Mar. 1	106·5	101·2	112·8	109·1	94·3	96·7
Relative weight of employment by economic areas as at Mar. 1, 1939	100·0	7·2	31·2	41·7	11·8	8·1

Note.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of employees reported in Canada by the firms making returns at the date under review.

ably with the reduction reported at that date in each of the last three years. The index, at 96·7, was fractionally higher than at March 1, 1938, when it had stood at 96·2; the 1,075 firms then furnishing statistics had employed 81,831 workers.

Index numbers of employment by economic areas are given in Table 1.

Employment by Cities

Employment decreased slightly in five of the eight cities for which separate tabulations are made, Montreal, Toronto, Windsor, Winnipeg and Vancouver showing curtailment, while the tendency in Quebec City, Ottawa and Hamilton was upward. The indexes in Montreal, Quebec, Ottawa and Vancouver were higher than at March 1, 1938, but in Toronto, Hamilton, Windsor and Winnipeg employment was not so active; the change in Toronto over the year was very slight.

Montreal.—Reductions in staffs were reported, on the whole, in Montreal. There was improvement in manufacturing (chiefly in leather, textile and iron and steel factories), and transportation was also brisker. On the other hand, road work and trade showed curtailment. Statements were tabulated from 1,652 firms employing 156,380 workers, as compared with 158,287 in the preceding month. For March 1 of last year, 1,434 employers had reported 148,149 men and women on their staffs; the index then had been lower, standing at 98·5, as compared with 101·4 at the latest date.

Quebec.—Manufacturing afforded more employment, mainly in the leather and textile groups, while transportation also showed improvement. Construction, trade and services, however, were quieter. The working forces of the 205 co-operating establishments totalled 16,478 persons, compared with 16,361 at February 1, 1939. The index was much higher than at the same date in 1938, when a rather larger advance had been indicated; statements were then tabulated from 178 firms with 13,320 workers.

Toronto.—Activity increased moderately in manufacturing in Toronto, the largest gains being in the textile, vegetable food and iron and steel groups, while there was a decline in animal food and printing and paper factories. Transportation, construction, services and trade also released employees. Returns were received from 1,692 firms, employing 133,514 men and women at the beginning of March, as compared with 134,048 at February 1. The index, standing at 105·3, was fractionally lower than that of 105·6 at March 1, 1938, when a similar falling-off had been reported by the 1,576 employers making returns, whose staffs aggregated 131,464.

Ottawa.—Employment in Ottawa showed improvement; manufacturing and transportation were rather slacker, and work on the roads increased, while little general change was recorded in other industries. The 223 co-operating establishments reported a total payroll of 14,277 persons at the date under review, as compared with 13,985 at February 1. The index was several points higher than at the beginning of March, 1938, when a downward tendency had been indicated by the 202 firms whose data were tabulated, and who then employed 13,222 men and women.

Hamilton.—Some recovery was noted in Hamilton, mainly in construction and manufacturing; in the latter, the greatest gains were in the non-ferrous metal and clay, glass and stone industries. Trade, on the other hand, was rather slacker. An aggregate staff of 31,396 was reported by the 315 concerns whose returns were tabulated, and who employed 31,209 in their last report. A reduction had been recorded at the same date of last year, but the level of employment then was higher, the index standing at 106·1, as compared with 97·4 at March 1, 1939. For the beginning of March, 1938, 296 employers had made returns showing 34,216 persons on their paylists.

Windsor.—The trend was downward in Windsor, there being a falling-off in the iron and steel division of manufacturing, while trade and construction also released some employees. Data were received from 190 establishments, with 19,119 workers, or 195 fewer than at February 1. Employment was quieter than at the same date of last year, when a decrease had also been recorded; the 183 firms whose statistics were received for March 1, 1938, had a staff of 20,912.

Winnipeg.—Reduced activity was noted in Winnipeg, where 511 concerns reported 38,325 persons in their employ, as against 38,592 in the preceding month. There was a decline in manufacturing, principally in iron and steel and printing and publishing works; construction, however, was slightly more active, while other industries showed little general change. Employment was in slightly smaller volume than at March 1 of last year, although a moderate gain had then been registered by the 486 co-operating employers whose personnel had included 38,642 men and women.

Vancouver.—Manufacturing recorded some improvement in Vancouver, and construction and services were rather more active; transportation and trade, however, showed curtailment. On the whole, there was a decrease of 115 persons in the payrolls of the 484 co-operating firms, who had 34,700 employees. A larger contraction had been indicated at the same date of a year ago, when 460 employers had

reported 33,780 workers; the index was then some two points lower than that of 106·4 at the latest date.

Employment by Industries

Manufacturing.—The trend in this group was again favourable; although the increase was rather smaller than usual for the time of year, it was decidedly larger than that reported at March 1, 1938. Statistics for the date under review were furnished by 6,265 manufacturers having 546,268 operatives, as compared with 541,129 at the beginning of February. The most pronounced recovery took place in leather, lumber and textile factories, but improvement was also shown in fur, pulp and paper, rubber, tobacco, iron and steel and non-ferrous metal products. On the other hand, activity declined in food, musical instrument, chemical, electrical apparatus and electric light and power plants.

Table II.—Index Numbers of Employment by Industries (Average 1926=100)

Industries	[1]Relative Weight	Mar. 1 1939	Feb. 1 1939	Mar. 1 1938	Mar. 1 1937	Mar. 1 1936	Mar. 1 1935	Mar. 1 1934

[1] For explanation of term "Relative Weight", see footnote to Table 1.

The crude index in manufacturing rose from 106·0 at February 1, 1939, to 107·0 at the date under review, as compared with 110·5 at March 1, 1938, and 107·6 at March 1, 1937. As already mentioned, the gain at the latest date was not so large as usual in the experience of past years; the seasonally-adjusted index therefore declined slightly, falling from 110·0 in the preceding month to 109·3 at the beginning of March.

The following are the unadjusted index numbers at March 1 in the years since 1926: 1939, 107·0; 1938, 110·5; 1937, 107·6; 1936, 99·5; 1935, 92·7; 1934, 86·5; 1933, 75·8; 1932, 87·0; 1931, 97·6; 1930, 110·9; 1929, 115·7; 1928, 104·7 and 1927, 99·8.

A review of the data for March 1, 1938, shows that returns had then been received from 6,019 manufacturers, whose staffs had aggregated 561,906, compared with 560,949 in the preceding month. The index then was 3½ points higher than at the beginning of March of the present year.

Animal Products—Edible.—Employment in these industries showed a further decrease, mainly in meat-packing plants. The index number stood at 119·6, the same as at March 1, 1938; the curtailment then noted had been on a similar scale. The working forces of the 304 reporting establishments aggregated 23,129 persons, as compared with 23,639 at February 1, 1939.

Leather and Products.—There was a considerable advance in employment in this division at the beginning of March, according to statistics from 315 manufacturers, whose payrolls included 22,881 men and women, compared with 21,957 in the preceding month. The gains occurred mainly in footwear and clothing factories in Quebec and Ontario. An increase of much the same size had been noted in the leather industries at the corresponding date a year ago, and the index number then was lower than at March 1, 1939.

Lumber and Products.—The trend continued favourable in the lumber group; statements were tabulated from 902 employers, whose staffs totalled 38,683 workers, compared with 37,142 at February 1. Improvement was indicated in Quebec, Ontario and the Western Provinces, that in Quebec being most pronounced. Employment was in rather less volume than at March 1, 1938, although the advance then reported had provided work for a smaller number of additional employees.

Plant Products—Edible.—A decline was recorded in the edible plant products group, chiefly in fruit and vegetable preserving, while, geographically, the greatest curtailment was in Nova Scotia, Quebec and Ontario. The firms making returns to the Dominion Bureau of Statistics, 517 in number, had 31,659 persons in their employ, or 266 fewer than at the beginning of February. A larger loss had been indicated at the beginning of March last year, when the index number stood at 103·1, compared with 104·2 at the date under review.

Pulp and Paper Products.—Employment in this division showed considerable improvement, chiefly in pulp and paper mills, while printing and publishing houses were slacker; the largest gains were in New Brunswick and British Columbia. A combined working force of 64,914 was recorded by 697 co-operating manufacturers, who had 64,150 employees at February 1. The index was slightly higher than at March 1, 1938, when a marked reduction, on the whole, had been reported.

Rubber Products.—The movement was favourable in the rubber industries; 54 factories reported 12,953 workers, as compared with 12,755 in their last return. The index number, at 103·6, was a few points higher than at March 1, 1938, a decrease having then been indicated.

Textile Products.—Heightened activity was registered in this group, chiefly in garment and personal furnishings, headwear and hosiery and knitting factories. On the other hand, silk mills released some employees. The level of employment was lower than at March 1, 1938, despite the fact that the gains then occurring had been on a smaller scale. The payrolls of the 1,152 co-operating establishments included 103,982 men and women, as compared with 101,930 at February 1, 1939. Most of the improvement was in Quebec and Ontario.

Tobacco.—Additions to staffs were noted at March 1 in tobacco works, 45 of which reported 13,510 employees, compared with 13,211 at February 1. The index, standing at 163·8, was higher by nearly 14 points than at the same date of a year ago; a decline had then been noted.

Beverages.—Little general change was shown in beverage manufacturing at March 1, when 26 extra persons were reported on the payrolls of the 141 co-operating plants, whose employees numbered 8,479. The index was several points higher than at the same date last year. The tendency had then been unfavourable.

Chemical Products.—Statistics tabulated from 295 chemical factories showed that they employed 17,827 persons, compared with 17,998 in the preceding month. Employment in this division was not quite so brisk as at March 1 of a year ago, when improvement had been recorded.

Clay, Glass and Stone Products.—There was a small advance in the building material industries, in which employment was at a lower level than at the corresponding date in

1938. Statements were compiled from 211 manufacturers with 7,969 employees, as against 7,883 in the preceding month.

Electric Light and Power.—Activity in plants producing electric power showed a moderate recession, according to the 99 co-operating establishments, which employed 15,683 workers, compared with 15,849 at February 1. Most of the falling-off took place in Quebec and the Maritime Provinces, while improvement was recorded in British Columbia. The Dominion index number, at 123·9, was higher than that of 116·0 at March 1, 1938, when a similar loss had been noted.

Electrical Apparatus.—Employment in electrical appliances was slower than in the preceding month; 126 factories reported 16,779 men and women on their pay-rolls, or 239 fewer than at February 1. Curtailment had also been indicated at the beginning of March of last year, but the index number then was some eighteen points higher.

Iron and Steel Products.—Continued, but much smaller advances were made in the iron and steel industry, in which employment was in less volume than in the late winter of 1938. There were gains in the automobile and other land vehicle, steel shipbuilding and repairing, heating appliance and machinery divisions, while the crude, rolled and forged, structural iron and steel and some other branches were slacker. Returns were tabulated from 915 establishments having 123,760 persons in their employ, or 377 more than in the preceding month.

Non-Ferrous Metal Products.—Smelters and refineries released employees, but the precious and the base metal manufacturing industries showed moderately heightened activity; 185 firms had 24,023 workers on their pay-rolls, as against 23,811 at the beginning of February. There were additions to staffs in Quebec and Ontario. The index of employment was fractionally below that of March 1, 1938, although a contraction had then been indicated.

Mineral Products, n.e.s.—Statistics tabulated from 100 employers in this group showed a slight falling-off in their forces, which aggregated 11,822. Little general change had been recorded at the corresponding date a year ago, when the index number was somewhat higher.

Logging

There were marked seasonal contractions in logging camps, in many of which the season's operations were approaching completion; 414 firms had 31,533 men in their employ, or 9,889 fewer than in their last report. The decline did not involve so many workers as that recorded at the beginning of March a year ago, but the index then was many points higher than at March 1, 1939.

Mining

Coal.—Employment in the mining of coal showed little change on the whole, there being slight gains in the Maritimes and small declines in the Western coal-fields. One hundred and five operators lowered their labour forces from 25,536 persons at February 1, to 25,499 at the beginning of March, 1939. A larger loss in personnel had been indicated at March 1, 1938; the index number then, however, was fractionally higher.

Metallic Ores.—There was moderate improvement in the situation in this group at the date under review. Data were received from 233 mines employing 41,085 workers, as against 40,930 at the beginning of February. The index stood at 334·6, as compared with 307·4 at March 1, 1938, when a small reduction had been noted.

Non-Metallic Minerals (Other than Coal).—Employment in these industries showed an upward movement, according to statistics from 99 firms having 7,873 persons on their pay-rolls, 65 more than in the preceding month. A rather larger gain had been indicated at March 1 of a year ago; the index then was slightly lower.

Communications

A decline was indicated in the staffs of telephone and telegraph companies; returns were received from 86 employers with 21,590 workers, compared with 21,679 in the preceding month. Although a greater decrease had occurred at March 1, 1938, employment was then at a somewhat higher level.

Transportation

Street Railways and Cartage.—Statistics were tabulated from 273 firms in this division, whose personnel included 27,372 men and women, as compared with 27,322 at the beginning of February. A small loss had been shown at the same date in 1938, when employment was rather quieter.

Steam Railways.—A considerable increase was registered in steam railway operation, in which 807 more workers were employed than in the preceding month; 100 co-operating companies and divisional superintendents reported 57,769 persons on their pay-rolls. A falling-off had been indicated at March 1 of last year, when the index number was slightly higher. Curtailment was noted at the date under review in Ontario, but improvement was indicated in Quebec, while little general change was recorded in the other provinces.

Shipping and Stevedoring.—There was a gain in the shipping and stevedoring group, in which employment was rather brisker than at the corresponding date in 1938. For March 1, 1939, 121 employers reported a staff of 11,947, or 210 more than in the preceding month.

Construction and Maintenance

Building.—A moderate contraction was noted in building activity at the beginning of March, the largest loss being in Quebec. The 810 contractors furnishing data throughout the Dominion had 18,166 employees, as against 18,543 at February 1. The level of employment was slightly lower than in the late winter of 1938, although a much greater decline had then taken place.

Highway.—Highway construction showed improvement at March 1, 1939, when 367 employers reported 67,587 workers, as compared with 65,916 at the beginning of February. Gains were indicated in Ontario and the Maritime Provinces, but there were reductions in Quebec and British Columbia. Employment in this group at March 1, 1938, was not so active as at the date under review, the increase from the preceding month then reported having been on a smaller scale.

Railway.—Employment on steam railway construction and maintenance considerably increased, according to data received from 34 companies and divisional superintendents employing 27,557 persons, or 4,663 more than in their last report. Heightened activity was recorded in all five economic areas; the gains were partly due to snow-clearing operations. A smaller advance had been noted at the beginning of March of last winter, and the index then was nearly five points lower.

Services

In the service group, 580 establishments reported a staff of 28,203, as compared with 28,407 at February 1. Most of the falling-off in employment was in laundries and dry-cleaning establishments. Activity generally was slightly greater than in the same month of 1938. A rather greater decrease had then been indicated.

Trade

Retail trade showed a substantial decline, while the tendency was also downward in wholesale establishments; the curtailment in the former was seasonal. On the whole, there was a reduction of 1,937 in the personnel of the 1,822 firms furnishing data in the trade group, who had 115,397 employees. The index stood at 128·9 at March 1, 1939, compared with 126·0 at the beginning of March, 1938, when a contraction had also been recorded in the group as a whole.

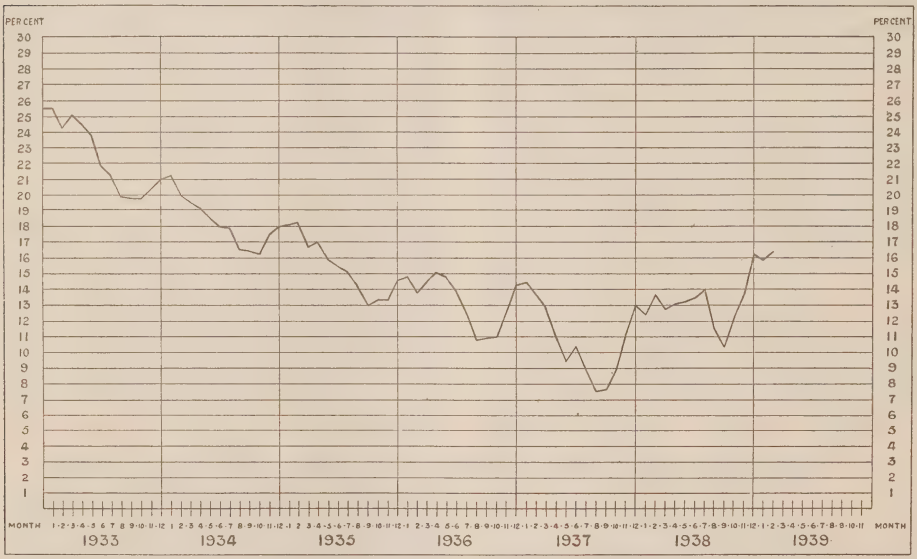
Tables

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "relative weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date under review.

(2) Unemployment in Trade Unions at the Close of February, 1939

The term unemployment as used in the accompanying article has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades or who are idle due to illness are not considered as unemployed, while unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

The level of unemployment among local trade union members at the close of February varied but slightly from the preceding month, though the tendency was towards retarded activity, as apparent from the reports forwarded by 1,967 labour organizations embracing a membership of 252,099 persons. Of these, 41,410 were out of work on the last day of the month, a percentage of 16·4 as compared with 15·9 per cent of idleness in January. Prevailing conditions were also somewhat less favourable than in February last year, when unemployment stood at 13·7 per cent. In Manitoba moderate improvement in the situation was noted during February from January, the garment trades and steam railway division accounting in large measure for this better employment movement, and in British Columbia and New Brunswick minor gains occurred. On the contrary, Alberta members reported the most noteworthy recessions in activity, which were almost entirely confined to the coal mining districts. In the remaining provinces there was but a slight lowering in the volume of work afforded. When contrasted with the returns for February, 1938, Nova Scotia, New Brunswick and Alberta unions all recorded rather important losses in available employment during the month reviewed and in Ontario and Saskatchewan curtailment of a



somewhat lesser degree was manifest. The trend was also adverse in Quebec and Manitoba, though the changes from February, 1938, were small. British Columbia unions alone showed a better volume of employment, the gains registered, however, being merely nominal.

A separate compilation is made each month of unemployment affecting local trade union members in the largest city in each province, with the exception of Prince Edward Island. Winnipeg and Saint John unions indicated heightened activity on a moderate scale during February from the previous month and in Vancouver lesser increases were noted. Employment in Montreal also tended upward, though the change from January was but fractional. Some falling off in employment, however, was manifest by Edmonton unions and a less favourable situation prevailed for Halifax, Toronto and Regina members. Vancouver unions were the only ones to register a higher level of employment than in February a year ago, while of the recessions indicated in the remaining cities those reflected by Edmonton and Halifax were the most pronounced. Contractions in employment of minor importance were evident among Saint John, Montreal, Toronto and Winnipeg unions. In Regina the variation from February last year was very slight, though in an unfavourable direction.

Appearing with this article is a chart which shows the course of unemployment by months from January, 1933, to date. The curve at the close of February showed little change in level from the preceding month, though the tendency was upward, an evidence of decreasing employment. In this movement the curve paralleled the course of February a year ago, when the trend was also less favourable, but the point reached at the close of the month reviewed remained somewhat above that of February, 1938.

The manufacturing industries, with 578 local unions reporting for February and involving a total of 99,353 members, showed that 14,171 or a percentage of 14·3 were idle on the last day of the month, in comparison with a percentage of 14·0 in both the preceding month and February last year. Fluctuations, however, occurred in the various trades and industries. Glass workers registered marked gains in employment from January and conditions for garment workers, and meat cutters and butchers were considerably improved. Employment advancement on a smaller scale was apparent among brewery, and hat, cap and glove workers, general labourers and printing tradesmen. Of the contractions in employment which were of a slightly more than offsetting nature, the most important were registered by fur and wood workers, and papermakers. Jewellery, and textile and carpet workers showed more moderate losses in employment and the situation declined slightly for bakers and confectioners, metal polishers, iron and steel, cigar and tobacco, and leather workers, and mill and smelter men. Compared with the returns for February, 1938,

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

hat, cap and glove, and wood workers, and general labourers were much busier during the period surveyed and substantial increases in employment were evident among meat cutters and butchers and leather workers. Activity in the garment trades and among paper makers, printing tradesmen, bakers and confectioners, and cigar and tobacco workers also tended favourably, though the variations from February a year ago were slight. A distinctly unfavourable situation, however, prevailed for glass workers but the losses suffered in the iron and steel trades involved the greatest number of members. Conditions for jewellery and brewery workers were considerably quieter than in February last year and among textile and carpet workers, and metal polishers activity was moderately restricted. Minor declines in work available were reported by fur workers and mill and smelter men.

The situation in the coal mining industry during February was less favourable than in either the preceding month or February a year ago, according to the returns compiled from 60 local unions with an aggregate of 22,157 members. Of these, 2,312 or a percentage of 10·4 were without employment on the last day of the month, in comparison with percentages of 8·0 in January and 5·4 in February last year. Alberta members, due largely to seasonal slackness, showed pronounced slowing up in employment from January and in Nova Scotia slight losses were recorded. British Columbia members, however, indicated noteworthy improvement in conditions. When a comparison is made with the returns for February, 1938, Alberta members, as in the previous comparison, were considerably less active during the month reviewed, and more moderate contractions were evident among Nova Scotia and British Columbia miners. In addition to the members reported as entirely out of employment, a number were shown as working at greatly reduced time.

Continuing the unfavourable movement of the past few months in building and construction operations employment in these trades showed some slight falling off in February, the 220 reporting unions with 28,729 members indicating 44·6 per cent of inactivity at the end of the month, contrasted with a percentage of 43·8 in January. Decided increases in slackness were registered by electrical workers and granite and stonecutters from January and activity for carpenters and joiners was moderately retarded. Recessions, on a small scale, were shown by steam shovelmen, painters, decorators and paperhangers, and bridge and structural iron workers. The situation for tile layers, lathers and roofers, plumbers and steamfitters, and hod carriers and building labourers, was, on the contrary, considerably better than in January and improvement of much lesser degree was manifest by bricklayers, masons and plasterers. Unemployment in the building trades, as a whole, was also at a higher level than in February, 1938, when 42·5 per cent of idleness was recorded. In this comparison conditions were much more depressed during the period under review for steam shovelmen, bridge and structural iron workers, granite and stonecutters, hod carriers and building labourers, painters, decorators and paperhangers and electrical workers. Activity for carpenters and joiners was also somewhat curtailed. Bricklayers, masons and plasterers, however, showed a substantially improved situation and noteworthy gains were recorded by tile layers, lathers and roofers. Employment advances on a smaller scale were manifest by plumbers and steamfitters.

From unions in the transportation industries 838 reports were received at the end of February, covering a membership of 66,565

persons, 8,767 or 13·2 per cent of whom were idle, compared with 12·9 per cent in January and 9·0 per cent in February last year. Steam railway employees, whose returns constituted over 77 per cent of the entire group membership reported, were afforded a slightly better employment volume than in January, though conditions for these workers were less favourable than in February last year. Among street and electric railway employees the tendency was upward, the same degree of improvement being shown in each comparison. Navigation workers, on the other hand, suffered losses in employment in substantial measure, more especially when compared with the returns for February a year ago, and among teamsters and chauffeurs some slowing up in employment was apparent both when contrasted with the January reports and those of February, 1938.

Retail shop clerks, with 4 unions comprising a membership of 1,840 persons, at the end of February indicated that only 6 or a percentage of 0·3 were unemployed, in contrast with 0·2 per cent in January and a fully engaged situation in February last year.

Little variation in conditions was reflected among civic employees during February from either the preceding month or February, 1938, the 80 locals making returns with 10,370 members showing that 155 or a percentage of 1·5 were out of work, as compared with 1·1 per cent in January and 1·7 per cent in February a year ago.

Slight improvement was manifest in the miscellaneous group of trades during February as shown by the reports compiled from 145 local unions with an aggregate of 11,830 members. Of these, 1,248 or a percentage of 10·5 were idle at the end of the month, compared with 11·1 per cent in January. The unemployment percentage, however, exceeded that of February, 1938, when 7·8 per cent of the members reported were idle. Barbers indicated a considerably better volume of work during February than in the previous month and slight gains were noted by hotel and restaurant employees, and unclassified workers. Activity for theatre and stage employees was, however, moderately curtailed and among stationary engineers and firemen the trend was toward reduced employment. Contrasted with the returns for February, 1938, hotel and restaurant, and theatre and stage employees, barbers and stationary engineers and firemen all showed a more favourable tendency during the month under review, though the variations were quite small. Extensive losses in employment, however, were evident among unclassified workers.

Fishermen registered a slight increase in employment during February from the previous month and a much improved situation from February last year. This was apparent from the reports furnished by 8 unions during February, involving a membership of 2,050 persons, 282 or 13·8 per cent of whom were unemployed on the last day of the month, in contrast with a percentage of 14·7 in January and with 38·4 per cent of inactivity in February last year.

The percentage of idleness for lumber workers and loggers stood at 55·6 at the close of February as compared with percentages of 60·3 in January and 4·7 in February, 1938. The February percentage this year was based on the reports tabulated from 4 unions of these workers with a membership numbering 1,820 persons.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1929 to 1938, inclusive, and also the percentages of unemployment by provinces for February of each year from 1929 to 1936, inclusive, and for each month from February, 1937, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

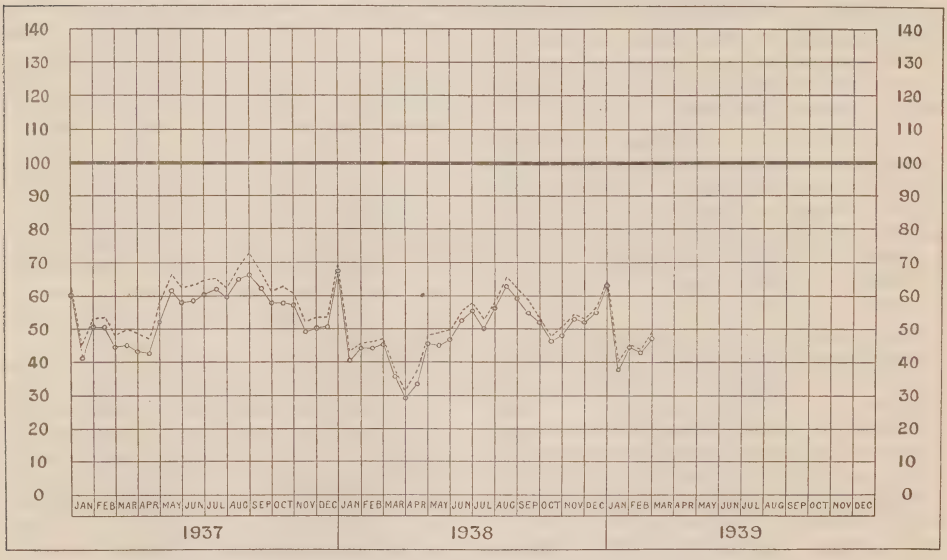
(3) Employment Office Reports for February, 1939

The volume of business transacted by the offices of the Employment Service of Canada during the month of February, 1939, as indicated by the average daily placements effected, showed a decline of 13 per cent from that of the preceding month, but a gain of 18 per cent over that of February a year ago. From January, a heavy loss was reported in farming, a more moderate one in services and a minor decline in manufacturing, but the total decrease shown in these three divisions much more than counterbalanced the nominal gains recorded in all remaining groups. In comparison with February a year ago, increases were registered in construction and maintenance, services, trade, mining and transportation, that in construction and maintenance being very substantial, but logging recorded a marked decline, followed by others of smaller proportions in manufacturing and farming.

The accompanying chart shows the trend of employment from January, 1937, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be noted from the graph that the curves of vacancies and placements in relation to applications showed little variation in the first half of February, being slightly downward in trend, but during the

latter half of the month under review both curves followed a decidedly upward course and at the close of the period had reached levels about 2 points above those recorded at the end of February a year ago. The ratio of vacancies to each 100 applications was 44·1 during the first half and 49·5 during the second half of February, 1939, in comparison with the ratios of 46·2 and 47·2 during the corresponding periods of 1938. The ratios of placements to each 100 applications during the periods under review were 42·9 and 47·3, as compared with 44·2 and 45·3 during the corresponding month of 1938.

The average number of vacancies reported daily by employers to the offices of the Employment Service throughout Canada during February, 1939, was 1,159, as compared with 1,334 during the preceding month and with 991 in February a year ago.



The average number of applications for employment received daily by the offices during the month under review was 2,485, as compared with 3,126 in January, 1939, and with 2,121 during February last year.

The average number of placements made daily by offices of the Service during February, 1939, was 1,119, of which 580 were in regular employment and 539 in work of one week's duration or less, as compared with a total daily average of 1,286 during the preceding month. Placements for February a year ago averaged 949 daily, consisting of 636 placements in regular and 313 in casual employment.

During the month of February, 1939, the offices of the Service referred 28,284 persons to vacancies and effected a total of 26,834 placements. Of these, the placements in regular employment were 13,910, of which 9,800 were of men and 4,110 of women, while placements in casual work numbered 12,924. The number of vacancies reported by employers was 19,639 for men and 8,177 for women, a total of 27,816, while applications for work numbered 59,631, of which 44,554 were from men and 15,077 from women. Reports for January, 1939, showed 33,349 positions available, 78,133 applications made and 32,132 placements effected, while in February, 1938, there were recorded 23,767 vacancies, 50,894 applications for work and 22,776 placements in regular and casual employment.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements—o—o—o—o—o—o

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1929, to date:

Year	Placements		
	Regular	Casual	Totals
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939 (2 months)	33,337	25,629	58,966

Nova Scotia

During February, orders received at employment offices in Nova Scotia called for over 11 per cent fewer workers than in the preceding month, but nearly 31 per cent more than during the corresponding month of last year. There was a decrease in placements of 11 per cent when compared with January, but an increase of nearly 30 per cent when compared with February, 1938. The increase in placements over February of last year was largely made up of gains in services and construction and maintenance, as the changes in all other groups were quite small. Placements by industrial divisions included logging 50; construction and maintenance 271 and services 490, of which 412 were of household workers. There were 88 men and 135 women placed in regular employment.

New Brunswick

There was a decrease of over 5 per cent in the number of positions offered through employment offices in New Brunswick during February when compared with the preceding month, but an increase of nearly 22 per cent in comparison with the corresponding month of last year. Placements were 4 per cent less than in January, but over 20 per cent above February, 1938. The increase over February of last year was due to a gain in the highway division of construction and maintenance, made up largely of snow shovellers, as a small increase in services was offset by declines in manufacturing and logging. The changes in other groups were nominal only. Placements under construction and maintenance numbered 351 and in services 524. Of the latter, 428 were of household workers. During the month 14 men and 87 women were placed in regular employment.

Quebec

Opportunities for employment, as indicated by orders received at employment offices in the Province of Quebec during February, were nearly 19 per cent less favourable than in the preceding month and nearly 14 per cent below the corresponding month of last year. There was a decrease also in placements of nearly 19 per cent when compared with January and of nearly 16 per cent in comparison with February, 1938. The most important decline in placements from February of last year was in construction and maintenance, although small losses were also reported in manufacturing, trade and farming. All other groups showed improvement, but none of the gains were important, the largest being in services. Industrial divisions in which most of the placements were effected during the month were manufacturing, 78; logging, 356; construction and maintenance 2,043 and services 2,348, of which 2,160 were of household workers. Placements in regular employment numbered 2,056 of men and 1,467 of women.

Ontario

Orders received at employment offices in Ontario during February called for over 8 per cent more workers than in the preceding month and nearly 66 per cent more than during the corresponding month of last year. There was an increase also in placements of nearly 9 per cent when compared with January and of nearly 71 per cent in comparison with February, 1938. The substantial increase in placements over February of last year was largely due to casual employment, removing snow from the streets and roads. Moderate gains were also reported in services and trade, but there were fairly large reductions under logging and manufacturing. Placements by industrial divisions included manufacturing 344; logging 380; farming 524; transportation 90; construction and maintenance 5,682; trade 300 and services 2,962, of which 2,002 were of household workers. There were 3,384 men and 1,260 women placed in regular employment.

Manitoba

There was a decline of 60 per cent in the number of positions offered through employment offices in Manitoba during February, when compared with the preceding month and of nearly 35 per cent in comparison with the corresponding month of last year. Slightly higher percentages of loss were reported in placements under both comparisons. With the exception of a small increase in trade, fewer placements were made in all other industrial divisions than during February, 1938, the largest declines being in farming, logging, services and construction and maintenance. Industrial divisions in which most of the placements were effected during the month were logging 114; farming 800; construction and maintenance 123 and services 624, of which 530 were of household workers. There were 1,047 men and 302 women placed in regular employment.

Saskatchewan

The demand for workers, as indicated by orders received at employment offices in Saskatchewan during February, was nearly 63 per cent less than in the preceding month, but nearly 78 per cent above the corresponding month of last year. There was a decrease of 63 per cent in placements when compared with January but an increase of over 83 per cent in comparison with February, 1938. A substantial increase in farm placements accounted for the gain over February of last year, although

there was also a fairly large increase in services. Small losses were reported in construction and maintenance and trade, but the changes in other groups were nominal only. Placements in farming numbered 742 and in services 594, of which 437 were of household workers. Placements in regular employment numbered 743 of men and 390 of women.

Alberta

There was a decline of nearly 37 per cent in the number of positions offered through employment offices in Alberta during February when compared with the preceding month and of nearly 10 per cent in comparison with the corresponding month of last year. There was a decrease also in placements of nearly 38 per cent in comparison with January and of over 14 per cent in comparison with February, 1938. Moderate losses in farming, construction and maintenance, logging and mining accounted for the decrease in placements from February of last year, although small declines were reported in nearly all other groups. Industrial divisions in which most of the placements were effected during the month were manufacturing 47; logging 130; farming 490; construction and maintenance 123 and services 360, of which 300 were of household workers. Placements in regular employment numbered 753 of men and 268 of women.

British Columbia

Employment opportunities, as indicated by orders received at employment offices in British Columbia during February, were 19 per cent better than in the preceding month and nearly 18 per cent above the corresponding month of last year. Similar percentages of gain were reported in placements under both comparisons. A substantial gain under construction and maintenance was responsible for the increase in placements over February, 1938, but was largely offset by a decline in logging. Of the changes in other groups, the most important was an increase in services. Placements by industrial divisions included logging 1,102; farming 82; construction and maintenance 3,618 and services 596, of which 388 were of household workers. During the month 1,715 men and 201 women were placed in regular employment.

Movement of Labour

During the month of February, 1938, the offices of the Employment Service of Canada made 13,910 placements in regular employment, 7,599 of which were of persons for whom employment was found outside the immediate vicinity of the offices at which they were registered. Of the latter, 212 were granted the Employment Service reduced transportation rate, 206 going to centres within the same province as the despatching office and 6 to other provinces. The reduced transportation rate, which is 2·5 cents per mile, with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may wish to travel to distant employment for which no workers are available locally.

In Quebec during February one certificate was issued at the Quebec City office to a plumber bound for Chicoutimi. Profiting by the Employment Service reduced transportation rate in Ontario during February 164 persons travelled to situations within the province. From Port Arthur 47 bush workers, 33 highway construction workers, 3 mine workers, 3 survey employees and one fisherman, and from Fort William 21 bush workers proceeded to centres within their respective zones. At Sudbury 12 bush workers secured certificates for transportation to Port Arthur and 3 bush workers to points in the Sudbury zone. Destined to the Sudbury zone, also, were 35 bushmen sent from North Bay. The Pembroke office despatched 2 highway construction workers to Timmins and one highway construction worker to North Bay. The Kenora zone received 2 mine workers from Timmins and the Oshawa zone one farm hand from Toronto. Manitoba transfers at the reduced rate during February were 9 in number, 3 provincial and 6 interprovincial. All of these were effected by the Winnipeg office which was instrumental in despatching one miner, one bushman and one farm hand within its own zone, while of the workers going outside the province 2 miners, 2 highway construction workers, and one hotel general were bound for Port Arthur and one farm hand for Estevan. On certificates received at Saskatchewan offices during February, one teacher travelled from Regina to a situation within the territory covered by that city office, and one farm domestic from Saskatoon to Yorkton. The labour movement in Alberta during February involved the issue of 34 reduced rate certificates to provincial centres. These were granted at the Edmonton office which transferred 14 bush workers, 5 transportation company employees, 5 fishermen, 3 farm hands, 3 hotel workers, 2 housekeepers, one miner and one saw mill worker to employment within its own zone. Two persons benfited by the Employment Service reduced transportation rate in British Columbia during February, one a miner shipped from Prince Rupert

and the other a companion help sent from Vancouver to situations within their respective zones.

Of the 212 persons who were carried at the Employment Service reduced transportation rate during February 170 travelled by the Canadian National Railways, 39 by the Canadian Pacific Railway, 2 by the Temiskaming and Northern Ontario Railway, and one by the Pacific Great Eastern Railway.

(4) Building Permits Issued in Canada During February, 1939

The value of the building represented by the permits issued by 58 cities stood at $1,894,161 in February, 1939; this was an increase of $187,531 or 11·1 per cent over the total of $1,706,630 for the preceding month, but a decrease of $470,241 or 19·9 per cent in comparison with February of last year, when the authorized building in these cities was estimated to cost $2,364,402.

Some 50 cities furnished detailed statistics, showing that they had granted more than 200 permits for dwellings valued at over $700,000, and more than 800 permits for other buildings, estimated to cost in excess of $850,000. In January, authority was given for the erection of some 160 dwellings and 900 other buildings, whose value was estimated at approximately $600,000 and $1,000,000 respectively.

New Brunswick, Quebec, Ontario, Manitoba and British Columbia reported increases in the value of the building represented by the permits issued as compared with January, 1939; the greatest gain, of $182,140, or 78·2 per cent, took place in Quebec. In Nova Scotia, Saskatchewan and Alberta there were declines in this comparison, that of $47,928 or 48·1 per cent in Nova Scotia being largest; Prince Edward Island reported no building authorizations during February.

As compared with February, 1938, New Brunswick, Quebec and Saskatchewan recorded moderate increases. The remaining provinces showed a falling-off in the value of the building authorized; the most noteworthy decrease in this comparison was that of $398,652 or 36·5 per cent in Ontario.

Of the four largest cities, Toronto and Vancouver reported increases in February in the estimated cost of the building work for which permits were taken out as compared with either January, 1939, or February, 1938, while in Montreal and Winnipeg there were gains over the preceding month, but losses as compared with the same month of last year.

Of the other centres, Sydney, Moncton, Quebec, Shawinigan Falls, Sherbrooke, Three Rivers, Brantford, Chatham, Fort William, Niagara Falls, Stratford, St. Thomas, Welland, Riverside, Moose Jaw and Calgary reported improvement over January, 1939, and also as compared with February, 1938.

The following table gives the value of the building authorized by 58 cities during February, and in the first two months of each year since 1920, as well as index numbers for the latter, base upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in January and February of the same years are also given (1926=100).

Year	Value of permits issued in February	Value of permits issued in first two months	Indexes of value of permits issued in first two months (1926=100)	Average indexes of wholesale prices of building materials in first two months (1926=100)
	$	$		
1939.....	1,894,161	3,600,791	30·4	87·3
1938.....	2,364,402	4,323,583	36·5	91·5
1937.....	2,138,886	3,860,753	32·6	90·1
1936.....	1,921,176	3,223,934	27·2	83·9
1935.....	3,601,637	4,484,515	37·8	81·8
1934.....	894,102	1,601,914	13·5	82·2
1933.....	925,894	2,111,856	17·8	75·2
1932.....	2,845,271	6,056,283	51·1	79·4
1931.....	6,395,659	14,797,115	124·8	83·8
1930.....	8,919,078	16,136,475	136·1	96·8
1929.....	10,465,330	18,882,210	159·2	99·6
1928.....	10,318,338	18,034,925	152·1	96·4
1927.....	7,638,176	13,314,713	112·3	97·1
1926.....	7,139,549	11,859,083	100·0	102·4

The aggregate for the first two months of 1939, was 16·7 per cent lower than in 1938, and was also lower than in 1937 or 1935; on the other hand, it was higher than in the first two months of 1936, 1934 or 1933. The index numbers of wholesale prices of building materials have recently been lower than in the same period of the preceding year, and in January and February were also lower than in the first two months of 1937, although they were higher than in preceding years since 1930.

The accompanying table gives the value of the building permits issued by 58 cities in January and February, 1939, and February, 1938. The 35 cities for which statistics are available since 1910 are marked thus "*".

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF MARCH, 1939

Reports of the Superintendents of the Employment Service

THE employment situation at the end of March, 1939, was reported by the superintendents of the Employment Service of Canada to be as follows:—

Farming in the Maritimes was limited to orchard pruning, hauling of fire-wood and routine work, but activity continued in pulp cutting and peeling in the logging industry. With more favourable weather, improvement was noted in fishing, although heavy fields of drift ice still hampered offshore work. Lobster fishermen were busy making extensive repairs to buildings, as well as repairing their nets and making new traps. Coal mines in the New Glasgow area operated from two to six days and those in Cape Breton and vicinity worked from three to five days. Manufacturing, in general, was quiet, but bread, cake and confectionery makers were preparing for Easter trade. Fertilizer plants and sawmills also were active and no idleness was reported from the iron and steel industry. Little new building construction was being started, but all work underway was progressing favourably. Highway construction likewise continued. Traffic by rail and water, both freight and passenger, was quite heavy, but bus travel only fair. Trade was somewhat dull. The usual demand existed for household workers, with an upward trend anticipated in casual work, as spring cleaning advanced.

Farming was quiet in the Province of Quebec, but logging showed activity. Mining was unchanged. In the manufacturing centres, reports showed that paper mills at Chicoutimi and leather concerns at Quebec City were operating at 50 per cent of their capacity; match factories at Hull were fairly busy, but employment at Matane, Rouyn and Val d'Or was rather slow; sugar refineries, flour mills and clothing shops at Montreal recorded improvement and silk and woollen mills at Sherbrooke were normal, but cottons recorded a marked decline. Iron and steel also re-

ported a contraction. Cold weather had affected building construction at many points, although at La Tuque, Montreal and Sherbrooke heightened activity had taken place. This was due largely to dam and power plant construction and repairs, alterations and building of homes. Trade was dull, but services normal.

Employment for farm workers in Ontario continued to show a small, but steady improvement, a number of orders having been booked for early in April. With cutting finished and the sleigh haul nearly completed, the majority of logging camps had closed, or were reducing their working crews. Some, however, were preparing for river driving. Mining was unchanged. The industrial situation was but little improved, as many of the firms were still working on a part time basis; however, indications pointed to an upward trend in some lines within a short period. With the approach of milder weather, the amount of building construction had gradually increased, although the continued cold and unusual depth of snow had delayed considerably the spring program, with the result that the majority of work, as yet, consisted chiefly of alterations and repairs. In highway construction, large layoffs were taking place, owing to the ending of Federal aid projects on March 31. Water transportation showed very little activity, other than that of repair work on boats and the outlook for an early opening of navigation seemed unfavourable. Trade was rather quiet. The demand for experienced household help remained steady and requests for casual help had improved slightly, but country vacancies were hard to fill.

Enquiries for men for spring work on farms in the Prairie Provinces were fairly active, with wages at comparable levels with those of last year, but logging was dull, there being little demand for workers, except for an occasional cord-wood cutter. Mining was very quiet, also manufacturing, and no building of major importance was underway, the chief activity in this section consisting of alterations and repairs. A few men also were placed with the Highway Department. Trade in many lines was slack, although implement dealers reported prospects good for spring sales. Requests for city domestics increased, and experienced maids were sought for farm homes, duties to begin about April 1.

A better demand for farm help was registered in British Columbia and all orders were easily filled, a number of applicants being those who had completed work on the relief forestry projects. Orchard pruning was finished, and growers were now spraying the trees. While most of the logging camps were operating, there were few calls for additional help and sash and door factories and sawmills were curtailing production. Mining, for the most part, was quiet, but where crews were being increased, there was sufficient local help available. Building was more active and highway construction continued. Improvement likewise was noted in the number of calls for casual labour, although a surplus of applicants was registered in all divisions. Activity was reported in the shipyard at Prince Rupert and waterfronts at all ports were busy. Trade was fair. An increase appeared in employers' orders for domestic service, with fewer women registered for work in that section.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

The British *Ministry of Labour Gazette*, March, 1939, summarized the employment situation as follows:—

There was a marked improvement in employment between January 16 and February 13. In outdoor industries employment in January had been restricted by severe weather, and the recovery in February was partly due to milder conditions; but there was also an improvement in many other industries. The improvement was most marked in building, public works contracting, agriculture and horticulture, and stone quarrying (in which industries employment at January 16 was adversely affected by bad weather), in the iron and steel industry, metal goods manufacture, engineering, and the textile, clothing, boot and shoe, and pottery industries. On the other hand, there was a decline in employment in coal mining in South Wales and Monmouthshire.

It is provisionally estimated that at February 13, 1939, the number of insured persons, aged 16-64, in employment in Great Britain was approximately 12,222,000. This was 143,000 more than at January 16, 1939, and on a comparable basis, 70,000 more than at February 14, 1938.

Among insured persons, aged 16-64, the percentage unemployed in Great Britain and Northern Ireland at February 13, 1939, was 13·2 compared with 14·1 at January 16, 1939. For February 14, 1938, the percentage (which

excludes the classes brought into insurance in April, 1938) was 12·8. For persons insured under the general scheme the corresponding percentages were 13·4 at February 13, 1939, 14·3 at January 16, 1939, and 13·1 at February 14, 1938. For persons within the agricultural scheme the percentages were 9·8, 11·1 and 8·4 respectively.

At February 13, 1939, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,538,512 wholly unemployed, 291,680 temporarily stopped, and 66,526 normally in casual employment, making a total of 1,896,718; this was 142,308 less than at January 16, 1939, but 86,297 more than at February 14, 1938.

The total of 1,896,718 persons on the registers in Great Britain at February 13, 1939, included 1,112,691 persons with claims admitted for insurance benefit, 564,334 with applications authorized for unemployment allowances, 41,070 persons with applications for insurance benefit or unemployment allowances under consideration, and 178,623 other persons, of whom 49,980 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at February 13, 1939, was 1,986,302, as compared with 2,133,809 at January 16, 1939, and 1,907,795 at February 14, 1938.

United States

In a report dated March 24, Miss Frances Perkins, Secretary of Labour, stated that employment in non-agricultural industries increased in February when approximately 45,000 workers were added to industrial payrolls. The report further indicated that at the February level, non-agricultural industries were employing about 100,000 more workers than a year ago. These figures did not include employment on Works Progress Administration and National Youth Administration projects, nor enrollees in the Civilian Conservation Corps.

The following paragraphs taken from the official press report indicate the employment situation in the United States to be as follows:—

Manufacturing employment increased somewhat less than seasonally from mid-January to mid-February. As compared with a year ago, factories were employing nearly 200,000 more workers. Aside from manufacturing, the principal gains in employment in February were on steam and electric railroads, in anthracite mines, and in hotels and insurance companies. Reductions in employment in wholesale and retail trade, in metal mines and quarries, in public utilities, and in some of the service industries, were due almost wholly to seasonal influences. In private building construction employment was well sustained, the reduction being the smallest in any February in the past seven years, with the exception of 1937. Employment on Public Works Administration and other Federal building projects, and on State roads was reduced slightly because of weather conditions, but was over 150,000 greater than last year at this time.

Factory employment in February stood at 90·7 per cent of the 1923-25 average, a gain of 1·3 per cent, or 96,000 wage earners, since January. This represents an increase of 2·8 per cent, or 200,000 wage earners, since February of last year. The index of factory pay rolls, at 85·3 per cent of the 1923-1925 average, was 2·5 per cent higher than in January and 10·9 per cent above February, 1938. The gains in weekly wage disbursements from January to February amounted to nearly $3,900,000 a week, and from a year ago to nearly $16,000,000 a week.

Gains in manufacturing employment were quite general. Of the 87 manufacturing industries surveyed monthly by the Bureau of Labor Statistics, 62 showed gains in number of workers and 63 had larger weekly pay rolls. The gains were about evenly divided between the industries manufacturing durable and non-durable goods. The durable goods group, as a whole, showed an increase of 1·2 per cent in employment and 2·5 per cent in pay rolls. The non-durable goods group reported a somewhat smaller than seasonal gain of 1·4 per cent in employment and a 2·4 per cent increase in pay rolls.

Among the manufacturing industries which added large numbers of workers to their rolls were women's clothing (14,800), men's clothing (14,000), shoes (9,500), knit goods (7,100), foundries and machine shops (5,900), cigars and cigarettes (4,800), stoves (4,600), furniture (4,200), agricultural implements (4,000), and cotton goods (4,000). Industries in which the increases ranged from 2,500 to 3,500 were shipbuilding, electrical machinery, shirts and collars, millinery, men's furnishings, electric and steam-railroad car building, and iron and steel. Employment in the manufacture of aircraft was at the highest level since August, 1937, and pay rolls reached an all-time high. In shipbuilding, more men were employed than at any time since December, 1937, and the machine tool industry reported the sixth consecutive monthly gain, with the largest number of workers since April of last year.

The food industries reported the principal declines in employment in February. There were relatively large seasonal lay-offs in meat

packing (6,800), canning (4,300) and beet sugar (3,200). Woollen mills reported a contraseasonal drop in employment, reducing their forces by 3,500. The automobile industry laid off about 4,100 workers between mid-January and mid-February, but was employing about 93,000 more men than a year ago. The building materials industries, as a group, reported little change in employment.

Retail stores, as a group, continued to lay off employees in small numbers, as is usual in February. Their staffs were reduced by about 1·1 per cent, or 34,000. Stores selling general merchandise released about 15,500 employees, or 2·1 per cent of their January forces. Apparel stores laid off 3·5 per cent of their workers, and jewellery stores 3·1 per cent. There were small reductions by hardware and lumber and building materials dealers, and automobile distributors. Employment in food stores showed little change. Seasonal increases were reported by firms handling farmers' supplies and by dealers in coal, wood and ice. Drug stores also took on more workers.

Employment in wholesale trade was somewhat lower than in January, largely because of seasonal reductions of less than 1 per cent by dealers in food products and groceries, which employ the largest numbers engaged in wholesale trade; in farm products (10·2 per cent), in hardware and paper products. Apparel and dry goods firms and firms selling building materials and metals increased their staffs from 1·5 per cent to nearly 4 per cent. In other lines of trade changes were small.

Anthracite mines reported an employment pick-up of 4·3 per cent, accompanied by a pay-roll increase of 18·1 per cent. Employment in bituminous coal mines showed little change, and pay rolls increased 4·1 per cent. Metal mines lost 0·3 per cent of their workers, less than is usual at this time of year. The winter shut-down in many quarries contributed to their loss of 2·1 per cent in employment, and oil wells cut their production forces by 0·9 per cent.

Slight employment recessions were reported by the public utilities, reflecting the lay-off of construction crews during the winter months. Telephone and telegraph companies reduced their forces by 2 per cent and electric light and power companies by 0·5 per cent. Electric railroads reported a slight contraseasonal gain.

Hotels added 2,000 employees to their staffs, while laundries and dyeing and cleaning plants cut their employment seasonally, laying off a total of 3,000 workers. Brokerage houses decreased their personnel and employment in insurance companies increased by less than 1 per cent.

Employment in private building construction declined 2·8 per cent between January and February, and pay rolls were 6·6 per cent smaller. This was the smallest February employment decline during the last seven years with the exception of February, 1937. The reported decreases in employment were in the northern group of States, most affected by adverse weather conditions—in New England and the East and West North Central and Mountain States. Practically no change was reported in the Middle Atlantic and South Atlantic States, and the East South Central States, while gains were shown in the West South Central and the Pacific States. These reports do not cover public construction projects financed by the Works Progress Administration, the Public Works Administration and the Reconstruction Finance Corporation, or by regular appropriations of the Federal, State, or local governments.

Under the title of "The Minimum Wage," the International Labour Office has just published an international survey of minimum-wage regulation. Referring to the report, *Industrial and Labour Information* of March 27 states:

"The analysis of minimum-wage legislation given in the report on *Minimum Wage-Fixing Machinery,* published by the International Labour Office in 1927, is now largely out of date. The Office has, however, received a great number of enquiries, particularly from those countries in which legislation has been recently enacted or is in contemplation, for information on more recent developments, and the need for a comprehensive international survey has been keenly felt. The present study is designed to meet that need. It comprises a series of monographs analyzing the experience of different countries in minimum-wage regulation. Nine such monographs—covering Australia, Belgium, Czecho-Slovakia, France, Great Britain, Ireland, New Zealand, Peru and the United States of America—are included in the volume.

"Each national monograph consists mainly of a summary description of the development and present state of minimum-wage legislation and its application in the country concerned, supplemented wherever possible by a brief account of some of the more important problems encountered and results achieved by wage regulation. The volume also includes an appendix containing a bibliography."

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the Labour Gazette for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

> "All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages; "The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contract made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

Department of Public Works

Renewal of float and approach at Cracroft, Comox-Alberni District, B.C. Name of contractors, W. Stewart Construction Co., Ltd. and R. Bumstead, Vancouver, B.C. Date of contract, February 18, 1939. Amount of contract, approximately $5,377.55. A fair wages schedule was included in the contract as follows:—

	Per hour
Pile driver foreman	$1 25
Pile driver engineer	1 12½
Pile driver man	1 00
Boomman	1 00
Bridgeman	1 00
Fireman	0 68¾
Labourer	0 45

Repairing hull, machinery, boiler etc., of the Tug *"Lisgar"*. Name of contractors, Sydney Foundry & Machine Works Ltd., Sydney, B.C. Date of contract, February 27, 1939. Amount of contract, $6,990.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Welder, electric	$0 58
Angle-smith	0 58
Angle-smith's helpers	0 45
Blacksmith	0 58
Blacksmith's helpers	0 40
Boilermaker	0 58
Boilermaker's helpers	0 45
Chipper and caulker	0 58
Loftsman	0 58
Machinist	0 58
Machinist's helper	0 40
Patternmaker	0 58
Steamfitter and pipefitter	0 58
Steamfitter's and pipefitter's helper	0 40

	Per hour
Riveter	0 58
Template-maker	0 58
Plater	0 58
Shipwright and joiner	0 58
Moulder	0 58
Driller and reamer	0 45
Heater, rivet	0 40
Bolter-up	0 40
Holder-on, rivet	0 45
Rigger	0 48
Crane operator	0 48
Labourers	0 35
Painters	0 48
Driver, team and wagon	0 65
Driver	0 35
Motor truck driver	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95

Construction of a dominion public building at Amherstburg, Ont. Name of contractors, Wilfrid Loaring Construction Co., Windsor, Ont. Date of contract, February 21, 1939. Amount of contract, $3,075.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 15
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 55
Carpenters and joiners	1 00
Cement finishers	0 65
Cement and concrete mixer operators:	
Steam	0 80
Gas. or electric	0 60
Drivers	0 55
Driver, horse and cart	0 65
Driver, team and wagon	0 90
Electricians (inside wiremen)	1 15
Engineers, operating, steam:	
Single or double drums	0 80
Three or more drums	0 80
Engineers on steel erection	0 80
Firemen, stationary	0 55
Labourers	0 55
Lathers, metal	0 80
Motor truck drivers	0 55
Motor truck driver and trucks:	
1 to 2 tons	1 55
3 tons	2 05
4 tons	2 55
Painters and glaziers	0 65
Plasterers	0 90
Plasterers' helpers (mixing and tempering material)	0 55
Plumbers and steamfitters	1 15
Stonecutters	0 85
Stonemasons	1 15
Stonemasons' helpers (mixing and tempering mortar)	0 55
Structural steel workers	0 80
Watchman	0 40
Welders and burners on steel erection	0 80

Construction of wharf repairs at Old Masset, Skeena District, B.C. Name of contractors, Armour Salvage & Towing Co., Ltd., Prince Rupert, B.C. Date of contract, February 27, 1939. Amount of contract, approximately $4,534.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Pile driver foreman	$1 25
Pile driver engineer	1 12½
Pile driver man	1 00
Boomman	1 00
Bridgeman	1 00
Fireman	0 68¾
Labourer	0 45

Erection of a public building at Port Hawkesbury, N.S. Name of contractor, Mr. Maurice A. Condon, Kentville, N.S. Date of contract, March 4, 1939. Amount of contract, $16,291.55 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 70
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 35
Carpenters and Joiners	0 50
Cement finishers	0 50
Cement and concrete mixer operators:	
Steam	0 55
Gas. or electric	0 40
Drivers	0 30
Driver, horse and cart	0 45
Driver, team and wagon	0 45
Electricians, inside wiremen	0 55
Engineers, operating, steam:	
Single or double drums	0 55
Three or more drums	0 65
Engineers on steel erection	0 75
Firemen, stationary	0 35
Labourers	0 30
Lathers, metal	0 50
Linoleum layers	0 45
Marble setters	0 70
Marble setters' helpers (all men assigned to help tradesmen)	0 35
Motor truck drivers	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
4 tons	2 35
Ornamental iron workers	0 50
Painters and glaziers	0 50
Plasterers	0 70
Plasterers' helpers (mixing and tempering material)	0 35
Plumbers and steamfitters	0 55
Roofers, felt and gravel	0 35
Roofers, sheet metal	0 55
Sheet metal workers	0 55
Stonecutters	0 60
Stonemasons	0 70
Stonemasons' helpers (mixing and tempering mortar)	0 35
Structural steel workers	0 75
Watchman	0 25
Waxers and polishers (floor)	0 35
Welders and burners on steel erection	0 75

Construction of bank protection work at Nicomen Island, Fraser Valley District, B.C. Name of contractor, Mr. R. R. Christie, New Westminster, B.C. Date of contract, February 25, 1939. Amount of contract, approxi-

mately $6,761.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Derrick engineer	$1 12½
Derrick fireman	0 68¾
Derrick men	1 00
Launch operator (work boat)	0 50
Pile driver foreman	1 25
Pile driver engineer	1 12½
Pile driver fireman	0 68¾
Pile driver bridgeman	1 00
Pile driver boomman	1 00
Pile driver man	1 00
Watchman	0 45
Labourers	0 45

Construction of alterations and additions to the public building at Springhill, N.S. Name of contractors, Rhodes, Curry Ltd., Amherst, N.S. Date of contract, March 4, 1939. Amount of contract, $9,250.00 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 75
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 55
Cement finishers	0 50
Cement and concrete mixer operators:	
Steam	0 60
Electric	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Electricians (inside wiremen)	0 60
Labourers	0 35
Lathers, metal	0 55
Lathers, wood	0 50
Motor truck drivers	0 40
Motor truck driver and truck:	
1 to 2 tons	1 40
3 tons	1 90
Ornamental iron workers	0 55
Painters and glaziers	0 50
Plasterers	0 75
Plasterers' helpers (mixing and tempering material)	0 40
Plumbers and steamfitters	0 65
Roofers, felt and gravel	0 40
Roofers, sheet metal	0 60
Sheet metal workers	0 60
Stonecutters	0 65
Stonemasons	0 75
Stonemasons' helpers (mixing and tempering mortar)	0 40
Structural steel workers	0 75
Watchmen	0 30

Construction of repairs to the bridge pier at Bryson, P.Q. Name of contractor, Mr. Laurent Giroux, St. Casimir, P.Q. Date of contract, February 26, 1939. Amount of contract, approximately $3,908.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 50
Blacksmith's helper	0 35
Boatman (rowboat)	0 30
Carpenter and joiner	0 50
Compressor operator (gas. or elec.)	0 40
	Per day
Diver (full day's pay to be allowed whether employed full or part time)	14 00
Diver's tender (full day's pay to be allowed whether employed full or part time)	5 00
	Per hour
Drill runner	0 40
Driver	0 30
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Hoist operator (gas. or elec.)	0 40
Labourer	0 30
Motor truck driver	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
4 tons	2 35
5 tons	2 85
Powderman	0 40
Timberman or cribman (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 37½
Watchman	0 25

Extending the south side of the western channel 1,214 feet south westerly, Toronto Harbour, Ont. Name of contractors, Detroit Construction Ltd., Windsor, Ont. Date of contract, February 17, 1939. Amount of contract, approximately $149,603.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Axemen	$0 55
Blacksmith	0 70
Blacksmith's helper	0 55
Compressor operator (gas. or elec.)	0 60
Crane operators (steam, gas., elec.)	0 85
	Per day
Divers (full day's pay to be allowed whether employed full or part time)	14 00
Divers' tenders (full day's pay to be allowed whether employed part or full time)	5 00
	Per hour
Drill runners	0 60
Engineer, operating, steam	0 80
Engineer on steel erection	0 80
Fireman, stationary	0 55
Hoist operators (gas. or elec.)	0 60
Labourers	0 50
Motor truck drivers	0 55
Motor truck driver and truck:	
1 to 2 tons	1 55
3 tons	2 05
4 tons	2 55
5 tons	3 05
Painters and glaziers	0 75
Pile driver foreman	0 90
Pile driver engineer	0 80
Pile driver firemen	0 55
Pile driver derrick engineers	0 80
Powdermen	0 60
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber	0 60
Tractor operators	0 60
Watchmen	0 40
Welders and burners (acetylene or elec.)	0 70
Welders on steel erection	0 80

Construction of two wooden hopper scows for Dredge P.W.D. No. 126. Name of contractor, Mr. J. Alphonse Lemay, Portneuf, P.Q. Date of contract, February 25, 1939. Amount of contract, $4,500.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Shipwright	$0 45
Wood caulker	0 45
Blacksmith	0 45
Loftsman	0 45
Labourer	0 30
Driver	0 30
Driver, team and wagon	0 55
Painter	0 45

Construction of a public building at Kapuskasing, Ont. Name of contractors, Hill-Clark-Francis Ltd., New Liskeard, Ont. Date of contract, February 28, 1939. Amount of contract, $19,750.00 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 80
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 60
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 65
Electric	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Electricians (inside wiremen)	0 65
Engineers, operating, steam:	
Single or double drum	0 65
Three or more drums	0 75
Engineers on steel erection	0 80
Firemen, stationary	0 40
Hoist operators (gas. or elec.)	0 45
Labourers	0 35
Lathers, metal	0 60
Linoleum layers	0 50
Marble setters	0 80
Marble setters' helpers (all men assigned to help tradesmen)	0 40
Motor truck drivers	0 40
Motor truck driver and truck:	
1 to 2 tons	1 40
3 tons	1 90
4 tons	2 40
Ornamental iron workers	0 55
Painters and glaziers	0 55
Plasterers	0 75
Plasterers' helpers (mixing and tempering materials)	0 40
Plumbers and steamfitters	0 65
Roofers, felt and gravel	0 40
Sheet metal workers	0 65
Stonecutters	0 70
Stonemasons	0 80
Stonemasons' helpers (mixing and tempering mortar)	0 40
Structural steel workers	0 80
Watchman	0 30
Waxers and polishers (floor)	0 40
Welders and burners (on steel erection)	0 80

Construction of a public building at Yorkton, Sask. Name of contractors, Shoquist Construction Ltd., Saskatoon, Sask. Date of contract, March 3, 1939. Amount of contract, $31,700.00 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 42½
Carpenters and joiners	0 70
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 65
Gas. or elec	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Electricians (inside wiremen)	0 75
Engineers, operating, steam:	
Single or double drums	0 65
Three or more drums	0 75
Engineers on steel erection	0 85
Firemen, stationary	0 45
Labourers	0 35
Lathers, metal	0 70
Lathers, wood	0 65
Linoleum layers	0 55
Marble setters	0 90
Marble setters' helpers (all men assigned to help tradesmen)	0 42½
Mastic floor:	
Spreaders and layers	0 85
Rubbers and finishers	0 60
Kettlemen	0 60
Labourers	0 40
Motor truck drivers	0 40
Motor truck drivers and 1 to 2 ton truck	1 40
3 ton truck	1 90
4 ton truck	2 40
Ornamental iron workers	0 65
Painters and glaziers	0 65
Plasterers	0 90
Plasterers' helpers (mixing and tempering material)	0 42½
Plumbers and steamfitters	0 80
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 42½
Roofers, felt and gravel	0 40
Roofers, sheet metal	0 65
Roofers, shingles (wood, asbestos)	0 70
Sheet metal workers	0 65
Stonecutters	0 80
Stonemasons	0 90
Stonemasons' helpers (mixing and tempering mortar)	0 42½
Structural steel workers	0 85
Terrazzo layers	0 75
Terrazzo finishers and helpers	0 60
Tile setters	0 90
Tile setters' helpers (all men assigned to help tradesmen)	0 42½
Watchman	0 30
Waxers and polishers (floor)	0 40
Welders and burners on steel erection	0 85

Department of Transport

Construction of concrete guide piers and additional excavation necessary to provide 18 foot draft facilities at Thorold, Ont., on account of the Welland Canal. Name of con-

tractors, J. P. Porter & Sons, Ltd., Montreal, P.Q. Date of contract, March 16, 1939. Amount of contract, $105,775.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 45
Carpenters and joiners	0 70
Compressor operators	0 50
Concrete finishers	0 60
Concrete mixer operators:	
Steam	0 65
Gas. or elec	0 50
Drill runners	0 50
Drag line operators (steam or gas.)	0 90
Drag line firemen	0 60
Drag line oilers	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians	0 70
Firemen (stationary)	0 45
Firemen (steam shovel)	0 55
Gas engine mechanics	0 50
Labourers	0 40
Locomotive crane operators (steam, gas. or elec.)	0 70
Machinists	0 65
Motor truck drivers	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Oilers (gas., shovel or crane)	0 50
Pipefitters (surface—temporary work)	0 55
Powdermen	0 50
Pumpmen	0 50
Riggers (general)	0 50
Shovel engineers (steam or gas.)	0 90
Shovel cranemen (steam or gas.)	0 70
Tractor operators	0 50
Watchmen	0 35
Welders and burners (acetylene or elec.)	0 65

Constructing of two timber scows for seaplane base at Port Arthur, Ont. Name of contractors, Thunder Bay Harbour Improvements Ltd., Port Arthur, Ont. Date of contract, March 7, 1939. Amount of contract, $2,240.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 60
Blacksmith's helper	0 45
Boatmen (rowboats)	0 40
Carpenters and joiners	0 70
Caulkers	0 70
Drivers	0 40

Supply and installation of interior fittings in the public building at St. Andrews East, P.Q. Name of contractors, Messrs. Henri Lemelin & Joseph Lacroix, St. Romuald, P.Q. Date of contract, January 31, 1939. Amount of contract, $638.40.

Supply and installation of interior fittings in the public building at Forest, Ont. Name of contractors, Canadian Office & School Furniture Ltd., Preston, Ont. Date of contract, February 20, 1939. Amount of contract, $696.

Supply and installation of interior fittings in the public building at North Head, N.B. Name of contractors, Wallace Mfg. Co., Ltd., Sussex, N.B. Date of contract, January 24, 1939. Amount of contract, $815.

Supply and installation of interior fittings in the public building at Cobden, Ont. Name of contractors, Canadian Office & School Furniture Ltd., Preston, Ont. Date of contract, February 22, 1939. Amount of contract, $694.

Supply and installation of interior fittings in the public building at Carberry, Man. Name of contractors, The Western Mfg. Co., Ltd., Regina, Sask. Date of contract, February 21, 1939. Amount of contract, $680.

SPECIAL CONTRACTS

Manufacture, Overhaul and Reconditioning of Aircraft

Note: The labour conditions applicable to contracts for the manufacture, overhaul and reconditioning of aircraft are identical with those for building and construction work, except that one scale of minimum wages rates was approved in February, 1937, for all works of this nature undertaken in Eastern Canada (Ontario, Quebec and the Maritime Provinces), and another scale for all such works in Western Canada (Manitoba, Saskatchewan, Alberta and British Columbia).

A revision of the classifications and wages scales involved in contracts of this nature was approved on March 7, 1939, and is applicable to all contracts for the manufacture, overhaul and reconditioning of aircraft which have been made since that date, including several of those listed hereunder. The amended conditions themselves are shown in connection with the particular contracts to which they apply. It will be noted, however, that certain of the contracts listed hereunder contain the 1937 conditions which were in effect at the time tenders were taken.

It is provided in these contracts that working hours shall not exceed 48 per week.

Department of National Defence

Complete overhaul of Wright engine. Name of contractors, Canadian Wright, Ltd., Montreal, P.Q. Date of contract, March 1, 1939. Amount of contract, $2,398.87. A fair wages schedule was included in the contract as follows:—

Engine Assembly—

	Per hour
Fitter (A.E.)..	$0 60
Fitter's helper (A.E.)..	0 40
Machinist..	0 65
Machinist's helper..	0 40
Machine operators..	0 50
Sandblasters..	0 55
Labourers..	0 35
Airframe Construction and Assembly—	
Fitters (A.F.)..	0 60
Fitter's helper (A.F.)..	0 40
Machinist..	0 65
Machinist's helper..	0 40
Machine operator..	0 5[illegible]
Woodworkers (joiner) leading hand..	0 8[illegible]
Woodworker (joiner)..	0 60
Woodworker's helper..	0 40
Welder..	0 60
Welder's helper..	0 40
Electrician..	0 65
Electrician's helper	0 40
Painter and doper..	0 55
Painter and doper's helper..	0 40
Fabric worker—female..	0 40
Fabric worker's helper..	0 30
Upholsterer..	0 55
Upholsterer's helper..	0 40
Sandblaster..	0 55
Labourer..	0 35
Erector..	0 60
Erector's helper..	0 40
Sheet metal worker..	0 60
Sheet metal worker's helper..	0 40
Riveters..	0 50
Riveter's helpers..	0 40
Apprentices to fitters, machinists, and sheet metal workers only—(16 to 21 years of age):	
1st year..	0 20
2nd year..	0 25
3rd year..	0 35

Note.—Only one helper to be employed to each journeyman. No more than one apprentice to be employed to each five journeymen.

Partial reconditioning of Avro 621 landplane No. 189. Name of contractors, Ottawa Car Manufacturing Company, Ltd., Ottawa, Ont. Date of contract, February 28, 1939. Amount of contract, $2,961.28. The preceding fair wages schedule was also included in this contract.

Complete reconditioning of Fleet 7C aircraft 222. Name of contractors, Fleet Aircraft, Limited, Fort Erie, Ontario. Date of contract, March 6, 1939. Amount of contract, $2,939.98. The preceding fair wages schedule was also included in this contract.

Complete reconditioning of Fleet 7C aircraft 215. Name of contractors, Fleet Aircraft Limited, Fort Erie, Ontario. Date of contract, March 9, 1939. Amount of contract, $2,937.91. The preceding fair wages schedule was also included in this contract.

Major reconditioning of Fleet 7 landplane. Name of contractors, Fleet Aircraft Ltd., Fort Erie, Ont. Date of contract, March 22, 1939. Amount of contract, $3,022.61. The preceding fair wages schedule was also included in this contract.

Complete reconditioning of Fleet 7C aircraft 219. Name of contractors, Fleet Aircraft Ltd., Fort Erie, Ont. Date of contract, March 11, 1939. Amount of contract, $3,035.38. The preceding fair wages schedule was included in the contract.

Repair and modification of two Vickers type 75 floats. Name of contractors, Canadian Vickers Ltd., Montreal, P.Q. Date of contract, March 28, 1939. Amount of contract, $1,205. The preceding fair wages schedule was also included in this contract.

Repair and modification of six Vickers type 75 floats. Name of contractors, Canadian Vickers, Ltd., Montreal, P.Q. Date of contract, March 28, 1939. Amount of contract, $4,206. The preceding fair wages schedule was also included in this contract.

Manufacture of bomb loading winches. Name of contractors, Canadian Vickers, Ltd., Montreal, P.Q. Date of contract, March 15, 1939. Amount of contract, $1,312.20. The revised fair wages schedule was included in this contract as follows:—

Journeymen (Comprising the following classes of skilled tradesmen):—

	Per hour
Pattern maker	$0 75
Tool and die maker	0 75
Aircraft fitter	0 65
Machinist	0 65
Joiner	0 65
Coppersmith	0 65
Welder	0 65
Electrician	0 65
Painter	0 65
Erector	0 65
Sheet metal worker	0 65
Heat treat operator	0 65
Plater	0 65
Moulder	0 65
Cable splicer	0 65
Hammer operator	0 65
Production Workers—Class "A" (Comprising workpeople engaged, under supervision, in repetitive machine, assembly or bench work, requiring less training, experience and skill than that necessary to qualify as a journeyman; also *riveters, upholsterers, sand blasters, fabric workers* (male), and *heat treat operators* on automatic furnaces)	0 55
Production Workers—Class "B" (Comprising workpeople engaged in repetitive machine, assembly or bench work requiring less training, experience and skill than that necessary for Class "A" Production Workers; also *helpers* assigned to assist journeymen, *doper, fabric worker* (female).)	0 45
Labourers	0 40
Apprentices (Indentured, between the ages of 16 and 21 years) may be employed in the proportion of 2 apprentices to each 5 journeymen in the following trades:—*fitters, machinists* and *sheet metal workers*	
First year	0 20
Second year	0 25
Third year	0 35
Fourth year	0 45

Supply and installation of modifications on Stranraer boat seaplanes. Name of contractors, Canadian Vickers, Ltd., Montreal, P.Q. Date of contract, March 23, 1939. Amount of contract, $4,737.90. The preceding fair wages schedule (revised) was also inserted in this contract.

Supply and installation of tail parachute parts. Name of contractors, Canadian Vickers, Ltd., Montreal, P.Q. Date of contract, March 22, 1939. Amount of contract, $3,400. The preceding fair wages schedule was also included in this contract.

Construction of three sets of launching chassis and tail trolley, complete with wheels, tires and tubes, for Stranraer boat seaplanes. Name of contractors, Canadian Vickers, Ltd., Montreal, P.Q. Date of contract, March 30, 1939. Amount of contract, $17,325. The preceding fair wages schedule was also included in this contract.

Complete reconditioning of Fleet 7C landplane. Name of contractors, Fleet Aircraft Ltd., Fort Erie, Ont. Date of contract, March 31, 1939. Amount of contract, $3,338.76. The preceding fair wages schedule was also included in this contract.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the Labour Gazette from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Vegetable Foods

Port Arthur and Fort William, Ontario.—Certain Bakeries and the Bakery and Confectionery Workers' International Union, Local 284.

Agreement reached following strike which was reported in the Labour Gazette, December, page 1340, to be in effect from November 28 and 30, 1938 to December 31, 1939, and thereafter until cancelled by either party or a new agreement made.

All permanent employees, except superintendents and office staff, must be union members; no discrimination against employees on account of union activity; the union to be the sole collective bargaining agency for all bakery employees.

Hours: 54 per week.

Overtime and work on seven specified holidays or on day off: time and one-half.

Wages per week: in bread shops—foreman, $29, ovenmen and doughmen, $25, table hands, $23, helpers, $16, bread wrappers, $16 or 30 cents per hour; in cake shops—foreman, $30, cake bakers, $24, improvers, $18, cake helpers, $14, jobbers, 50 cents per hour, jobbers' helpers, 40 cents; apprentices (bread or cake baking) from $9 during first year to $18 during fourth year.

Disputes which cannot be settled between the employer and the local union will be referred to representatives of the employer and of the international union.

Vancouver, B.C.—Certain Bakeries and the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers, Local 189 (Bakery Salesmen).

Agreement to be in effect from June 1, 1938, to June 1, 1939, and thereafter from year to year, subject to notice.

All salesmen and stablemen must apply to join the union within 30 days of commencing their employment. All employees to authorize the company to deduct from their wages and pay to the union secretary any dues, fines or assessments levied by the union. In consideration of the company agreeing to such check off, the union agrees that should any of its members abscond or cheat the company such money will be refunded to the employer out of the union funds. Jobbers purchasing their bread or cakes from a union bakery must be union members.

Hours: hours to be as set by the provincial "Hours of Work Act," six days to constitute a week's work, with no work on Sundays or national holidays except that each bakery may have two men on such days to handle emergency or shipping orders. Any driver called to work on a national holiday to receive an extra day off or an extra day's pay. Stablemen's work to be completed in 12 hours.

Minimum weekly wage rates: bakery salesmen $24.50, stablemen and helpers $23. (Inexperienced new men may, however, be paid $20 per week during first four weeks and $21 during second four weeks). The commission on cakes to be 10 per cent retail and 5 per cent wholesale. No employee who prior to this agreement was receiving a higher rate of wages will have his wage rate reduced.

Vacation: all employees with one year's service or more with a bakery to receive one week's holiday with pay each year.

Any dispute which cannot be adjusted between the employer and union representatives will be referred to a joint arbitration board, whose decision will be final.

Nanaimo, B.C.—Certain Bakeries and the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers, Local 189 (Bakery Salesmen)

Agreement to be in effect from June 1, 1938, to June 1, 1939, and thereafter from year to year subject to notice.

This agreement is the same as the agreement between the same local union and certain bakeries at Vancouver as summarized above, with this exception:

Minimum weekly wage for bakery salesmen: $23.50 per week.

Manufacturing: Rubber Products

Kitchener, Ontario.—A Certain Rubber Products Manufacturing Company and Their Employees (Members of the United Rubber Workers of America, Locals 67 and 80).

Two agreements are in effect, one for local no. 67 covering the manufacture of footwear, etc., and the other for local 80 covering the manufacture of tires. Both agreements were made following the strikes reported on page 379 of this issue, and are in effect from March 10, 1939 to October 31, 1939, and thereafter subject to 30 days' notice by either party.

The company recognizes and will deal with a committee of employees, selected by each of the above local unions, as the bargaining agencies for employees. No discrimination to be shown against employees on account of union activity. Neither employees nor the company to intimidate employees either for or against union membership.

Hours: in the factory manufacturing footwear, etc., the hours for all production employees are 9 per day, 5 on Saturdays, a 50 hour week; in the tire factory, the hours for all production employees are 8 per day.

Overtime: in the factory manufacturing footwear, etc., for production employees (excluding truck driver, night watchman, vulcanizers and maintenance men) first half hour at regular pay, thereafter at time and one-half; in the tire factory for production employees, time

and one-half for all time in excess of 9 hours in a day or 50 in a week, with certain exceptions. For all employees except power-house employees and watchmen, time and one-half for work on Sundays and eight specified holidays.

Wages: the demand of the employees for a 5 cent per hour increase in wages is to be referred to a joint arbitration board; all other questions as to wages are to be negotiated between the company and the employees' committees.

Seniority in service to govern preference of employment, seniority rights to begin after 12 months service. In case of curtailment of production, necessitating reduction in staff, all employees with less than 12 months accumulated service to be laid off first. For six weeks thereafter (eight weeks in case of tire factory), work will be divided amongst all employees with more than 12 months service, unless or until the hours for any division be reduced below 35 (32 in case of tire factory) in a week, when further employees may be laid off according to their seniority so that the remaining employees in such division may have 35 (32 in case of tire factory) hours work; after this period sufficient employees to be laid off according to their seniority to enable remaining employees in any division to work 43 (40 in case of tire factory) hours per week. When production is later increased, the 43 (40 in case of tire factory) hour week to remain until all employees with more than 12 months service have been recalled.

Any grievance of an employee not settled with the foreman to be dealt with by the grievance committee and the management. No strike or lockout to occur before or during the negotiation for settlement of any dispute arising under the agreement.

Manufacturing: Textiles and Clothing

Windsor, Ontario.—A Certain Cap and Glove Manufacturing Company and the United Hatters, Cap and Millinery Workers International Union, Local 79 (Cap and Glove Factory Workers).

Agreement reached following strike reported in the Labour Gazette, February, page 141. Agreement to be in effect from February 2, 1939, to July 1, 1939, and for a year longer if neither party gives notice of change 30 days before July 1, 1939.

Only union members to be employed and all new workers to be engaged in agreement with the shop committee and workers may not be discharged without the consent of the unions. No discrimination against any employee on account of union activity.

Hours: 8½ per day from Monday to Thursday inclusive, 8 on Friday, a 42-hour week.

Overtime: time and one-quarter.

Wages: a list of employees with their weekly wage is included and specified wages are from $8 to $20 per week; in the glove department, the minimum is $12.50.

The employer agrees to produce all merchandise for sale on the premises of the employer and will not buy any ready made merchandise unless his employees have full time employment.

There shall be equal distribution of work among all workers of the shop at all times.

Any dispute which cannot be settled by the employer with the shop committee will be taken up by the union representative, and later, if no settlement reached, referred to an impartial arbitrator whose decision will be final. No strikes or lockouts to occur.

Manufacturing: Pulp, Paper and Paper Products

Cornwall, Ontario.—Howard Smith Paper Mills Limited and the International Brotherhood of Paper Makers, Local 212 and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Local 338.

Agreement to be in effect from January 1, 1939, to January 1, 1940, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, November, 1938, page 1295, with the following and certain other minor changes:

Disputes which cannot be settled by the management and the union will be submitted for arbitration to the federal Department of Labour and its decision will be final.

Manufacturing: Printing and Publishing

Toronto, Ontario.—Daily Newspaper Publishers and the International Typographical Union, Local 91.

Agreement to be in effect from April 1, 1938, to March 31, 1941.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, November, 1937, page 1268, with certain exceptions:

Minimum weekly wages for assistant foremen, compositors, make-ups, operators, proofreaders, copy-cutters, bank men, type casters and linotype machine tenders: from April 1, 1938, to March 31, 1939, $44 for work on evening newspapers, $45.50 for work on morning newspapers and $48.50 for "lobster shift," that is shift commencing in day hours and running into night hours (increases of $1.50 per week over wage rates previously in effect); from April 1, 1939 to March 31, 1940, further increases of $1.50 per week to be made, making the rates $45.50, $47 and $50 respectively; for the year April 1, 1940 to March 31, 1941, corresponding rates to be $47, $48.50 and $51.50.

Wages per week for apprentices are similarly increased to: second year $10.75, first half of third year $14.75, second half of third year $17, first half of fourth year $19.25, second half $22.25, first half of fifth year $25.75, second half $29.50, sixth year $32.

Construction: Buildings and Structures

Vancouver, B.C.—Master Lathers' Association of Vancouver and The Wood, Wire and Metal Lathers' International, Union, Local 207.

Agreement to be in effect from April 1, 1939, to April 1, 1940, and thereafter from year to year, subject to notice.

Only union members to be employed and the union agrees to recognize the Master Lathers Association as their employers.

Wages for day work: first class lathers for nail work $1 per hour, second class 75 cents, $1.12½ per hour for tie work; rates are also set for laying lath by the thousand.

For work out of town $1 per day extra to be paid.

Transportation and Public Utilities: Local Transportation

Winnipeg, Manitoba.—Two Cartage and Storage Firms and Their Employees (Members of the Canadian Brotherhood of Railway Employees) (Truck Drivers, Helpers, Packers, etc.)

Agreements made as a result of conciliation by the Department of Labour, following applications for boards under the Industrial Disputes Investigation Act. One agreement is in effect from December 1, 1938, to December 31, 1939, and the second from March 16, 1939, until either party gives 30 days' notice.

No discrimination to be shown against employees on account of union membership.

Seniority to govern the laying off and re-employment of employees. When merit and ability are sufficient, preference in filling new positions or vacancies to be given to employees applying for them in order of their seniority.

A permanent employee may not be suspended, discharged or disciplined without being given an impartial hearing, at which he may be assisted by one or two fellow employees. Any dispute as to an employee being unjustly dealt with or as to the carrying out of the agreement shall be taken up with the employee's committee and company officials. No strike or lockout to occur during the term of the agreement.

Hours, overtime, wage rates and vacation for one firm's employees: hours are 48 per week, with overtime to be paid at 50 cents per hour for all except contract drivers, and all to be given nine legal holidays. Wage rates for employees of this same firm are $22.50 per week for cartage men and $21 per week for contract men; contract drivers to be paid 50 cents per hour if sent on another job after regular assigned hours; any employee required to stand by subject to call, other than during regular working hours, to be paid at 25 cents per hour. Employees receiving higher wages or working less hours when agreement made are to continue at same wages and hours. In this firm, contract chauffeurs with one year's service to be given one week's vacation with pay.

Hours, overtime and wage rates for the second firm's employees: hours are 9 per day, 6 on Saturdays, a 51 hour week, with overtime over such daily hours to be paid at time and one-half; employees receiving the legal holidays when agreement made are not to be deprived of them and such chauffeurs working over half the time in the 30 days preceding one of the nine specified holidays to be paid for such holiday. Employees required to work on Sundays or one of the nine holidays to be paid at regular rates for regular hours, but those qualified for the holidays to be so paid in addition to the holiday pay. Wages per hour: chauffeurs and helpers 45 cents; wages and hours of stockkeepers to continue as in effect August 1, 1938, unless changed by mutual agreement between the company and the employees committee.

Collective Labour Agreements Act, Quebec

The following agreements and amendments to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:

Bakers, Quebec (amendment).

Fine Glove Cutters and Operators, Province of Quebec.

Work Glove Cutters, Province of Quebec.

Retail Clerks, Magog (amendment).

Garage and Service Station Employees, Quebec (amendment).

Barbers and Hairdressers, Victoriaville (cancellation).

Barbers and Hairdressers, Montreal (amendment).

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are summarized in a special article below:

ONTARIO

Soft Furniture Industry, Toronto and district.

Painters, Toronto.

ALBERTA

Honey Producing Industry, Coaldale, Taber and Vauxhall Zone.

Honey Producing Industry, Lethbridge Zone.

Carpenters, Edmonton.

Carpenters, Red Deer and Sylvan Lake.

Garage and Service Station Employees, Calgary.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938, issue of the Labour Gazette, page 503. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended.

Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the

Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues beginning May, 1938.

Recent proceedings under the Act include: the extension by Orders in Council of agreements affecting fine glove cutters and operators and work glove cutters throughout the province; amendments to agreements affecting bakers at Quebec, retail store employees at Magog, garage employees at Quebec and barbers and hairdressers at Montreal; the repeal of the Order in Council affecting barbers and hairdressers at Victoriaville, all of which are summarized below. The approval by Orders in Council of the constitution and by-laws of certain joint committees are also noted below. In addition, a request for the extension of an agreement affecting longshoremen engaged in inland navigation at Montreal harbour was published in the *Quebec Official Gazette,* March 18.

Manufacturing: Vegetable Foods

Bakers, Quebec.—An Order in Council, approved March 4, and published in the *Quebec Official Gazette,* March 11, amends the previous Orders in Council for this trade (Labour Gazette, December, 1937, page 1385, April, 1938, page 451, January, 1939, page 96) by excluding from the territorial jurisdiction the counties of Bellechasse and Dorchester.

Manufacturing: Fur, Leather and Miscellaneous Animal Products

Fine Glove Cutters and Operators, Province of Quebec.—An Order in Council, approved February 25, and published in the *Quebec Official Gazette,* March 4, makes binding the terms of an agreement between certain manufacturers of fine gloves and the following unions: for operators and blockers—Le Syndicat des Trois Rivières (the Three Rivers Union), Le Syndicat des Opérateurs et Opératrices de Gants Fins (The Union of Fine Glove Operators), the St. Lawrence Glove Works Employees' Syndicate and Le Syndicat des Opérateurs et Opératrices de Gants Fins (The Union of Fine Glove Operators); for cutters—Le Syndicat des Trois Rivières (The Union of Three Rivers), the St. Lawrence Glove Works Employees' Syndicate, Le Syndicat Catholique National des Gantiers de Montréal, Inc. (The National Catholic Union of Glove Makers of Montreal, Inc.), Le Syndicat Catholique et National des Gantiers de Loretteville et du district de Québec, Inc. (The National Catholic Union of Glove Makers of Loretteville and of the Quebec district, Inc.)

The Order in Council to be in effect from February 13, 1939, to December 31, 1939, and to apply to the manufacture of fine gloves throughout the province of Quebec. (Previously cutters were under a separate agreement (Labour Gazette, June, 1937, page 695) from operators and blockers (Labour Gazette, March, 1938, page 335).)

Hours: 9 per day, 4 on Saturdays, a 49 hour week.

Overtime: if an employer finds it necessary to keep his employees at work overtime during a certain period, he must submit his case to the joint committee for a decision; regular rates for overtime work.,

Wages: for both the cutters and the operators and blockers, piece rates are set for each operation, the province being divided into zones with lower rates set for smaller cities and towns,

and, in the case of operators and blockers, still lower rates for rural districts.

Apprenticeship: for operators and blockers, one apprentice allowed to each employer except if the joint committee permit more, apprenticeship to be for one year, with $7 per week being paid during first six months and $9 during second six months; for cutters, there is no apprenticeship period for block cut, clicking machine and knife cut operations, but for table cut operations the apprenticeship is two years, with minimum rates of from $6 during first six months to $12 during fourth six months and not more than one apprentice may be employed for each twenty fine glove cutters or fraction thereof.

Work Glove Cutters, Province of Quebec.—An Order in Council, approved February 25, and published in the *Quebec Official Gazette,* March 4, makes obligatory the terms of an agreement between certain manufacturers of work gloves and the St. Lawrence Glove Works Employees' Syndicate, le Syndicat des Trois Rivières (the Three Rivers Union) and le Syndicat des Tailleurs de Gants de Travail de Montréal (the Union of Work Glove Cutters of Montreal).

The Order in Council to be in effect from January 1, 1939, to December 31, 1939 ,and to apply throughout the province to the cutting of work gloves.

Hours: 48 per week.

Overtime: manufacturers to ask for a permit to work overtime from the joint committee.

Wages: a schedule of piece work rates is set, with rates in municipalities of less than 15,000, ten per cent lower than in larger cities and towns.

One apprentice allowed to each ten cutters or fraction thereof and $8.05 per week for first six months and $10.35 during second six months in the larger cities and towns, and corresponding rates of $7.255 and $9.315 in smaller municipalities.

Trade

Retail Clerks, Magog.—An Order in Council, approved February 25, and published in the *Quebec Official Gazette,* March 4, amends the previous Orders in Council for the workers (Labour Gazette, October, 1938, page 1173, and January, 1939, page 97) by permitting the sale of bread and butter at any hour of the day in retail commercial establishments.

Service: Custom and Repair

Garage and Service Station Employees, Quebec.—An Order in Council, approved February 25, and published in the *Quebec Official Gazette,* March 4, amends the previous orders in council for these workers (Labour Gazette, June, 1938, page 696, December, page 1174, and February, 1939, page 218) by excluding from the territorial jurisdiction the counties of Bellechasse and Dorchester.

Service: Business and Personal

Barbers and Hairdressers, Victoriaville.—An Order in Council, approved March 4, and published in the *Quebec Official Gazette,* March 11, repeals the Order in Council making this agreement obligatory and that amending it (Labour Gazette, February, 1938, page 215, and June, page 698).

Barbers and Men's Hairdressers, Montreal.—An Order in Council, approved February 25, and published in the *Quebec Official Gazette,* March 4, amends the previous Orders in Council for this trade (Labour Gazette, September, 1938, page 1045, November, page 1301, and December, page 1424) by making certain changes in the regulation of barber schools.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the March 4 issue of the *Quebec Official Gazette*:

Garage and Service Station Employees, Montreal (amendment).
Garage and Service Station Employees, Sherbrooke.
Farriers, Victoriaville (amendment).
Checkers and Coopers, Montreal.

INDUSTRIAL STANDARDS ACT

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario and Alberta

In four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council on all employers and employees in the industry in the zone designated by the Minister. The Minister may also establish an advisory com-

mittee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour, who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the Labour Gazette, as follows: Ontario, in the issue of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, and May, 1938, page 501; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, and June, 1938, page 633; Nova Scotia, in June, 1936, page 604; Saskatchewan, in the issue of June, 1937, page 635, and May, 1938, page 507. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Manufacturing: Miscellaneous Wood Products

Soft Furniture Industry, Toronto and District.—An Order in Council, dated February 28, and published in *The Ontario Gazette,* March 4, makes binding the terms of a schedule for the soft furniture industry in the city of Toronto and neighbouring townships, from March 14, 1939, to October 15, 1939. (A similar schedule in effect October, 1937, to October, 1938, and summarized in the Labour Gazette, November, 1937, page 1274, had covered this industry throughout the province.)

Hours: 8 per day, 4 on Saturdays, a 44 hour week; except for labourers who may work an additional hour per day for the purpose of sweeping and cleaning up, at the regular wage rate.

Overtime only allowed on permit from the Advisory Committee, and such permits may only be given to employers engaged in the production of custom made soft furniture, during the months of March to May inclusive and September to December inclusive, and such permit may allow not more than six hours overtime in any one week, not more than 120 hours in any one year for each employee. All overtime to be paid at time and one quarter. No work on Saturday afternoons, nor on Sundays and eight specified holidays.

Minimum hourly wage rates: upholsterers 65 cents; cutters, springers, operators, cushion fillers, finishers, trimmers, 55 cents; labourers 40 cents. The Advisory Committee may fix a special minimum rate of wages for a handicapped employee.

Construction

Painters, Toronto.—An Order in Council dated February 28, and published in *The Ontario Gazette,* March 4, makes binding in the city of Toronto and neighbouring townships the terms of a schedule governing painters, decorators, paperhangers and glaziers, from February 28, 1939, "during pleasure."

Hours: 8 per day from Monday to Friday inclusive, a 40-hour week.

Overtime: on regular working days from 5 p.m. to 8 p.m., time and one-half; all other overtime including work on Saturdays, Sundays and eight specified holidays, double time, with the exception that the Advisory Committee may permit overtime work on Saturdays at regular rates of pay if the work is of such a nature that it cannot be done during regular working periods.

Minimum hourly wage rates: for painters, decorators, paperhangers and glaziers, 75 cents; for spray painting 85 cents.

Alberta

Agriculture

Honey Producing Industry, Coaldale, Taber and Vauxhall Zone.—An Order in Council, dated March 14, and published in *The Alberta Gazette,* March 31, makes binding in the Coaldale, Taber, Vauxhall zone the terms of a schedule governing the honey producing industry, from April 10, 1939 to March 10, 1940 or "during pleasure."

The terms of this schedule are similar to the one previously in effect and summarized in the Labour Gazette, June, 1938, page 701. (As noted in the Labour Gazette, September, 1938, page 1048 the "Eastern Irrigation District" was added to the 1938 schedule, but is not mentioned in this new 1939 schedule.)

Honey Producing Industry, Lethbridge Zone.—An Order in Council, dated March 14, and published in *The Alberta Gazette,* March 31, makes binding the terms of a schedule governing the honey producing industry in the Lethbridge zone, from April 10, 1939, to March 10, 1940, or "during pleasure."

The terms of this schedule are exactly the same as for the Coaldale, Taber and Vauxhall zone, mentioned above.

Construction

Carpenters, Edmonton.—An Order in Council, dated March 21, and published in *The Alberta Gazette,* March 31, makes binding a schedule of wages and hours in the carpentry industry in the city of Edmonton and neighbouring townships from April 1, 1939 to March 31, 1940.

The terms of this schedule are similar to the one previously in effect and summarized in the Labour Gazette, April, 1938, page 454.

Hours and wages are unchanged, at 90 cents per hour, with a 44 hour week, with overtime at time and one-half and work on Sundays and holidays at double time.

Carpenters, Red Deer and Sylvan Lake Zone.—An Order in Council, dated March 25, and published in *The Alberta Gazette,* March 31, makes binding a schedule of wages and hours in the carpentry industry in the Red Deer and Sylvan Lake Zone, from April 10, 1939 to April 9, 1940 or "during pleasure."

Hours: 9 per day, 4 on Saturdays, a 49 hour week. In case of night shifts, 8½ hours work to be equivalent to 9 hours.

Overtime: time and one-half; work on Sundays and four specified holidays double time.

Minimum hourly wage rate for carpenters: 75 cents.

Service: Custom and Repair

Garage and Service Station Employees, Calgary.—An Order in Council, dated March 21, and published in *The Alberta Gazette,* March 31, makes binding in the city of Calgary the terms of a schedule governing the automotive repair and gasoline service station industry, from April 10, 1939, to April 9, 1940, or "during pleasure."

Hours: 9 per day, 54 per week, except that every second week employees to receive one-half day off, making the hours for alternate weeks 54 and 49. The 9 hour day to be completed in 10 hours with one hour off for lunch and is to be worked between 8 a.m. and 11 p.m.

Overtime: all work in excess of 10 hours per day or 54 per week and any work between 11 p.m. and 8 a.m. (except night watchman) or any work on regular half day off, to be paid at time and one-half. Work on Sundays and six specified holidays, time and one-half, except for front end men and gas service men working on their regular shifts on that day. Work on cars at the direct expense of the employer may be done when required at single time rates if an overtime permit received from the Advisory Committee.

Minimum wages per hour: first class mechanics or specialists holding Alberta Proficiency certificates 70 cents, second class mechanics or specialists holding Alberta Proficiency certificates 60 cents; non-mechanical service station employees $13.50 per week; washmen and greasemen 50 cents or 50 per cent of labour price quoted, night watchman 33⅓ cents; mechanics at all times engaged in the repairing and/or reconditioning of used cars may be paid 7½ cents per hour less than the above minimum rates. Mechanics, washmen and greasemen may be paid at 80 per cent of the amount payable if they had worked the full 49 or 54 hours in the week at the regular minimum hourly rate provided that this system of payment is continued throughout the calendar year.

Apprenticeship: one apprentice allowed to every five mechanics in large shops, in smaller shops one apprentice allowed; apprentices to be paid from $7.50 per week during first three months to $17 during third year, 45 cents per hour for first half of fourth year and 50 cents during second half. An apprentice with a certificate from a recognized trade or technical school to be credited with one year's apprenticeship. Any greaseman with three years' service to have the privilege of being apprenticed as a mechanic, if an opening exists, and will receive credit for one apprentice year and be paid the rate of a third year apprentice.

Employees' Pensions on Canadian Railroads in 1938

According to the annual report of the Canadian National Railway system for the year ended December 31, 1938, the total number of pensioners at that date under Canadian National pension plans totalled 6,913 as compared with 6,287 at December 31, 1937. Employees pensioned during the year numbered 991 and 365 pensioners died. Pension costs to the railway under the various pension plans in effect were $4,159,798 in 1938 compared with $3,993,734 in 1937.

Under the United States Railroad Retirement Act and the Carriers' Taxing Act, the tax payable (equal to 2¾ per cent of employees' compensation) in respect of Canadian National Railway system operations in the United States for the year 1938 amounted to $461,000 as compared with $515,000 in 1937.

The cost to the National system under United States Federal and State legislation dealing with unemployment insurance and old age benefits other than covered by the Railroad Retirement Plan amounted to $595,000 in 1938 compared with $459,000 in 1937.

In the annual report of the Canadian Pacific Railway Company for the year ended December 31, 1938, pension disbursements for the year amounted to $2,515,157. It is reported that since the inception of the contributory pension plan (Labour Gazette, October, 1936, page 910) on January 1, 1937, the total employee contributions have amounted to $3,910,247. It is also stated in the report that: "As was anticipated would be the case during the first few years of operation, disbursements from the pension fund were negligible. The operation of the plan is proving to be satisfactory."

Under the provisions of the United States Carriers' Taxing Act, the excise taxes levied on the Canadian Pacific Railway Company and its employees, who come under the provisions of the United States Railroad Retirement Act, amounted in each case to $64,716.

During the year, 571 employees were pensioned and transferred to the pension payroll. After allowing for deductions owing to deaths and discontinuances through other causes, the total number of pensioners at the close of the year showed an increase of 306 over the number at December 31, 1937. There were 3,441 on the pension payroll at the end of 1938.

PRICES RETAIL AND WHOLESALE IN CANADA, MARCH, 1939

Cost of Living, Prices of Staple Articles and Index Numbers

THERE was little movement in prices during the month. The cost per week, in terms of retail prices, of a list of staple foods, fuel and lighting and rent entering into a family budget and the Dominion Bureau of Statistics weekly index number of wholesale prices were both practically unchanged from the levels of the preceding month but the former was about two per cent lower and the latter 12 per cent lower than in March, 1938.

The cost per week of a list of twenty-nine staple foods entering into a budget for a family of five in terms of average retail prices in sixty-nine cities was $8.17 at the beginning of March as compared with $8.16 for February and $8.69 for March, 1938. Changes during the month were slight, the most important being advances in the cost of fresh meats, eggs and potatoes, and declines in the cost of lard, cheese, flour and rolled oats. Some comparative figures of the cost of this list of foods for certain earlier dates are $8.49 for March, 1937; $8.12 for March, 1936; $6.67 for March, 1933 (the low point in recent years); and $11.67 for March, 1930. Including the cost of fuel and rent with that of foods the total cost of the list was $17.07 at the beginning of March as compared with $17.06 for February; $17.48 for March, 1938; $17.13 for March, 1937; $16.63 for March, 1936; $15.41 for June, 1933 (the low point in recent years); $21.96 for March, 1930; $20.96 for March, 1922; $26.92 for July, 1920 (the post war peak); and $14.35 for March, 1914. The cost of both fuel and rent were practically unchanged in the month under review.

In wholesale prices the Dominion Bureau of Statistics weekly index number based upon prices in 1926 as 100 has been relatively stable since October, 1938, not having risen above 74 nor fallen below 73. It has, however, declined about 12 per cent during the last year. For the week ended March 31, 1939, the index number was 73·3 as compared with 73·1 for the week ended March 17, the low point for the month, and 73·3 for the week ended February 24. The latest figures available on a monthly basis are for February when the index number was 73·2 as compared with 83·1 for March, 1938; 85·5 for March, 1937; 72·4 for March, 1936; 63·5 for March, 1933 (the low point during recent years); 95·6 for March, 1929; 98·3 for March, 1922; 164·3 for May, 1920 (the post war peak); and 64·7 for March, 1914. In the classification according to chief component materials the Vegetable Products group and the Non-Ferrous Metals Products group advanced slightly but the Animal Products group and the Non-Metallic Mineral Products group were lower. Canadian farm products advanced slightly during the month due mainly to higher prices for potatoes.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of March of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received, and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the

(*Continued on page 446*)

COST PER WEEK (IN TERMS OF THE AVERAGE RETAIL PRICES IN SIXTY-NINE CITIES IN CANADA) OF CERTAIN STAPLE FOODS, FUEL AND LIGHTING, IN THE QUANTITIES STATED, AND RENT ENTERING INTO A FAMILY BUDGET.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family.

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended March 31, 1939; monthly figures not yet available

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(*Continued from page 438*)

absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, dif-

*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18¼%; Clothing, 18¼%; Sundries, 20%.

ferences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

Retail Prices

The prices of fresh meats in the main averaged slightly higher in March continuing the advances which commenced at the beginning of the year. Sirloin steak averaged 27·2 cents per pound as compared with 26·5 cents in February and 24·9 cents in December, 1938. Rib roast of beef was 20·4 cents per pound in March as compared with 18·7 cents in December. Lard averaged one half per cent per pound lower than in February at 12·8 cents per pound. The average price of fresh eggs was little changed in March following the decline during the previous month. Flour was fractionally lower at an average price of three cents per pound. The price of potatoes has advanced gradually month by month since September, 1938, when the price was $1 per 90 pounds to $1.35 in March, 1939. No changes were reported in rent.

Following are the prices per ton reported for Welsh coal, "cobbles" and "French nut"; Halifax $15.50; Charlottetown $14; Moncton $16; Saint John $14.50; Quebec $14; Three Rivers $15 and $14; Sherbrooke $14.75; St. Hyacinthe $15; Thetford Mines $17.25; Montreal $14.75 to $15.50; Ottawa $16.50; Kingston $15; Belleville $15; Peterborough $16.75; Oshawa $15.50; Toronto $15; St. Catharines $15; Hamilton $15 and $14.50; Brantford $16.25; Galt $16 to $16.50; St. Thomas $16.50; Cobalt $19.50; Timmins $19.25; Port Arthur $17.75; Fort William $17.75; Winnipeg $20.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE accompanying tables, which appear quarterly, give the official and certain other index numbers of the cost of living, retail and wholesale prices in Great Britain and certain of the principal commercial and industrial countries. The following notes afford information as to recent changes in prices in several of these countries.

Great Britain

Wholesale Prices.—The Board of Trade index number, on the base 1930=100, was 96·8 for February as compared with 97·2 for January, a decrease of 0·4 per cent for the month. The index for food prices declined 1·5 per cent due to decreases in all its subgroups. In the industrial materials and manu-

factures group there was an increase of 0·1 per cent, an increase of 2·7 per cent in textiles other than cotton and wool being counteracted by the sum of small decreases in all the other sub-groups. Compared with a year earlier the general index showed a decline of 8·5 per cent while those for foods and industrial and manufactured goods declined 11·9 per cent and 6·7 per cent respectively.

The *Statist* index number, on the base 1867-1877=100, was 88·6 at the end of February as compared with 88·7 at the end of January. During the month food prices declined 1·0 per cent, small declines being general in the sub-groups. The index of prices of "materials" increased 0·3 per cent, decreases in minerals and sundries being more than offset by an increase of 2·7 per cent in the textile sub-group. As compared with February, 1938, the corresponding figure for the current year showed a decline of 8·1 per cent.

Cost of Living.—The Ministry of Labour's index number, on the base 1914=100, was 153 at the first of March as compared to 155 a month earlier. The index of food prices was 135 for March as compared to 138 at the first of February the decrease being mainly due to decreases in the price of eggs. The other groups making up this index were unchanged during the month.

France

Wholesale Prices.—The General Statistical Office index number, on the base 1914=100, was 677 for February as compared with 676 for January. The index of food prices declined from 657 in January to 651 in February due to decreases in both vegetable and animal foods which were only partly offset by an increase in the sugar, coffee and cocoa sub-group. The index of prices of industrial materials increased from 694 to 700 due to increases in all its sub-groups the most important of which was an increase of 2·9 per cent in the prices of textiles. The index based on gold currency, 1914=100, was unchanged at 55.

Cost of Living.—The official index number of the expenditure of a workingman's family of four persons at Paris, on the base 1914=100, was 722 for the fourth quarter of 1938 as compared to 689 for the third quarter, an increase of 4·8 per cent during the three months. The index of food prices increased from 723 to 768 or 6·2 per cent during the period.

Germany

Wholesale Prices.—The index number of the Federal Statistical Office, on the base 1913=100, was 106·5 for February being unchanged from the figure for the previous month. The index of prices of agricultural products declined 0·2 per cent, while those of colonial products and semi-manufactured goods increased 0·2 per cent and 0·1 per cent respectively; that for manufactured goods was unchanged.

Cost of Living.—The official index number, on the base 1913-1914=100, was 125·7 for February, a decrease of 0·1 per cent from the January figure. The index of clothing prices was 0·2 per cent higher than in January while food prices declined 0·1 per cent. Rent, heat and lighting materials and sundries were unchanged.

India

Wholesale Prices.—The index number of the Labour Office, Government of Bombay, on the base July, 1914=100, was 101 for December, 1938, as compared with 99 for the previous month. During the month food prices increased 5·0 per cent while non-foods increased 1·0 per cent.

Cost of Living.—The official index number of the working class cost of living at Bombay, on the base July, 1933 to June, 1934=100, was 105 for January as compared with 104 the previous month. The index of food prices was unchanged at 112; clothing and rent were also unchanged at 85 and 100 respectively. Fuel and lighting materials increased from 103 to 105 and sundries from 95 to 96.

United States

Wholesale Prices.—The Bureau of Labour Statistics index number, on the base 1926=100, was 76·9 for January, 1939, as compared with 77·0 for December, 1938. Half of the 10 major group classifications declined during the month; food decreased 2·2 per cent, house-furnishing goods, 0·7 per cent; farm products, 0·6 per cent; fuel and lighting materials, 0·5 per cent; and metals and metal products, 0·2 per cent. Textile products advanced 0·2 per cent and building materials and sundries each rose 0·1 per cent. Two groups, hides and leather products and chemicals and drugs, remained unchanged. The general index for January, 1939, was 4·9 per cent below the figure for January, 1938.

Cost of Living.—The index number of the Industrial Conference Board, on the base 1923=100, was 85·1 for February as compared to 85·4 for January, a decrease of 0·4 per cent for the month. With the exception of the fuel and light group which was unchanged all the groups making up the index showed decreases, the most important being a decline of 1·0 per cent in food prices.

RECENT LEGAL DECISIONS AFFECTING LABOUR

English Court of Appeal Upholds Workman's Right to Wages during Illness

ON February 27 the Court of Appeal unanimously allowed an appeal by a Sheffield salesman whose right to recover wages during illness had been disallowed by a County Judge.

The plaintiff employed by the defendant on a weekly basis was ill from December 4, 1937, until March 26, 1938. On the latter date he was given one week's notice. He thereupon claimed arrears of wages for the 16 weeks he was ill. The trial judge was of the opinion that when an employee was unable to perform his duties through sickness he was not entitled to wages in the absence of an express contract to that effect. He found, however, that the contract of service continued during the illness and that the defendant continued to make the contribution required under the National Health Insurance Act with respect to the plaintiff. Although there was no authority on the position of a workman under the National Health Insurance Act, he considered that it would be inequitable for the defendant to have to pay the plaintiff's wages while employing another to do his work as well as contributing under the National Health Insurance Act. The plaintiff had drawn 18s. health insurance benefit a week during his illness.

On appeal, Lord Justice Scott said that the plaintiff's illness was obviously not a breach of his contract of service and he cited cases to show that under the common law of England the right to wages continues until a contract is terminated by notice in accordance with its terms. He distinguished the present case from one relied on by the County Court Judge in which a man receiving half his wages in compensation for an accident in accordance with the rules for sick benefits incorporated in the contract could not collect full wages. He distinguished the case also from one arising under the Workmen's Compensation Act as it was right to interpret that statute as suspending the right at common law to full wages during the period of incapacity but the National Health Insurance Act, 1936, conferred benefits intended to improve the workman's position but in their nature irrespective of the amount of wages as fixed in the contract of service. *Marrison v. Bell,* The *Times,* London, February 28, 1939.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

ACCORDING to data tabulated in the Dominion Bureau of Statistics from 11,493 establishments, employment at the beginning of April showed a considerable seasonal contraction, the reported staffs aggregating 1,015,632 persons, compared with 1,031,679 in the preceding month. The statistics furnished by leading firms since 1920 show that in sixteen of the eighteen preceding years, employment at April 1 has suffered a between-seasons' recession, ordinarily resulting from the completion of the winter's work in logging camps, before any considerable numbers of persons have been absorbed into the outdoor industries opening up in the spring and summer. The general decline at the date under review was very slightly less than the average recorded at April 1 in the years since 1920, and has been considerably exceeded on several occasions in recent years, notably by the reductions indicated at the beginning of April in 1938, 1935 and 1930. After adjustment for seasonal variation, the index at the latest date stood at 111·1, compared with 111·0 at March 1, 1939.

There were important losses in logging at April 1, 1939. Mining was also seasonally quiet, and there was a falling-off in transportation and on railway construction and maintenance. On the other hand, manufacturing showed some slight improvement, and additions to staffs were noted in highway construction, services and trade.

The index (based on the 1926 average as 100) declined from 106·5 at March 1 to 104·9 at the beginning of April; at the same date in the more recent years of the record, it was as follows: 1938, 105·0; 1937, 103·0; 1936, 97·4; 1935, 93·4; 1934, 91·3; 1933, 76·0; 1932, 87·5; 1931, 99·7; 1930, 107·8; 1929, 110·4 and 1928, 102·3.

Unemployment in Trade Unions.—At the beginning of April, 1939, the percentage of unemployment reported to the Department of Labour by local trade unions was 15·7 contrasted with unemployment percentages of 16·4 at the beginning of March, and 12·8 at the beginning of April, 1938. The April percentage was based on the reports compiled from 1,962 labour organizations embracing a membership of 251,191 persons.

Employment Office Reports.—The reports of the Department of Labour from the offices of the Employment Service of Canada showed that the volume of business transacted during March, 1939, as indicated by the average daily placements, was 2 per cent below that of the preceding month and 31 per cent above that recorded during the corresponding month last year. Total placements for March were higher, however, than in February, due to their being 3 more working days in the period under review. The groups showing the major changes in both comparisons were construction and maintenance and services, in which noteworthy gains were recorded. Vacancies in March, 1939, numbered 31,086; applications, 65,948; and placements in regular and casual employment, 29,604.

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget showed little change in April as in recent months. The figures are $17.04 as compared with $17.07 for March. The slight decline in April was due to the lower cost of foods. Fuel and rent were practically unchanged. Comparative figures for certain earlier dates are $17.50 for April, 1938; $17.18 for April, 1937; $16.33 for April, 1936; $15.41 for June, 1933 (the low point during recent years); and $21.53 for April, 1930. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics advanced gradually week by week from 73·2 for the week ended April 7 to 73·5 for the week ended April 28. For the last week in March the index was 73·3 and for the week ended March 3, 73·2. Comparative figures on a monthly basis are 73·2 for March; 82·3 for April, 1938; 86·2 for April, 1937; 72·2 for April, 1936; 63·5 for February, 1933 (the low point in recent years); and 94·5 for April, 1929.

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

†For the week ended April 28, 1939.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending April 29, 1939, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending April 22, March 25 and February 25, 1939; April 24, March 26 and February 26, 1938. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation.

industrial conditions in Canada. The index of the physical volume of business was slightly higher in March both as compared with the preceding month and with March, 1938. An advance in mineral production in March as compared with February was indicated, the index for the group being up from 190·9 to 196·7 because of increases in the shipments of gold and silver and in the exports of asbestos. The indexes of manufacturing, electric power output and distribution also showed advance in the same comparison while construction was slightly lower. The increase in manufacturing was due to greater volume indicated in the production of foodstuffs, tobacco, textiles and in iron and steel. The increase in the index of distribution which is based upon trade employment, car loadings, imports and exports was due to slight increases in each of these factors except in the index for exports which was slightly lower. The decline in construction was due to a decrease in contracts awarded.

Strikes and Lockouts.—The number of strikes and lockouts recorded for April was six, involving 314 workers and causing a time loss of 1,361 man working days, which was the smallest time loss in any month since August, 1930. In March there were seven disputes, involving 1,628 workers with time loss of 10,293 days. None of the disputes in April involved many employees or caused much time loss and in March a strike of rubber workers at Kitchener, Ontario, caused eighty per cent of the time loss for the month. In April, 1938, there were 14 disputes, involving 2,871 workers with a time loss of 16,449 days, due chiefly to strikes of sawmill workers at Fort Frances, Ontario, taxicab drivers at Toronto, Ontario, and steamship employees on the Great Lakes and St. Lawrence River. Of the six disputes recorded for April, 1939, four were terminated during the month, one resulting in favour of the employer affected, two in favour of the workers involved and the result of one being recorded as indefinite. Two disputes, involving 209 workers, were recorded as unterminated at the end of April. The figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Industrial Disputes Investigation Act

During the month the Department received an interpretative supplementary report of the Board of Conciliation and Investigation in the dispute between Hendrie and Company Limited and its motor truck drivers.

The text of this report, together with particulars respecting six applications for the establishment of boards, is to be found in the section commencing on page 462.

Canadian delegation to International Labour Conference

The Canadian delegation to attend the twenty-fifth session of the International Labour Conference (League of Nations) at Geneva, opening on June 8, has been announced by the Hon. Norman McL. Rogers, Minister of Labour, to be comprised as follows:

Government Delegates:

Mr. H. H. Wrong, Geneva, Switzerland, Permanent Delegate of Canada to the League of Nations.

Mr. M. S. Campbell, Ottawa, Chief Conciliation Officer, Department of Labour.

Advisers to Government Delegates:

Mr. Thomas J. O'Neill, Member of Parliament, Kamloops.

Mr. George D. Taylor, Sault Ste. Marie, Executive Board Member, All-Canadian Congress of Labour.

Mr. Michel A. Bourdon, Montreal, Treasurer, Confederation of Catholic Workers of Canada.

Mr. Alfred Rive, Geneva, Switzerland, Second Secretary, Permanent Delegation of Canada to the League of Nations.

Employers' Delegate:

Mr. A. R. Goldie, Galt, Vice-Chairman of Babcock-Wilcox and Goldie-McCulloch Limited, and Past Chairman of the Industrial Relations Committee of the Canadian Manufacturers' Association.

Adviser to Employers' Delegate:

Mr. G. V. V. Nicholls, Toronto, Assistant Secretary of the Legal and Industrial Relations Department of the Canadian Manufacturers' Association.

Workers' Delegate:

Mr. R. J. Tallon, Ottawa, Secretary-Treasurer of the Trades and Labour Congress of Canada and President of Division No. 4, Railway Shop Crafts.

Adviser to Workers' Delegate:

Mr. William H. Phillips, Ottawa, Vice-President of the Order of Railroad Telegraphers.

In accordance with procedure followed in recent years, the nominations for employers' delegate and adviser, were made by the Cana-

dian Manufacturers' Association, and the nominations for the workers' delegate and adviser by the Trades and Labour Congress of Canada.

The International Labour Organization in Geneva, which forms part of the machinery of the League of Nations, was established under the authority of the Treaties of Peace adopted at the close of the Great War, with the object of securing the improvement of industrial conditions by legislative action and international agreement. The International Labour Conference is the annual gathering which brings together representatives of governments, employers and of workers from the fifty-six member states of the Organization, including nearly all the important industrial countries of the world. Germany ceased to be a member of the Organization in October, 1935, and the withdrawal of Italy and Japan will become effective in December, 1939, and November, 1940, respectively.

Comprising the 1939 agenda are the following items listed for the second and final stage of the double-discussion procedure of the Conference:

I. Technical and vocational education and apprenticeship.
II. Regulation of contracts of employment of indigenous workers.
III. Recruiting, placing and conditions of labour (equality of treatment) of migrant workers.
IV. Regulation of hours of work and rest periods of professional drivers (and their assistants) of vehicles engaged in road transport.
V. Generalization of the reduction of hours of work in industry, commerce and offices.
VI. Reduction of hours of work in coal mines.

An invitation has been extended to the provincial governments to be represented at this Conference but it is not known as yet what appointments, if any, may be made by the provincial authorities.

Statistics of material aid recipients for March

Preliminary figures from the National Registration for March released by the Hon. Norman McL. Rogers, Minister of Labour, showed that the grand total of all classes of persons on urban and agricultural aid in March was 1,025,000, an increase of 0·7 per cent over the February figure as revised to date, but almost 2 per cent less than in March, 1938.

The Dominion total of unemployed but fully employable persons on aid in March this year was 192,000, an increase of 0·8 per cent from the February total of 190,500. The figure for March this year represented an increase of 10 per cent over March a year ago.

A total of 703,000 persons were receiving non-agricultural aid in March this year, less than one per cent more than in the previous month. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a net increase of 7·7 per cent from the figure for March, 1938.

The number of farmers and members of their families in receipt of agricultural aid continues to show a decline from the year before. Seventy-one thousand farmers who, together with their dependents, account for a farm population of 322,000, were reported as receiving agricultural aid for subsistence in March. Of these persons 270,000 were located in the Province of Saskatchewan alone. The Dominion total on agricultural aid, while up by 0·6 per cent in March over the February revised figure was 18 per cent less than in March, 1938. The March total of farmers and their families on aid in Saskatchewan, continued to hold the improvement over a year ago, showing a decrease of 20·2 per cent in this comparison, but was virtually unchanged from February, 1939.

Youth training and national forestry programs

Recent official announcements envisage two major measures to maintain and expand youth training programs in Canada. Legislation now in progress through Parliament provides for the appropriation of four million five hundred thousand dollars "to be expended over a period of three years beginning with the fiscal year ending March 31, 1940."

In addition, the Minister of Labour, Hon. Norman McL. Rogers, in a press release of April 13, announced the inauguration by the Dominion Government of a million dollar national forestry program as an expansion of the youth training plan. This program is intended to combine training and employment of young men with protection and development of Canadian forests and wild life conservation, and will be under the joint direction of the Department of Labour and the Dominion Forest Service, Department of Mines and Resources.

While the Dominion appropriation stands at $1,000,000 considerably more than this amount may be expended. Of the $1,000,000 available, $600,000 is to be allocated to the provinces on a dollar-for-dollar basis for forest conservation work, subject to Dominion approval of programs. The remaining $400,000 will be used for forest conservation work on Dominion national parks and forest experi-

ment stations, under the direct supervision of the Dominion Forest Service, Department of Mines and Resources, as a part of the Youth Training Program. If provincial allocations are all taken up, work will be provided for a total of at least 4,000 men during a five months' period.

Conditions governing selection of the young men to be employed under the program have been laid down. They must be between 18 and 25 years of age, unemployed, and in necessitous circumstances. They will be chosen by local selection boards from applications filed with the provincial employment offices. Enrolment will be subject to medical examination. A training wage will be paid each trainee, plus board, lodging and medical attendance.

(A review of youth training administration during 1938 together with tabular statistics to February 28, 1939, will be found elsewhere in this issue on page 469.)

Courses for aircraft mechanics under youth training program

Following conferences between officials of the Department of National Defence and the Department of Labour, the co-operation of all Provinces is being sought in establishing under the Dominion-Provincial Youth Training program, courses to train young men as aircraft mechanics.

It is anticipated that the Royal Canadian Air Force will be taking on several hundred recruits next year, in the trades of air rigger, fitter, machinist, motor mechanic, wireless operator, etc. It is hoped to establish a number of classes in these trades throughout the country to give technically minded young men preliminary training based on the Air Force syllabus. Applicants will be carefully selected and may be required to undergo a medical examination, in order to ensure that they are medically fit in all respects.

On the conclusion of these classes, those young men who desire to do so, and who can pass the required tests, may be able to enlist in the Air Force for ground work. Others will probably be able to secure employment, with civil aviation companies or with the aircraft manufacturers.

Assistance of university students in youth training plan

Financial assistance to enable deserving students to enter upon or to continue a university course may be made available under the Dominion - Provincial Youth Training program, it was announced recently by the Hon. Norman McL. Rogers, Minister of Labour.

The Minister has advised Provincial Governments that projects for student aid can be submitted under the Dominion-Provincial Youth Training program. It is estimated that the plan would provide assistance to approximately 300 students in the first year, 500 in the second, and 700 in the third year. Comments have been invited from the Provinces on the project and they are asked to signify if they wish to put it into operation.

In order to receive financial assistance under the plan, students will be selected by a committee of each participating university on the basis of merit, plus need. The maximum assistance to any one student will not exceed $25 a month for eight months, and the assistance given to the students in any one university is not to exceed, on the average, $150 per student for the academic year.

As in the case of other projects under this program, Dominion and Provinces would share the cost on an equal basis. The money wlll be available for full-time students of university grade (graduates or under-graduates) in degree-granting universities and colleges and institutions affiliated, federated or associated with them, except theological colleges or seminaries. Determination of the universities eligible and the allotment of the number of students to participate in each will rest with the Provinces.

Report of Dominion Commissioner of Unemployment Relief

In accordance with the provisions of the Unemployment and Agricultural Assistance Act 1938, a report on its operations during the fiscal year has been submitted to Parliament. The administration of the Act is vested in the Minister of Labour, Mr. Harry Hereford being the Dominion Commissioner of Unemployment Relief. The report gives detailed relief statistics as reported by the Provinces and Federal Departments for the fiscal year up to and including February, 1939.

In addition to a comprehensive review of relief administration under the 1938 Act, the report gives tabular summaries of Dominion disbursements under the relief legislation of 1930, 1931, 1932, 1933, 1934, 1935, 1936, and 1937. The total of Dominion expenditure (exclusive of loans and advances) under the nine relief measures as at March 31, 1939, amounted to $345,861,770.

The report details the various phases of relief administration including grants for material aid, aid in the drought areas, re-establishment of settlers, single unemployed persons, rehabilitation of older unemployed, transportation facilities into mining areas and development of tourist highways, relief settlement, works projects (Department of Labour) and youth training.

Unemployment and Agricultural Assistance Act, 1939

The Unemployment and Agricultural Assistance Act, 1939, which received Royal Assent on May 2nd, 1939, follows in general the terms of the statutes enacted in 1936, 1937, and 1938. Power is again vested in the Governor in Council to authorize the execution of such undertakings as he may determine to be in the best interests of Canada, continuing to give employment as far as practicable to relief recipients registered with the Employment Service of Canada in the province in which the work is to be performed. Where the Dominion is providing financial assistance, contracts or undertakings under provincial jurisdiction are to be approved by the Dominion Minister of Labour and the work is to be supervised by a Dominion Government officer.

The Governor in Council may make agreements with any of the provinces for the alleviation of unemployment and agricultural distress, and to assist those in need, and may also make agreements with corporations, partnerships or individuals, engaged in industry respecting the expansion of industrial employment. No financial assistance is to be granted to any province unless it agrees to furnish such information and permit such examination and audit as the Dominion may deem necessary. The Act will expire on March 31, 1940. except as regards authority which is contained therein for the renewal or consolidation of loans, advances, or guarantees, but obligations incurred under The Unemployment and Agricultural Assistance Act, 1939, may be discharged after its expiration. The Act requires that a report shall be laid before Parliament within thirty days after the expiration of the Act, or if Parliament is not then in session shall be published and made available for distribution by the Department of Labour containing a full and correct statement of the monies expended or loaned, guarantees given and obligations contracted under the Act.

The Dominion-Provincial Youth Training Plan will not be carried on under the provisions of The Unemployment and Agricultural Assistance measure as was the case in the two previous years, a separate bill designed to be entitled The Youth Training Act, 1939, having been introduced in the House of Commons. This Bill provides for the continuation of the youth training program for a further three-year period.

Income Tax Deduction to encourage expansion of industrial plants

With a view to counteracting "the several factors which have been holding back investment in new capital enterprise" and in order to "promote a substantial expansion of employment both in heavy construction and in the machinery and equipment industries," provision was made in the Budget presented to Parliament on April 25 by Hon. Chas. A. Dunning, Minister of Finance, for a credit against income tax equal to 10 per cent of the capital cost of any extensions, replacements or betterment made to industrial plants commencing after May 1.

To implement this proposal, Mr. Dunning introduced the following resolution to amend the Income War Tax Act: "1. That a taxpayer (other than a company deriving income from a metalliferous mine to which section 89 of the act applies) shall be entitled to deduct from the tax that would otherwise be payable under the act amounts not exceeding in the aggregate ten per cent of capital costs actually incurred and paid in the period beginning May 1, 1939, and ending April 30, 1940, in respect of the construction, installation, betterment, replacement or extension of plant, machinery or fixed equipment during the same period, by deducting, in each of the first three fiscal years of the taxpayer after April 30, 1940, in which the taxpayer has taxable income, an amount not exceeding one-third of the aggregate amount of the deductions authorized."

Referring to this resolution Mr. Dunning, stated in part: "The government proposes, therefore, to offer what I believe will be a powerful incentive to all industries to go forward immediately with any justified expansion of plant and with such modernization of machinery and equipment as the progress of recent years has made essential. Any firm, therefore, which begins after May 1 next the construction, installation, betterment, replacement or extension of plant, machinery or fixed equipment will be allowed a credit against income tax equal to 10 per cent of the costs incurred for such capital projects prior to April 30, 1940—one year. This tax credit is to be spread equally over the next three years in which the firm has a taxable income. It will apply to any firm in any industry whether organized as an individual firm, partnership or corporation, except, of course, a new metalliferous mine which already has the benefit of the three-year exemption from corporate income tax."

Relief recommendations of Canadian Federation of Municipalities

Featuring the recommendations submitted to the Dominion government at the recent convention of the Canadian Federation of Mayors and Municipalities, were two resolutions in regard to relief costs. The first petitioned the Federal government "to establish such arrangements as may be necessary in order to relieve the municipalities of all responsibility for the costs of relief." The second resolution requested the Federal government "to consider the costs of labour in any Federal-Provincial Municipal unemployment relief works project as embracing 50 per cent of the costs of materials; and that the Federal and Provincial governments be requested to assume such portion of the costs of material as including labour costs."

The Federation's requests were heard at a private meeting at which the following members of the Cabinet were present: Hon. Norman Rogers, Minister of Labour; Hon. J. E. Michaud, Minister of Fisheries; Hon. T. A. Crerar, Minister of Mines and Resources, and Hon. C. D. Howe, Minister of Transport.

Subsequently the Federation's recommendations were considered by the Cabinet as a whole and an official reply made through the Hon. Mr. Rogers.

The government declared itself as being unable to comply with the request for complete assumption of relief costs, the program for the present fiscal year having already been decided. However, the Minister pointed out that the Dominion had increased its allotment for unemployment relief by ten million dollars and it was hoped that this increase would be reflected in easing the financial burden of relief through the provinces to the municipalities. The Minister also observed that the present policy would be maintained "pending such new constitutional arrangements as may result from the report of the Royal Commission on Dominion-Provincial Relations."

This policy was outlined by the Minister in the House of Commons on January 23, 1939, as follows:—

1. *Grants-in-aid.*—The Dominion Government is prepared to pay dollar for dollar with Provincial Governments for material aid (direct relief) up to a maximum federal contribution of 40 per cent in each province. Under the maximum this would mean in general terms a 40-40-20 division of the costs of material aid among the Dominion, the Province, and the Municipality. Under the same agreement the Dominion Government will share the cost of aid given to transients on a 50-50 basis with the Province.

2. *Civic Improvements.*—The Dominion Government is prepared to offer its co-operation to Provincial Governments which wish to enable certain of their Municipalities to enlarge their normal programs of civic improvements as an alternative to direct relief. To this end the Dominion Government under its agreements with the Provinces will contribute 50 per cent of the direct labour costs of such projects as have been submitted by Municipalities and approved by the Provincial and Dominion Governments, it being understood that the Provincial Government in the case of such approved projects will also contribute 50 per cent of the direct labour costs and the Municipality will bear the cost of materials and supervision. In approving applications from Municipalities for assistance to civic improvements, due consideration will be given to (*a*) the extent of unemployment in the Municipality, and (b) the value of the proposed improvement to the community and the relative cost of materials in relation to the total cost of the project. The employment on approved programs of civic improvements will be supervised, at least in the larger municipalities, by a committee which shall represent each of the three contributing Governments. This will ensure that the expenditures on civic improvements will have their maximum effect in reducing relief rolls, and will reduce at the same time the expenditures of the several Governments in the Municipality for material aid to the unemployed. This form of assistance to civic improvements will not be available to municipal projects which are accepted for another form of federal aid under the Municipal Improvements Assistance Act.

Unemployment Insurance measures in Ontario and Quebec

At the recent sessions of the Ontario and Quebec Legislatures enabling legislation was enacted authorizing participation in any plan of unemployment insurance initiated by the Dominion Government.

In the preamble to the Ontario Bill (No. 95) reference was made to "certain constitutional difficulties with regard to the enactment of the scheme," and to the desirability "that the adoption and administration of such a scheme be undertaken by the Government of Canada." The Lieutenant-Governor was empowered "to enter into any agreement or arrangement for the bringing into force within Ontario of any general scheme of unemployment insurance undertaken by the Government of Canada."

The preamble to the Quebec Bill (No. 94) after stating that "a fair, contributory and compulsory system of unemployment insurance would be a valuable social and economic advantage for the working class and the public generally," and that "the unemployment problem in Canada is one for which the responsibility and public expenditure rest chiefly with the federal authorities," authorized the Lieutenant-Governor "to enter into with the Federal Government any agreement which he may deem just and in conformity with the interests and constitutional rights of this province . . . ."

Further extension of Technical Education Act of 1919

Legislation to extend the provisions of the Technical Education Act, 1919, in so far as it is applicable to the province of Manitoba, which had been unable to earn its original allotment, received Royal Assent on April 5.

In the original Act the sum of ten million dollars was designated to be expended over a period of ten years. The yearly grants to the provinces sanctioned under the provisions of the Act were determined by first setting aside the sum of ten thousand dollars for each province and then dividing the remainder in proportion to population. Money was not given to the provinces to expend, but each provincial Government was reimbursed, within the limits of its appropriation, to the extent of one-half of approved expenditures on work which comes within the scope of the Act.

At the expiration of the ten-year period only one province (Ontario) had earned its entire appropriation and the Act was therefore extended for a period of five years in order that the other provinces might have a further opportunity to earn the balance of their original quota.

In 1934, the Act was again extended for another five years to enable Saskatchewan, Manitoba and Nova Scotia (which provinces still had balances unexpended) to earn the amounts still remaining to their credit. At the expiration of this extension Manitoba alone still had a balance remaining.

Hungary and Peru to continue participation in work of I.L.O.

On April 12, the International Labour Office received a telegram from the Minister for Foreign Affairs of Hungary advising that although that country had withdrawn from the League of Nations, the Hungarian Government intended to continue participating in the work of the International Labour Organization for the bettering of the condition of workers.

On April 15, Peru also advised the I.L.O. of its withdrawal from the League of Nations and of its intention to continue participation in the work of the International Labour Organization.

27th Convention International Association of Public Employment Services

The 27th Annual Convention of the International Association of Public Employment Services was held at New Orleans, Louisiana, on April 12, 13 and 14, 1939. About 700 delegates were present, with the Employment Service of Canada being represented by V. C. Phelan, Assistant Director, of Ottawa; J. Neish, Provincial General Superintendent, from Winnipeg, and M. W. Robertson, Provincial General Superintendent, from Edmonton. Panel discussions covered a wide field of employment office technique, based largely upon the experience of officials in the United States in the reorganization of public employment services due to the introduction of unemployment compensation legislation across the country.

Leonard J. Maloney of Hartford, Connecticut, was elected as President for the ensuing year. V. C. Phelan, of Ottawa, was re-elected as First Vice-President and James Neish, of Winnipeg, was added to the Executive Board. The 1940 convention will be held in Kansas City

Survey of World Unemployment Situation

According to a quarterly report published in *Industrial and Labour Information* for April 3, issued by the International Labour Office, industrial employment during the period November, 1938, to March, 1939, was somewhat better than in the preceding three months.

Of the 20 countries for which statistics of industrial employment are available, the number of persons in employment increased in 13 countries during the period reviewed compared with the same period a year ago and decreased in six (Australia, Canada, Finland, Luxemburg, Sweden, and Switzerland) and remained stationary in one (Norway).

With regard to unemployment, the reports from 23 countries show that eight countries registered an increase as compared with a year ago and 11 a decrease. In a few cases the change was very slight while in some countries various sets of statistics showed inconsistent trends. It was recorded that unemployment had increased in 9 countries (Australia, Belgium, Canada, Chile, France, Hungary, Ireland, Sweden and the United Kingdom) and decreased in 12, while in two the situation was not clear.

In presenting these statistics of employment and unemployment, the International Labour Office emphasizes the limitations of such figures, and states that they do not afford any comparison of levels of unemployment or employment in the various countries as methods applied in compiling such statistics differ from one country to another, and the figures only serve as an indication of the trend of employment and unemployment in the countries concerned.

Statistics based on unemployment insurance schemes indicate declines in unemployment over the corresponding period of 1938 ranging from 1·2 in the Netherlands to 0·4 in

Switzerland and 0·9 in Denmark. Increases in unemployment were registered from this source in Belgium of 5·1 and the United Kingdom of 0·4.

Returns from trade unions show that unemployment had decreased 0·8 per cent in Sweden and 3·9 per cent in the United States. Figures from this source indicate that unemployment has increased 3·5 per cent in Canada and 0·7 per cent in Australia.

Indices of employment computed from statistics obtained the operation of social insurance schemes register improvement in all countries so reporting. The increases in employment range from 9·1 in Hungary and 8·1 in Germany to 0·8 in Great Britain. Increases were also reported in Latvia (3·0), the Netherlands (5·0) and Yugoslavia (3·1).

Returns from selected establishments for the quarterly period registered declines in employment in Canada, of 3·3; Australia, 1·4; Finland, 5·6; Luxemburg, 1·5; Sweden, 1·2; Switzerland, 0·9. Increases in employment were indicated in statistics obtained from this source in Estonia, 7·2; France, 3·2; Italy, 1·9; Japan, 10·5; Poland, 4·7; South Africa, 3·9; and the United States, 1·4.

Note.—*More recent and detailed statistics dealing with the employment situation in Canada are given in the article (four sections) "Employment and Unemployment in Canada in March, 1939" to be found elsewhere in this issue.*

ERRATA

In report No. 22 entitled *Wages and Hours of Labour in Canada, 1929, 1937 and 1938,* issued as a supplement to the March issue of the Labour Gazette, the following corrections are required:—

On page 38—Add footnote "(a) Without board and lodging."

On page 134—Column 1, line 22—insert after "establishments" the words "are limited to 55 a week."

On page 134—Column 1, line 23—insert after "week" the words "in towns of over 10,000 population."

On page 139—Column 1—insert as line 12 the following: "effect and apply to factories; seasonal can-"

On page 142—Column 2—insert as third and fourth lines the following:—"rate of 30 cents an hour for the hours worked. The rates for employees to whom."

On page 144—Column 1—omit third and fourth lines.

On page 158—Column 2, line 44—for "cents for beginners to 26 cents after one year" *read* "cents for helpers; for erection work: erectors."

In the April issue of the Labour Gazette (page 399) in an article on the "Legal Minimum Age for Employment of Children in Canada" there was an error in the statement relating to the statutory school-leaving age in Prince Edward Island. By an amendment of 1938, school attendance in Prince Edward Island is now compulsory up to 15 years of age instead of 13 for at least 60 per cent of the term in rural districts and for the whole term in Charlottetown and Summerside.

I. L. O. Report on Legal Status of Women at Work

A report published recently by the International Labour Office on the problems of women's work with an analysis of the laws and regulations in force in different countries shows that in many respects the legal status of women has been brought into harmony with that of men in the same occupations.

The report is in 12 chapters dealing with method of regulation of women's work; public administrative departments concerned with employment of women; maternity protection; hours of work; night work; the employment of women in unhealthy, exhausting and dangerous work; the employment of women on work involving moral dangers; the regulation of the right to employment; wage regulation; differential treatment of the sexes in social insurance schemes; the legal status of women professional workers; and labour problems arising out of the civil and political status of women.

Labour Productivity in U. S. Shoe Industry

Output of shoes per man-hour has increased markedly with the mechanization of the shoe industry. Such factors as style changes, managerial policies, and dexterity of individual workers have each played an important role in determining the extent of the increase in labour productivity. A study conducted by the United States Bureau of Labour Statistics in co-operation with the National Research Project of the W.P.A. revealed that man-hour output in a group of plants producing men's shoes in 1935 was about 21·5 per cent higher than in 1929 and 38 per cent higher than in 1923. Noticeable increases in the output per man-hour of various grades of women's shoes were also found.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

SIX applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour recently as follows:—

(1) From 26 truck drivers, van men and helpers in the employ of the Saskatoon Cartage and Warehouse Company at Saskatoon, Saskatchewan. The employees, members of Division No. 200, Automotive Transport Section, Canadian Brotherhood of Railway Employees, request an agreement with the company covering wages, hours of labour and working conditions. The dispute also affects 34 employees indirectly.

(2) From 103 employees of the Malagash Salt Company, Limited, at Malagash, Nova Scotia. The employees are members of the United Salt Mine Workers Local Industrial Union No. 323 (C.I.O.). They request an eight-hour day, increased wages and the elimination of certain conditions and practices which are claimed to be detrimental to the health and safety of the employees.

(3) From certain employees of the Canadian National Railways at Port Arthur, Ontario, being stevedores, coopers, sealers, checkers, porters, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The request of the employees for increased wages and certain improvements in working conditions is stated to be the cause of the dispute, which affects 300 employees directly and 700 indirectly.

(4) From certain employees of the Canadian Pacific Railway Company at Fort William, Ontario, being stevedores, coopers, sealers, checkers, porters, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The dispute relates to the employees' request for increased wages and improved working conditions, 400 men being directly affected and 700 indirectly.

(5) From marine engineers in the employ of the Canadian Pacific Steamships Limited in its Pacific Service. Sixty-one employees, members of Councils Nos. 6 and 7 of the National Association of Marine Engineers of Canada, Inc., are stated to be directly affected by the dispute, which relates to the men's request for an adjustment of wages and living conditions and a signed agreement with the union.

(6) From 41 employees of the Eastern Light and Power Company, Limited, at Sydney, Nova Scotia, being linemen, operators, etc., members of Local Union "B" 1089, International Brotherhood of Electrical Workers. The employees' demands for wage increases, improved working conditions and a signed agreement are stated to be the cause of the dispute.

Supplementary Report of Board in Dispute between Hendrie and Company Limited and Its Motor Truck Drivers

The Board of Conciliation and Investigation which last winter, under the chairmanship of Professor Kenneth W. Taylor, dealt with a dispute between Hendrie and Company Limited and its motor truck drivers, members of the Canadian Brotherhood of Railway Employees, was reconvened in April by the Minister of Labour for the purpose of interpreting certain clauses of the Memorandum of Settlement embodied in the board's report. The text of the report appeared in the December, 1938, issue of the LABOUR GAZETTE at page 1335. The board submitted its opinions upon these questions in a report dated April 14, the text of which follows:—

Text of Supplementary Report

The Honourable the Minister of Labour,
Ottawa.

Re Industrial Disputes Investigation Act and re differences between Hendrie and Company Limited, Toronto, and their motor truck drivers, members of the Canadian Brotherhood of Railway Employees.

Sir:

In conformity with your request made under Section 28 of the Industrial Disputes Investigation Act, the Board in the above matter reconvened on April 10, 1939, and held a further sitting on April 14, 1939.

It has considered carefully the questions placed before it and submits the following unanimous report of its opinion upon them.

Question 1.

Was it the understanding of the Board that monthly rated employees senior in the service of the Company should be prevented by the Company from getting full-time employment when work was available and being performed by junior employees, or were the senior employees, in the opinion of the Board, to be given full-time employment when work was available and could be arranged by lay-off or shortening the hours of employment of junior employees?

Answer.

It was the understanding of the Board that the senior employees were to be given full-time employment when work was available,

and could be arranged by lay-off or shortening the hours of employment of the junior employees.

Question 2a.

Was it the understanding of the Board that an employee who worked fifty-one hours and fifty-five minutes in any week should be paid the weekly proportion of his monthly rate, less five minutes, or less two hours and five minutes?

Answer.

In the opinion of the Board an employee who worked fifty-one hours and fifty-five minutes is entitled to the weekly proportion of his monthly rate, less five minutes.

Question 2b.

If an employee worked fifty-two hours in a week, and twenty minutes of that fifty-two hours was overtime, under Section A, Clause 9 of the Memorandum, is the employee entitled to a full week's pay?

Answer.

In the opinion of the Board the employee is entitled to a full week's pay.

In respect of questions 2a and 2b the Board is of the opinion that wage payments back to December 1, 1938, should be made to conform to the above opinions.

Question 3.

Were any truck drivers exempted from the provision of item 3 of the Memorandum of Settlement?

Answer.

In the discussions leading up to the drafting of the Memorandum of Settlement, it was agreed that two classes of employees viz., (a) Horse Van Drivers, and (b) Machinery Movers, were in a specially skilled class, and to that extent were outside the ordinary seniority rule; but it is the opinion of the Board that when such men are employed on ordinary freight they are to take their place in order of seniority.

All of which is respectfully submitted.

(Sgd.) K. W. Taylor,
Chairman.

(Sgd.) H. A. F. Boyde,
Member.

(Sgd.) J. L. Cohen,
Member.

Hamilton, Ontario, April 14, 1939.

Mothers' Allowances in Saskatchewan

The report of the Commissioner of Child Welfare of Saskatchewan for the fiscal year ended April 30, 1938, contains a review of the administration of mothers' allowances during that period.

Prefacing the tabular summary is the following paragraph:

"Notwithstanding the very careful administration of this part of the Child Welfare work, the amount paid for the year increased a little over ten thousand dollars. While there are those who think our scale of allowances is fairly low, the recipients themselves seem to invariably prefer the allowance to ordinary relief. In the cities some of the recipients obtain partial relief in addition to the allowance and are given a small exemption on the allowance so that they are better off financially than if they depended upon the relief allowance alone."

The statistics indicate that mothers' allowances disbursements during 1937-38, totalled $495,988.24. For April 1938, (the last month of the fiscal year) the situation as regards mothers' allowances in the province was as follows: Total number of families, 3,007; number of widows, 2,120; number of deserted wives, 75; husband living, 667; number of guardians, 145; amount paid, $41,245.27; number of children under 16 years, 7,854; average paid per recipient, $13.71; average paid per child, $5.25.

Mechanization and Productivity of Labour in the Cigar Manufacturing Industry is the title of a report (Bulletin 660) prepared by the United States Bureau of Labor.

In a preface to the report Isador Lubin, Commissioner of Labor Statistics states: "The cigar-manufacturing industry presents an unusual case in the study of mechanization, since major changes in man-hour productivity in this industry over the last 20 years have been brought about principally by the mechanization of one process. Moreover, not all concerns have mechanized, a substantial number of establishments for one reason or another continuing to use the older, hand-labour, craftsmanship methods. In many factories to-day one may find and study manufacturing methods substantially the same as those in general use 20 and 30 years ago. For these reasons, the present survey, though designed principally to study the productivity of labour in the industry to-day, has been somewhat extended in scope to appraise changes brought about by the introduction of improved manufacturing methods in the last 20 or 30 years.

STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1939

THE following table shows the number of disputes, workers involved and time loss for April, 1939, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in man working days
*Apr. 1939.....	6	314	1,361
*Mar. 1939.....	7	1,628	10,293
Apr. 1938.....	14	2,871	16,449

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

While the number of strikes and lockouts recorded for April was slightly less than that for March both the numbers of workers involved and the time loss were much less than in March when one strike of rubber workers at Kitchener, Ont., involved over one-half of those involved in all disputes and caused eighty per cent of the time loss. The figures for April do not include three disputes noted below as to which the information received was not complete. In April, 1938, most of the workers involved and time loss were affected by three disputes, namely, the strikes of sawmill workers at Fort Frances, Ont., taxicab drivers at Toronto, Ont., and steamship employees on the Great Lakes and St. Lawrence River.

There were no disputes carried over from March but six disputes commenced during April, four of which were terminated during the month, one resulting in favour of the employer affected and two in favour of the workers involved while the result of the other was recorded as indefinite. At the end of the month, therefore, there were two strikes or lockouts on record, namely: rubber factory workers, Kitchener, Ont., and fish handlers and truck drivers, Winnipeg, Man.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to eight such disputes, namely: coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; lime plant workers, Blubber Bay, B.C., June 2, 1938, one employer; lithographers, London, Ont., August 31, 1938, one employer; bakers and helpers, Vancouver, B.C., November 11, 1938, one employer; dressmakers, Montreal, P.Q., January 20, 1939, one employer; and stationary engineers, Toronto, Ont., March 2, 1939, one employer.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A dispute in a silk mill at Valleyfield, P.Q., about April 1, involved a number of weavers for a few hours in protest against increasing the number of looms per person without any increase in wages. Work was reported to be resumed when the employer agreed to restore the previous conditions.

A minor dispute on April 6 at Timmins, Ont., involved eight to sixteen bakery employees, members of the Bakery and Confectionery Workers' International Union in one establishment who ceased work to enforce demands for a union agreement with increased wages and reduced hours. Work was resumed in about three and one-half hours as a result of negotiations. A closed shop union agreement, outlined elsewhere in this issue, was signed providing for increases in wages and reduction in hours.

A minor dispute on April 19 at Timmins, Ont., involved three bakery employees in a dispute for five hours. It was alleged that the employees were dismissed for union activity when they demanded increased wages and reduced hours. The union picketed the plant and work was resumed when a closed shop union agreement, outlined elsewhere in this issue, was signed.

A cessation of work for about an hour by a number of the employees in an artificial silk mill at Cornwall, Ont., occurred on April 20 owing to a dispute as to seniority under the agreement in regard to the re-employment and lay-off of certain classes of workers for some special work. The employees remained in the factory pending a settlement and when informed that a conciliation officer of the Dominion Department of Labour was coming

to deal with the dispute, work was resumed. A satisfactory arrangement was reached a few days later.

A dispute involving shoe factory workers in one establishment at Vancouver, B.C., has been reported. The closing down of the factory on April 6, with a notice to employees to apply for re-employment, was alleged by the workers' representatives to be a lockout as the result of the organization of a union, following a ten per cent reduction in wages. The employer stated that the plant was closed owing to business conditions. The secretary of the Trades and Labour Council and other workers' representatives interviewed the management but a settlement was not reached. The management stated that the employees were free to join any organization desired. The plant was reopened on April 12 and 69 out of 100 employees were given work, the number later being increased. It was reported that the employees resumed work on the advice of an official of the British Columbia Department of Labour.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes Commencing During April

COAL MINERS, INVERNESS, N.S.—A number of the longwall miners in one colliery ceased work on April 26 when demands for assistants to help with timbering materials, etc., were refused. It was stated that the miners had

STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1939*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to April, 1939				
NONE.				
(b) Strikes and Lockouts commencing during April, 1939				
MINING, ETC.—				
Coal miners, Inverness, N.S.	1	35	105	Commenced Apr. 25; *re* demand by longwall miners for assistants to carry materials; terminated Apr. 27; pending investigation by Dept. of Mines; indefinite.
MANUFACTURING—				
Rubber Products—				
Rubber factory workers, Kitchener, Ont.	1	200	1,000	Commenced Apr. 25; for increased wages, piece rates; unterminated.
Textiles, Clothing, etc.—				
Clothing factory workers, Winnipeg, Man.	1	25	100	Commenced Apr. 15; alleged violation of agreement *re* wage rates; terminated Apr. 19; conciliation (local); in favour of workers.
Miscellaneous Wood Products—				
Door factory workers, Terrebonne, P.Q.	1	15	15	Commenced Apr. 25; for discharge of a foreman and re-engagement of another; terminated Apr. 25; return of workers; in favour of employer.
Miscellaneous—				
Bedding factory workers (upholsterers, etc.), Montreal, P.Q.	1	30	60	Commenced Apr. 26; against reduction in wage rates; terminated Apr. 27; negotiations; in favour of workers.
TRADE—				
Fish handlers and truck drivers, Winnipeg, Man.	1	9	81	Commenced Apr. 20; for recognition of union, increased wages and reduced hours; unterminated.

* In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

agreed some time ago to carry the props, etc., to the working place but objected to the distance sometimes involved. The rest of the miners continued to operate the mine. The colliery being operated under the management of the Nova Scotia Department of Mines, when officials were reported to be on the way to deal with the dispute, work was resumed on April 28 pending the result. Later it was arranged that the miners involved would be assigned to other working places.

RUBBER FACTORY WORKERS (SHOES), KITCHENER, ONT.—Twenty employees, boys and young men, ceased work on April 25 to enforce a demand for an increase in wages, and 175 other employees were reported to have also stopped work in support of them. On April 27 the shoe department of the factory was closed as the flow of work for the remaining 200 employees had stopped. The management stated that they had offered to deal with the wage demand later in the week. From April 29 to May 1 a conference between the management and the representatives of the workers, members of the United Rubber Workers of America, was reported to be in progress.

CLOTHING FACTORY WORKERS, WINNIPEG, MAN.—Employees of a garment manufacturing establishment ceased work on April 15, alleging violation of an agreement with the United Garment Workers of America in the payment of the piece work wages. As a result of conciliation by the garment manufacturers' association work was resumed on April 20, the employer having agreed to pay the back wages due under the agreement and to meet the other wage demands of the workers.

DOOR FACTORY WORKERS, TERREBONNE, P.Q.—A number of the employees engaged in the veneer department in a door manufacturing establishment ceased work on April 24 following a dispute between two foremen as a result of which one of the foremen left and the men under him, demanding dismissal of the other foreman and the re-engagement of the one who had left, stayed away from work on the next day. The strikers returned to work on April 26 without securing their demand.

BEDDING FACTORY WORKERS, MONTREAL, P.Q.—The upholsterers employed in a bedding manufacturing establishment at Montreal, P.Q., ceased work on April 26, a conference between union representatives and the management not having resulted in a settlement of a dispute as to a ten per cent reduction in wages. The upholsterers are members of the Upholsterers, Furniture, Carpet, Linoleum and Awning Workers' International Union, and were supported by the Trades and Labour Council. The establishment was picketed and mattress workers were reported to be ready to cease work also. After two days work was resumed when the management restored the wage rates and it was reported also restored a five per cent wage reduction for mattress workers. The president of the Montreal Trades and Labour Council assisted in negotiating the settlement.

FISH HANDLERS AND TRUCK DRIVERS, WINNIPEG, MAN.—A number of fish handlers and truck drivers employed by a fish processing and storage establishment ceased work on April 20 demanding recognition of the Butchers' and Meat Packers' Federal Union and ten per cent increase in wages with time and one-half for overtime and a reduction in hours from 54 per week to 48. The union applied for a board of conciliation under the Manitoba Strikes and Lockouts Act and a conciliation officer had been appointed but the application was withdrawn before the dispute had been dealt with. Two truck drivers of the company were badly beaten by men alleged to be sympathizers with the strike and the company stopped the use of its own trucks and engaged a trucking company for the work. A settlement was not reached by the end of the month but proposals were stated to be under consideration for a conciliation committee.

Apprenticeship bills have been introduced in the following State legislatures: California, Colorado, Connecticut, Georgia, Indiana, Kansas, Massachusetts, New Hampshire, North Carolina, Ohio, Texas, Utah, and Wyoming, and enacted in Nevada.

The Wisconsin legislature is considering amendments relating to: Compulsory plumbing and carpentry apprenticeship; raising the required school instruction to 144 hours a year; and increasing the appropriation for the Apprenticeship Division of the Industrial Commission.

Older youths with the benefit of longer work experience demand higher wages than youths who have more recently entered the labour market, according to a preliminary tabulation on a survey of youth in the labour market being conducted by the Research Division of the Works Progress Administration. Sixty-seven per cent of the youths included in the study had private employment at some time during 1938 but only fifty-six per cent had private jobs at time of interview.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month bringing down to date that given in the March, 1939, issue in the review of Strikes and Lockouts in Canada and Other Countries, 1938. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is obtained for the most part from newspaper reports which at times are uncertain and incomplete.

Great Britain

In Great Britain the *Ministry of Labour Gazette* publishes statistics dealing with all strikes and gives some details in regard to the more important ones. These details, which are published after investigation, do not always agree with the information given earlier in the press.

The number of strikes which began during March was 64 and 18 were unterminated at the end of the previous month, making a total of 82 in progress during the month, involving 20,000 workers, with a resultant time loss of 90,000 man working days.

Of the 64 disputes which began during March, 11 arose out of demands for increases in wages, four were against proposed reductions in wages and 15 were over other wage questions; two were over questions of working hours, 20 arose out of questions respecting the employment of particular classes or persons, seven were over working conditions and two were over questions of trade union principle. Three disputes were due to sympathetic action.

Final settlements reached during March numbered 60. Of these, 11 were settled in favour of the workers, 30 were settled in favour of the employers and 19 resulted in compromises. In the case of three other disputes work was resumed pending negotiations.

The dispute which involved the largest number of workers during March was one of 3,600 dock workers at Glasgow. The strike started on March 27 over a refusal to accept the terms of a new agreement negotiated between the employers and the trade union. Only one ship was affected the first day but the dispute spread until on March 29, 1,500 workers were involved. A lockout by the employers followed at noon the same day, involving the whole port. Work was resumed on April 1, when the new agreement was accepted.

At a colliery at Wrexham in northern Wales, 1,200 workers ceased work on March 2 as the result of a dispute regarding the re-employment of workers who had been temporarily laid off. An agreement as to the re-engagement of such workers was reached and work was resumed the same day.

At Barrow-in-Furness in Lancashire 700 engineers (machinists, etc.) employed by one firm ceased work at noon, March 15, in protest against the suspension of a fitter who was alleged to have left work before the proper time. Work was resumed 24 hours later but the nature of the settlement was not stated in the *Ministry of Labour Gazette*.

The introduction of a new system of timing of piecework led to a strike of 500 engineers (machinists, etc.) employed by one firm at Loughborough, Leicestershire. The strike began March 29, work being resumed the next day to permit of negotiations.

On February 24, 200 lightermen employed by one firm at London ceased work demanding the introduction of a "rota" system of employment involving the employment of all staff, permanent and temporary, for equal periods of time. On March 2, 500 other lightermen employed by various firms ceased work refusing to shift barges owned by the firm first involved in the dispute. On March 6 work was resumed on the advice of trade union officials.

Belgium

The monthly labour review of Belgium reports four strikes as having begun during February which together with six unterminated at the end of January, made a total of 10 in progress, involving 1,297 workers and resulting in a time loss of 7,000 man-working days. Nine of these strikes were over questions respecting wages, the other arising out of working conditions. Settlements were reached in eight disputes during March; one strike was successful, four were unsuccessful and three ended in compromises.

United States

Preliminary estimates of strikes in February, 1939, which as the Bureau of Labour Statistics points out, are based on "scattered

information from newspaper and other sources and are subject to revision as more definite reports are received" show 185 strikes as beginning during the month, which with 100 unterminated at the end of January made a total of 285 in progress during the month. The number of workers involved in these disputes was 70,000 with a resultant time loss of 600,000 man-working days. The comparable figures for the previous month, which have been partially revised but are not final show that there were 255 strikes in progress, involving about 65,000 workers, with a resultant time loss of 525,000 man-working days.

The suspension of operations in bituminous coal mines in the Appalachian field which began April 3 (LABOUR GAZETTE, April, 1939, pages 382-383) continued throughout the month of April. Negotiations between the United Mine Workers of America, affiliated with the Congress of Industrial Organizations, and the mine owners continued with interruptions throughout the month. Agreement on questions of wages and hours was reached quite early in the negotiations, both sides having agreed to a continuation of the wage rates and schedules of hours contained in the previous contract. The representatives of the union demand that the United Mine Workers be granted a closed shop or that the clause in the former agreement imposing a penalty against unauthorized strikes be removed. They claim that failing a closed shop agreement they should have the right to strike, since otherwise, the Progressive Miners' Union, an affiliate of the American Federation of Labor, might by obtaining as members the majority of the workers in any one mine, go before the National Labor Relations Board asking for an election to decide which union should represent the workers in that mine. The union also contends that the operators may impose lock-outs without incurring any penalty.

While refusing the closed shop or the elimination of the penalty clause, which they claim is essential to the enforcement of the agreement and the stabilization of the industry, the operators have offered to make the United Mine Workers the sole bargaining agency in their mines and have proposed to check off from the employees' wages monthly dues irrespective of the employees' union membership. This money would be turned over to the union as a "service charge" for administering the contract.

Although various municipal and federal officials endeavoured to mediate, drawing attention to threatened curtailment of the services of various public utilities which rely on bituminous coal in the production of electric power, the disputants were deadlocked at the beginning of May and on or about May 3 bituminous miners in fields other than the Appalachian were ordered to cease work. These additional strikers are reported to number about 100,000, bringing the total number involved up to about 420,000.

During April the operators and miners in the Pennsylvania anthracite fields were also negotiating for a new agreement and it was reported that if no settlement was reached by May 8, 100,000 of the latter would cease work.

On April 18 the National Maritime Union called a strike of its members on oil tankers when the oil companies who owned the ships refused to insert a preferential hiring clause in the new agreement which was being negotiated. By the end of the month it was reported that over 100 ships and more than 5,000 seamen were involved.

National Housing Statistics

In a press release issued by the Hon. Chas. A. Dunning, Minister of Finance it was reported that National Housing Act loans for April totalled $1,403,379, or 69 per cent above approvals in the corresponding month of last year. This brings to $32,032,273 the total Dominion and National Housing Act loans approved to April 30, 1939. Number of family housing units financed was 438 as against 235 in April, 1938, an increase of 86 per cent.

A steadily expanding number of the loans approved are being utilized to finance the construction of low-cost homes. Of the 438 housing units financed in April, 138 or approximately 32 per cent were financed by loans of $2,500 or less, and 347 or approximately 80 per cent were financed by loans of $3,500 or less. The average loan for the month was $3,204 per unit.

Total Housing Act loans to April 30, 1939, divided according to provinces, are as follows:—

	Units	Amount
Prince Edward Island	15	$ 80,034
Nova Scotia	469	1,983,470
New Brunswick	135	554,417
Quebec	2,053	8,618,927
Ontario	4,067	15,121,305
Manitoba	307	1,173,488
Saskatchewan	15	44,740
Alberta	..	.....
British Columbia	1,391	4,455,892
	8,452	$32,032,273

Approvals during the past 12 months have amounted to $16,176,869 as compared with $8,790,607 in the preceding 12 months.

YOUTH TRAINING IN CANADA IN 1938

Statistical Data on Numbers Trained and Types of Projects by Provinces

INCLUDED in the report of the Dominion Commissioner of Unemployment Relief (Mr. Harry Hereford) on the administration of the Unemployment and Agricultural Assistance Act, 1938, is a section on youth training with tabular statistics detailing the situation to February 28, 1939. (A reference to the other features of the report appears elsewhere in this issue on page 457.)

Reviewing the background of the youth training program, the report indicates the 50-50 basis of the agreements with each province bearing its administration costs.

Those eligible to participate were young people, male or female, between 16 and 30 years of age, not gainfully employed and certified as being in necessitous circumstances, including deserving transients. Trainees were selected by each province subject to approval of a representative of the Dominion Department of Labour. The agreements provided that selection of trainees be made without discrimination or favour in relation to racial origin, religious views or political affiliations.

The agreements provided for the payment of travelling expenses, and living allowances to trainees, where necessary, also for the appointment of special instructors, project supervisors, vocational guidance officers, and placement officers. Over twenty-five placement officers, whose responsibility it was to locate suitable employment for trainees, were appointed, such appointments being made in all the provinces except Prince Edward Island and British Columbia. Instructors of classes and project supervisors also devoted a certain amount of time to placement work. Wherever placements were made the employer agreed that none of his existing staff would be displaced; that he would employ and train the young person in the occupation stated and retain his or her services, if satisfactory, as long as work was available.

Amounts allotted to each of the provinces were as follows: Prince Edward Island, $20,000; Nova Scotia, $90,000; New Brunswick, $76,500; Quebec, $325,000; Ontario, $350,000; Manitoba, $150,000; Saskatchewan, $120,000; Alberta, $120,000; British Columbia, $155,000.

The projects undertaken comprised four main types:—

1. Work training projects related to forestry and mining, designed to conserve and develop natural resources and afford work and training to young men.

2. Occupational training, designed to fit young men and young women for specific occupations of a skilled or semi-skilled nature.

3. Courses for rural young men and women to provide the necessary theoretical and practical knowledge which would enable them to obtain a better economic return from their home farm and to improve the comfort of rural home life.

4. Physical recreation and health projects, designed to maintain the morale and increase the physical fitness of young people.

The last two mentioned types of projects were not designed to place young people in wage-earning employment, and it will be seen from section "G" of the accompanying table that the number enrolled in these courses comprised over seventy per cent of the total number in receipt of training during 1938-39.

The following classes or courses were held in the various provinces:—

Prince Edward Island—

For women—
Catering for tourists, handicrafts, homecraft and home nursing.

For men—
General agriculture, farm mechanics, egg and poultry grading, rural community leadership, carpentry, fisheries, woodlot cultivation.

Nova Scotia—

For women—
Home service training schools, rural homecraft and handicrafts.

For men—
Mine training, auxiliary industrial apprenticeships, farm mechanics, poultry and egg grading, pruning and grafting, beekeeping, fur farming, general agricultural short courses.

New Brunswick—

For women—
Home service training schools, rural handicrafts and homecraft.

For men—
Foresty, prospecting, surveying, general agriculture, farm mechanics, radio servicing, wireless telegraphy operating, house wiring, motor mechanics, carpentry, building construction, salesmanship, community leadership.

(1) Quebec and Alberta figures for 1938-39 are incomplete.

NOTE.—In reference to Section "B" it is observed that not all the projects undertaken have been designed to place those trained in wage earning employment. A large proportion of the numbers shown in Section "A" were enrolled in Physical Training courses and in a wide variety of rural courses. In respect to the 1938-39 activities Section "G" shows separately the numbers in the various courses designed to train for wage earning employment and those in other courses. Section "B" includes those who obtained employment during or on completion of their courses, and those subsequently placed by instructors or placement officers, but does not include those who subsequently on their own initiative found work. There is no authoritative information as to the numbers who have obtained employment in this latter way, but sample surveys indicate that the number is considerable.

It is noted that, from the commencement in 1937 to February 28, 1939, the total number in courses designed to train for employment was 27,407, of whom 9,034 discontinued training before the completion of their courses, of the remaining 18,373, there have been placed in employment 7,007 or over 38 per cent and there were still in training 5,827 at February 28, 1939.

* On May 15, 1939, the Minister of Labour announced later figures in regard to youth training. These statistics indicated that to March 31, 1939, the total number given training was 117,000. The Minister also announced that employment had been found for 40½ per cent of the youths completing courses designed to lead to employment.

Quebec—

For women—

Rural homecraft and handicrafts, hotel assistants.

For men—

Mining, forestry, general agriculture (parish courses), rural co-operatives and credit unions, ski instructors.

Ontario—

For women—

Home service training schools, waitresses, art textile design, industrial learnerships.

For men—

Mining, tobacco curing, farm apprentices, male nurses, parks and gardening, wireless telegraphy operating, machine shop, welding, carpentry, industrial apprentices and learners.

Manitoba—

For women—

Home service training schools, specialized services, rural homecraft, home nursing, dressmaking, commercial refresher, commercial art, retail selling.

For men—

Foresty, industrial learners, agricultural courses, motor mechanics, welding, auto body work, machine shop, radio and electricity, carpentry, mechanical drafting, sheet metal work, diesel engineering, printing, aircraft ground work, commercial refresher, first aid.

Saskatchewan—

For women—

Home service training schools, rural homecraft and handicrafts, agricultural subjects, dressmaking, commercial refresher, interior decorating, home nursing, cooking.

For men—

University agricultural courses, short agricultural courses, carpentry, motor mechanics, radio servicing, machine shop, welding, house wiring, diesel engineering, aviation, commercial refresher, first aid.

Alberta—

For women—

Home service training schools, agricultural short courses (homecraft and handicrafts), industrial learnerships, physical recreation, occupational centres.

For men—

Forestry, farm apprentices, industrial apprentices and learners, physical recreation, first aid, occupational centres.

British Columbia—

For women—

Home service training schools, dressmaking, power sewing machine operation, waitresses, retail selling, commercial refresher, rural short courses, physical recreation.

For men—

Forestry, mining, woodworking, building construction, motor mechanics, radio servicing, diesel engineering, plastering, painting and decorating, first aid, physical recreation.

The accompanying table is a statistical summary of the youth training plan from its commencement in 1937 to February 28, 1939.

Canada's Tourist Trade

The estimated expenditures of tourists visiting Canada during 1938 were $273,431,000 in comparison with $290,581,000 in 1937. A large part of this revenue was accounted for by visitors from the United States, more than 17,000,000 persons having crossed the international boundary into Canada in 1938, with estimated expenditures totalling $259,000,000 as compared with $274,000,000 in 1937.

Tourists from the United States using automobiles were the heaviest spenders, accounting for a total of $180,258,000 in 1938 as compared with $181,332,000 in 1937. Those entering by rail spent $47,563,000 as compared with $49,223,000, by boat $10,927,000 compared with $16,054,000, and other travellers, including those who entered by ferry, plane, bus, etc., $20,000,000 compared with $27,000,000.

Visitors from overseas countries spent an estimated total of $14,683,000 compared with $16,972,000 in 1937.

Canadians travelling abroad spent a total of $123,913,000 as compared with $124,422,000 in 1937, of which $103,956,000 was spent in the United States compared with $102,087,000. Canadian travellers to overseas countries spent $19,957,000 compared with $22,335,000 in 1937.

The Board of Standards and Appeals of the New York Department of Labor is revising sections of the State's boiler code governing new installations, to coincide with the code of the American Society of Mechanical Engineers. The board is bringing up to date its regulations adopted 25 years ago relating to fireproof and fire-resisting materials, and the elevator and hoistway code adopted in 1923.

RECENT REGULATIONS UNDER DOMINION AND PROVINCIAL LEGISLATION

Pilots—Irrigation Workers and Electricians in Alberta—Hours of Work, Minimum Wages and Safety Regulations in British Columbia—Superannuation of Municipal Employees in British Columbia—Minimum Wages in Quebec

NEW orders relate to pilots in the District of Miramichi in New Brunswick, to electricians in Alberta and to pensions for municipal employees in British Columbia. Minimum wages are fixed for workers on irrigation projects in Alberta and for men employed in shingle mills in British Columbia while changes are made in fair wage orders in Quebec. Hours of labour are limited for persons employed in drug stores and beauty parlours in British Columbia and new safety regulations in the same province apply to several hazardous industries.

Canada Shipping Act

New by-laws for the Pilotage District of Miramichi were approved on April 5. With certain exceptions they are similar to the by-laws for the district of Chignecto (Labour Gazette, March, 1939, p. 301) and provide for the examination and licensing of pilots. Apprentice pilots must be British subjects between 18 and 30 years of age, serve an apprenticeship of four years and pass the prescribed examinations. An applicant for a licence who has not been apprenticed must be between the ages of 21 and 45 years and must submit to the Pilotage Authority a certificate as mate in the Home Trade of Canada or as Master in the Inland Waters as well as health and character references. He may be required to serve one season as apprentice before trying the pilot's examinations. Provision is made for deductions from wages for the purchase of a Dominion Government Annuity for each pilot. The penalty for retaining pilots on board more than 48 hours is $5 a day and is payable to the pilots.

Alberta Hours of Work Act

From April 1 to October 1, 1939, workers employed on irrigation projects under the Water Resources Act are exempt, by an order approved March 14, from the maximum working hours of nine a day and 54 a week fixed by the Hours of Work Act for male workers.

Alberta Male Minimum Wage Act

For workmen on the same projects an order in council of the same date fixes a minimum wage of 33⅓ cents an hour, the minimum payable for adult workers in private industry throughout the province employed by the week or longer period.

Alberta Tradesmen's Qualification Act

Two orders in council of March 21 designate the trade of electrician as one to which the Act applies and make regulations for the examination of candidates for the certificates of proficiency necessary to carry on the trade. Certificates must be renewed each year. "Electrician" includes any person engaged in the installation, alteration or repair of electrical fixtures, appliances or apparatus but excludes a man engaged in line work. Examinations are to be conducted in Edmonton, Calgary, Lethbridge, Medicine Hat and Drumheller by boards of examiners consisting of a representative of the city, the master electricians and of the journeymen electricians all of whom are to be nominated by the particular city and appointed by the Government. A Board of Appeal is to consist of the chairmen of the boards of examiners.

An apprentice's certificate may be issued by the Department of Trade and Industry to any person working under an electrician holding a Certificate of Proficiency. For other certificates candidates after three years' practical experience must be examined in general electrical theory and practical work, the Canadian Electrical Code and the Alberta Electrical Protection Act.

At least 75 per cent must be obtained on an examination for a First Class Journeyman's Certificate and a Restricted Certificate. The holder of the former certificate may work as journeyman electrician in any part of the province subject to the by-laws of any city and the holder of the latter is entitled to work in any part of the province except the five cities mentioned but he may not do the initial work of wiring any building where concealed conduit work is required. A Provisional Restricted Certificate, which is valid for six months and not more than two of which may be issued to any one person, may be granted to a person failing to qualify for a Restricted Certificate but obtaining at least 50 per cent of the allotted marks.

Alberta Workmen's Compensation Act

Regulation 9 (Labour Gazette, 1938, p. 1234) defining the position of the industries of teaming, cartage and trucking with respect to the Act was amended on March 23 to make it

clear that the Act applies to such industries only when carried on as a regularly established business or in conjunction with some other industry to which the Act applies.

British Columbia Hours of Work Act

An order of the Board of Industrial Relations of April 3 reduces the maximum hours of persons employed in drug stores. The former order (LABOUR GAZETTE, 1937, p. 1206) exempting these workers from the maximum of eight hours a day and 48 hours a week fixed by the Hours of Work Act and prohibiting employment for more than nine hours hours a day or 52 a week is repealed but these provisions are contained in the new order which stipulates in addition that the hours of work in two consecutive weeks may not exceed 96.

British Columbia Minimum Wage Acts

Two orders of the Board of Industrial Relations, effective March 30, relate to men employed in the shingle industry and to female workers in personal service occupations. Order 62 continues in force the 40-cent hourly minimum provided by Order 16 for male workers, except apprentices, engaged in the manufacture of wooden shingles not including shingle bolts. Order 27A fixes maximum working hours of nine hours a day and 44 a week for female operators in beauty parlours and stipulates that these workers are to have one hour's rest daily, the hour to be completed between 11 a.m. and 2.30 p.m. The power given the Board under the Female Minimum Wage Act to limit hours of work has been exercised in the case of these occupations which are not within the scope of the Hours of Work Act.

British Columbia Municipal Superannuation Act

The first regulations under the Municipal Superannaution Act, 1938 (LABOUR GAZETTE, February, 1939, p. 161) issued on March 31 set out three tables showing the contributions necessary to provide a single life annuity of $10 per month commencing at the minimum retiring age or a greater amount if the employee continues to work on reaching that age. Provision is made for payment of one-half the annuity to the widow when the employee dies before reaching the pensionable age and for annuities in case of total and permanent disablement.

For females the mininum retirement age is 55 and the maximum 60, and an annuity may be purchased at age 20 for a lump sum of $658 or monthly payments of $2.55. The rates gradually rise to a lump sum of $1,776 if the annuity is purchased at 55. For policemen and firemen for whom the same retirement ages are fixed as for women, the cost at age 20 is a lump sum of $659 or $2.70 monthly increasing to a lump sum of $1,713 if purchase is made at 55. For all other males the minimum retirement age is 60 and the maximum 65. At age 20 the lump sum payment is $525 and the monthly contribution $2. It rises to a lump sum of $1,472 at age 60.

British Columbia Workmen's Compensation Act

Regulations gazetted March 30 amend the accident prevention regulations for submarine diving, logging and for factories and other workplaces. The following additions have been made to the regulations. If during specially hazardous operations a diver fails to reply to the attendant's signals, given every ten minutes, a second diver must be ready and go down immediately. Rules are laid down for the construction of ladders, the control of dust and the piling of lumber. Repairs to machinery in shingle mills are prohibited while the saws are in motion and glass guards around all high speed wheels must be shatter-proof. Special rules govern the work of excavating with a power machine and scaffolding.

New regulations apply to mechanical refrigerating systems. All such systems must be designed and installed in accordance with the British Columbia regulations concerning boilers, pressure vessels and appurtenances. Every machine is to be equipped with an approved automatic safety valve and with accumulators or liquid traps and evacuating valves if of over five tons capacity. Control valves must be easily accessible and there must be provision in machinery rooms for emergency ventilation and at least two exits. Where natural ventilation is insufficient, mechanical ventilation controlled outside the machinery room and capable of changing the air every five minutes is to be provided. Two approved gas masks or helmets must be kept in good condition and available for immediate use in all plants of five tons capacity or over and one such mask or helmet in smaller plants. Full instructions for their use are to be posted near the equipment and employees must be trained in its use.

In the logging industry employers are responsible for seeing that workmen do not work within the bight of any line or in dangerous places. The regulations for this industry require head-spars, tail-trees, gin-poles and anchorage stumps to be examined

and meet certain specifications, prohibit the use of hooks instead of shackles to fasten guy lines, require the removal of dangerous objects and stipulate that line trees used for anchorage must be guyed. Soft hammers only may be used for cutting cables and workmen running in slack lines are not to use their hands to guide lines on donkey drums. Special rules apply to the felling of trees and foremen are responsible for safe working conditions in this work. Engines used in yarding and loading must have a horn or whistle and may only be operated by experienced workmen with approved signalling codes. Employers' records showing the experience and ability of all operators, except licensed steam engineers, must be forwarded to the Board on request and be open for inspection by its representative. There are also special rules for tractor and motor truck logging relating to brake equipment and loading. Private roads, bridges and log-dumps must be maintained in a safe condition and bridges and their approaches must have guard rails. Woodsmen's shoes must be safe soled. Power boats used as camp-tenders or tugs are to be equipped with a row boat and life buoys must be installed on floats, wharves or other places where workmen are employed in or about water.

Quebec Fair Wage Act

Orders in council gazetted April 1 amend two orders and suspend a third. Order 4 is amended to declare the City of Thetford Mines in Zone III for the purpose of the Order relating to hotels and restaurants and to declare the town of Chicoutimi in Zone IV with respect to textile workers. Before the amendment, these workers were entitled to the higher rates provided for Zone II (LABOUR GAZETTE, 1938, p. 512).

The hourly minimum rates provided by Order 16 (LABOUR GAZETTE, 1938, p. 1350) for cutters and wrappers in butter and cheese wholesale and export establishments are reduced from 26c. 22c. and 17c. for 60 per cent, 25 per cent and 15 per cent of their number in each establishment respectively, to a minimum of 17c. for any of these workers. The 22-cent minimum which was payable to not less than 25 per cent of all other employees in these places is now payable to not more than 25 per cent.

Order 18 (LABOUR GAZETTE, 1938, p. 1352) applying to funeral furniture and casket manufacture was suspended from December 17, 1938, for all establishments but those of Messrs. Gerard and Godin in Three Rivers where the minimum rates remained in effect until March 1.

Vacation Plans in the U.S. During 1938

The National Industrial Conference Board Inc. of New York in one of its studies in personnel policy (No. 13) reviews the "Developments in Company Vacation Plans" during 1938.

For the purpose of this survey, 210 companies employing over one million workers furnished the Conference Board with information concerning the operation of their vacation plans for wage-earning employees during the preceding year.

In a summary of the results of the survey made it is stated that "depressed business conditions in 1937-1938 caused the suspension of only a very small proportion of plans as compared with the number discontinued or abandoned during the period of 1929 to 1935. Although over one-third of the 210 vacation plans are subject to union agreements, the majority of companies found no trouble in carrying out their policies, and difficulties arising from misinterpretation of provisions occurred in only a few instances.

"Many companies have adopted a more liberal policy since 1935 in regard to the eligibility requirements and the length of vacation granted. In approximately three-fourths of the plans, employees are qualified for some vacation privilege after one year's service or less.

"Plans have been revised during the past few years to make the time of the vacation period as flexible as possible, but particular attention has been given to definitions of eligibility in case of lay-off, and to the methods of calculating vacation pay. This accounts for the wide variety of policy and practice found in the plans of different companies.

"Vacation expense, at the time of operating losses, was 'worth it' to some companies, which considered that a vacation allowance helped to supplement the earnings of workers subjected to short-time hours or lay-offs. In seven plans, a provision, rarely found in former years, permits all eligible employees the option of a paid vacation or the privilege of remaining at work and receiving an allowance in addition to their regular pay.

"Although many changes have occurred in details of vacation plans the ratio of companies using one kind of plan as against others has remained relatively constant. A majority of companies favour vacations staggered over a period of months, and prefer plans which graduate the length of vacation allowance on the basis of past service."

OLD AGE AND BLIND PENSIONERS IN CANADA

Financial and Statistical Summary as at March 31, 1939

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act providing for the payment of pensions to blind persons.

Old Age Pensions

In the first of the tables appearing with this article, particulars are given dealing with operations under the Old Age Pensions Act (Revised Statutes of Canada, 1927, Chapter 156; as amended by Statutes of 1931, Chapter 42), and under the various provincial concurrent acts, as at March 31, 1939. (The text of the Old Age Pensions Act was given in the LABOUR GAZETTE for April, 1927, page 375, and the new regulations were reviewed in the issue for March, 1938, pages 286-288).

The Act made provision for the establishment of a Dominion-provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as $365 a year and who has resided in Canada for 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is $240 yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds $125 a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (LABOUR GAZETTE, May, 1937, page 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is $240 per annum. If, however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to $120. If a pensioner is unmarried, the maximum pension is reduced by the amount of his income from earnings or other sources in excess of $200 a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of $165, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $400. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $200.

Under agreements negotiated between the Dominion and the provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

Regulations governing the payment of pensions to the blind were published in the *Canada Gazette* of August 28, 1937.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

OLD AGE PENSIONS

FINANCIAL AND STATISTICAL SUMMARY OF OLD AGE PENSIONS IN CANADA AS AT MARCH 31, 1939

—	Alberta Act effective Aug. 1, 1929	British Columbia Act effective Sept. 1, 1927	Manitoba Act effective Sept. 1, 1928	New Brunswick Act effective July 1, 1936	Nova Scotia Act effective Mar. 1, 1934	Ontario Act effective Nov. 1, 1929

THE LEGAL REGULATION OF HOURS OF WORK IN CANADA

THE following is a brief summary of the statutory regulation of hours of work in Canada. It is not intended to be a complete statement. For the most part, hours of work in Canada are regulated by provincial legislation. Limitations imposed by the Dominion affect only Dominion Government employees, persons employed on Dominion public works or in the execution of contracts for Government works or supplies. An order in council of 1930 provided that, unless it was against the public interest, the hours of work of any person employed by the Dominion Government who was at that time required to work more than eight hours a day should be reduced to eight hours with a half holiday on Saturday. On construction work undertaken by the Government of Canada, either directly or by contract, the Fair Wages and Hours of Labour Act restricts working hours to eight a day and 44 a week provided such works are not declared exempt from the operation of the Act by the Governor in Council. Unless excepted by statutory authority or by agreement, works towards the cost of which a grant is made by the Dominion are governed by similar conditions laid down in an agreement between the Dominion and the provincial or municipal authority or private corporation to which financial assistance is given. In contracts for equipment and supplies for the Dominion Government, it is stipulated that the working hours of persons employed in the manufacture of such goods shall be those fixed by the custom of the trade in the district or, where there is no custom as to hours, fair and reasonable hours as determined, if necessary, by the Minister of Labour.

Provincial legislation includes laws concerning working conditions, among which are hours of labour, in certain classes of undertakings such as mines, factories and shops and for certain occupations such as drivers of motor vehicles and elevator operators, legislation in Alberta, British Columbia, Nova Scotia and Quebec dealing only with hours of work and statutes in Alberta, Manitoba, Nova Scotia, Ontario, Quebec and Saskatchewan under the authority of which orders in council may limit hours of labour.

Under the Quebec Collective Labour Agreements Act and the Industrial Standards Acts of Alberta, Nova Scotia, Ontario and Saskatchewan hours have been regulated in a considerable number of industries and trades in certain districts or throughout the province. New Brunswick has recently enacted an Industrial Standards Act. In Nova Scotia the Act applies only to the building trades in Halifax and Dartmouth and in the other provinces orders in council limit hours in several building trades in different cities. Working hours in barber shops are restricted in some cities and towns in Quebec, Ontario and in Saskatchewan. In the manufacturing industries orders in council apply to men's clothing and women's cloaks and suits in Ontario and Quebec, gloves, furs, millinery and shoes in Quebec, furniture (wood) in Ontario and Quebec, brewing in Ontario and a few others. Weekly hours range in these industries from 40 to 48. Hours are limited by order in council for other workers in Quebec, including job printers and bakers in cities and persons employed in stone-cutting, ornamental iron work, aluminium smelting and iron oxide mining; in Ontario in the manufacture of soft furniture and in Alberta for bakers, creosote workers and taxi-drivers in some towns.

No orders have yet been made under the section of the Manitoba Fair Wage Act added in 1938 to give power to the Lieutenant-Governor in Council to make binding the wages and hours agreed upon at a conference of employers and employed in certain industries but the Act has been applied since its enactment in 1916 to limit hours of labour on all construction work contracted for by the Provincial Government and since 1934 to regulate hours on private construction jobs of more than $100 in any city or town of over 2,000 or in any other part of the province to which the Act is made to apply by order in council. Regulations fix maximum hours varying from 44 to 48 according to the occupation but teamsters have a maximum work week of 54 hours. In Ontario a statute of 1936 places the same limits on hours on public works and works subsidized by the Provincial Government as the Dominion statute, eight a day and 44 a week except in special cases or in emergencies. In other provinces, by order in council or by resolution of the Legislature, "a fair wages" policy is applied to public works and wages and hours are usually determined by the custom of the trade in the locality.

The Hours of Work Acts of Alberta and British Columbia apply to both sexes. In Alberta, except in agriculture or domestic service, hours of work in any trade or occupation, unless exempted by regulation, are limited to nine a day and 54 a week for male workers and eight a day and 48 a week for females. In British Columbia, the Act provides for an eight-hour day and 48-hour week, except where special regulations apply, in mines, factories, construction, road transport,

retail and wholesale stores, barber shops, bakeries, restaurants, public dining rooms and the catering service connected therewith and for hotel clerks and elevator operators. Regulations in Alberta and British Columbia make provision for longer hours for some classes of workers in the lumbering industry and in British Columbia for the fruit and vegetable industry, fish canneries and laundries and in shops for the Christmas season and in the smaller towns as well as for certain classes of workers employed in industrial undertakings.

In Quebec and Nova Scotia there are statutes enabling the administrative authorities to restrict hours of work in different industries. The Nova Scotia Act of 1935 stipulates that all workmen in industrial undertakings including mines and quarries, factories and construction work of any kind, must be given a weekly rest day and provides for a board of adjustment to determine maximum hours in such undertakings. No board, however, has been appointed. In Quebec an Act of 1933 designed to spread employment was applied to the building industry throughout the province and hours were limited to 40 a week, or 36 a week where a two-shift system was in effect, except on jobs costing from $200 to $500 according to the locality. The latter system was compulsory during the summer on large jobs for public authorities or of which half the costs were paid or guaranteed by the province or a municipality. At the present time under this Act maximum hours for the building industry, except on small jobs, are eight a day for skilled men and nine for unskilled workmen in the Montreal Division and eight a day and 48 a week in the rest of the province. Where work is done in shifts as required on public contracts during the summer season, the length of the shift has been extended to eight hours except in the Montreal Division where it is still six hours. Other orders under this statute limit to 55 the hours of work per week of persons employed in beauty parlours on the Island of Montreal and to 64 the hours of workmen in shoe-repairing on the Island of Montreal and within a radius of 10 miles if the majority of the work orders are received from the Island.

In Manitoba, New Brunswick, Ontario and Saskatchewan there is no legislation dealing solely with hours of work but in these provinces, as in Alberta, British Columbia, Nova Scotia and Quebec, laws governing employment in mines, factories and shops restrict hours. In Manitoba, the limitations imposed by the Factories Act on the working hours of women and young persons have been superseded by regulations under the Minimum Wage Act applying with some variation to both men and women. The maximum hours fixed by statute or under statutory authority for workers in mines, factories and shops are shown in the accompanying table. In some cases these standards have been modified by

STATUTORY MAXIMUM HOURS OF WORK PER DAY OR PER WEEK IN MINES, FACTORIES AND SHOPS IN CANADA

—	N.S.	N.B.	Quebec	Ontario	Manitoba	Sask.	Alberta	B.C.	Yukon
MINES—									
Coal:

*Females only.

†Females and boys. Applies to boys under 18 in Quebec and under 16 in Ontario and Saskatchewan.

‡Females and boys in towns of 10,000 or more. An order of the Fair Wage Board fixes a maximum of 72 hours for males over 18, and 55 hours for females and for boys under 18. in industrial and commercial establishments in cities and towns.

**Females, and boys under 18, in factories, 17 in shops. Adult males in factories in Greater Winnipeg may not work more than 48 hours in a week unless paid a minimum of 30 cents an hour for extra hours.

‡‡In Vancouver, Victoria and their environs, but 3 extra hours may be worked on Saturdays in other parts of the province provided that 48 is maximum for week.

orders in council under Industrial Standards Acts or the Collective Labour Agreement Act of Quebec.

In all the coal-mining provinces, there is a statutory eight-hour day for underground workers and Alberta, British Columbia and Saskatchewan regulate the hours of labour of men above ground. In Saskatchewan longer hours may be worked by agreement between the workman and employer. In Nova Scotia and Manitoba, there is no legal limitation on the hours of work in metalliferous mines, quarries, etc., and only in Alberta and British Columbia are hours above ground regulated. In Quebec, the restriction applies only to boys under 18 and in Ontario only to those parts of the province without county organization. The largest mining operations in Ontario are carried on, however, in the northern districts.

Early factory legislation in all provinces except Prince Edward Island limited hours of women and young persons and in Alberta the Factories Act of 1926 provided for a nine-hour day and 54-hour week for all factory workers with some exceptions. In Nova Scotia the clause fixing maximum hours was dropped while in Alberta and Manitoba the power to limit hours given by the Minimum Wage Acts was exercised to reduce the maximum fixed by the factory law in so far as women were concerned. When the Alberta Hours of Work Act was passed in 1936 it maintained the existing conditions of a maximum of nine hours a day and 54 a week for male workers and eight hours a day and 48 a week for women and girls. In British Columbia the Hours of Work Act of 1923 extended to men and boys the eight-hour day and 48-hour week provided for women and girls by the Factories Act of 1908. In New Brunswick and Ontario the 10-hour day and 60-hour week fixed in the first factory laws for women and girls, and in Ontario also for boys under 16, have not been changed but in Quebec the weekly limits for women and boys under 18 were reduced in 1930 to 55. An order under the Quebec Fair Wage Act limits to 72 in a week the hours of males over 18 years of age in industrial and commercial establishments and other workplaces in cities and towns to which the Act applies. In all provinces longer hours may be worked with special permission or under special regulations applying to certain industries or occupations.

An indirect influence tending to reduce hours is the requirement in some cases that time in excess of a specified number of hours must be paid for at higher rates per hour. Punitive rates are applicable in Alberta to hours in excess of the normal statutory limits but, provided the weekly maximum is not exceeded, no overtime rate is payable for the first hour beyond the eight hours for women and girls or the nine hours for male workers. In British Columbia the minimum rates of wages are increased after a fixed number of hours in certain occupations, such as in the fruit and vegetable industry, telephone operation, motor transport and for first-aid attendants in hospitals. In Manitoba, where hours of work for adult males in factories are not limited by law, a regulation under the Minimum Wage Act stipulates that male factory workers over 18 years of age in Greater Winnipeg must be paid a minimum of 30 cents an hour for every hour in excess of 48 in a week. In Ontario where hours are frequently less than the legal maximum for women and young persons, most orders under the minimum wage laws fix minimum rates for a specified number of hours in a week and require female workers and males replacing females to be paid at proportionate rates for hours in excess of the specified number or in excess of the normal hours of work in any establishment where they are less than the specified number. The hours specified, 48, 50 and 54, vary with the size of the place. In the textile industry higher rates must be paid to both men and women for the first two hours of overtime and one and one-half times the regular rate for other overtime. In Quebec unless the Fair Wage Board grants exemption from the overtime regulation, in industrial establishments in cities and towns running normally 48, 54 or 60 hours a week both male and female workers must be paid one and one-half times the regular rate if they are employed beyond these normal hours or beyond 10 hours in a day when normal weekly hours are not exceeded or beyond 12 hours a day in any case. The overtime rate does not apply, however, to workmen earning $30 a week or more on the Island of Montreal or within five miles, $25 in cities and towns of 2,000 or more or $20 in other towns or to workmen given a certain number of holidays in lieu of overtime pay or under certain other conditions.

As regards shops, hours of work are limited by statute only in Alberta and British Columbia for all classes of workers but in Manitoba under a minimum wage order there is a basic 48-hour week and persons employed for longer hours in the week or for more than nine hours in a day or 10½ hours on Saturday must be paid five cents an hour in addition to the minimum rate unless their wages are higher than this regulation would provide. An enactment of 1939 stipulates, however, that, except as permitted by the Manitoba Minimum Wage Board, no woman and no boy under 17 may be employed in a shop for

more than eight hours a day or 48 a week. In Ontario there is a maximum 10-hour day and 60-hour week for women and for boys under 16 and in Quebec the same maximum per week for women and boys under 18 in towns of 10,000 or more is fixed by the Industrial and Commercial Establishments Acts but appears to be superseded in all cities and towns by an order of the Fair Wage Board limiting hours for these classes to 55 a week unless a permit for longer hours is granted in accordance with the Industrial and Commercial Establishments Act. Except in Alberta and Ontario provision is made for a limited amount of overtime. In Nova Scotia the Children's Protection Act prohibits the employment in shops of girls under 16 and boys under 14 for more than eight hours a day or more than four hours on Saturday.

All the provinces give to municipal councils power to make by-laws requiring the closing of shops at a specified hour on any or every day of the week and providing for a weekly half-holiday. Such by-laws must be passed if a sufficient proportion of the local shopkeepers petition for them and in all provinces the municipal council has power to make an early-closing by-law on its own initiative.

Bake-shops in Alberta and British Columbia are within the Hours of Work Acts. In British Columbia drivers delivering bakery products may be employed 54 hours a week. In Ontario there is a maximum 56-hour week for adult male workers in bake-shops. In Quebec binding agreements under the Collective Labour Agreements Act fix maximum hours in the baking industry in several cities.

In barber shops and beauty parlours hours of work are limited only in some provinces. Barber shops are within the Alberta and British Columbia Hours of Work Acts while beauty parlours are affected in Alberta by the Hours of Work Act and in British Columbia by an order under the Female Minimum Wage Act limiting hours to nine a day and 44 a week. In Manitoba a minimum wage order fixes maximum hours for females and for boys under 18 in beauty parlours at 10 a day and 48 a week except with a permit from the Bureau of Labour. Barber shops in certain cities are governed by orders in council under the Industrial Standards Acts and in Quebec under the Collective Labour Agreements Act. In the latter province, hours of labour in beauty parlours on the Island of Montreal are restricted to 55 a week.

Hours of work in hotels and restaurants are limited in Alberta and British Columbia by the Hours of Work Acts. In British Columbia hotel clerks and persons employed in public dining rooms and the service connected therewith have an eight-hour day and 48-hour week but females employed in hotels and in restaurants or any place where food is served or prepared may be employed for 10 hours in a day and 52 in a week in emergencies if paid at overtime rates. In resort hotels, however, the maximum work-week for women and girls is 54 hours, the hours in excess of 48 to be paid for at the rate of time and a half. In Manitoba women and boys under 18 may not be employed in hotels or restaurants more than 10 hours a day or 48 a week. Cooks, male or female, and men over 18 may be employed longer, however, but in hotels of 100 rooms or more they may not be required to work more than 54 hours in a week. In Ontario women and boys under 16 may not be employed in restaurants more than 10 hours in a day or 60 in a week. In Quebec, under an order of the Fair Wage Board, in hotels and restaurants in cities and towns hours of work are limited to 55 a week in the case of women and boys under 18 and to 72 in the case of men. In Alberta, Manitoba, Ontario, Quebec and Saskatchewan there is provision for a weekly rest-day for most classes of workers in hotels and restaurants but in all except Alberta, it applies only to cities or in Quebec to cities and towns.

Road transport is within the scope of the Hours of Work Act in British Columbia where persons employed in the transport of goods have an eight-hour day and 48-hour week but these limits may be exceeded up to 10 a day and 54 a week. The maximum weekly hours for taxicab drivers are 54 and except in Victoria and suburbs the maximum hours per day are nine. In Victoria drivers of taxicabs may be employed for 10 hours within the 11 hours immediately following reporting for work. In Alberta no regulations under the Hours of Work Act have yet been made for road transport except for passenger vehicles in Edmonton where maximum hours for drivers are 12 from the time of starting work on six days a week with a rest period of one hour each day. Similar regulations apply to taxi drivers in Calgary under the Industrial Standards Act but in Banff during the summer season there may be a 12-hour day and seven-day week for taxi and bus drivers. Throughout the province a regulation of the Highway Traffic Board limits hours spent in driving goods or passenger vehicles to nine in 24 except in an emergency but under special circumstances a maximum of 10 hours in two periods of five hours each separated by a 45-minute rest period may be permitted.

In Manitoba no person may be employed in driving a goods or passenger vehicle for more than nine hours or in any capacity for more

than 12 hours in any 24 or on duty on more than six days in a week except in case of a break-down of the vehicle. Taxicab drivers in Winnipeg, however, may be on duty as drivers or in other capacities for a maximum of 12 hours a day on six days a week. In New Brunswick, Nova Scotia and Ontario drivers of transport vehicles may not be employed more than 10 hours out of 16 consecutive hours in New Brunswick and out of 24 in Nova Scotia and Ontario. In New Brunswick the 10 hours covers only work as driver of any transport vehicle but in Nova Scotia it applies to work in any capacity in connection with a vehicle transporting passengers or passengers and freight. In both provinces some vehicles are exempt. In Ontario the limits apply to both passenger and goods transport but the stipulation for passenger transport is limited to the hours spent in driving or operating the vehicle. For truck drivers work in any capacity is prohibited for more than 10 hours. Taxicab drivers in Toronto have a maximum 11-hour day and 66-hour week.

In Quebec, except in an emergency when an overtime rate of $2 an hour must be paid, no person may be permitted to drive a motor transport vehicle for more than 12 consecutive hours without taking a rest period in addition to the time for meals, and no bus driver may drive more than 250 miles in 24 hours.

ANNUAL CENSUS OF MANUFACTURING AND CERTAIN OTHER INDUSTRIES IN CANADA, 1937

Statistics Respecting Employees, Wages, Etc.

THE Dominion Bureau of Statistics, under the Statistics Act of 1918, takes annually by mail an industrial census covering statistics of fisheries, mines, railways, etc., and general manufacturing in Canada. Preliminary figures for all manufacturing industries for the year 1937 have been issued and the accompanying tables give the figures in some detail.

The first table contains summary figures for all the manufacturing industries for 1930, 1933, and from 1935 to 1937, showing the number of establishments, capital invested, the number of employees on salaries and wages together with the amount of such salaries and wages, the cost of materials entering into manufactures and the value of the finished products. The figures for 1937 show a continuation of the improvement which began in most cases in 1934 following declines from 1930. The cost of materials used in manufacturing in 1937 was 23·6 per cent higher than in 1936. This was due partly to increases in the cost of raw materials, as prices were rising until July, 1937, when they again began to decline. The number of employees on salaries, increased 10·9 per cent from 1936 to 1937 while the number of wage earners increased 11·2 per cent. The increase in the total amount of wages paid in 1937 as compared to 1936, was 19·8 per cent. There have been increases in the wage rates, and an increase in the time worked per man.

The second table shows the number of employees on salaries and on wages with salaries and wages paid as well as the number of establishments, for 1937, by provinces and by groups of industries and for each of the important industries in each group.

The third table gives the figures as to the number of employees and salaries and wages paid in other industries for which figures are collected annually. It will be noted that during 1937, all industries with the exception of fishing, showed increases in the number of those employed when compared to the previous year. The aggregate amount of salaries and wages in each industry for which this information is available has increased.

Statistics for 1936, comparable to those contained in the present article, appeared in the LABOUR GAZETTE, May, 1938, pp. 524-527. Figures from the Decennial Census of 1931, Bulletin XXXI, showing numbers of gainfully employed persons in all industries were given in the LABOUR GAZETTE, August, 1933, pp. 819-821, also figures from Bulletin XXXIII, as to numbers of wage earners, weeks employed and average earnings, were given in the LABOUR GAZETTE, November, 1933, pp. 1094-1095.

TABLE 1.—MANUFACTURING INDUSTRIES IN CANADA, PRINCIPAL STATISTICS, 1930, 1933 AND 1935 TO 1937

Items	1930[1]	1933	1935	1936	1937	Change per cent in 1937 over 1936
Establishments.....No.	22,618	23,780	24,034	24,202	24,834	+ 2·6
Capital invested..... $	4,041,030,475	3,279,259,838	3,216,403,127	3,271,263,531	3,465,227,831	+ 5·9
Employees on salary.....No.	84,711	86,636	97,930	104,417	115,827	+ 10·9
Salaries..... $	169,992,216	139,317,946	160,455,080	173,198,057	195,983,475	+ 13·2
Average salary..... $	2,007	1,608	1,638	1,659	1,692	+ 2·0
Employees on wages.....No.	529,985	382,022	458,734	489,942	544,624	+ 11·2
Wages..... $	527,563,162	296,929,878	399,012,697	438,873,377	525,743,562	+ 19·8
Average wage..... $	995	777	870	896	965	+ 7·7
Cost of materials..... $	1,522,737,125	967,788,028	1,419,146,217	1,624,213,996	2,006,926,787	+ 23·6
Value of production..... $	3,280,236,603	1,954,075,785	2,653,911,209	3,002,403,814	3,623,159,500	+ 20·7
Value added by manufacture..... $	1,522,737,125	919,671,181	1,153,485,104	1,289,592,672	1,506,624,867	+ 16·8

[1]A change in the method of computing the number of wage-earners in the years 1925 to 1930 increased the number somewhat over that which the method otherwise used would have given. In 1931, however, the method in force prior to 1925 was re-adopted.

TABLE II.—NUMBERS OF EMPLOYEES, SALARIES AND WAGES PAID IN MANUFACTURING INDUSTRIES IN CANADA, 1937

—	Number of establishments	Salaried Employees			Wage earners		
		Male	Female	Salaries	Male	Female	Wages

Wages and salaries $	8,132,525	7,375,492	5,759,047	5,621,807	6,071,962	6,313,911	6,816,627

(a) See note (1), Table I.
(b) Including about half of the express employees which are also shown under Express below.
(c) Not including operators paid on commission.
(d) Full time employees only.
*The figures for mining, etc., include non-ferrous smelting and refining, clay products, cement, lime and stone (monumental and ornamental) which are shown as sub-groups under manufacturing.

WAGES OF EMPLOYEES ON FARMS IN CANADA, 1929, 1933, AND 1936 TO 1938

THE Dominion Bureau of Statistics secures each year from its agricultural correspondents throughout Canada information as to the wages of employees on farms in Canada during the year just ended. The figures so secured are published in the *Monthly Bulletin of Agricultural Statistics* for the February of the following year. Tables of these figures have appeared in the reports on Wages and Hours of Labour in Canada issued as supplements to the LABOUR GAZETTE for January, 1925 to 1938, inclusive, and March, 1939, the first of these giving figures back to 1914. The accompanying table includes figures taken from the issue of the *Bulletin* for February, 1939, and from previous issues.

The figures are for the years 1929 when farm wages in Canada were around the general level from 1921 to 1929, for 1933 when these wages were down to about the lowest point since 1914, and the last three years. These figures reveal that wages of employees on farms in Canada fell approximately fifty per cent from 1929 to 1933 and thereafter have tended to increase gradually. From 1937 to 1938 there was a slight increase for Canada as a whole, due to the increases that occurred in the western provinces, as there were decreases in most of the eastern provinces.

WORKMEN'S COMPENSATION IN ALBERTA, MANITOBA, NEW BRUNSWICK, NOVA SCOTIA AND SASKATCHEWAN, 1938

Annual Reports of Provincial Boards

THE annual reports of the Workmen's Compensation Boards of Alberta, Manitoba, New Brunswick, Nova Scotia and Saskatchewan have recently been received.

Alberta

According to the twenty-first annual report of the Workmen's Compensation Board of Alberta, there were 13,377 accidents during 1938 compared with 13,177 in 1937. Of this total 51 were fatal, 112 involved permanent disablement and 13,214 temporary disability.

During 1938 assessments collected by the Board amounted to $1,118,470.35, while compensation paid totalled $468,626.82 and payments from the pension fund $484,008.54. Contributions on account of medical aid amounted to $374,024.41 while $317,807.65 was paid out for such services. The consolidated statement of receipts and expenditures given in the report shows receipts in excess of disbursements amounting to $75,385.45.

The cost of administration, including the cost chargeable to the Electrical Protection Act, mine rescue work and returned superannuation was $112,113.97.

Statistics for the year under review are summarized in the report as follows:

Number of employers within the scope of the Act as at December 31, 1938, 5,272; number of accidents reported during the year 1938, 13,377; number of accidents and claims not finally disposed of as at December 31, 1937, 1,577; number of claims disposed of by award of pension or payments of compensation, 6,367; number of claims disposed of by payment only of account for medical aid, 5,510; number of accidents disposed of for which no application for compensation was received, 158; number of accidents disposed of on which no compensation was due, 1,879; number of claims on which further payments have to be made, 720; number of accidents awaiting further reports and on which no payments have been made, 320.

Of the 13,377 accidents occurring during 1938 fifty-one were reported fatal; 112 involved permanent disability and 13,214 temporary disability. "Handling objects" was the most frequent cause of accidents followed by "falling objects or bodies". The time loss in non-fatal claims totalled 202,669 days. The average time loss in permanent disability cases was 121.54 days and in temporary disability cases 24.78 days. The average age of injured workmen was 35·62 years.

The report also contains references to the work carried on by the Mine Rescue and First Aid Department at various centres including the number of men given training and the extent and condition of equipment in use at mine rescue stations.

The annual review of the administration of the Electrical Protection Act is also included in the report, it being stated that "conditions in the electrical industry remained steady during the year." Under the Accident Prevention Regulations of the Act 366 inspections and 21 investigations were made.

Manitoba

During the year 1938 there were 11,224 accidents, including 48 fatalities, reported to the Manitoba Workmen's Compensation Board compared with 10,867 accidents with 28 fatalities during 1937.

Details showing the accidents as reported by the various groups for the last two years are as follows:

Group	1937	1938
Steam Railways	1,248	1,149
Province of Manitoba	436	482
City of Winnipeg	407	361
General Body of Employers.	8,125	8,590
Winnipeg Electric Company	261	225
Dominion Government	390	417
	10,867	11,224

The report also gives final returns for 1937 which show that 10,890 accidents were reported to the Board as having occurred during the year. Of these accidents 84 per cent entailed the payment of compensation, either for medical aid only or for compensation for time loss and medical aid, while in 16 per cent of cases no expense was involved.

On December 31, 1938, the Board had on its books as in receipt of pension, 515 dependents of workmen killed in industry during the period March 1, 1917, to December 31, 1938.

The total actual payroll of all classes of employees in 1937 was $65,801,138.19. Of this total, the returns for the largest group, known as the general body of employers, showed a payroll of $36,911,764.00, the Canadian Pacific Railway Company and Canadian National Railways forming the two next largest groups with payrolls of $7,203,167.52 and $6,849,011.12 respectively. In 1938 the actual cash disbursed by the Board amounted to $992,628.12 as compared with $953,856.52 disbursed during 1937.

The report also shows that the value of Board Orders passed during 1938 for payment of compensation, including orders respecting Dominion Government employees and amounts transferred to General Unclassified Reserve to provide for the future payments in fatal and permanent disability cases was $885,772.97 compared with $860,989.21 for the year 1937.

The current report also contains a statistical analysis of the compensable accidents which occurred during 1937, showing the number of accidents by classes; nature of disability; time loss; average age and average wage; causes of accidents; month of occurrence; week of termination of temporary disability; nature of injuries; temporary disability cases; permanent disability cases; death cases; sex, marital condition of claimants; nativity of claimants; industries in which permanent disability cases occurred; and industries in which fatal accidents occurred.

New Brunswick

The twentieth annual report of the New Brunswick Workmen's Compensation Board reviews the administration of the Workmen's Compensation Act during the calendar year 1938.

According to the report the estimated income of the Board shown in the provisional statement for the year 1937 was $832,068.13, while the actual income amounted to $911,959.38, an increase of $79,891.25 between the provisional and actual income. The estimated expenditure shown in the statement for 1937 was $777,942.27 whereas the actual expenditure amounted to $777,233.01, or a decrease of $709.26 between provisional and actual expenditure, thereby showing an increase between the provisional and actual surplus of $80,600.51. The amounts written off to adjustments and bad debts are shown as $13,747.47, it being found necessary by the Board to write off the amount of $1,269.17 as bad debts mainly on account of debtors having left the province or made assignments and received their discharge in bankruptcy. The balance of $12,478.30 was written off to adjustments, auditors for the Board having found that employers had made mistakes in submitting their actual payroll returns.

The total income for the year 1938 is estimated in the report at $802,219.87 and the expenditure at $585,180.22, leaving an estimated credit balance of $217,039.65. Adding this to the credit balance of $59,778.04 carried forward from 1937, an estimated surplus of $276,817.69 remains.

Complete accident statistics for 1937 are contained in the report, 11,521 accidents being recorded for the year. Of the total number of accidents, 22 were fatal, 332 resulted in permanent partial disability, 7,863 in temporary total disability, and 3,304 required medical aid only. The compensation cost of accidents in 1937 was $707,094.89.

The causes of accidents in 1937 were classified as follows: prime movers, 279; working machines, 630; hoisting apparatus, 284; dangerous substances, 281; stepping on or striking against objects, 1,239; falling objects, 2,066; handling objects, 1,559; tools, 2,376; runaways and animals, 118; moving trains and vehicles, etc., 472; fall of person, 2,028; all other causes, 1,307.

Factory Inspection.—The annual report of the Factory Inspector is included in the report of the Workmen's Compensation Board. Referring to accident prevention the Factory Inspector states:

"During the past year I have made a careful study of factory and mill conditions in an endeavour to find out what causes so many minor accidents and if these could have been avoided. I am firmly convinced that at least 50 per cent of all minor accidents could have been avoided.

"When a serious, or major accident occurs, an investigation immediately follows, to find the cause of the accident and how to prevent its recurrence. When a minor accident happens the cause is generally so simple that it passes unheeded, yet thousands of dollars are spent by the Compensation Board each year for these accidents.

"First and foremost, I strongly recommend that all safeguards and safety equipment be used at all times. Employees who refuse, or fail to use the safeguards supplied for their protection, should be reported."

During 1938, renewal Stationary Engineers' licences were issued to the number of 926, and 140 new licences were issued, compared with 918 renewal licences and 165 new licences issued in 1937.

Nova Scotia

The annual report of the Workmen's Compensation Board of Nova Scotia for the calendar year 1938 records a decrease in the total number of accidents of all kinds reported to the Board during the year compared with the total number in 1937. The total number of accidents of all kinds for 1938 was 12,022, as against 12,693 in the previous year, a difference of 671.

The total cost of all accidents for 1938 under Part 1 of the Act, as far as could be estimated at the time of publication of the report, was nearly $1,714,300.00, which amount is exclusive of administration expenses and cost of safety associations.

The provisional statement of income and expenditure for 1938 indicates that the total actual and estimated income for industries under Part 1 of the Act amounted to $1,772,-788.39 and the estimated expenditure for the same period was $1,843,691.78 showing a deficit for the year's operations of $70,903.39. The gross surplus brought forward from prior years was $480,351.40 leaving a gross surplus at December 31, 1938 of $409,448.01, less $13,000.00 for bad and doubtful accounts, or a net surplus of $396,448.01.

During 1938, an amount of $119,123.04 was paid on account of medical aid to all classes, compared with $115,608.43 expended on this account in 1937. The sum of $9,801.85 was expended on safety associations compared with an amount of $9,678.29 so expended in the previous year. Administration expenses during 1938 increased to $119,589.62 compared with $113,286.83 in 1937.

The 12,022 accidents reported to the Board for the year 1938 are classified as follows:—

Fatal accidents, dependency established and compensation commenced, 45; fatal accidents, burial expenses paid, no dependents, 17; fatal accidents reported, pending adjustment, 1; fatal accidents, claim non-compensable or disallowed, 2; accidents causing permanent partial disability, 238; accidents causing total disability for seven days or over, 7,861; accidents where medical aid only has been paid, 3,063; accidents pending adjustment, no payments, 218; accidents not compensable, other than fatal, 577.

During the year 7,861 workmen who were injured and wholly disabled for seven days and upwards were paid compensation. At the end of the year the persons receiving compensation for 1938 and prior years in the form of a monthly pension were as follows: Widows, 660; children under 16, 707; dependent mothers, 60; dependent fathers, 16; other dependents, 13; workmen disabled for life (partially or wholly), 1,352.

The average rate of assessment levied on payrolls under Part 1 of the Act since the commencement of the Act in 1917 has been $2.02 per hundred dollars of payroll. The rate varies from year to year, the average rate for 1937 having been $2.65 while the average rate rose to $3.08 in 1938.

The provisional statement of income and expenditure by classes to December 31, 1938, shows that mining held first position insofar as revenue accrued from assessments and also disbursements was concerned. Total income (actual and estimated) for the year from assessments in the mining industry was $909,-581.96, while the total expenditure for the industry was $1,012,268.96. Of this amount, $204,438.47 was for compensation paid other than pensions; $166,091.77 was transferred to reserves for pension awards; $550,771.68 was for compensation estimated outstanding, the balance being for the industry's proportion of medical aid, safety associations and administration expenses.

The report contains a review of the administration of the Workmen's Compensation Act during its twenty-two years in operation. During that period, accidents in the industries within the jurisdiction of the Board number 173,583, of which 1,765 were fatal. The amount actually paid to workmen and their dependents by way of compensation or medical aid for the twenty-two years amounts to $26,950,-513.59. The report also gives complete statistics for 1937 dealing with accidents by classes, months of occurrence of compensated accidents, time losses, average age and wage, nature of industries, causes of accidents, etc.

Saskatchewan

The ninth annual report of the Workmen's Compensation Board of Saskatchewan published recently, contains a provisional financial statement for the calendar year 1938 and a final statement for the year 1937.

During 1938 the number of employers reporting to the Board was 4,470 as compared with 4,693 in 1937, a decrease of 223. The amount of payroll reported during the year, exclusive of Dominion and Saskatchewan governments (which are not required to estimate their payrolls), totalled $30,824,315.00 as compared with $30,214,374.00 in 1937.

In 1937, the Board collected a sum of $553,-123.84 from all employers while expenditures in that year amounted to $502,762.38 leaving a surplus of $50,361.46. For the year 1938 the estimated receipts are $478,859.38 and the total expenditure including an estimate for outstanding claims is set at $429,278.48, leaving an estimated surplus of $49,580.90.

Claims reported to the Board in 1938 totalled 5,190, an increase of 131 over 1937. The number of fatal accidents in 1938 was 18, which included the asphyxiation of three workmen at the Moose Jaw Sewage Disposal Plant in May, 1938.

In 1937, the sum of $167,707.52 was paid by way of compensation; $184,325.15 in pension awards; $100,623.65 in hospital and medical aid, making an aggregate expenditure on these items of $452,656.32.

The average assessment rate of the Board during 1938 was $1.59 per hundred dollars of payroll, the same as in 1937. Commenting on this point the report stated that the assessment rate is the same "despite the fact that quite a number of rate reductions were imposed in 1938."

Referring to the surplus of 1937 and 1938 the report also states that "The surpluses for 1937 and 1938 were not budgeted for and are due to the uncertainties of income and accident cost. In accident cost the severity of the accidents is an important consideration. The Board declared certain rate reductions in 1938 and it has now declared further rate reductions for 1939 which, on the basis of 1938 payrolls, will reduce Board income by $53,930. These rate reductions should lead to a deficit for 1939 and such deficit will probably be quite substantial. It all depends, however, upon an unpredictable future."

Administration expenses of the Board during 1938 amounted to $49,657.44 while the benefits paid out amounted to $476,586.61, the percentage of administration expenses to benefits paid out being 10·4 "which" the report states "constitutes another record low for the Board, the percentage for 1937, which was the previous low, being 10·8."

The report also gives detailed statistics regarding accidents occurring during 1937. The causes of accidents in 1937 are classified as follows: Prime movers, 90; working machines, 226; hoisting apparatus, 17; dangerous substances, 171; stepping on or striking against objects, 590; falling objects, 615; handling objects, 540; tools, 310; runaways and animals, 56; moving trains and vehicles, 132; falls of persons, 632; all other causes, 917, a total of 4,296 for the year 1937.

EMPLOYMENT PROBLEMS OF OLDER WORKERS IN THE UNITED STATES

The Committee on Employment Problems of Older Workers, appointed by the United States Secretary of Labor in 1938, submitted its report on March 19, 1939. In its conclusion the Committee declares that the "prejudice against hiring the older worker appears to rest largely on inadequate or erroneous information"; that it is not true that "workers are through after 40"; and that "everything possible should be done to dispel this idea". Any policy, private or Governmental (it continues) which discriminates against workers on the basis of a fixed age is undesirable from all points of view and is not justified by the findings of the Committee.

The Committee was appointed in accordance with a recommendation made at the Fourth National Conference of the States on Labor Legislation (1937), and was charged with studying the employment problems of older workers and making recommendations thereon. It was composed of six representatives of employers, six of workers, seven members representing the public, and a secretary from the Department of Labor. The Committee did not make original field surveys as a basis for its report, but analysed and appraised available information on the subject, including statistical data furnished by various co-operating companies, the 1937 Census of Unemployment, and various W.P.A. studies.

Findings of Committee

The Census of Unemployment (1937) showed that the rate of unemployment mounted with age, thus confirming conclusions already drawn by placement officers in both public and private agencies. The W.P.A. has found that those workers who find private employment and thus leave the W.P.A. rolls are, on the average, 10 years younger than those who are unable to secure such employment, and also that older workers' unemployment is likely to be of much longer duration than that of younger workers, despite the fact that during these middle years of life workers acquire the heaviest family responsibilities.

While older workers are generally favoured by seniority rules and by general personnel policy, nevertheless once displaced they find great difficulty in securing re-employment. The Committee states that workers of 40 years of age and over are handicapped by three major factors: the current unemployment situation, the prejudices of employers, and their own fears.

Unconsidered acceptance of the idea that workers of 40 and over are less desirable than younger workers, the Committee declares, has created a serious situation. Yet an examination of factual data on productivity, accident compensation, sickness and group insurance plans and pension schemes, led the Committee to the conclusion that "there is little significant relationship between age and costs, and that the prejudice against hiring older workers rests largely on inadequate and erroneous impressions."

Recommendations

In order to attack the problem of unemployment among older workers, the Commit-

tee strongly recommends that the Government abolish age limits for entrance into the Government service, except for jobs where physical strenth and endurance are essential. "Although the Government provides a larger share of employment for older workers than private industry," the report states, "nevertheless the practice of setting age limits in public employment does constitute an artificial and unjustifiable limitation and does set an undesirable example to private industry."

Employers who have in the past adopted arbitrary hiring age limits are urged to discontinue this practice, to re-examine the basis of their preference for younger workers in the light of the findings of the Committee, and to scan their productive processes in order to determine which occupations are particularly suitable for the employment of older workers.

Trade unions and managements are urged to co-operate in eliminating prejudices against older workers and the Committee suggests that workers themselves can help to break down such prejudices, noting in this connection that in some instances the problem has been met through union contracts.

It is recommended also that the United States Employment Service study the work opportunities of a particular locality or group of employing establishments with a view to determining the jobs most suitable to middle-aged workers, and that the Service give special consideration to the qualifications, experience and aptitudes of middle-aged applicants.

Without specific authority by law to collect wages due, the Division of Women and Children in the Industrial Commission of Minnesota collected $42,283 in the biennium 1937-38 in minimum-wage shortages for 2,067 employees. The value of this service is indicated by the statement that "later pay-roll audits have presented conclusive evidence of the general permanency of these wages increases. . ."

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD JANUARY TO MARCH, 1939

BUSINESS transacted by the offices of the Employment Service of Canada during the quarter January to March, 1939, showed a marked gain over that recorded during the corresponding quarter of 1938, as there was an increase of over 19 per cent in vacancies offered and of 21 per cent in placements effected. Gains were shown in both instances in construction and maintenance, services and farming, that in the first named group being very substantial; this was due largely to relief work on highways and other construction sponsored by the federal and provincial governments. Logging, manufacturing, transportation, trade and mining recorded declines. The decrease in logging was fairly large and the one in manufacturing of more moderate proportions, while those in the remaining groups were quite small. Provincially, the Maritimes, Ontario, Saskatchewan and British Columbia reported additional vacancies and placements, Ontario showing the greatest change which took place in the construction and maintenance group, where more relief placements had been effected, while Manitoba, Quebec and Alberta registered losses under both comparisons, Manitoba reporting the largest reduction.

From the chart on page 506, which accompanies the article on the work of the Employment Offices for the month of March, it will be seen that the curves of vacancies and placements in relation to applications showed the greatest fluctuations during the first half of January, when a pronounced downward trend was followed. During the remainder of the quarter little marked change was shown, there being a rise of several points during the latter half of January and of February and a drop of about two points during the first half of March. However, at the close of the period under review, the levels of both curves were nearly 16 points higher than those recorded at the end of March, 1938. During the period January to March, 1939, there was a ratio of 45·3 vacancies and 43·5 placements for each 100 applications for employment, as compared with 41·4 vacancies and 39·2 placements during the corresponding quarter a year ago.

The average number of positions offered daily during the quarter under review was 1,214, of applications registered 2,681 and of placements effected 1,166, in contrast with a daily average of 1,017 vacancies, 2,457 applications and 964 placements in regular and casual employment during the first quarter of 1938.

During the three months January to March, 1939, the offices of the Employment Service reported that they had made 93,300 references of persons to positions and had affected a

total of 88,570 placements, of which 49,056 were in regular employment and 39,514 in casual work. Of the placements in regular employment 33,665 were of men and 15,391 of women, while casual work was found for 28,897 men and 10,617 women. A comparison with the same period of 1938 shows that 73,189 placements were then made, of which 50,113 were in regular employment and 23,076 in casual work. Applications for employment during the period under review were received from 151,567 men and 52,145 women, a total

of 203,712 persons, in contrast with the registration of 186,727 during the same period of 1938. Employers notified the Service during the first quarter of 1939 of 92,251 positions, of which 62,972 were for men and 29,279 for women, as compared with 77,263 opportunities for work offered during the corresponding quarter of 1938.

In another section of this issue will be found a report in detail of the transactions of the Employment Offices for the month of March, 1939.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, MARCH, 1939

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on April 1 was 11,493, the employees on their payrolls numbering 1,015,632 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for March was 1,962, having an aggregate membership of 251,191 persons, 15·7 per cent of whom were without employment on April 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of April, 1939, as Reported by Employers

Employment at April 1 showed considerable curtailment of a seasonal character, according to information tabulated in the Dominion Bureau of Statistics from 11,493 establishments whose staffs aggregated 1,015,632 persons, compared with 1,031,679 in the preceding month. This reduction of 16,047 workers lowered the index from 106·5 at March 1, 1939, to 104·9 at the date under review, when it showed little change from that of 105·0 at April 1, 1938. The 1926 average is taken as 100 in calculating these indexes.

The trend of employment at April 1 in sixteen of the eighteen preceding years for which statistics are available has been downward; the decline ordinarily results from the release of bushmen following the completion of the season's logging operations in the Eastern and Central Provinces, before any appreciable number of workers have been absorbed into the outdoor industries opening up in the spring and early summer. The general contraction at the latest date was very slightly less than the average recorded at April 1 in the years since 1920, and has been considerably exceeded on several occasions in recent years, notably by the reductions indicated at the beginning of April in 1938, 1935 and 1930. After adjustment for seasonal variation the index at the latest date stood at 111·1, compared with 111·0 at March 1, 1939.

There was important shrinkage in logging at April 1, 1939, when 13,046 men were released from work in the woods; this decline was substantially smaller than that recorded at the same date last spring, but approximated the average loss at April 1 in the years since 1920. Mining was also seasonably quiet, and there was a falling-off in transportation and on railway construction and maintenance. On the other hand, manufacturing showed some slight improvement and there were also additions to staffs in highway work, in services and trade.

Based on the 1926 average as 100, the unadjusted indexes at April 1 in recent years are as follows:—1939, 104·9; 1938, 105·0; 1937, 103·0; 1936, 97·4; 1935, 93·4; 1934, 91·3; 1933, 76·0; 1932, 87·5; 1931, 99·7; 1930, 107·8; 1929, 110·4 and 1928, 102·3.

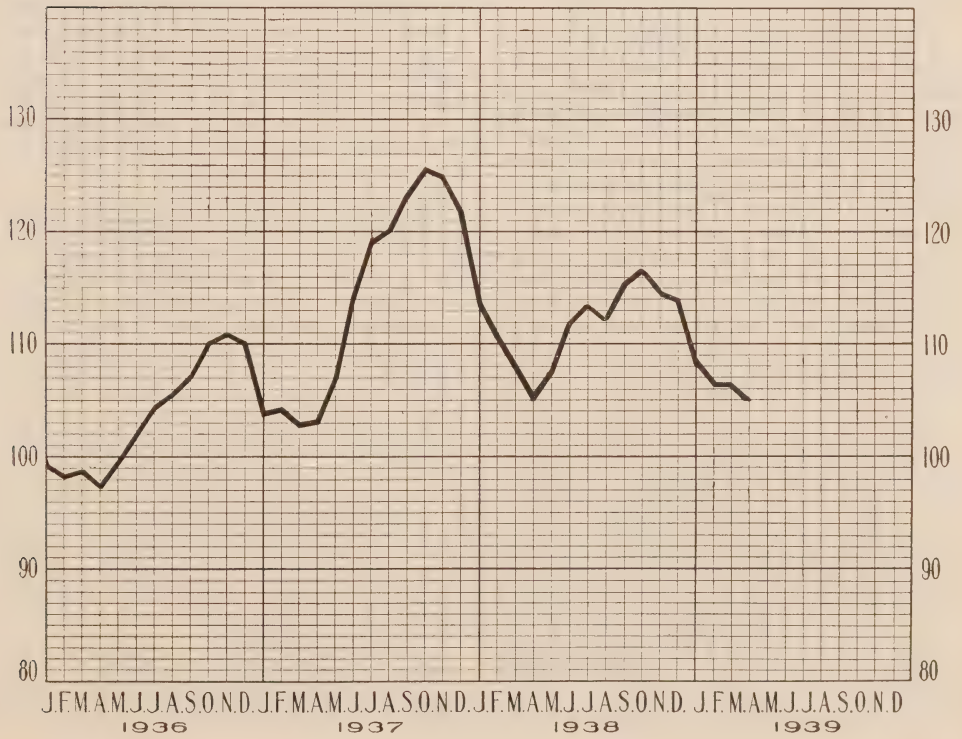
For April 1, 1938, statistics had been received from 10,450 firms, whose employees had numbered 1,001,970, as compared with 1,029,001 in the preceding month. The index had then stood at 105·0.

Employment in Financial Organizations

For some months, statistics of their employment have been collected from banks, trust companies and stock exchange operators. For April 1, 415 firms and branches in these lines of business reported staffs aggregating 32,909 persons, compared with 32,930 in the preceding month. The addition of these figures to the returns furnished in the manufacturing, logging, mining, transportation, communications, construction, service and trade industries brings the total number of employees included in

the April 1 survey of employment to 1,048,541, and slightly raises the index to 105·0. Comparable data for April 1, 1938, are not available.

Employment by Economic Areas



Industrial activity in New Brunswick, Quebec, Ontario and the three Prairie Provinces showed seasonal declines on a large scale at April 1, while in Prince Edward Island, Nova Scotia and British Columbia there was an upward movement. The general level of employment in Prince Edward Island, Quebec, Saskatchewan, Alberta and British Columbia, was slightly higher than at the same date of 1938; in the remaining provinces, however, this comparison was unfavourable. In most cases, the variation from last April was small.

Maritime Provinces.—There was a large seasonal decrease in the Maritime Provinces; improvement was reported in Prince Edward Island and Nova Scotia, but in New Brunswick considerable curtailment was indicated. The 814 co-operating employers reduced their payrolls from 74,500 persons at March 1 to 73,458 at the beginning of April. Logging showed a decided seasonal contraction, over 1,900 men being released from bush work, while employment in building, highway and railway construction and maintenance moderately declined. On the other hand, manufacturing reported important gains, mainly in food, textile and iron and steel factories. Transportation and retail trade also showed an advance. Employment generally was not so brisk as at the beginning of April, 1938, although more pronounced losses had then been reported; statements for April 1 of last year were received from 715 firms employing 74,901 workers, 3,374 fewer than at March 1, 1938.

Quebec.—Manufacturing, shipping, services, and trade showed moderately heightened activity in Quebec. The gains in manufacturing, though rather small, extended to most industrial divisions, the tobacco and mineral product groups being the exceptions. On the other hand, mining, transportation, construction and logging reported large declines. Data was tabulated from 2,828 establishments in Quebec,

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

with 310,584 employees, as against 320,258 at March 1. The index, at 109·4 at April 1, 1939, was two points higher than at the same date of last year, although the curtailment then indicated had been on a smaller scale. The trend has been retrogressive in sixteen of the eighteen previous Aprils for which information is available; the decrease at the latest date exceeded the average recorded at this time of year, but was much smaller than that reported at April 1 in 1934, 1935 or 1936.

At April 1, 1938, statistics had been furnished by 2,521 employers, whose pay-rolls had included 299,694 men and women, as compared with 307,213 in the preceding month.

Ontario.—Employment showed a contraction in Ontario, where 5,026 firms had reduced their forces by 4,926 workers since the preceding month, bringing them to 426,204 at April 1. A decidedly greater loss had been registered by the 4,630 employers making returns for the same date in 1938, when their staffs had aggregated 428,027; however, employment was then at a higher level, the index standing at 109·6, compared with 108·0 at the latest date. The experience since 1920 shows that activity customarily declines in Ontario at the beginning of April, there having been curtailment of operations in fifteen of the eighteen previous years for which data are available; the reduction at the date under review approximated the average.

Manufacturing showed a falling-off at the first of April, notably in tobacco factories, while curtailment was also indicated in the pulp and paper, textile and electric light and power divisions. On the other hand, food, beverage, rubber, clay, glass and stone, non-ferrous metal and some other factories reported heightened activity; little general change took place in iron and steel works. In the non-manufacturing industries, mining, transportation, road construction and maintenance, services and trade showed improvement. Logging, however, released a large number of workers as the season's operations drew to a close, and railway construction and maintenance was also quieter.

Prairie Provinces.—As is customary in the early spring, employment in the Prairie Provinces declined at April 1; the reduction, though rather smaller than that noted at the same date in 1938, exceeded the average loss indicated in the early spring in the last eighteen years. The index, at 91·7 at the latest date, was slightly higher than at April 1, 1938. Most of the decrease at the beginning of April in the present year was of a seasonal character in coal-mining and logging, but construction, transportation and manufacturing were also slacker. On the other hand, services and trade also afforded rather more employment. The working forces of the 1,664 co-operating employers aggregated 118,337 persons, compared with 121,778 at March 1.

The establishments furnishing information at the same date of last year had numbered 1,503, with a personnel of 114,126.

British Columbia.—A substantial advance of a seasonal character was indicated in British Columbia, according to returns tabulated by the Bureau from 1,161 firms with 87,049 employees, or 3,036 more than in their last report. The increase greatly exceeded that noted, on the average, at April 1 in previous years of the record, although it was smaller than the gain recorded at the same date of last spring. The volume of employment reported was practically the same as at April 1, 1938, when it was larger than in the early spring of any other year since 1930. There was improvement at the date under review in manufacturing (especially of lumber products), and in logging, construction and trade. At the beginning of April of last year, the 1,081 co-operating establishments had reported 85,222 employees, compared with 81,832 in the preceding month.

Table 1 gives index numbers by economic areas.

Employment by Cities

Industrial activity increased in six of the eight centres for which employment data are segregated. The gains in Montreal and Toronto were considerable. The movement was also favourable in Quebec City, Ottawa, Hamilton and Vancouver, in Windsor, little general change was noted, while Winnipeg firms reported moderate curtailment of operations from March 1, 1939.

Montreal.—There was an advance in industrial activity in Montreal, according to 1,656 firms who reported 157,774 persons on their payrolls, as compared with 156,460 at March 1. This increase was seasonal in character and approximated the average gain at April 1 in preceding years of the record, although it was smaller than that indicated at the same date in 1938. Manufacturing generally showed improvement at April 1, 1939, from the preceding month, textile and iron and steel plants reporting the greatest increases in personnel. Services, trade and construction also afforded rather more employment, but transportation was quieter. The 1,447 establishments from which returns were received for April 1, 1938, had reported 151,472 employees, compared with 148,340 in the preceding month; the index then was slightly lower.

Quebec.—Manufacturing, construction, services and trade showed heightened activity in Quebec City, while transportation was slacker.

There was an increase of 36 in the working forces of the 206 employers making returns, who had 16,514 on their payrolls at April 1. A small gain had also been reported by the 177 firms co-operating at the beginning of April in 1938, whose staffs aggregated 13,418; the index, at 100.4, was then much lower than that of 118·1 at the latest date.

Toronto.—Toronto businessmen reported improvement over the preceding month, the additions to staffs largely exceeding those reported at April 1, 1938. Most of the betterment as compared with the preceding month occurred in trade, although services and transportation also afforded more employment; within the factory group, increases in textile, mineral product, clay, glass and stone and other divisions were more than offset by losses in printing and publishing, iron and steel and some other classes. The working forces of the 1,711 employers furnishing statistics totalled 135,196 persons, compared with 134,303 in the preceding month. Employment was in practically the same volume as at the corresponding date of last year, when a smaller advance had been indicated by the 1,574 concerns reporting; their payrolls had included 132,297 men and women. The index at April 1, 1939, stood at 106·1, as compared with 106·0 at the beginning of April in 1938.

Ottawa.—Improvement was noted in Ottawa, there being gains in manufacturing and construction. Transportation, on the other hand, was quieter. An aggregate staff of 14,618 workers was employed by the 225 establishments whose statistics were tabulated, and who had 14,359 in their last report. The index, at 107·3, was several points higher than that of 101·7 at the same date of last year, when a similar increase had been recorded. Statements had then been compiled from 202 firms with 13,498 emloyees.

Hamilton.—Manufacturing showed recovery, particularly in the iron and steel division; there was also an upward movement in trade, while building contractors released some members of their staffs. Returns were tabulated from 322 employers with 32,109 persons on their pay lists, or 496 more than at March 1. The level of employment was lower than at April 1, 1938, although a much smaller advance had then been indicated by the 296 co-operating establishments, whose payrolls had included 34,298 men and women.

Windsor.—Little general change took place in Windsor at April 1, according to data received from 197 firms employing 19,214 men and women, as against 19,202 in the beginning of March. Manufacturing was rather slacker, while the non-manufacturing divisions reported some improvement. Employment on the whole was in smaller volume than in April of last year; 187 concerns had then reported 20,331 persons on their staffs.

Winnipeg.—Employment in Winnipeg showed a further falling-off; the payrolls of the 521 employers furnishing statistics aggregated 38,311 workers, as compared with 38,395 in the preceding month. Manufacturing was rather more active, there being moderate gains in a number of industries, while construction was quieter. No general change had been noted at April 1, 1938, when information had been received from 487 firms with 38,639 employees; the index was then slightly higher, standing at 89·6, as compared with 88·3 at the date under review.

Vancouver.—Improvement was reported in Vancouver, according to 506 establishments with a staff of 35,504, as compared with 35,228 in the preceding month. There was a decline in transportation, but manufacturing, construction, services and trade showed heightened activity. A smaller increase had been recorded at the beginning of April of last year, and employment in that city was then at a lower level. The index stood at 107·4 at the latest date, compared with 104·6 at April 1, 1938, when the 460 co-operating employers had reported 33,889 men and women on their pay-lists.

Employment by Industries

Manufacturing.—Further slight improvement was recorded in manufacturing, the gain being considerably smaller than the average increase from March 1 to April 1 in the experience of the years since 1920. Additions to staffs at the date under review were recorded in iron and steel, food, textile, rubber, beverage, chemical, clay, glass and stone, non-ferrous metal, fur, leather and musical instrument factories. On the other hand, declines were indicated in the lumber, pulp and paper and tobacco divisions, those of a seasonal character in the last-named being on a large scale. Statements were received from 6,283 manufacturers, employing 546,555 operatives, as compared with 546,327 in the preceding month. The index stood at 107·1, compared with 107·0 at the beginning of March, while at April 1, 1938, it was 110·8.

Since the general increase in factory employment was below the average gain at this date in previous years for which statistics are available, the seasonally-corrected index declined, falling from 109·3 at March 1, to 108·0 at the beginning of April, 1939.

The following are the unadjusted index numbers in manufacturing at April 1 in the years since 1927, (average 1926=100):—1939,

107·1; 1938, 110·8; 1937, 110·8; 1936, 101·1; 1935, 93·9; 1934, 88·1; 1933, 76·0; 1932, 87·3; 1931, 99·7; 1930, 111·3; 1929, 116·5; and 1928, 106·6.

A brief review of the situation at April 1, 1938, shows that the 6,040 manufacturers then furnishing data had employed 563,660 workers, an increase of 1,082 in comparison with their March 1, 1938, payrolls.

Animal Products, Edible.—Improvement was noted in dairies, fish canneries and meat-packing establishments. Statements were tabulated from 303 firms employing 23,663 workers, as against 23,129 at the beginning of March. A smaller increase had been recorded at April 1, 1938, and activity was then at a slightly lower level.

Leather and Products.—Further but moderate gains were shown in the leather group, according to statements from 315 employers whose payrolls aggregated 23,104 at the beginning of April, or 223 more than in the preceding month. A smaller increase had been indicated at April 1 a year ago when the index of employment was 3·5 points lower.

Lumber and Products.—An upward trend was noted in wooden vehicle factories, but container, rough and dressed lumber and other wood-using mills were slacker. On the whole, there was a decrease of 175 persons in the lumber group as reflected in statistics from 900 manufacturers, with 38,473 employees, as compared with 38,648 at March 1, 1939. The loss was contra-seasonal, according to the experience of earlier years of the record, although a reduction had also been reported at the beginning of April, 1938. The index, at 72·4 at April 1, 1939, was slightly lower than at the same date of last year.

Plant Products, Edible.—There was an advance in employment in vegetable foods in the period under review, flour and cereal, fruit and vegetable preserving, and some other classes reporting heightened activity. Returns were tabulated from 519 firms whose payrolls aggregated 31,854 persons, as compared with 31,689 at March 1. The index was fractionally lower than at the beginning of April, 1938, when a larger gain had been noted.

Pulp and Paper Products.—The movement in all branches of the pulp and paper group was slightly downward. Data were received from 697 firms employing 64,647 workers, as compared with 64,928 in their last report. On the whole, employment in these industries was rather quieter than at April 1, 1938, improvement over the preceding month having then been indicated.

Rubber Products.—Rubber works were more active, 222 persons being added to the reported staffs, which totalled 13,175 in 54 establishments. An advance had also been shown at the same date last year, when the index was rather lower.

Textile Products.—There was further improvement on the whole in employment in textiles, chiefly in garment and personal furnishings, knitting and headwear factories, while woollen and silk mills were slacker. The average change at April 1 in the eighteen preceding years for which data are available has been an increase, so that the gain at the date under review was seasonal. Statements were compiled from 1,157 manufacturers with 104,496 employees, or 574 more than at March 1, 1939. Most of the advance occurred in Quebec. The situation was not so favourable as at the corresponding date of last year, although a contraction had then been reported.

Tobacco.—Seasonal reductions in employment were recorded in this group, 4,372 persons being released from the working forces of the 45 co-operating establishments, which employed 9,138 workers at the date under review. The curtailment took place largely in Ontario. The index was lower than in the spring of last year, when small losses had been noted.

Beverages.—The tendency was slightly upward in this division, there being improvement in distilled and malt liquor and soft drink manufacturing. Returns were tabulated from 93 establishments with 6,750 men and women on their staffs, compared with 6,673 at March 1. Employment in the beverage group was brisker than at the beginning of April, 1938; the gain then indicated was on a somewhat smaller scale.

Chemicals and Allied Products.—Two hundred and ninety-eight plants turning out chemicals and allied products reported 18,188 employees, as compared with 17,852 in their last return. The largest gains took place in Quebec and Ontario. The general advance rather exceeded that noted at the corresponding date in 1938, but the index then was slightly higher.

Clay, Glass and Stone Products.—There was an increase in the personnel of building material works, 214 of which employed 8,582 workers, as against 8,035 in their last report. Smaller additions to staffs had been made at April 1, 1938, when employment in these industries was a little more active.

Electric Light and Power.—A falling-off was shown in this group, in which 100 plants reported 15,632 employees, or 52 fewer than at the beginning of March. The largest loss was in Ontario, while a gain was noted in Quebec.

Employment was brisker that at April 1, 1938, although the trend was then favourable.

Electrical Apparatus.—Slight improvement was noted in electrical appliance factories, according to the 124 co-operating firms, who had 16,859 persons on their payrolls, compared with 16,779 in their last report. Curtailment had been noted at April 1, 1938, when the index was over eleven points higher.

Iron and Steel Products.—Statistics were received from 916 manufacturers in this group, whose staffs were enlarged by 1,527 workers to 125,268 at the beginning of April. There were moderate gains in the crude, rolled and forged, shipbuilding, heating appliance, structural iron and steel, and many other divisions; indeed, the trend was generally, though slightly upward in all branches except the automobile, agricultural implement and wire divisions. Improvement was shown in the Maritime Provinces and Quebec, while there was a small gain in Ontario, with a similar decline in the Western Provinces. Very much smaller additions to the personnel had been recorded, on the whole, in the same period of last year, but the index number then was considerably higher than that of 95·8 at April 1, 1939.

Non-ferrous Metal Products. — Returns tabulated from 189 manufacturers in this group showed that they employed 24,353 persons, as against 24,023 at March 1. Most of the increase took place in the smelting and refining division. The improvement was chiefly in Quebec and Ontario. Employment was in slightly less volume than at the beginning of April in 1938, although the advance then indicated was rather smaller.

Mineral Products.—No general change was shown in these industries at the beginning of April, according to data received from 100 establishments, in which 11,808 persons were employed, or 14 fewer than in the preceding month. The index of employment in this group was lower than in the corresponding period of last year, when a slight gain had been shown.

Logging

Continued and larger losses of a seasonal character were reported in logging camps, 420 of which reduced their payrolls from 31,637 men at March 1, to 18,591 at the date under review; the number laid off was about average, according to the experience of preceding years of the record. The most extensive curtailment at the beginning of April was in Quebec and Ontario, but the movement was also downward in the Maritime and Prairie Provinces. In British Columbia, on the other hand, considerable improvement was noted. The seasonal contractions reported at the same date of last year had involved the release of over twice as many workers, but the index then was many points higher than at April 1, 1939, when it stood at 64·0.

Mining

Coal.—As is customary at the beginning of April, there was a falling-off in employment in coal-mines during the period being reviewed; this mainly occurred in the Prairie coal fields, but there were also small losses in the Maritime Provinces and British Columbia. Data were received from 105 operators, whose staffs included 23,915 employees, as against 25,499 in their last report. The index was slightly lower than in the spring of last year, when smaller declines had been reported.

Metallic Ores.—Returns were received from 233 firms in this group, employing 40,956 workers, or 129 fewer than at the beginning of March. An insignificant increase had been indicated at the same date in 1938, but the index then stood at 307·6 compared with 333·6 at the beginning of April of the present year.

Non-metallic Minerals, other than Coal.—Seasonal gains were made in these industries, in which 100 firms employed 7,971 persons, as compared with 7,878 in the preceding month. Although more marked advances had been recorded by the employers furnishing statistics at April 1 of last year, employment then was at much the same level.

Communications

Information was received from 86 communication companies and branches, employing 21,686 workers, or 96 more than in the preceding month. Telephones and telegraphs showed a moderate improvement. A similar gain had been indicated at April 1, 1938; the index was then at 82·5, compared with 81·2 at the latest date.

Transportation

There were contractions in employment in the street railway, cartage and steam railway divisions, while shipping was rather brisker; the losses on steam railways were considerable. Statistics were compiled from 505 employers of 95,997 workers, as compared with 97,261 at March 1. Of the former number, 27,466 persons belonged in the local transportation, 56,470 in the steam railway, and 12,061 in the water transportation division. The tendency at April 1 in preceding years for which data are available has usually been upward, there being, on the average, a small increase at that date; the movement at the beginning of April, 1938, however, had also been unfavourable, although the loss then recorded was not so large. Nevertheless, the index at the date

under review was 79·3, or very slightly higher than that of 78·5 at April 1, 1938.

Construction and Maintenance

Building.—Statements were compiled from 812 building contractors, with 18,212 persons in their employ, or 11 more than in their last report. The tendency was upward in Quebec and British Columbia, but elsewhere was unfavourable. A general reduction had been indicated at April 1, 1938, when the index was, however, fractionally higher.

Highway.—Additions to staffs were reported on highway construction and maintenance; 366 contractors employed 69,631 men, as compared with 67,587 in the preceding month. Quebec, Ontario and British Columbia recorded heightened activity, the gains in Ontario being substantial. More pronounced improvement over March had been shown in April of last year, but the number then engaged in this work was decidedly smaller than in the period under review.

Railway.—There was curtailment in employment in the construction departments of the railways in four of the five economic areas. British Columbia where no general change was shown, being the exception. Most of the decline was due to the completion of track-clearing operations as the winter drew to a close. The working forces of the 34 co-operating contractors and divisional superintendents aggregated 22,201 men, whereas in the preceding month they had 27,557 employees. The index number was two points lower than in the spring of 1938, a much smaller decline having been recorded at April 1 of last year.

Services

The service group showed improvement, according to 583 firms with 28,893 workers, or 643 more than in the preceding month. Laundries and dry-cleaning establishments were decidedly busier, and there was a smaller gain in hotels and restaurants. On the whole, the increase reported at the beginning of April of last year, was not quite so marked and employment was then in rather less volume than at the date under review.

Trade

There was a substantial increase in the aggregate forces of the 1,966 co-operating wholesale and retail establishments, which employed 121,024 workers at April 1, as compared with 118,807 at the beginning of March. This advance, which was seasonal, occurred mainly in the retail division, while wholesale houses showed little general change. All five economic areas shared in the upward movement. A smaller gain had been indicated in trade as a whole at the same date a year ago, when the index of employment was rather lower, standing at 127·1, compared with 131·1 at the beginning of April, 1939.

Tables

Index numbers of employment by economic areas, leading cities and industries, respectively, are given in the accompanying tables. The columns headed "relative weight" show the proportion that the number of employees reported in the indicated area, or industry, is of the total number of employees reported in Canada by the firms making returns at the date under review.

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

——	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
April 1, 1927	97·4	97·8	94·6	100·4	94·1	96·1
April 1, 1928	102·3	98·5	99·2	106·0	101·9	100·0
April 1, 1929	110·4	107·5	101·1	117·4	113·9	106·0
April 1, 1930	107·8	107·8	103·7	112·7	103·2	106·0
April 1, 1931	99·7	102·3	98·5	102·4	97·7	92·4
April 1, 1932	87·5	88·3	85·0	91·1	86·1	80·9
April 1, 1933	76·0	78·3	73·1	78·3	78·3	68·8
April 1, 1934	91·3	95·1	85·1	98·7	83·3	86·6
April 1, 1935	93·4	95·8	85·9	100·7	86·9	91·8
April 1, 1936	97·4	101·8	91·4	103·4	90·5	95·9

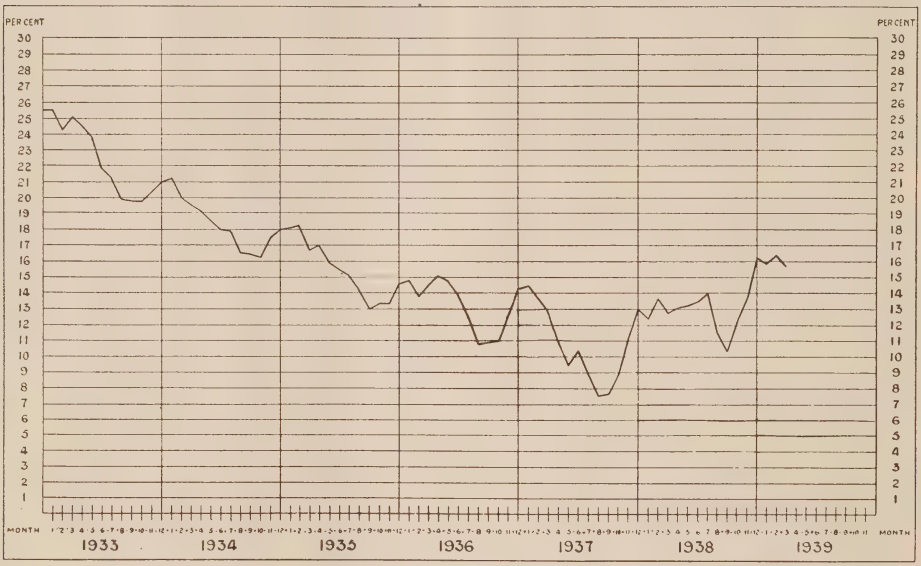
[1] For explanation of term "Relative Weight", see footnote to Table I.

(2) Unemployment in Trade Unions at the Close of March, 1939

Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are idle due to illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Some reaction from winter quietness among local trade union members was apparent at the end of March, the slight improvement



noted being mainly seasonal in character and affecting a number of industries. For the month under review reports were forwarded by a total of 1,962 labour organizations including a membership of 251,191 persons, 39,498 of whom or a percentage of 15·7 were idle on the last day of the month contrasted with 16·4 per cent in February. Less active conditions, however, prevailed than in March last year when 12·8 per cent of unemployment was reported. The provincial variations in comparison with February were not outstanding, Quebec, Nova Scotia, British Columbia, New Brunswick, Saskatchewan and Ontario unions all recording heightened activity on a small scale while in Alberta and Manitoba employment eased off slightly. All provinces participated in the downward employment movement manifest from March a year ago, Nova Scotia, New Brunswick, Ontario and Alberta unions showing fair-sized contractions in work afforded, and Saskatchewan, Quebec, Manitoba and British Columbia declines of lesser degree.

Each month a separate tabulation is made showing the unemployment situation in the largest city in each province except Prince Edward Island. During March, moderate advances in available work were registered by Regina unions from February, and increases of slightly smaller proportions were noted by Halifax members. Nominally better conditions prevailed in Montreal and Toronto. On the contrary, Saint John, Vancouver and Winnipeg unions showed retarded activity on a rather small scale, and in Edmonton the increases in idleness reported were only fractional. When making a comparison with the returns for March last year Regina and Vancouver members showed a favourable employment tendency during the month reviewed though the gains were less than one per cent, and in all other cities losses in activity were recorded. Of these, the most important were reflected in Edmonton, while Saint John, Montreal, Toronto and Winnipeg members suffered moderate curtailment of activity, and minor contractions occurred in Halifax.

It will be noticed from the chart which accompanies this article that the curve of unemployment during March pursued a contrary course to that of the previous month, projecting slightly in a downward direction and reflecting a somewhat better situation during the month reviewed. The level of the curve, however, remained above that of March, 1938, when employment was in greater volume.

Slight increases in work afforded were evident in the manufacturing industries during March, the 574 unions furnishing reports with a membership numbering 98,870 persons showing 13·3 per cent of inactivity compared with 14·3 per cent in February. Papermakers and wood workers recorded gains in activity from February, involving the largest number of members, and among fur workers and metal polishers the percentage advances were pronounced, though affecting few persons as their

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

total membership was rather small. Hat, cap and glove workers also, showed important employment expansion. An upward movement of employment was apparent among garment, iron and steel, brewery, and cigar and tobacco workers, mill and smeltermen, and meat cutters and butchers, but the changes from February were slight. Leather and glass workers, on the contrary, were much quieter than in February and among general labourers there was an appreciable drop in the volume of work accorded. Lesser declines occurred among textile and carpet, gas and jewellery workers, bakers and confectioners, and printing tradesmen. The percentage of idleness in the manufacturing industries as a whole, exceeded that reported in March last year when 11·4 per cent of unemployment was recorded. In this comparison the garment and textile trades, and leather workers contributed substantially to the total increase in idleness during the month reviewed and a less favourable situation obtained for jewellery, brewery, and iron and steel workers, papermakers, and mill and smeltermen. On the other hand, fur, hat, cap and glove, and wood workers and metal polishers were decidedly better employed. Moderate advancement was indicated by meat cutters and butchers, and general labourers, while glass, cigar and tobacco, and gas workers, printing tradesmen, and bakers and confectioners also, showed somewhat improved conditions.

Due to a large extent to mine closings in Alberta during March the coal mining industry was quieter than in the preceding month. Reports for March were tabulated from 56 unions of coal miners covering a membership of 21,786 persons, 2,765 of whom or a percentage of 12·7 were idle compared with 10·4 per cent in the preceding month. Contributing declines of much smaller proportions than in Alberta were registered from the British Columbia mines, while in Nova Scotia the trend was toward increased employment. Inactivity in the British Columbia mines was considerably more pronounced than in March last year when 7·6 per cent of the members indicated in the group as a whole, were out of work, though in Alberta and Nova Scotia there were noteworthy employment recessions. Part time work among coal miners was registered also to a considerable degree during March.

The usual revival in building and construction activities with the approach of the spring season was in evidence to a moderate degree during March, unemployment standing at 40·2 per cent as compared with 44·6 per cent in February. Reports for March were tabulated from 222 associations of these tradesmen, with 28,493 members, 11,456 of whom were without employment on the last day of the month. Conditions were also fractionally better than in March last year when 40·8 per cent of the members reported were out of work. Painters, decorators and paperhangers, and bridge and structural iron workers were much busier than in February and the improvement registered by carpenters and joiners, though smaller viewed from a percentage basis, still involved a considerable number of members. Moderate gains were noted also by hod carriers and building labourers, granite and stonecutters, and electrical workers. Large scale recessions, however, were evident among tile layers, lathers and roofers, and activity for bricklayers, masons and plasterers, plumbers and steamfitters, and steam shovelmen showed noteworthy curtailment. Employment for bricklayers, masons and plasterers was somewhat more prevalent than in March a year ago, and the situation improved slightly for plumbers and steamfitters, and hod carriers and building labourers. Among carpenters and joiners the change from March, 1938, was but nominal though tending in a favourable direction. Of the recessions in employment which were nearly sufficient to offset these gains, the most extensive were manifest by steam shovelmen, tile layers, lathers and roofers, granite and stonecutters, and bridge and structural iron workers. Noteworthy declines in activity also, occurred among electrical workers and painters, decorators and paperhangers.

There was no variation apparent in the level of unemployment for transportation workers during March from the preceding month, the 837 unions from which reports were tabulated representing a total of 66,986 members, indicating 13·2 per cent of inactivity, the same as was recorded at the end of February. Steam railway employees, whose membership constituted nearly 78 per cent of the entire group membership represented, showed fractional declines in work afforded as did also street and electric railway employees, while among teamsters and chauffeurs small recessions in employment were manifest. This curtailment was, however, completely counteracted by the better conditions prevailing in the navigation division. In contrasting with the returns for March a year ago when 9·0 per cent of idleness was reflected in the transportation industries, navigation was much quieter during the period surveyed, and contributing declines on a moderate scale were reported by steam railway employees, and teamsters and chauffeurs. Street and electric railway employees, however, showed a favourable

tendency, though the change from March last year was quite slight.

The five associations of retail shop clerks from which reports were tabulated at the end of March with a membership aggregate of 1,852 persons indicated that only 0·1 per cent were out of work as compared with 0·3 per cent of idleness in February. In March last year all members were reported busy.

From unions of civic employees 83 reports were received during March, embracing a membership of 10,501 persons, 232 or a percentage of 2·2 of whom were idle on the last day of the month contrasted with percentages of 1·5 in February and 1·3 in March a year ago.

The trend of employment in the miscellaneous group of trades was more favourable during March than in the preceding month though the change was slight, the 144 unions from which reports were compiled with a membership numbering 11,578 persons showing an unemployment percentage of 9·8 in comparison with 10·5 per cent of inactivity in February. Declines in work afforded on a small scale, however, were registered from March last year when 8·3 per cent of the members reported were idle. A moderate rise in employment was manifest by unclassified workers during March from February, and stationary engineers and firemen showed a more favourable trend of activity. Some falling off in available work, however, was recorded by theatre and stage, and hotel and restaurant employees, and barbers. Compared with the returns for March last year a considerably lower level of activity was apparent among unclassified workers, and minor contractions prevailed among barbers and hotel and restaurant employees. Slight gains in work afforded, however, were reported by theatre and stage employees, and stationary engineers and firemen.

Fishermen reflected large increases in slackness during March from either the previous month or March last year according to the returns compiled from 9 locals with 2,285 members. Of these, 839 or a percentage of 36·7 were out of work on the last day of the month in contrast with 13·8 per cent in February and with a percentage of 16·3 in March last year.

Unemployment for lumber workers and loggers showed a considerable falling off during March from the preceding month, the 3 locals from which reports were received comprising a membership of 1,794 persons, showing 31·5 per cent of idleness in comparison with a percentage of 55·6 in February. Severe losses in work afforded, however, were noted from March last year when 4·3 per cent of inactivity was registered.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1929 to 1938 inclusive and also the percentage of unemployment by provinces for March of each year from 1929 to 1936 inclusive and for each month from March, 1937, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

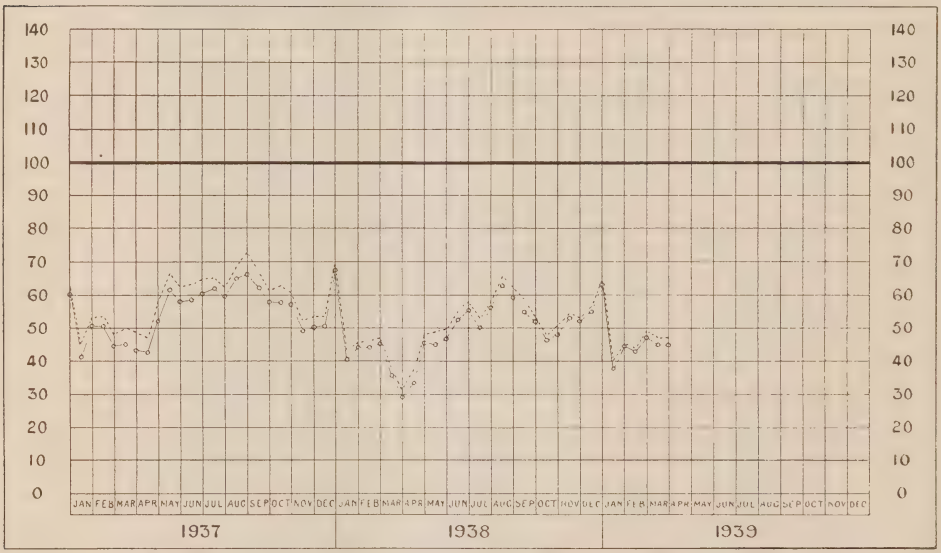
(3) Employment Office Reports for March, 1939



The volume of business transacted by the offices of the Employment Service of Canada during the month of March, 1939, as represented by the average daily placements, showed a decline of 2 per cent from February, although total placements for the month were considerably higher, as there were 3 more working days in March than in February. When compared with March a year ago an increase in the average daily placements of over 31 per cent was shown; total placements, too, were higher, even though the working days in March 1938 and 1939 remained the same. In industrial comparison with February, gains were recorded in all groups, except logging and trade, the highest being in construction and maintenance and services, while increases in manufacturing and farming were more than offset by the decline in logging; changes in mining, transportation and trade were nominal only, the latter being adverse. When compared with March, 1938, a substantial gain was registered in construction and maintenance, a more moderate one in services and slight ones in farming and mining. Losses were shown in logging, transportation, trade and manufacturing, none of which was outstanding.

The accompanying chart shows the trend of employment since January, 1937, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. As may be seen from the graph, the curves of both vacancies and placements in relation to applications followed a slightly downward trend during the first half of February, but remained practically unchanged during the latter half of the month, while at the close of the period under review both levels attained were nearly 16 points higher than those recorded at the end of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 47·1 during the first half and 47·2 during the second half of March, 1939, in contrast with ratios of 38·1 and 31·7 during the corresponding periods of March, 1938. The ratios of placements to each 100 applications during the periods under review were 44·9 and 44·8, as compared with 35·8 and 29·3 during the corresponding month of 1938.

The average number of vacancies reported daily by employers to offices of the Service throughout Canada during March, 1939, was 1,152, as compared with the daily average of 898 during the same month a year ago and with 1,159 recorded daily in February, 1939.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements—o—o—o—o—o—o

The average number of applications for employment received daily by the offices of the Service during the month under review was 2,443, in comparison with 2,599 in March, 1938. Applications for work during the preceding month of 1939 averaged 2,485 daily.

The average number of placements made daily by the offices of the Service during March, 1939, was 1,097, of which 582 were in regular employment and 515 in work of one week's duration or less, as compared with a total daily average of 1,119 during the preceding month. Placements in March a year ago averaged 837 daily, consisting of 547 in regular and 290 in casual employment

During the month of March, 1939, the offices of the Service referred 31,266 persons to vacancies and effected a total of 29,604 placements. Of these, the placements in regular employment were 15,719, of which 10,460 were of men and 5,259 of women, while placements in casual work totalled 13,885. The number of vacancies reported by employers was 20,359 for men and 10,727 for women, a total of 31,086, while applications for work numbered 65,948, of which 48,476 were from men and 17,472 from women. Reports for February 1939, showed 27,816 positions available, 59,631 applications made and 26,834 placements effected, while in March 1938, there were recorded 24,243 vacancies, 70,150 applications for work and 22,595 placements in regular and casual employment.

The following table gives the placements effected by the Employment Service of Canada, each year, from January, 1929, to date:

Year	Placements		
	Regular	Casual	Totals
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939 (3 months)	49,056	39,514	88,570

NOVA SCOTIA

During the month of March, 1939, orders received at Employment Offices in Nova Scotia called for nearly 25 per cent more workers than in the preceding month and 22 per cent more than during the corresponding month of last year. There was an increase also in placements of over 20 per cent when compared with February and 19 per cent in comparison with March, 1938. The increase in placements over March of last year was due to a gain in services, as minor advances in construction and maintenance and transportation were offset by small losses in logging, trade and farming. Industrial divisions in which most of the placements were effected during the month were logging, 49; construction and maintenance, 327 and services, 622, of which 518 were of household workers. During the month 81 men and 150 women were placed in regular employment.

NEW BRUNSWICK

Orders received at Employment Offices in New Brunswick during March called for nearly 15 per cent more workers than in the preceding month and over 14 per cent more than in the corresponding month of last year. There was an increase also in placements of nearly 14 per cent when compared with February and of nearly 15 per cent in comparison with March, 1938. Construction and maintenance was the only industrial group in which placements were higher than during March of last year and accounted for the gain in the province as a whole. This increase was made up largely of casual placements for snow removal in the highway division of the group and was offset, in part, by small declines in all other groups. Placements by industrial divisions included manufacturing, 34; construction and maintenance, 412; trade, 20 and services, 578, of which 476 were of household workers. Placements in regular employment numbered 8 of men and 93 of women.

QUEBEC

Opportunities for employment, as indicated by orders received at Employment Offices in the Province of Quebec during March, were nearly 31 per cent better than in the preceding month, but over 4 per cent less than during the corresponding month of last year. There was an increase of nearly 30 per cent in placements when compared with February, but a decline of over 2 per cent in comparison with March, 1938. The only changes of importance, by industrial groups, from March of last year were in construction and maintenance and services, a large decline in the former being almost entirely offset by an increase in the latter. Other changes included declines in trade and manufacturing and an increase in logging. Industrial divisions in which most of the placements were effected during the month were manufacturing, 150; logging, 271; construction and maintenance, 2,813, and services, 3,016, of which 2,733 were of household workers. There were 3,046 men and 1,884 women placed in regular employment.

* 3 Placements effected by offices since closed.

Ontario

There was an increase of nearly 8 per cent in the number of positions offered through Employment Offices in Ontario during March when compared with the preceding month and of over 56 per cent in comparison with the corresponding month of last year. There was an increase also in placements of over 7 per cent when compared with February and of nearly 60 per cent in comparison with March, 1938. The substantial increase over March of last year was largely due to the placing of snow shovellers in the highway division of construction and maintenance, as the improvement in this group was slightly larger than the net increase in the province as a whole. Of the changes in other groups the most important were gains in services and mining and losses in logging and farming. Placements by industrial divisions included manufacturing, 452; logging, 138; farming, 1,067; mining, 90; construction and maintenance, 5,375; trade, 273, and services, 3,656, of which 2,781 were of household workers. During the month 3,666 men and 1,679 women were placed in regular employment.

Manitoba

Employment opportunities, as indicated by orders received at Employment Offices in Manitoba during March, were nearly 2 per cent less than in the preceding month and nearly 10 per cent below the corresponding month of last year. There was a decline also in placements of nearly 2 per cent when compared with February and of nearly 9 per cent in comparison with March, 1938. Placements by industrial groups were slightly below those of March last year in logging, construction and maintenance, farming and transportation but small increases were reported in services and manufacturing. Industrial divisions in which most of the placements were effected during the month were manufacturing, 34; logging, 64; farming, 674; construction and maintenance, 130, and services, 754, of which 653 were of household workers. There were 877 men and 376 women placed in regular employment.

Saskatchewan

During the month of March, 1939, orders received at Employment Offices in Saskatchewan called for over 13 per cent fewer workers than in the preceding month, but nearly 29 per cent more than during the corresponding month of last year. There was a decrease of nearly 20 per cent in placements when compared with February, but an increase of nearly 26 per cent in comparison with March, 1938. Except for small declines in logging and transportation, placements were higher in all industrial groups than during March of last year. None of the gains, however, were important, that in farming being the largest and accounted for most of the increase for the province as a whole. Industrial divisions in which most of the placements were effected during the month were farming, 452; construction and maintenance, 64, and services, 564, of which 424 were of household workers. Placements in regular employment numbered 463 of men and 356 of women.

Alberta

The demand for workers, as indicated by orders received at Employment Offices in Alberta during March, was nearly 25 per cent higher than in the preceding month and on practically the same level as during the corresponding month of last year. There was an increase of nearly 22 per cent in placements when compared with February, but a decline of over 3 per cent when compared with March, 1938. There were minor changes only when comparing placements by industrial groups with those of March last year; these included gains in farming, trade, logging and manufacturing and losses in construction and maintenance, transportation and services. Placements by industrial divisions included manufacturing, 53; logging, 42; farming, 561; construction and maintenance, 256, and services, 474, of which 425 were of household workers. There were 703 men and 378 women placed in regular employment.

British Columbia

There was an increase of nearly 6 per cent in the number of orders received at Employment Offices in British Columbia during March when compared with the preceding month and of over 88 per cent in comparison with the corresponding month of last year. Similar percentages of gain were reported in placements under both comparisons. The large increase over March, 1938, was mainly due to casual placements in the highway division of construction and maintenance, although there were also gains in logging and services. Placements in all other groups were on about the same level as last year's. Industrial divisions in which most of the placements were effected during the month were logging, 806; farming, 136; construction and maintenance, 3,894, and services, 825, of which 558 were of household workers. During the month 1,616 men and 343 women were placed in regular employment.

Movement of Labour

During the month of March, 1939, the offices of the Employment Service of Canada effected 15,719 placements in regular employment, 7,307 of which were of persons for whom the em-

ployment located was outside the immediate district of the offices at which they were registered. Of the latter, 130 were granted the Employment Service reduced transportation rate, 118 proceeding to points within the same province as the despatching office and 12 to other provinces. The reduced transportation rate which is 2·5 cents per mile with a minimum fare of $4.00, is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may desire to travel to distant employment for which no workers are available locally.

The movement of labour from Ontario centres during March was entirely provincial and involved the issue of 50 reduced rate certificates. Of these 42 were issued at Port Arthur to 30 bush workers, 5 carpenters, 4 miners, one electrician, one highway construction labourer, and one housekeeper, bound for points within the Port Arthur zone. Travelling from Fort William 4 bush workers and from Sudbury one bush worker went to employment within their respective zones. The Kenora zone received 2 mine workers from Timmins, and the North Bay zone one steel sharpener from Toronto. The Winnipeg office was responsible for all transfers at the reduced rate in Manitoba during March which numbered 27. Of these, 15 were provincial and 12 interprovincial. The former were issued to 14 farm hands and one hotel cook going to centres within the Winnipeg zone. Transferred to other provinces were 7 bushmen, 2 miners, one fisherman and one farm hand destined to the Port Arthur zone and one farm hand to Estevan. In Saskatchewan during March the Regina office issued a certificate for reduced transportation to a teacher conveyed to a situation within the same zone. Vouchers for transportation were granted in Alberta during March to 48 persons going to employment within the province. The Edmonton office effected the transfer of all of these, despatching 20 transportation company employees, 9 mine workers, 7 bushmen, 3 hotel workers, 2 sawmill employees, 2 farm hands, 2 household workers, and 1 carpenter to various centres within its own zone, and 2 farm hands to Lethbridge. Taking advantage of the Employment Service reduced rate in British Columbia during March 4 persons journeyed to provincial centres. These were transferred by the Vancouver office which shipped one farm hand, one hotel cook and one housekeeper to employment in the Vancouver zone and one waitress to Penticton.

Of the 130 persons who travelled at the Employment Service reduced transportation rate during March, 101 were conveyed by the Canadian National Railways, 25 by the Canadian Pacific Railway, 2 by the Temiskaming and Northern Ontario Railway and 2 by the Pacific Great Eastern Railway.

(4) Building Permits issued in Canada during March, 1939

According to returns tabulated by the Dominion Bureau of Statistics, the value of the building permits issued by 58 cities during March was $3,351,194. This was an increase of $1,457,033 or 76·9 per cent over the February total of $1,894,161, but a decrease of $210,323 or 5·9 per cent as compared with the aggregate of $3,561,517 reported for March, 1938.

The building represented by the construction permits taken out in the first three months of the present year was valued at $6,951,985; this was lower than the total of $7,885,100 reported in the first quarter of 1938, and was also lower than the 1937 aggregate of $10,527,992. The cumulative total for this period in each of the years since 1931 has been substantially below the average of $17,593,858 indicated in the months, January-March in the years, 1920-1938.

Some 50 cities furnished detailed statistics for March, 1939, showing that they had granted about 300 permits for dwellings valued at more than $1,000,000 and more than 1,400 permits for other buildings estimated to cost approximately $2,100,000. During February, authority was given for the erection of about 200 dwellings and over 800 other buildings, estimated to cost approximately $700,000 and $850,000, respectively.

Nova Scotia, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia reported increases in the value of the building authorized during March, 1939, as compared with the preceding month. The greatest gain was that of $788,521 or 113·8 per cent in Ontario. New Brunswick showed a decline of $14,310 in this comparison.

As compared with March, 1938, Ontario and the three Prairie Provinces recorded increases, of which the most pronounced gain was that of $115,045 or 8·4 per cent in Ontario. The remaining provinces showed a falling-off in the value of the building authorized; the reduction of $150,107 or 16·2 per cent in Quebec was greatest.

Of the larger cities, Toronto and Winnipeg reported increases as compared with the preceding month and with March, 1938; in Montreal there was a gain over February, 1939, but a loss as compared with the same month of last year, while the building authorizations in Vancouver showed a decrease in each comparison. Of the other centres, Shawinigan Falls,

Westmount, Belleville, Fort William, Kitchener, London, Port Arthur, Sault Ste. Marie, York and East York Townships, St. Boniface, Regina, Calgary, Lethbridge, Medicine Hat, New Westminster, Prince Rupert and Victoria reported higher totals than in either February, 1939, or March, 1938.

TABLE I

Year	Value of permits issued in March	Value of permits issued in first quarter	Indexes of value of permits issued in first quarter (1926=100)	Average indexes of wholesale prices of building materials in first quarter (1926=100)
	$	$		
1939	3,351,194	6,951,985	30·9	87·3
1938	3,561,517	7,885,100	34·6	91·3
1937	6,667,239	10,527,992	46·8	92·5
1936	2,368,537	5,592,471	24·9	84·0
1935	4,022,755	8,507,270	37·8	81·4
1934	1,109,085	2,710,999	12·1	82·2
1933	953,966	3,065,821	13·6	75·2
1932	3,396,729	9,453,012	42·0	79·3
1931	9,948,979	24,746,094	110·0	83·7
1930	13,356,787	29,493,262	131·1	96·7
1929	24,068,018	42,950,228	190·9	99·2
1928	15,128,413	33,163,338	147·4	95·5
1927	11,713,640	25,028,353	111·3	96·4
1926	10,634,491	22,493,574	100·0	102·0

Table I gives the value of the building authorized by 58 cities during March and in the first quarter of each year since 1926, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first quarter of the same years are also given, (1926=100).

The value of the building authorized in the first three months of 1939 was lower by 11.8 per cent than in the same period of 1938, and was also lower than in the first quarter of 1937; it was, however, higher than in the same period in 1936. As already stated, the total for the months January-March in the years since 1931 have been much below the average for those months in the last nineteen years. The index numbers of wholesale prices of building materials in the first three months of this year, while lower than in the same quarter of 1938 or 1937, were higher than in the first three months of other years since 1930; wholesale prices throughout this period, however, have also been considerably lower than in preceding years of the record.

Table II gives the value of the building permits issued by 58 cities in February and March, 1939, and March, 1938. The thirty-five cities for which statistics are available since 1910 are marked thus "*".

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF APRIL, 1939

Reports of Superintendents of the Employment Service of Canada

THE employment situation at the end of April, 1939, was reported by the Superintendents of the Employment Service to be as follows:—

Farmers in the Maritime Provinces were busy with field work in preparation for spring planting and farm produce at the markets was fairly abundant, but of little variety. Fishing was considerably better. Gaspereau, cod, haddock and halibut were plentiful and lobster fishermen had everything in readiness for the running of lines as soon as there was open water. Activity in logging was confined chiefly to pulpwood cutting and peeling; several sawmills, however, continued operations. Coal mines in the New Glasgow area operated from one to six days per week, while those in Cape Breton and vicinity worked from three to five days. Manufacturing concerns, in general, were busy and no idleness was reported by the iron and steel industry. Other than repair work and street and sewer construction, little new building was under way. Transportation was moving more rapidly and trade was fair. There was also a greater demand for household workers in the Women's Division.

Farming showed very little activity in the Province of Quebec. River driving and opening of a few sawmills at Matane had created additional employment opportunities there, but, elsewhere, cold weather had retarded the usual spring operations in logging. Manufacturing centres reported as follows: Bagotville, Matane and La Tuque—improvement noted; Chicoutimi—paper mills operating at half capacity and remaining plants normal; Montreal—shoe and clothing factories more active; Quebec—leather concerns working at half capacity, clothing busy, but other industries slow; Sherbrooke—textiles normal; Three Rivers—pulp and paper also normal, but iron quiet and cottons improved; Hull and Val d'Or—regular employment as usual. Building construction generally was better and street and highway improvement continued. Trade was fair and the call for women domestics satisfactory.

More favourable weather conditions resulted in an improved call for farm help in Ontario, although the demand was still light. Logging was very quiet, with operations confined to preparations for the spring drive. Mining was moderately active, but few additional men were being hired. No material change was reported in manufacturing. Many concerns were operating on a part-time basis and with reduced staffs. The rubber industry, however, was very busy and furniture factories and shipyards, where numerous boats were being overhauled, likewise registered improvement. Building was still rather slack, due to the lateness of the season, but was gradually getting under way. Highway construction, already started, was progressing favourably, but new contracts had not yet been given out. Navigation had only just opened, so that transportation in that line was still slow. The annual spring housecleaning period provided employment for women and girls by day, week or month, with little difficulty experienced in filling requests. There were also orders for experienced help for hotels, restaurants and tourist camps. The latter, although not open at present, were preparing for an early start.

Requests for farm help in the Prairie Provinces had increased slightly, but the number of vacancies reported was few for the season of the year. This was partly due to the fact that many of the men sent out under the Farm Improvement Relief Plan had been retained at spring wages. Seeding was well started throughout the provinces, as weather conditions had been favourable, 75 per cent of the sugar beet acreage in Southern Alberta having already been completed. Logging and mining both were quiet and manufacturing registered no change. Building construction was accelerated with the coming of spring, particularly at Winnipeg; elsewhere, work in this line consisted chiefly of alterations and repairs. Little highway construction was under way. Spring clean-up and improvements in view of the Royal visit, as well as garden work, afforded temporary employment for a number of men. Trade was fair. In the Women's Division there existed a shortage of applicants for farm households, although all city orders, which were substantially higher in volume, were easily filled.

Few farm or logging vacancies were listed in British Columbia, as practically all extra help needed in these two industries had been obtained. Logging camps were busy, also sawmills and sash and door factories. Mining likewise was active. Building showed improvement, but little highway construction was under way. Drydocks and shipyards at Prince Rupert were slack, but waterfront work there and at New Westminster and Victoria was plentiful. No extra gang work on railways was yet available. Trade was fair. A steady demand existed for experienced domestics, and casual work, also, was more in evidence in the Women's Division.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, April, 1939, summarized the employment situation as follows:—

There was a further improvement in employment between February 13 and March 13, which extended to almost every industry. The improvement was most marked in building, public works contracting, agriculture and horticulture, coal mining, the iron and steel industry, tinplate and metal goods manufacture, engineering, the cotton and wool textile industries, tailoring and dressmaking, the pottery industry, furniture making and upholstery, the distributive trades, and hotel and boarding house service. There was a slight decline in employment in ship building and repairing.

It is provisionally estimated that at March 13, 1939, the number of insured persons, aged 16-64, in employment in Great Britain was approximately 12,403,000. This was 181,000 more than at February 13, 1939, and on a comparable basis, 180,000 more than at March 14, 1939.

Among insured persons, aged 16-64, the percentage unemployed in Great Britain and Northern Ireland at March 13, 1939, was 12·1, compared with 13·2 at February 13, 1939. For March 14, 1938, the percentage was 12·4. For persons insured under the general scheme the corresponding percentages were 12·3 at March 13, 1939, 13·4 at February 13, 1939, and 12·7 at March 14, 1938. For persons within the agricultural scheme the percentages were 7·8, 9·8 and 6·4 respectively.

At March 13, 1939, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,429,085 wholly unemployed, 231,245 temporarily stopped, and 66,599 normally in casual employment, making a total of 1,726,929; this was 169,789 less than at February 13, 1939, and 22,052 less than at March 14, 1938.

The total of 1,726,929 persons on the registers in Great Britain at March 13, 1939, included 976,692 persons with claims admitted for insurance benefit, 552,779 with applications authorized for unemployment allowances, 31,937 persons with applications for insurance benefits or unemployment allowances under consideration, and 165,521 other persons, of whom 38,577 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at March 13, 1939, was 1,813,987, as compared with 1,986,302 at February 13, 1939, and 1,844,583 at March 14, 1938.

United States

There was a further rise in non-agricultural employment in March, according to an announcement made by Miss Frances Perkins, Secretary of Labor, on April 26, 1939. The report stated that seasonal expansion in manufacturing and retail trade activity counted largely for the increase of approximately 200,000 workers during the month. However, the gain was slightly smaller than the usual seasonal increase from February to March.

The following paragraphs taken from the official press report indicate the employment situation in the United States to be as follows:—

About 360,000 more workers were employed in non-agricultural industries in March 1939 than in the corresponding month of last year. These figures do not include employees in Works Progress Administration and National Youth Administration projects nor enrollees in the Civilian Conservation Corps.

Approximately 50,000 factory wage earners returned to jobs in March. This number was somewhat smaller than usual at this season of the year. In retail trade, the increase of approximately 80,000 employees was slightly in excess of the average February-March gain. Private building construction contractors reported a substantial seasonal gain in employment while highway and street work was curtailed. Dyeing and cleaning establishments enlarged their forces to handle increased spring volume. Slight gains in employment were reported by utility companies, hotels, laundries, and insurance firms. Class I railroads reported an increase of 6,179 workers.

With the exception of a seasonal decline of nearly 13,000 employees in wholesale trade and of 3,000 workers in coal mines, the employment losses between February and March were small. Brokerage firms decreased their forces by 2·7 per cent and small declines were reported in metal mining and crude petroleum producing.

Factory Employment.—

The increase of 0·7 per cent or 50,000 wage earners in manufacturing industries was accompanied by a rise of 1·6 per cent, or $2,800,000 in weekly payrolls. These gains were somewhat smaller than the usual average increases of 1·0 per cent in employment and 1·8 per cent in payrolls for March. The March gains raised the Bureau's indexes of factory employ-

ment and payrolls to the highest levels recorded since the latter months of 1937. The March 1939 employment index was 4·1 per cent above the level of March of last year and the factory payroll index was 12·6 per cent higher.

The gains in factory employment and payrolls were general, 61 of the 87 manufacturing industries surveyed monthly by the Bureau of Labour statistics showing more employment and larger payrolls in March than in February. Employment in the durable goods group of industries increased 1·0 per cent and payrolls rose 1·9 per cent, while in the non-durable goods group of industries employment increased 0·5 per cent and payrolls 1·4 per cent. The durable goods employment index in March 1939 stood at the highest level since December 1937, while the non-durable goods employment index was somewhat lower than in the late summer and autumn of last year.

Non-Manufacturing Employment.—

The usual spring pick-up in retail trade resulted in an employment increase between February and March of 2·5 per cent or 80,000 workers. This gain, slightly greater than the average March increase for the last ten years, raised the March, 1939 employment index to 83·5 of the 1929 average, which is 0·6 per cent above the level of a year ago. Employment gains were reported in all retail lines with the exception of the jewellery and wood-coal and ice groups. The general merchandising group showed a gain of 4 per cent and apparel stores increased their employment by 10 per cent.

Employment in private building construction showed an increase of 6·2 per cent from February to March according to reports received from 13,575 contractors employing 101,258 workers in March. Corresponding payrolls rose 13·5 per cent. The March employment increase was the largest gain reported in March since 1932 with the exception of 1934 and 1936. The reports on which these figures are based do not cover construction projects financed by the Works Progress Administration, the Public Works Administration, and the Reconstruction Finance Corporation or by regular appropriations of the Federal, State, or local governments.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages that those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the

work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

NATIONAL HARBOURS BOARD

Raising the wharf at Sections 47-49 in the Harbour of Montreal, P.Q. Name of contractors, Messrs. E. G. M. Cape and Company, Montreal, P.Q. Date of contract, April 17, 1939. Amount of contract, approximately $195,495.48. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 45
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gas. or electric	0 50
Compressor operators (gas. or elec.)	0 50
Dragline operators (steam or gas.)	0 85
Dragline firemen	0 55
Dragline oilers	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drill runners	0 50
Engineers, operating, steam:	
Single or double drum	0 65
Three or more drums	0 75
Engineers on steel erection	0 75
Engineers, crane (steam, gas., elec.)	0 70
Firemen, stationary	0 50
Hoist operators—tower (gas, or elec.)	0 60
Labourers	0 40
Machinists	0 65
Machinists' helpers	0 45
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Pile driver and derrick foremen	0 75
Pile driver and derrick engineers	0 65
Pile driver and derrick men (rigging, setting and signalling)	0 55
Pile driver and derrick firemen	0 50
Pile driver and derrick labourers	0 45
Rodmen—reinforced steel	0 50
Structural steel workers	0 75
Tractor operators	0 50
Watchmen	0 35
Welders and burners on steel erection	0 75

Reconstruction of the St. Charles River wharf east and west of Shed 29, Quebec, P.Q. Name of contractor, Mr. J. A. Auclair, Quebec, P.Q. Date of contract, March 17, 1939. Amount of contract, approximately $55,476.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 45
Boatmen (rowboats)	0 40
Carpenters and joiners	0 60
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 60
Gas. or electric	0 55
Compressor operators (gas. or electric)	0 55
Dragline operators (steam or gas.)	0 85
Dragline firemen	0 55
Dragline oilers	0 50
Drivers	0 40
Driver, horse and cart	0 55
Drivers, team and wagon	0 65
Drill runners	0 50
Engineers, operating, steam:	
Single or double drums	0 60
Three or more drums	0 70
Labourers	0 40
Machinists	0 65
Machinists' helpers	0 45
Motor boat operators	0 45
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Rodmen—reinforced steel	0 50
Steom shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gas.)	0 85
Watchmen	0 35

DEPARTMENT OF NATIONAL DEFENCE

Repairs to the dockyard slip, Halifax, N.S. Name of contractor, Mr. R. M. Hall, 8 Norwood Street, Halifax, N.S. Date of contract, April 13, 1939. Amount of contract, $18,100. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 70
Blacksmith's helper	0 45
Boatmen (rowboat)	0 40
Carpenters	0 65
Concrete mixer operator (gas.)	0 50
	Per day
Diver (full day's pay to be allowed whether employed full or part time)	$14 00
Diver's tender (full day's pay to be allowed whether employed full or part time)	5 00
	Per hour
Driver	$0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Engineers, operating, steam:	
Single or double drum	0 65
Three or more drums	0 75
Fireman, stationary	0 45
Labourers	0 40
Machinists	0 70
Motor truck driver	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
Pile driver foreman	0 75
Pile driver engineer	0 65
Pile driver fireman	0 45
Pile driver derrick engineer	0 65

	Per hour
Pile driver derrick fireman	0 45
Pumpmen	0 50
Timbermen (measuring, scribing and, by use of axe, adze, auger, etc., cutting and fitting timber)	0 50
Watchman	0 35

DEPARTMENT OF PUBLIC WORKS

Construction of additions and alterations to the Laboratory Building, Department of Mines and Resources, Booth Street, Ottawa, Ont. Name of contractor, Mr. Alex. I. Garvock, Ottawa, Ont. Date of contract April 11, 1939. Amount of contract, $8,467 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 85
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 70
Gasoline or electric	0 55
Drivers	0 45
Drivers, horse and cart	0 60
Driver, team and wagon	0 80
Electricians (inside wiremen)	0 80
Elevator constructors	0 85
Elevator constructors' helpers	0 60
Engineers, operating, steam:	
Single or double drums	0 70
Three or more drums	0 80
Engineers on steel erection	0 80
Firemen, stationary	0 50
Labourers	0 45
Lathers, metal	0 70
Motor truck drivers	0 50
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
Ornamental iron workers	0 60
Painters and glaziers	0 65
Plasterers	0 85
Plasterers' helpers (mixing and tempering material)	0 50
Plumbers and steamfitters	0 95
Sheet metal workers	0 85
Structural steel workers	0 80
Welders and burners on steel erection	0 80

Construction of an extension to the wharf at Sayward, Comox-Alberni District, B.C. Name of contractor, Mr. William Greenlees, Vancouver, B.C. Date of contract, April 3, 1939. Amount of contract, approximately, $6,873.25. A fair wages schedule was included in the contract as follows:—

	Per hour
Pile driver foreman	$1 25
Pile driver engineer	1 12½
Pile driver man	1 00
Boomman	1 00
Bridgeman	1 00
Fireman	0 68¾
Labourer	0 45
Watchman	0 45

Constructing a wharf at Rivière du Loup, P.Q. Name of contractors, Messrs. N. Fournier and Alp. Montminy, of Cap St. Ignace and St. François, P.Q., respectively. Date of contract, March 29, 1939. Amount of contract, approximately $33,706.00. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 50
Blacksmiths' helpers	0 35
Boatmen (rowboats)	0 30
Carpenters and joiners	0 50
Cement finishers	0 50
Cement and concrete mixer operators:	
Steam	0 55
(Gas. or electric.)	0 40
Compressor operators (gas. or elec.)	0 40
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Driver	0 30
Drill runners	0 40
Engineers (operating steam)	0 55
Firemen (stationary)	0 35
Hoist operators (gas. or elec.)	0 40
Labourers	0 30
Machinists	0 55
Motor truck drivers	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
4 tons	2 35
5 tons	2 85
Motor boat operators	0 35
Pile driver foreman	0 65
Pile driver engineers	0 55
Pile driver firemen	0 35
Pile driver derrick engineers	0 55
Pile driver derrick firemen	0 35
Powdermen	0 40
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gas.)	0 85
Watchmen	0 25
Timbermen and cribmen (measuring, scribing and, by use of axe, adze, etc., cutting and fitting timber)	0 37½

Construction of a public building at Mont Joli, P.Q. Name of contractor, Mr. Eugene Ross, Mont Joli, P.Q. Date of contract, April 11, 1939. Amount of contract, $14,147.00 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 70
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 35
Carpenters and joiners	0 50
Cement finishers	0 50
Cement and concrete mixer operators:	
Steam	0 55
Gas. or electric	0 40
Drivers	0 30
Driver, horse and cart	0 45
Diver, team and wagon	0 55
Electricians (inside wiremen)	0 55
Engineers, operating, steam:	
Single or double drums	0 55
Three or more drums	0 65

	Per hour
Engineers on steel erection	0 75
Firemen, stationary	0 35
Labourers	0 30
Lathers—metal	0 50
Motor truck drivers	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
4 tons	2 35
Ornamental iron workers	0 50
Painters and glaziers	0 50
Plasterers	0 70
Plasterers' helpers (mixing and tempering material)	0 35
Plumbers and steamfitters	0 55
Roofers, felt and gravel—patent	0 35
Roofers, sheet metal	0 55
Roofers, shingles (woods, asbestos)	0 50
Sheet metal workers	0 55
Structural steel workers	0 75
Watchman	0 25
Welders and burners on steel erection	0 75

Improvement to assembly wharf at Nanaimo, B.C. Name of contractors, Messrs. Armstrong & Monteith Construction Co., Ltd., Vancouver, B.C. Date of contract, March 11, 1939. Amount of contract, approximately $8,514.70. A fair wages schedule was included in the contract as follows:—

	Per hour
Pile driver foreman	$1 25
Pile driver engineer	1 12½
Pile driver men	1 00
Pile driver boomman	1 00
Pile driver bridgeman	1 00
Pile driver fireman	0 68¾
Carpenters and joiners	0 70
Concrete mixer operator (gas. or elec.)	0 55
Millwrights	0 70
Painters and glaziers	0 65
Plumbers and steamfitters	0 80
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 50
Electricians	0 75
Labourers	0 45
Watchman	0 45

Construction of an addition to the Dominion public building at New Westminster, B.C. Name of contractors, Ward & Son, Ltd., New Westminster, B.C. Date of contract, April 3, 1939. Amount of contract, $126,461.00 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 10
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 90
Cement finishers	0 90
Cement and concrete mixer operators:	
Steam	0 90
Electric	0 60
Drivers	0 45
Driver, horse and cart	0 60
Driver, team and wagon	1 00
Electricians (inside wiremen)	1 00
Elevator constructors	1 04

Fourth year..	0 45

Construction of spare parts for Stranraer boat seaplanes. Name of contractors, Canadian Vickers, Ltd., Montreal, P.Q. Date of contract, April 17, 1939. Amount of contract, $34,668.00. The preceding fair wages schedule was also included in this contract.

Construction of spare parts for Northrop Delta aircraft. Name of contractors, Canadian Vickers, Ltd., Montreal, P.Q. Date of contract, April 20, 1939. Amount of contract, $33,594.48. The preceding fair wages schedule was also included in this contract.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated:

Manufacturing—Vegetable Foods

TIMMINS, ONTARIO.—TWO BAKERIES AND THE BAKERY AND CONFECTIONERY WORKERS' INTERNATIONAL UNION, LOCAL 488.

Agreements made following minor strikes reported on page 464 of this issue. One agree-

ment is in effect from April 9, 1939, to April 8, 1940; the other from April 24, 1939, to April 24, 1940.

No discrimination to be shown employees on account of union activity. All employees must join the union within two weeks of employment. Provision is made for a shop committee in each bakery.

Hours: 56 per week.

Overtime: time and one half.

Minimum weekly wages: in one bakery—bread bakers $32, $28 and $20, cake bakers $32 and $28, bakers' helpers, $18, apprentices $15 for first year, $18 thereafter; bread salesmen or drivers $20; sales girls, wrappers and miscellaneous workers, 22 cents per hour; in the other bakery, $28 for first bread baker, $18 for helpers.

Vacation: in the first bakery, all employees with one year's service at the time the agreement was made to receive one week's vacation with pay.

Transportation and Public Utilities: Electric Railways

EDMONTON, ALBERTA.—CITY OF EDMONTON AND EDMONTON CIVIC EMPLOYEES' FEDERATION (ELECTRIC RAILWAY EMPLOYEES).

The sections of the agreement affecting the Amalgamated Association of Street and Electric Railway Employees, Division No. 569, and the International Brotherhood of Electrical Workers—B 1007, covering the street railway branch, is summarized below under "Service: Public Administration."

Transportation and Public Utilities: Water Transportation

MONTREAL, QUEBEC. — CERTAIN STEAMSHIP LINES (INLAND NAVIGATION) AND THE BROTHERHOOD OF RAILWAY AND STEAMSHIP CLERKS, FREIGHT HANDLERS, EXPRESS AND STATION EMPLOYEES (LONGSHOREMEN).

Agreement to be in effect from February 28, 1939, for the 1939 navigation season and thereafter from year to year, subject to notice.

Subject to the law of the Province of Quebec, the employer will give preference in employment to union members, new employees to be secured through the union.

The minimum number of men required for handling specified goods is provided for in the agreement.

Wages are as in the agreement with several steamship companies for which application has been made to have it made obligatory under the Collective Labour Agreements Act (LABOUR GAZETTE, April 1939, page 434). These wages are 50 cents per hour for work between 7 a.m. and 7 p.m., and 51 cents between 7 p.m. and 7 a.m.

Any disputes are to be taken up by a local protective committee of the men with the company, and if settlements are not made will be referred to the vice president of the Brotherhood and the company concerned. No strike or lockout to occur.

MONTREAL, QUEBEC.—CERTAIN STEAMSHIP LINES (INLAND NAVIGATION) AND THE BROTHERHOOD OF RAILWAY AND STEAMSHIP CLERKS, FREIGHT HANDLERS, EXPRESS AND STATION EMPLOYEES (CHECKERS AND COOPERS).

Agreement to be in effect from April 10, 1939, for the 1939 season of navigation, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1938, page 1416, with certain minor changes in working conditions and the following wage changes:

Wages per Hour: for checkers 51 cents between 7 a.m. and 7 p.m. (an increase of one cent over last year), 52 cents from 7 p.m. to 7 a.m. (no change from last year's rate); for coopers, 50 cents between 7 a.m. and 7 p.m. (an increase of one cent) and 51 cents between 7 p.m. and 7 a.m. (no change from last year).

TORONTO AND HAMILTON, ONTARIO.—CERTAIN STEAMSHIP COMPANIES AND THE BROTHERHOOD OF RAILWAY AND STEAMSHIP CLERKS, FREIGHT HANDLERS, EXPRESS AND STATION EMPLOYEES (LONGSHOREMEN, CHECKERS AND SHEDMEN).

Agreements to be in effect from date of signing (March and April, 1939) to end of 1939 navigation season, and thereafter from year to year, subject to notice.

These agreements are similar to the ones previously in effect, as summarized in the LABOUR GAZETTE, December, 1938, page 1416, with certain exceptions:

Wages: longshoremen and shedmen 50 cents per hour from 7 a.m. to 7 p.m. (an increase of one cent per hour), 51 cents from 7 p.m. to 7 a.m. (no change from last year); checkers (based on a 10-hour day) $120 per month at Toronto (an increase of $2 per month), $114 at Hamilton.

If required to work through meal hour, regular rate of pay from beginning of meal hour for one hour and a half, but if required to work beyond this time, double time to be paid for whole period from beginning of meal hour, but not exceeding two hours.

POINT EDWARD AND SARNIA, ONTARIO.—CERTAIN STEAMSHIP LINES AND THE BROTHERHOOD OF RAILWAY AND STEAMSHIP CLERKS, FREIGHT HANDLERS, EXPRESS AND STATION EMPLOYEES (LONGSHOREMEN).

Agreement to be in effect from March 17, 1939, for the 1939 season of navigation and thereafter from year to year, subject to notice.

This agreement is similar to that summarized above for Toronto except that it covers only longshoremen and except for wage rates.

Wages for longshoremen: 47 cents per hour between 7 a.m. and 7 p.m., 48 cents per hour between 7 p.m. and 7 a.m.

WINDSOR, ONTARIO.—CERTAIN STEAMSHIP LINES AND THE BROTHERHOOD OF RAILWAY AND STEAMSHIP CLERKS, FREIGHT HANDLERS, EXPRESS AND STATION EMPLOYEES (LONGSHOREMEN).

Agreement to be in effect from March 1, 1939 for the 1939 navigation season, and thereafter from year to year, subject to notice.

This agreement is similar to that summarized above for Toronto except that it covers only longshoremen and except for the wage rates.

Wages for longshoremen: 49 cents per hour between 7 a.m. and 7 p.m., 50 cents between 7 p.m. and 7 a.m.

Transportation and Public Utilities: Telegraphs and Telephones

EDMONTON, ALBERTA.—CITY OF EDMONTON AND EDMONTON CIVIC EMPLOYEES' FEDERATION (TELEPHONE ELECTRICAL EMPLOYEES).

The section of the agreement with the International Brotherhood of Electrical Workers, B 1007, covers the Telephone Branch and is summarized below under "Service: Public Administration."

Transportation and Public Utilities: Electricity and Gas

EDMONTON, ALBERTA.—CITY OF EDMONTON AND EDMONTON CIVIC EMPLOYEES' FEDERATION (POWER HOUSE AND PUMPING STATION EMPLOYEES, ELECTRICAL WORKERS, ETC.).

The sections of the agreement which are with the Amalgamated Association of Street and Electric Railway Employees, Division 569, covering power house and pumping station employees and that with the International Brotherhood of Electrical Workers, B 1007 covering electrical workers in the electric light and the power house branches are summarized below under "Service: Public Administration."

Service: Public Administration

EDMONTON, ALBERTA.—THE CITY OF EDMONTON AND THE EDMONTON CIVIC EMPLOYEES FEDERATION, REPRESENTING CIVIC SERVICE UNION LOCAL NO. 52; EDMONTON CITY FIRE FIGHTERS' UNION NO. 209; EDMONTON CIVIC EMPLOYEES' UNION NO. 30; THE EDMONTON POLICE ASSOCIATION; AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES LOCAL DIVISION NO. 569 AND INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, NO. 1007.

General

Agreement to be in effect from January 1, 1938, until a new agreement is made or this one terminated after three months' notice. Amendments may be mutually agreed to and added to this agreement.

When necessary to reduce staff, or when re-employing staff, as well as in making promotions, seniority in service to be a governing factor, provided qualifications are satisfactory; seniority to be effective within each department, branch or sub-branch.

Permanent employees to be allowed 12 days' sick leave with pay and seasonal employees one day for each month of service in the year to a maximum of six days per year sick leave with pay, if proof is furnished of the necessity of such leave.

Vacation: permanent employees with one year's service to be allowed two weeks vacation leave each year with pay if they are monthly employees and shift men; permanent hourly paid employees one week's vacation during second year and two weeks per year thereafter.

Any permanent or seasonal employee who is suspended, discharged or refused re-employment on the grounds of incompetency or misconduct or who has a complaint as to wages or working conditions may have the matter taken up by the union committee with the city commissioners and later if necessary with the city council. If a satisfactory settlement is not made, the union committee may apply for a Board of Conciliation.

CIVIC SERVICE UNION, LOCAL NO. 52

Overtime: equivalent of time off to be granted or payment at time and one half for such overtime; double pay or its equivalent in time off for all work on Sundays and ten specified holidays.

Basic monthly salaries (from which certain deductions are taken): juniors (male) from $55 during first year to $106 during sixth year; stenographers and female clerks from $55 during first year to $90 during eighth year (temporaries $2 to $3.50 per day); telephone operators (inexperienced) $58 during first six months, $67 during second six months; telephone operators (experienced) $75 during first year to $95 during fourth year; clerks are divided into seven salary groups: for lowest class from $106 for first year to $124 during fifth year in that class, for highest class from $172 during first year to $185 during third year; chief clerk $200 to $225; temporary clerk $4 per day; inspectors and appraisers $145 to $165; assessment appraisers $165 to $185; general foreman $155 to $175; janitors and caretakers $115 to $150.

The following deductions from salaries are applicable: 9 per cent for employees $1,201 to $1,500, 9½ per cent for employees $1,501 to $1,800, 12 per cent for employees $1,801 to $2,100, 12½ per cent for employees $2,101 to $2,400, 13 per cent for employees $2,401 to $3,000, 15 per cent for employees $3,001 and up. These percentages are reduced by the restoration of $60 per year.

Minimum salaries in special relief department: stenographers from $55 per month during first year to $90 during eighth year; lady investigators $80 to $90 per month; male investigators $1,020 to $1,260 per annum; chief investigator $140, accountant $140, special investigator $125; clerks minimum salaries are not specified but are to be the same as those in force when the agreement was made.

EDMONTON CITY FIRE FIGHTERS UNION, NO. 209

Hours: the fire department is under the two platoon system, consisting of a 10-hour day shift and a 14-hour night shift; operators to work 8-hour shifts.

Employees allowed two weeks' sick leave per year on production of proof. Time lost due to accident while on duty to be paid at regular rates of pay.

Vacation: after one year's service, 21 days days vacation with pay each year.

Basic monthly wage schedule (subject to same percentage deductions, less the $60 per year restoration as applicable to Civic Service Union noted above): district chiefs $175; captains $165; mechanics $175; assistant electrician and assistant motor mechanic $155; firemen and drivers from $100 during first year to $145 during sixth year; operators from $120 during first year to $127.50 during third year and thereafter; fire marshall $165; superintendent of fire and police telegraph alarm system $200, chief's secretary $148.

Uniforms and equipment to be supplied by the department.

Civic Employees' Union, Local No. 30

Hours: 8 per day, 4 on Saturdays, a 44-hour week, except teamsters who are to work up to 9 per day, 5 on Saturdays at straight time rates, if required.

Overtime: time and one half till 10 p.m.; thereafter and all work on Sundays and nine specified holidays, double time, except that shift work required on these days to be paid at straight time.

Minimum hourly wage rates (subject to the same percentage deduction less the $60 per year restoration, as applicable to Civic Service Union as noted above): casual labourers with less than 12 months' service 50 cents, with 12 months' service and over 52 cents; permanent labourers and teamsters 52 cents; sewer and water house service construction men 54 cents; experienced labourers (sub-foreman, bridge gangs, water and sewer maintenance men, sectional tile layers, sewer pipe layers, leak diggers and timber men) 57 cents; truck drivers 58 cents; heavy truck drivers 65 cents; gasoline engine operators, hydrant and valve repairers 62 cents; water service and meter installers, pipe layers, fitters and caulkers 66 cents; sewer and waterworks construction foremen and inspector 76 cents; steam boiler operators 82 cents.

Edmonton Police Association

There may be a police association and membership in the association to be optional to members of a force. The police force of the city as a body may not be affiliated with the Trades and Labour Council or with any political body.

Hours and overtime: 8 hours per day, 6 days per week, a 48-hour week. If required to work additional time such as attendance at police court or at fires, equivalent time off to be granted. They must, however, attend any necessary drills, classes of instruction, physical training classes, gymnastic training or annual inspection without being allowed time off.

Minimum monthly salaries (subject to the same percentage deduction, less the $60 per year restoration, as applicable to civic service union, as noted above): sergeants $165 and $170; constable from $125 for third class to $150 for Class A (after 7 years); for new constables rates to be from $100 during first year to $150 during sixth year; detectives $165; acting detectives $150, accountant $185, janitor $120, policeman $100, matron $97.50, chauffeurs $140.

After one year's service, members of the force are entitled to two weeks' sick leave with pay, when proof of illness given.

Vacations are regulated by the regulations of the police force.

Uniforms supplied by the city; detectives to be given $110 per annum for clothing and shoes allowance.

Members of the force may appeal to the city commissioners from any decision of the chief constable upon matters of discipline if complaint is made in writing and decision alleged to be unjust or arbitrary. The members of the police force may not under any circumstances take part in any sympathetic strike.

Amalgamated Association of Street and Electric Railway Employees, Division No. 569.

I. Motormen, Conductors and Motor-Conductors

Hours to be on basis of an eight hour day, but overtime rates not payable until after 8½ hours in any day; all regular runs to be made in one shift as nearly as possible; runs of 7¾ hours to be classified as regular runs and paid on the basis of an 8 hour day.

Overtime: time and one half for hours over 8½ in any day and for work on off days; time and one half was also to be paid for work on nine specified holidays whenever put in operation by mutual agreement at a later date.

Basic wages for mortormen, conductors and motor-conductors (subject to the same percentage deduction, less the $60 per year restoration, as applicable to civic service union as noted above): from 58 cent per hour during first six months to 71 cents after three years; inspectors $175 per month, chief inspector $180.

Seniority to govern choice of runs, but it was agreed that the senior men trade runs with junior men for the months of February, June and October so that the junior men might have day runs for three months in the year.

Uniforms to be supplied by the city.

II. Barn men

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: time and one half for overtime and for work on Sundays and holidays.

Basic hourly wages (subject to the same percentage deduction, less the $60 per year restoration, as applicable to civic service union, as noted above): armature winders and electricians 90 cents, blacksmiths 80 cents, blacksmiths' helpers 57 cents first year and 64 cents second year; electric welder 70 cents first year to 80 cents after two years; babbit man 75 cents, painters 80 and 82½ cents, brush hand 72½ cents, painters' helper 62 and 65 cents, seat repairer 62 cents, car wirers 73 cents, controller man 75 cents, car repairer from 57 cents first year to 71 cents after two years, car cleaners 55 cents, linemen's helper 62 cents, boiler firemen 60 cents.

III. Track Men

Hours: 8 per day, 4 on Saturday, a 44 hour week, except for track greaser who may work a 48 hour week.

Overtime: time and one half; time and one half for work on nine specified holidays whenever put in operation by mutual agreement at a later date.

Basic wages (subject to the same percentage deduction, less the $60 per year restoration, as applicable to Civic Service Union, as noted above): track men 55 cents per hour; track men in charge of gang 60 cents; track greasers $110 per month, flagmen $100 per month.

IV. Power House and Pumping Station

Hours for men paid by the hour on maintenance and construction work, including mechanics, mechanics' helpers, labourers, construction men and all other workers not regularly on shift duty: 8 per day, 4 on Saturdays, a 44 hour week for day men; 8 per day with time off for lunch, a 48 hour week for night men. Shift employees working shifts on operation of the plant and including engineers, firemen, coal-handlers, ash-handlers, switchboard operators and filter men, 8 hours per shift, including time off for lunch; coal handlers including crane engineer, to work 8 hours per day, 6 days per week.

Overtime: time and one half for first four hours and double time thereafter; double time for shift employees required to work on their day off. Time and one half to be paid for work on nine specified holidays whenever this is made applicable by mutual agreement at a later date.

Basic wage rates (subject to the same percentage deduction, less the $60 per year restoration, as applicable to Civic Service Union, as noted above): assistant engineer (turbine room) $155 per month, water tenders with full 3rd class engineer's certificate $145, water tenders without certificate $140, firemen 60 and 65 cents, ash handlers 55 to 59 cents, coal elevator attendants 63 and 65 cents, crane engineer 92 cents, crane engineer's helper 62 cents, boiler cleaners 60 and 66 cents, tube blower 61 cents, combustion man 57 cents, general helpers 55 to 60 cents, filter operators 56 and 60 cents, assistant engineer (pump room) $145, charge engineers $180.

INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS—B 1007

Any employee having a grievance which the foreman cannot adjust may have it taken up by the union with the superintendent, and if no satisfactory settlement is made in this way, the committee may refer the matter to the city commissioners.

I. Electric Light Branch

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: except for shift employees, time and one-half for overtime work until 10 p.m., and double time thereafter, with double time for work on Sundays and recognized holidays; for shift employees, time and one-half for first four hours and double time thereafter.

Work on poles, timbers, bridges, towers or fixtures of an elevation of 90 feet or more to be paid at double time.

Wages per hour: line foreman and street light foreman 95 cents, shop maintenance man 93 cents, linemen 88½ cents, street light maintenance man (third year) 67½ cents, street light patrolman 84½ cents, meter installers, 84½ cents, groundmen 59 cents, permanent labourers 59 cents, temporary labourers 50 cents; meter readers from $95 per month for first year to $110.50 fourth year and $115 after 10 years (meter readers also to be supplied with uniforms).

Apprentices to serve four years; one apprentice allowed to three journeymen. Apprentices to be paid from 30 cents per hour during first half of first year to 70 cents during second half of fourth year.

II. Telephone Branch

Hours: 8 per day, 4 on Saturdays, a 44-hour week. Where necessary, shift work may be carried on and employees whose shifts extend over Saturday afternoon and Sunday to be allowed equal time off, but no employee to be required to work more than one Saturday afternoon and a Sunday in two.

Overtime: except for shift employees, overtime until 10 p.m., time and one-half, with double time thereafter and for work on Sundays and recognized holidays; for shift employes, time and one-half for first five hours and double time thereafter.

Wages per hour: branch exchange foremen 93 and 96½ cents, switchmen and cable splicers 75 cents to 90 cents; private branch exchange installers and inspectors 75 to 87½ cents; senior shop mechanic 87½ cents, inspectors, installers and linemen 75 to 84½ cents; servicemen, rackmen and shop repairmen 73 to 82½ cents; cable splicer's helper and main exchange nightmen 58 to 66 cents, branch exchange nightman 54 cents.

Apprentice (switchmen, cable splicers, P.B.X. installers, P.B.X. inspectors, linemen, installers, inspectors, servicemen, rackmen and shop repairmen) 30 cents during first 6 months of probation period, 35 cents during second six months; from 40 cents during first six months of apprenticeship to 65 cents during sixth six months.

III. Power House Branch

Hours: for hourly employees (maintenance and construction work, including mechanics, mechanics' helpers, labourers, construction and all other workers not regularly on shift duty), 8 per day, 4 on Saturdays except for those working at night who will work the same hours as shift men; for shift employees (those working shifts in the operation of the plant, including engineers, firemen, coalhandlers, ashhandlers, switchboard operators, filter men and machinists) 8-hour shifts including time off for lunch.

Overtime for shift employees: time and one-half for first four hours and double time thereafter; double time for work on their day off. For hourly employees called to work on a statutory or legal holiday: double time to be paid.

Wages per hour: switchboard operators 68 and 70 cents, charge engineers 78 cents, assistant charge engineers 65 cents, electricians 86 cents, electricians' helpers 59 cents, cable splicers 98 cents, machinists 82 cents, machinists' helpers 66 cents, boiler room mechanic 75½ cents.

Wages per hour for apprentice electricians from 30 cents during first half of first year to 80 cents during second half of fifth year.

IV. Street Railway Branch

Hours of duty to remain as previously in effect.

Wages same as linemen in electric light department.

Collective Labour Agreements Act, Quebec

The following agreements and amendments to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:

Textile and Jute Bag Manufacture, Montreal.

Paper Box Manufacture (Uncorrugated paper), Province of Quebec.

Building Trades, Three Rivers (amendment).

Building Trades, St. Jerome.

Garage and Service Station Employees, Quebec (amendment).

Barbers, St. John and Iberville.

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are summarized in a special article below:

ONTARIO

Men's Clothing Industry, Province of Ontario.

Barbers, Kenora-Keewatin Zone.

SASKATCHEWAN

Sign Painters, Regina.

ALBERTA

Painters, Edmonton.

Plumbers, Edmonton.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938, issue of the LABOUR GAZETTE, page 503. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues beginning May, 1938.

Recent proceedings under the Act include: the extension by Orders in Council of agreements affecting the manufacture of textile and jute bags in the Montreal district, the manufacture of paper boxes (uncorrugated) throughout the province, building trades at St. Jerome and barbers at St. John and Iberville; the amendment by Orders in Council of agreements affecting building trades at Three Rivers and garage and service station employees at Quebec, all of which are summarized below. Requests for the extension of new agreements affecting the manufacture of sashes, doors and caskets at Jonquière and Kenogami, building trades at Montreal and plumbers at Montreal were published in the *Quebec Official Gazette,* April 1. In addition, Orders in Council were published in the *Quebec Official Gazette,* April 1, approving the constitution and by-laws of certain joint committees as noted below.

Manufacturing: Textiles and Clothing

TEXTILE AND JUTE BAG MANUFACTURING INDUSTRY, MONTREAL.—An Order in Council, approved March 29, and published in the *Quebec Official Gazette,* April 1, makes obligatory the terms of an agreement between certain manufacturers of textile and jute bags and the Textile Bag Manufacturers' Employees' Association of Montreal and District.

The Order in Council applies to employees of the industry, including office employees, stationary engineers, stockmen, truck drivers and maintenance men, on the Island of Montreal and the cities and towns within five miles of its limits.

Hours: 48 per week except for work required continuously, such as boiler house employees, watchmen and maintenance men who work 72 hours.

Overtime: time and one-quarter.

Minimum hourly wage rates for male employees: cloth cutting and rolling machine operators 40 cents; in the printing department—charge hands 45 cents, assistants 35 cents, rubber cutters 50 cents, rubber cutter assistants and form cleaners 17 cents; in the baling department—operators 42 cents, assistants 35 cents; for general labour—fireman in charge of boilers 45 cents, stokers 35 cents, truck drivers 35 cents, watchmen 25 cents, maintenance men (including carpenters, electricians, plumbers, machinists, etc.), 50 cents. Minimum hourly wages for female employees: printing department—operators 26 cents, helpers 22 cents; sewing department—operators 28 cents, apprentices 22 cents, helpers 18 cents, inspectors 26 cents, checkers 22 cents; bag turning department—turners 22 cents, apprentices 17 cents. The labour conditions for office employees to be those established by Ordinance No. 4 of the Fair Wage Board. Wages may not be reduced because of the putting into force of this agreement. Handicapped workers may be paid lower rates of wages to be determined by the joint committee.

Manufacturing: Pulp, Paper and Paper Products

PAPER BOX (UNCORRUGATED PAPER) MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved March 29, and published in the *Quebec Official Gazette,* April 1, makes obligatory the terms of the agreement between certain manufacturers of paper boxes and associations of their employees.

The Order in Council applies throughout the province to the manufacture of paper boxes, imitation wood boxes partly made or completed with paper or cardboard, and all other fibre, pulp or paper boxes made of uncorrugated material (The Order in Council for the manufacture of corrugated paper boxes was summarized in the LABOUR GAZETTE, February, page 218 and March, page 335). It is to be in effect from April 1, 1939, to March 31, 1940.

Hours: 50 per week except that the joint committee may issue permits to employers to work 55 hours at regular rates. This limit does not apply to shippers or repair men.

Overtime: time and one-quarter.

Wages: the province is divided into two zones, of which zone I comprises the Island of Montreal and within 50 miles of its limits, and zone II the rest of the province.

MINIMUM HOURLY WAGE RATES

—	Hourly wages, Zone I	Hourly wages, Zone II

Machinists	.40 to .60	.37 to .57
Maintenance and repair men	.30 to .40	.27½ to .37½

The minimum hourly rates for female employees must average at least 24 cents for zone I and 22 cents for zone II and for male employees 27 cents in zone I and 25 cents in zone II. During October, November and December extra female help may be employed, not exceeding 20 per cent of the regular female staff and may be paid minimum rates of 15½ cents in zone I and 13½ cents in zone II.

Construction: Buildings and Structures

BUILDING TRADES, THREE RIVERS AND SHAWINIGAN FALLS.—An Order in Council, approved March 29, and published in the *Quebec Official Gazette,* April 1, amends the previous Order in Council for these trades (LABOUR GAZETTE, August, 1938, page 944).

Additional parties to the agreement are several contractors of Cap de la Madeleine, Louiseville and Shawinigan Falls and Le Syndicat National Catholique des Charpentiers-Menuisiers des Châtes Shawinigan (The National Catholic Union of Carpenters and Joiners of Shawinigan Falls) and Le Syndicat National Catholique des Peintres des Châtes Shawinigan (The National Catholic Union of Painters of Shawinigan Falls).

The territorial jurisdiction is enlarged by the addition of the towns of Shawinigan Falls, Grand Mère, Cap de la Madeleine, La Tuque and Louiseville.

The amendment also provides that in municipalities of a population of less than 8,000, when the cost of the building contract, including wages and material, does not exceed $10,000, employees resident in the locality may be paid the following lower rates for certain trades: carpenters and joiners 40 cents per hour; painters 35 cents; painters (spraying machines) 45 cents; labourers (common) 25 cents; electricians 45 cents; stationary enginemen 40 cents; enginemen (mixers, compressors) 40 cents; en-

ginemen (hoists) 50 cents; millwrights 40 cents; machinists 40 cents; blacksmiths 40 cents; marble, terrazo, celanite, tile and mosaic setters 50 cents; lathers (metal and wood) 35 cents; lathers (wood) $2.10 per thousand; cement finishers 40 cents; plaster pourers, mortar mixers and hod carriers 25 cents; celanite mixers 25 cents; drillers 25 cents; riggers 40 cents; whitewashers 35 cents; paper hangers 35 cents; truck drivers 25 cents; carters (two-horse vehicle) 45 cents; carters (one-horse vehicle) 35 cents.

For these same contracts in the municipalities of less than 8,000: apprentice bricklayers, masons and plasterers to be paid 15 cents per hour during first year, 30 cents during second year and 40 cents during third year with not more than one apprentice to each five journeymen; apprentice electricians to be paid from 15 cents per hour during first year to 35 cents during fourth year, with not more than one apprentice to each journeyman; apprentice carpenters, joiners, painters, millwrights, machinists, blacksmiths, marble, terrazzo, celanite, tile and mosaic setters; joint pointers, cement finishers, whitewashers and paperhangers to be paid from 15 cents during first year to 25 cents during third year, with not more than one apprentice to each three journeymen.

Building Trades, St. Jerome.—An Order in Council, approved March 29, and published in the *Quebec Official Gazette*, April 1, makes obligatory the terms of an agreement between certain contractors and Le Syndicat de la Construction Incorporé de St. Jérôme (The Union of Building Trades, Incorporated, of St. Jerome).

The Order in Council is to be in effect from April 1, 1939, to March 31, 1940, in the towns of St. Jerome and Ste. Therese (Terrebonne County).

Hours: 8 per day, 48 per week except for labourers who may work 9 per day, 54 per week.

Overtime: time and one-half for work between 5 p.m. and 10 p.m.; all other overtime, including work on Sundays and holidays, double time. The joint committee may, however, grant permits for urgent and special work which cannot be done during regular hours on working days to be done after 5 p.m. at regular rates.

Minimum hourly wage rates: bricklayers, masons, tilesetters, plasterers, plumbers, steamfitters, pipefitters, stonecutters (shop or field), electricians 60 cents; erectors of wood or metal screens, sashes, windows, steel partitions and weatherstrips 50 cents; asbestos setters, roofers (slate and tile), joiners (concrete form, shop or field), hardwood floor layers and connected trades, metal lathers, floor finishers (scraped by hand or machine), tinsmith (shop or field), 50 cents; cement finishers, painters, decorators, glaziers, wallpaper hangers, spraymen, floor finishers (shop or field), 45 cents; wood lathers (ten test, gyproc, etc.), roofers (composition) 40 cents; hod carriers 35 cents; labourers 30 cents.

Builders and contractors not employing tradesmen, but doing the work themselves must be paid 25 per cent in excess of the above minimum rates.

Board and lodging expenses, if paid by the employee, not to exceed $5 per week; the surplus of this sum to be paid by the employer.

One apprentice allowed to each ten journeymen or fraction thereof except for the joiner trade, in which one apprentice may be employed for each five journeymen. For the trades of joiner, painter, plasterer, plumber, pipefitter, steamfitter, electrician, tinsmith, bricklayer and mason, four years apprenticeship required; for the trades of cement finisher, lather (metal and wood), roofer (composition) and hardwood floor layers, three years required.

Wages for apprentices: for trades requiring four years apprenticeship hourly rates are from 25 cents during first year to 40 cents during fourth year; for trades requiring three years apprenticeship, hourly rates are from 25 cents during first year to 35 cents during third year.

Service: Custom and Repair

Garage and Service Station Employees, Quebec.—An Order in Council, approved March 29 and published in the *Quebec Official Gazette*, April 1, amends the previous Orders in Council for these workers (Labour Gazette, June, 1938, page 696, December, page 1174, February, 1939, page 218 and April, page 435) by taking the county of Lotbinière from the territorial jurisdiction.

Service: Business and Personal

Barbers, St. John and Iberville.—An Order in Council, approved March 29, and published in the *Quebec Official Gazette*, April 1, makes obligatory the terms of an agreement between La Section des Maîtres Barbiers du Syndicat professionnel des barbiers et coiffeurs de St-Jean et d'Iberville (The Master Barbers Section of the Professional Union of Barbers and Hairdressers of St. John and Iberville) and La Section des employés-barbiers (the employed barbers section) of the same union.

The Order in Council to be in effect from April 1, 1939, to March 31, 1940, in the city of St. John and the town of Iberville. (The previous agreement was summarized in the Labour Gazette, December, 1935, page 1157.) Hairdressing shops for women are not included except for minimum rate for haircut for women or any other service which may be done either in a men's barber shop or a ladies' beauty parlour.

Hours: Monday 8 a.m. to 6 p.m., with one hour off for noon meal; Tuesday, Wednesday, and Thursday 8 a.m. to 7 p.m., with two hours off for meals; Friday 8 a.m. to 9 p.m., with two hours off for meals; Saturday and eve of holidays 8 a.m. to 11 p.m., with two hours off for meals. In addition each barber to have six consecutive hours off during the week, except the week in which a holiday occurs.

Wages: $13 per week plus 50 per cent of all receipts in excess of $20 made by the employee during the week; extra employees 25 cents per hour plus 50 per cent of all receipts over $5 made by the employee in the day. The joint committee may set a lower rate for any handicapped worker. A scale of minimum prices which must be charged for each operation is included.

Only one apprentice allowed in each shop. apprenticeship to be for two years. Apprentices to be paid $5 per week during second six months, $7.50 during third six months and $10 after 18 months.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the April 1 issue of the *Quebec Official Gazette:*

Barbers and Hairdressers, St. Jerome.
Aluminium Industry, Arvida.
Ladies' Hairdressers, Montreal.
Fine Glove Manufacturing Industry, Province of Quebec.

INDUSTRIAL STANDARDS ACT

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario, Saskatchewan and Alberta

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council on all employers and employees in the industry in the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers: in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour, who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the LABOUR GAZETTE, as follows: Ontario, in the issue of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, and May, 1938, page 501; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, and June, 1938, page 633; Nova Scotia, in June, 1936, page 604; Saskatchewan, in the issue of June, 1937, page 635, and May, 1938, page 507. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Manufacturing: Textiles and Clothing

MEN'S CLOTHING INDUSTRY, PROVINCE OF ONTARIO.—An Order in Council, dated April 1, and published in *The Ontario Gazette*, April 8, makes binding throughout the Province of Ontario the terms of a schedule governing the men's and boys' clothing industry from April 18, 1939, "during pleasure."

The schedule covers the manufacture of men's and boys' pants, coats, vests and suits, but excludes work clothing, windbreakers, etc., and also custom tailoring establishments with not more than four workers.

Hours: 8 per day, 4 on Saturdays, or 9 from Monday to Thursdays, 8 on Fridays, a 44-hour week in either case.

Overtime and work on seven specified holidays, time and one-half.

Minimum hourly wage rates in counties of Ontario, York, Peel, Halton and Wentworth: class A (cutter or marker and head operator on coats) 70 cents; class B (finish presser) 65 cents; class C (pocket maker on coats, pocket maker on pants, trimmer, and edge taper) 62 cents; class D (1st operator on vests, shaper, leg and bottom presser on pants) 60 cents; class E (seamer on pants, top stitcher on pants, lining maker on pants, waistband operator on pants, fitter on coats, under baster, top collar baster, finish presser on vests and 2nd operator on vests) 57 cents; class F (lining maker, edge stitcher, joiner and pocket tacker, shoulder joiner, gorge sewer, fitter on vests, top presser on pants, chopper, alteration tailor, and edge baster by hand) 50 cents; class G (edge presser, lining baster, facing baster by hand, collar setter, seam or under presser on coats, examining brusher and try-on baster) 45 cents; class H (shoulder and undercollar baster, seam or under presser on vests, a pocket maker and outside seamer on boys' longs, shorts and bloomers, a lining sewer and stitcher on boys' longs, shorts and bloomers, finish presser on boys' longs, shorts and bloomers and assistant trimmer) 41 cents; class I (sleeve maker, edge baster by machine and seam presser on pants) 37 cents; class J (button-hole maker by machine, fitter on pants, trimming maker on pants, separator of coats, separator of vests, ticket pocket maker, dart sewer, and canvas baster by hand) 35 cents; class K (facing and bottom tacker, special machine operator, lapel and collar padder, facing baster by machine, armhole serger, lining and back maker on vests, 3rd operator on vests, baster on vests, separator of pants, finisher on coats and canvas maker by hand) 33 cents; class L (canvas baster, by machine, special machine operator on pants, button-hole maker by hand, finisher on pants and vests and button sewer) 31 cents; class M (bottom trimmer on pants, thread marker, canvas maker by machine, button-hole tacker, binder, cleaner and basting puller, pocket piecer on vests, general helper and busheller on pants) 28½ cents.

Minimum hourly wage rates for employees of manufacturers of odd pants in counties of Ontario, York, Peel, Halton and Wentworth: class A (cutter or marker) 68 cents; class B (trimmer or lining marker on odd pants) 52 cents; class C (pocket maker, leg presser, lining or top stitcher, and top presser) 50 cents; class D (inside and crotch seamer, outside seamer and lining sewer) 43 cents; class E (pocket maker on boys' longs, shorts and bloomers, lining sewer and stitcher on boys' longs, shorts and bloomers, finish presser on boys' longs, shorts and bloomers) 41 cents; class F (chopper) 40 cents; class G (layer-up and fly sewer) 38 cents; class H (assistant trimmer, fitter, seam presser, cuff presser, facing operator, curtain maker, button-hole maker, seamer on boys' longs, shorts and bloomers and waist-band operator) 33 cents; class I (pocket serger, bar tacker, pant-crease felling machine operator, fly maker, button sewer, loop maker, examiner, cleaner, button-hole tacker, ticket sewer, and cuff machine operator) 28½ cents.

The minimum wage rates for the province of Ontario other than the counties of Ontario, York, Peel Halton and Wentworth are for all manufacturers 12½ per cent less than the above minimum rates.

(The above hours and wage rates are similar to those of the schedule previously in effect and summarized in the Labour Gazette, October, 1936, page 952, but the specific trades making up some of the classes are different from the previous schedule.)

Each employer is assessed one half of one per cent of his payroll for any work performed in the industry and each employee is likewise assessed one half of one per cent of his or her wages, to be paid each month to the Advisory Committee established by the Minister of Labour.

A jobber who directly or indirectly supplies to a contractor (workman or manufacturer) materials to be manufactured is responsible for the observance of the terms of this schedule in respect to any work performed by or through such contractor.

Service: Business and Personal

Barbers, Kenora and Keewatin.—An Order in Council, dated April 1, and published in *The Ontario Gazette,* April 8, makes binding the terms of a schedule governing the barbering industry in the town of Kenora and Keewatin and within two miles of their limits, from April 18, 1939, "during pleasure."

Hours: in the town of Kenora the hours are the hours during which barber shops are permitted to be open under municipal by-laws; in the town of Keewatin hours are from 8 .m. to 7 p.m. from Monday to Friday inclusive, and 8 a.m. to 10 p.m. on Saturdays and the day before a holiday. In both towns shops to close one day a week at 1 p.m. except a week in which one of the seven specified holidays occurs.

Minimum wage rates for full time employment: $25 per week or $15 per week plus 60 per cent of the proceeds in excess of $25 from the work of the employee. For those employed 4 hours per day or less from Mondays to Fridays inclusive and all day or less on Saturday, $7.50 per week plus 60 per cent of proceeds in excess of $12.50 from work of the employee. For those working on Saturdays or the day before a holiday and on the previous evening only, $5.00 per week, plus 60 per cent of the proceeds in excess of $7.50 from the work performed by the employee. For those employed only for Saturday or the day before a holiday, $4.00 per day or part thereof, plus 60 per cent of the proceeds in excess of $6.00 from the work performed by the employee. For those working on days other than Saturdays, or the day before a holiday, $2.50 per day or part thereof, plus 60 per cent of the proceeds in excess of $4.00 from the work performed by the employee.

No deduction may be made from wages for materials supplied, laundry or any operating expenses.

A scale of minimum charges which must be made for each operation is included in the schedule.

Saskatchewan

Manufacturing: Miscellaneous Products

Sign Painting, Regina.—An Order in Council, approved April 12, and published in *The Saskatchewan Gazette,* May 1, makes binding the terms of a schedule for the sign painting industry in the city of Regina and within five miles of it, from May 11, 1939 "during pleasure."

Hours: regular hours are 54 per week, except apprentices for whom regular hours are 48 per week.

Overtime: first class journeymen 80 cents per hour, second class journeymen 50 cents, helpers 35 cents, apprentices 25 to 35 cents.

Minimum wage rates: First class journeymen (one who holds a certificate of competency from the Advisory Board) 65 cents per hour; second class journeymen (one who has finished his apprenticeship but has not the certificate of competency) 45 cents; helper (an employee who does no lettering, pictorial or decorative work) 30 cents; apprentices from $7.50 per week during first six months to 30 cents per hour during third year.

A scale of minimum charges which must be charged for each piece of work is included.

Not more than one helper may be employed for each journeyman.

Alberta

Construction: Buildings and Structures

Painters, Edmonton.—An Order in Council, dated April 11, and published in *The Alberta Gazette,* April 15, makes binding the terms of a schedule for the painting, decorating, paperhanging and glazing industry (except glazing done in a sash and door or woodworking factory and except the installation of plate glass in shop fronts), from April 25, 1939 "during pleasure."

This schedule is similar to the one previously in effect and summarized in the January Labour Gazette, page 99 with these exceptions:

The regular working shift of 8 hours may be any time between midnight Sunday and Saturday noon. There is no longer any reduction in the hours of the night shift.

Minimum wage rate for journeymen painters, decorators, paperhangers and glaziers 80 cents per hour (an increase of 5 cents).

A contractor recognized by the Advisory Committee is allowed one apprentice.

PLUMBERS AND STEAMFITTERS, EDMONTON.—An Order in Council, dated April 11, and published in *The Alberta Gazette*, April 15, makes binding the terms of a schedule governing the plumbing, steamfitting and gas fitting industry in the city of Edmonton and within ten miles of the post office, from May 1, 1939 to April 30, 1940.

This schedule is similar to the one previously in effect and summarized in the LABOUR GAZETTE, September, 1938, page 1048, with this exception:

Minimum hourly wage rate for journeymen: the $1.00 rate remains in effect until July 31, 1939, when it is to be raised to $1.05.

PRICES RETAIL AND WHOLESALE IN CANADA, APRIL, 1939

Cost of Living, Prices of Staple Articles and Index Numbers

PRICES continued to move within narrow limits during the month. The cost per week, in terms of retail prices, of a list of staple foods, fuel and lighting, and rent entering into a family budget was slightly lower due to a small decline in the cost of foods while the Dominion Bureau of Statistics weekly index number of wholesale prices declined fractionally during the first week and then advanced during the remainder of the month. As compared with a year ago the former was about two and one-half per cent lower and the latter about ten per cent lower.

The cost per week of a list of twenty-nine staple foods entering into a budget for a family of five in terms of average retail prices in sixty-nine cities was $8.14 at the beginning of April as compared with $8.17 for March; $8.69 for April, 1938; $8.54 for April, 1937; $7.82 for April, 1936; $6.67 for March, 1933 (the low point in recent years); and $11.24 for April, 1930. Fourteen items in the list were lower in cost than in the preceding month, six were higher and nine were unchanged. Such changes as occurred were slight, the most important being declines in the cost of lard, eggs, butter and sugar and advances in certain meats and in potatoes. Including the cost of fuel and rent, both of which were practically unchanged during the month under review, with that of foods the total cost of the list was $17.04 at the beginning of April as compared with $17.07 for March; $17.50 for April, 1938; $17.18 for April, 1937; $16.33 for April, 1936; $15.41 for June, 1933 (the low point during recent years); $21.53 for April, 1930; $20.66 for April, 1922; $26.92 for July, 1920 (the post war peak); and $14.32 for April, 1914.

In wholesale prices the Dominion Bureau of Statistics weekly index number based upon prices in 1926 as 100 was at the low point for the month at the end of the first week, being 73·2. From this figure it advanced gradually to 73·5 for the week ended April 28. In March the index number was 73·2 for the week ended March 3 and 73·3 for that ended March 31. The latest figures available on a monthly basis are for March when the index number was 73·2 as compared with 82·3 for April, 1938; 86·2 for April, 1937; 72·2 for April, 1936; 63·5 for February, 1933 (the low point in recent years); 94·5 for April, 1929; 98·4 for April, 1922; 164·3 for May, 1920 (the post war peak); and 64·0 for April, 1914. In the classification according to chief component materials the largest changes occurred in the Vegetable Products group and in the Animal Products group, the former being higher and the latter lower. Grains, potatoes, raw sugar and raw rubber advanced in price while live stock, meats, butter, cheese and raw wool were lower. Other groups were relatively little changed.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of April of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

(*Continued on page 540*)

COST PER WEEK (IN TERMS OF THE AVERAGE RETAIL PRICES IN SIXTY-NINE CITIES IN CANADA) OF CERTAIN STAPLE FOODS, FUEL AND LIGHTING, IN THE QUANTITIES STATED, AND RENT ENTERING INTO A FAMILY BUDGET.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family.

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries)

‡For the week ended April 28, 1939; monthly figures not yet available

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(*Continued from page 532*)

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received, and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

Retail Prices

The gradual advance in the prices of fresh meats in progress since the beginning of the year was continued in April. Sirloin steak averaged 27·5 cents per pound in April as compared with 27·2 cents in March, rib roast 20·6 cents in April as compared with 20·4 cents in March. Fresh pork was fractionally higher at 23·8 cents in April. The price of lard was down from an average of 12·8 cents per pound in March to 12·4 cents in April. Fresh eggs were lower in most localities, the Dominion average price being down from 30·1 cents per dozen in March to 28·2 cents in April. The average price of milk has been unchanged at 10·9 cents per quart since September, 1938. Creamery butter averaged fractionally lower at 26·6 cents per pound. The price of potatoes advanced in all provinces except Ontario and British Columbia. The Dominion average price increased from $1.35 per 90 pounds to $1.38.

The following are the prices per ton reported for Welsh coal, "cobbles" and "French nut"; Halifax $15.50; Charlottetown $14; Moncton $16; Saint John $14.50; Quebec $14; Three Rivers $15 and $14; Sherbrooke $14.75; St. Hyacinthe $15; Thetford Mines $17.25; Montreal $14.75-$15.50; Ottawa, $16.50; Kingston $15; Belleville $16.50; Peterborough $16.75; Oshawa $15.50; Toronto $15; St. Catharines $15; Hamilton $15 and $14.50; Brantford $16.25; Galt $16-$16.50; St. Thomas $16.50; Cobalt $19.50; Timmins $19.25; Port Arthur $17.75; Fort William $17.75; Winnipeg $20.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices, in Great Britain and certain of the principal industrial and commercial countries appeared in the April issue of the LABOUR GAZETTE.

Great Britain and Northern Ireland

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 96·6 for March as compared with 96·8 for February, a decrease of 9·2 per cent for the month. The index of prices of food and tobacco declined 1·1 per cent while the index of prices of industrial materials and manufactures increased 0·3 per cent. Compared with the figure for March, 1938, the general index for March of this year showed a decrease of 7·2 per cent while those for foods and industrial and manufactured goods declined 10·5 per cent and 5·4 per cent respectively.

The Statist index number, on the base 1867-1877=100, was 89·0 at the end of March as compared with 88·6 at the end of February, an increase of 0·5 per cent for the month. The index of prices of foodstuffs increased 0·8 per cent while that for "materials" increased 0·3 per cent. As compared with March 31, 1938, the corresponding figure for the current year showed a decline of 5·5 per cent.

COST OF LIVING.—The Ministry of Labour's index number on the base 1914=100, was 153 at the first of April, showing no change from the figure for the previous month. The index of food prices was also unchanged during the month, standing at 135; decreases in the prices of eggs were offset by increases in the prices of potatoes.

France

WHOLESALE PRICES.—The General Statistical Office index number, on the base 1914=100, was 681 for March as compared with 677 for February. The index of food prices increased from 651 to 653 due to increases in the animal foods and the sugar, coffee and cocoa sub-groups which were only partially offset by a decrease in the vegetable foods sub-group. The index of prices of industrial materials increased from 700 to 706, there being small increases in the minerals and metals and in the sundries sub-groups and the index for the textile sub-group being unchanged. The index based on gold currency, 1914=100, was unchanged at 55.

Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office, on the base 1913 =100, was 106·6 for March as compared with 106·5 for the preceding month. During the month agricultural prices rose from 107·6 to 107·8, raw materials and semi-manufactured goods rose from 94·4 to 94·5 and manufactured goods rose from 125·5 to 125·7.

COST OF LIVING.—The official index number, on the base 1913-1914=100, was 126·0 for March as compared with 125·7 for February. The index for food prices rose 0·5 per cent during the month, clothing prices rose 0·3 per cent and the cost of sundries declined 0·1 per cent. The indexes for rent and heating and lighting materials were unchanged from the previous month.

India

WHOLESALE PRICES.—The index number of the Labour Office, Government of Bombay, on the base July, 1914=100, was 100 for January, 1939, as compared with 101 for the previous month. The index of food prices declined from 105 to 104 during the month while the prices of non-foods was unchanged at 99.

COST OF LIVING.—The official index number of the working class cost of living at Bombay, on the base July, 1933, to June, 1934=100, was 104 for February as compared to 105 for January. The index of food prices declined from 112 to 110, while that for fuel and lighting materials declined from 105 to 103. The other groups making up the general index were unchanged.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number, on the base 1926= 100, was 76·9 for February showing no change from the January figure. Of the ten sub-groups making up this index, two indexes, those for farm products and foods were unchanged; the indexes of four sub-groups showed increases and those of four others showed decreases. The increases were as follows: sundries, 0·4 per cent, fuel and lighting materials 0·3 per cent, textile products 0·3 per cent and building materials 0·1 per cent. The sub-groups showing decreases were, hides and leather products, 1·3 per cent, chemicals and drugs 0·5 per cent, housefurnishing goods, 0·2 per cent and metal and metal products, 0·1 per cent. The general index for February was 3·6 per cent lower than the corresponding figure for 1938.

COST OF LIVING.—The index number of the Industrial Conference Board, on the base 1923 = 100. was 84·9 for March as compared with 85·1 for February. a decrease of 0·2 per cent for the month. The rent and sundries groups showed no changes during the month. The index of food prices declined 0·5 per cent, while those for fuel and lighting materials and clothing each declined 0·1 per cent.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE FIRST QUARTER OF 1939

The number of fatal industrial accidents (including fatalities from industrial diseases reported with fatal accidents by workmen's compensation boards, etc., as well as fatalities to persons incidental to the pursuit of their occupations) which were recorded in the Department as occurring during the first quarter of 1939 was 188, there being 65 in January, 60 in February and 63 in March.

The report for the fourth quarter of 1938, showing 262 fatalities was given in the LABOUR GAZETTE, February, 1939, page 232. In the first quarter of 1938, 239 fatal accidents were recorded (LABOUR GAZETTE, May, 1938, page 594).

The supplementary list of accidents not reported in time for inclusion in the reports covering the periods in which they occurred contain 44 fatalities for 1938.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrences and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Provincial Workmen's Compensation Boards, from the Board of Transport Commissioners of Canada, from certain other official sources and from the correspondents of the LABOUR GAZETTE. Information as to accidents is also secured from newspapers.

Classified by groups of industries the fatalities occurring during the first quarter of 1939 were as follows: agriculture, 32; logging, 26; fishing and trapping, 2; mining, non-ferrous smelting and quarrying, 38; manufacturing, 20; construction, 24; transportation and public utilities, 20; trade, 8; service, 18.

Of the mining accidents, 31 were in "metalliferous mining," 4 in "coal mining," and 3 in "non-metallic mining and quarrying, n.e.s."

Of the accidents in manufacturing, 2 were in "vegetable foods, drink and tobacco," 1 in "textiles and clothing," 7 in "saw and planing mill products," 1 in "wood products," 6 in "iron, steel and products," 2 in "non-metallic mineral products," and 1 in "chemical and allied products."

In construction there were 10 fatalities in "buildings and structures," 12 in "highway and bridge," and 2 in "miscellaneous construction."

In transportation and public utilities there were 13 fatalities in "steam railways," 1 in "water transportation," 5 in "local and highway transportation," and 1 in "storage."

In trade there were 3 fatalities in "wholesale," and 5 in "retail."

There was no serious disaster resulting in the loss of a very large number of lives, during the period under review. Accidents involving the loss of two or more lives were as follows:

On March 2, a hotel cook, a hotel housekeeper and two maids lost their lives in a fire that destroyed a hotel at Halifax, Nova Scotia.

When an electric train struck their car, near Burnaby, British Columbia, a highway construction foreman and two labourers were killed, on March 9.

At Frood, Ontario, two mining timber workers were killed on January 10, by falling down an ore chute when a support broke. Another two miners were killed by a fall of ore, at Copper Cliff, Ontario, on February 21. Two miners lost their lives from a rock blast, at Kirkland Lake, Ontario, on March 11; and another two fatalities occurred in a Kirkland Lake mine, on March 23, when two miners fell down a stope, following an ore collapse. Two miners were killed in a premature explosion at Timmins, Ontario, on March 23.

Supplementary List of Accidents

A supplementary list of accidents occurring during 1938 has been compiled which contains 44 fatalities, of which 2 were in agriculture, 1 in logging, 14 in mining, non-ferrous smelting and quarrying, 9 in manufacturing, 10 in construction, 4 in transportation and public utilities, 1 in trade, and 3 in service. One of these accidents occurred in February, 1 in March, 2 in May, 5 in June, 2 in July, 7 in August, 5 in September, 2 in October 9 in November and 10 in December.

RECENT LEGAL DECISION AFFECTING LABOUR

Montreal Court Denies Right of Union to Sue Under Act Making it Liable to be Sued

On April 1, Mr. Justice Surveyer of the Superior Court of Montreal dismissed in so far as it concerned the plaintiff trade union and locals, an action brought by the International Ladies' Garment Workers' Union and a dressmakers' and a dress cutters' local of that union for arrears of wages alleged due under the terms of a collective agreement between the unions and the Dress Manufacturers' Guild of Montreal which had been made legally binding on all employers in the industry by Order in Council under the Collective Labour Agreements Act.

The defendant took exception to the form of the action, contending that as voluntary unincorporated associations the plaintiff union and its locals had no status in court and could not institute an action before a court. The plaintiffs admitted that under Quebec law they did not possess a collective civil personality and were not entitled to sue as a partnership, but claimed the right to sue under the Act to Facilitate the Exercise of Certain Rights passed in 1938. This statute provides that any group of persons associated for any commercial, industrial or professional purpose which does not possess a collective civil personality and is not a partnership, may be summoned before the Courts by summoning one of its officers or it may be summoned collectively under the name by which it is known and that judgments rendered may be executed against all the real and personal property of the group. The plaintiffs' contention was if the group could be sued in its common name it could likewise bring suit.

Several authorities were mentioned to show that where the words of a statute are precise and unambiguous they must be given their ordinary and natural sense which in this case allows an unincorporated trade union to be sued but not to sue. The Court was of the opinion that if judgment were rendered against such a group as the plaintiffs, it could not be executed and that neither could the plaintiff, not being a person, be made to pay the costs of an action. It was held that the plaintiffs have legal capacity to take action only under the names of all the members of their group and the defendant's objection to the form of the action was maintained. The action accordingly failed and the defendant was allowed to withdraw his deposit for costs when he took exception to the form of the action. *International Ladies' Garment Workers' Union et al vs. Rothman and Montreal Dress Manufacturers' Guild,* Superior Court, Montreal, April 1, 1939.

VOLUME 39] JUNE, 1939 [NUMBER 6

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

INDUSTRIAL employment in Canada showed an increase at the beginning of May, according to returns received by the Dominion Bureau of Statistics from 11,607 firms, each employing a minimum of 15 workers and representing all industries except agriculture, fishing, hunting and highly specialized business. The working forces of these firms aggregated 1,030,718 persons, or 12,149 more than in the preceding month. The employment index (with the average in the calendar year 1926, as the base equal to 100) stood at 106·2, as compared with 104·9 at April 1, and 107·4 at the beginning of May last year. The indexes for May 1 of preceding years are as follows:—1937, 106·3; 1936, 99·5; 1935, 95·2; 1934, 92·0; 1933, 77·6; 1932, 87·5; 1931, 102·2; 1930, 111·4; 1929, 116·2; 1928, 106·8 and 1927, 101·8 The industrial expansion indicated at the latest date was on a smaller-than-average scale, according to the experience of the years, 1921-1938; the index of employment, after correction for seasonal influences, therefore declined slightly, falling from 111·1 in the preceding month to 110·3 at the beginning of May.

Unemployment in trade unions.—At the beginning of May, 1939, reports were forwarded to the Department of Labour by 1,910 local trade unions involving a membership of 242,398 persons, 33,593 or 13·9 per cent of whom were unemployed, as compared with 15·7 per cent at the beginning of April, 1939, and 13·1 per cent at the beginning of May, 1938.

Employment Office Reports.—Reports received by the Department of Labour from the offices of the Employment Service of Canada showed a nominal loss in business transacted by these offices during April, 1939, when compared with the previous month, but a gain of nearly 15 per cent in comparison with that of April a year ago, construction and maintenance being the group, in each instance, mainly responsible for the change. Vacancies in April, 1939, numbered 26,994, applications 57,469, and placements in regular and casual employment 25,146.

79821—1½

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget was $17.02 at the beginning of May as compared with $17.04 for April; $17.36 for May, 1938; $17.28 for May, 1937; $16.36 for May, 1936; $15.41 for June, 1933 (the low point during recent years); and $21.49 for May, 1930. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics changed little from week to week during the month and was 73·5 for the week ended June 2 which was the same as for the week ended April 28 as compared with 73·3 for the week ended March 31, and 80·3 for the week ended June 3, 1938. Comparative figures on a monthly basis are 73·4 for April; 80·3 for May, 1938; 85·5 for May, 1937; 71·9 for May, 1936; 63·5 for February, 1933 (the low point in recent years); and 93·4 for May, 1929.

Business Statistics.—The latest information avaliable reflecting industrial conditions in Canada is given in the table on page 546. The index of the physical volume of business was slightly higher in April both as compared with the previous month and with April, 1938. The index of mineral production was higher in April than at any time during the last twelve months there being important increases in the shipments of copper, nickel and zinc. The index of the volume of manufacturing also was higher in April than at any time since January, 1939, the increase being due to the greater volume indicated in foodstuffs, certain forestry products, coke, and in the imports of crude petroleum. Construction was at somewhat greater volume than in March and trade employment, imports and exports were also higher after correction for seasonal variation while the output of electric power and car loadings were lower. All of the above principal groups were higher than in April, 1938, except construction, car loadings and imports which were somewhat lower. Information available for May shows employment at a higher level than in April but slightly lower than in May, 1938. The number

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

†For the week ended June 2, 1939.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending May 27, 1939, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending May 20, April 22 and March 25, 1939; May 21, April 24 and March 26, 1938. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation.

of cars of revenue freight showed substantial advance in both these comparisons as did also the gross earnings of the Canadian National Railways.

Strikes and Lockouts.—The number of strikes and lockouts recorded for May was 11, involving 3,434 workers and causing a time loss of 17,203 man working days, as compared with 6 disputes in April, invloving 314 workers with a time loss of 1,361 days. Nearly all of the workers involved in May and most of the time loss were accounted for by two strikes of coal miners in Nova Scotia and two strikes of rubber factory workers at Kitchener, Ont., one of which began in April and was the only important dispute during that month. In May, 1938, there were 15 disputes, involving 1,741 workers, with a time loss of 12,589 working days, due chiefly to strikes of sawmill workers at Fort Frances, Ont., and silk factory workers at Louiseville, P.Q. Of the eleven disputes recorded for May, 1939, seven were terminated during the month, two resulting in favour of the employers concerned, two in favour of the workers involved, compromise settlements being reached in two cases and the result of one dispute being recorded as indefinite. Four disputes, involving approximately 605 workers, were recorded as unterminated at the end of May. The figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Second Annual Meeting of the C.A.A.L.L.

The Canadian Association of Administrators of Labour Legislation, formed last year at a conference of Dominion and provincial officials (LABOUR GAZETTE, June, 1938, page 615), held its second annual meeting in Ottawa on June 5, 6 and 7. In addition to representatives of the Dominion Department of Labour, there were officials in attendance from every province except Nova Scotia and Prince Edward Island. Apart from sessions devoted to the business of the association, the conference gave its attention to the discussion of four major problems relating to the administration of labour legislation in Canada. A feature of the conference was a dinner in the evening of June 6, at which an address was given by the Hon. Norman McL. Rogers, Minister of Labour, on the work of the International Labour Organization.

Among those in attendance at the conference were the following:—

Dominion Department of Labour:
- W. M. Dickson, Deputy Minister of Labour;
- Gerald H. Brown, Assistant Deputy Minister of Labour;
- R. A. Rigg, Director of the Employment Service of Canada;
- F. E. Harrison, Fair Wage and Conciliation Officer;
- C. W. Bolton, Chief Statistician;
- Miss M. Mackintosh, Chief of Research Division.

Alberta:
- Clayton Adams, Chairman of the Board of Industrial Relations.

British Columbia:
- Adam Bell, Deputy Minister of Labour;
- Robert Morrison, Assistant Deputy Minister of Labour.

Manitoba:
- Edward McGrath, Secretary of the Bureau of Labour;
- James Leslie, Conciliation Officer.

New Brunswick:
- H. R. Pettigrove, Fair Wage Officer;
- R. B. Irving, Chairman of the Workmen's Compensation Board.

Ontario:
- Hon. N. O. Hipel, Minister of Labour;
- James F. Marsh, Deputy Minister of Labour;
- A. W. Crawford, Director of the Minimum Wage Branch;
- J. R. Prain, Chief Factory Inspector.

Quebec:
- J. O'Connell-Maher, Secretary of the Department of Labour;
- Cyprien Miron, Conciliation Officer;
- Georges Cromp, Vice-president of the Fair Wage Board;
- C. H. Cheasley, Member of the Fair Wage Board.

Saskatchewan:
- H. R. Johnstone, Acting Commissioner of Labour and Public Welfare.

The session devoted to a discussion of the regulation of wages and hours of labour was presided over by Mr. Marsh, the principal speakers being Messrs. Crawford, Bell and McGrath. Mr. Brown was in the chair during the discussion of trade unions, collective bargaining and conciliation, which was led by Messrs. O'Connell-Maher and Pettigrove. Mr. O'Connell-Maher presided over the discussion of industrial standards legislation and Messrs. Marsh, Adams and Johnstone were the chief participants. Mr. McGrath was chairman during the discussion of the enforcement of labour legislation, the leaders being Messrs. Morrison and Miron.

At the final business session of the conference the respresentatives unanimously adopted a constitution, under which future work of the Canadian Association of Administrators of Labour Legislation will be con-

ducted. Officers were elected for the ensuing year, as follows: president, Mr. Bell; first vice-president, Mr. O'Connell-Maher; second vice-president, Mr. Crawford; secretary-treasurer, Miss Mackintosh. It was decided to hold the next annual meeting of the association in Ottawa sometime between June 1 and 15, 1940.

Statistics of material aid recipients for April

Preliminary figures from the National Registration show that the grand total of all classes of persons on urban and agricultural aid in April was 1,005,000, a decrease of 2·2 per cent over the March figure as revised to date and almost 2 per cent less than in April, 1938.

The Dominion total of unemployed but fully employable persons on aid in April this year was 187,000, a decrease of 2·6 per cent from the March total of 192,000. The figure for April this year represented an increase of 10·9 per cent over April a year ago.

A total of 686,000 persons were receiving non-agricultural aid in April this year, a decrease of 2·7 per cent from the previous month. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a net increase of over 8 per cent from the figure for April, 1938.

The number of farmers and members of their families in receipt of agricultural aid continues to show a decline from the year before. A total of 70,000 farmers who, together with their dependents, account for a farm population of 319,000, were reported as receiving agricultural aid for subsistence in April. Of these, 264,000 were located in the Province of Saskatchewan alone.

The Dominion total on agricultural aid in April showed a decrease of more than one per cent from the March revised figure and 18·6 per cent less than April, 1938. The April total of farmers and their families on aid in Saskatchewan, continued to hold the improvement over a year ago, showing a decrease of 21·4 per cent in this comparison, and a decrease of almost 2 per cent from March, 1939.

Participation of Provinces in national forestry program

All nine provinces have informed the Dominion Government of their intention to participate in the national forestry program announced on April 13. The plan which, it is anticipated, will give employment to several thousand young men, has been commended by forestry and other organizations, stated Honourable Norman McL. Rogers, Minister of Labour, in a recent press release.

Some weeks ago the Minister announced inauguration by the Dominion Government of a million-dollar national forestry program as an expansion of the Youth Training plan. Of the $1,000,000, appropriated by the Dominion, $600,000, was allocated to the provinces on a dollar-for-dollar basis for conservation work subject to Dominion approval of programs. Now that the provinces have decided to participate in the program the $600,000, will be almost doubled for this part of the work.

The remaining $400,000, of the Dominion appropriation is being used for forest conservation work in Dominion national parks and forest experiment stations under the supervision of the Dominion Forest Service, as a part of the Youth Training program.

The forestry training projects are confined to men from 18 to 25 years of age. Applications should be made through the Employment Service or the Provincial Forest Service in the various provinces.

Royal Assent of His Majesty to two social measures

On May 19, His Majesty King George VI gave Royal Assent to a number of Bills among which were two enactments in the sphere of labour and social legislation.

These were an Act to provide for the training of young people to fit them for gainful employment (LABOUR GAZETTE, May, page 456) and an Act to amend the Criminal Code, section eleven of which provided against refusal to employ, or dismissal, for membership in trade unions (LABOUR GAZETTE, April, page 366).

Ontario Medical Association endorses compulsory health insurance report

At its 59th annual convention held in Hamilton on May 29 to June 2, the Ontario Medical Association endorsed a committee report advocating compulsory health insurance on a national basis. This attitude of the provincial organization will be transmitted to the Canadian Medical Association in answer to a request for a statement of policy.

The report of the committee which has been studying the subject for seven years recommended the adoption of compulsory health insurance for low-income brackets and contributory insurance for persons in higher income classifications.

In his presidential address, Dr. W. A. Jones of Kingston told the Association that individual contributions of 50 cents a week would provide the public with medical and surgical attendance including laboratory service, semi-private hospital accommodation and standard nursing service.

Outlining the work being done by Associated Medical Services and the medical relief plan, Dr. Jones said that if people contributed regularly and consistently during the earning period of their lives to an insurance fund, there would be no difficulty in regard to paying for medical attention of all kinds during periods of accident or sickness.

Elimination of oppressive labour pratices sought in U.S. legislation

Legislation designed "to eliminate certain oppressive labour practices affecting interstate and foreign commerce" has been introduced in the United States Congress. Identical Bills have been been introduced in the Senate by Senators LaFollette and Thomas and in the House of Representatives by Mr. Wood. This legislation as introduced in the House of Representatives is cited as the "Oppressive Labor Practices Act of 1939," and declares as follows:

Section 1. (*a*) The Congress hereby finds that the utilization of labour spies, strikebreakers, strikebreaking agencies, oppressive armed guards, and industrial munitions, (1) violates the right of employees to organize, bargain collectively, and engage in concerted activities for their mutual aid and protection; (2) causes and provokes acts of violence, breaches of the peace, and destruction of property, affecting commerce; (3) leads to labour disputes burdening and obstructing commerce and the free flow of commerce; (4) obstructs the settlement of labour disputes through negotiation and the orderly procedure of collective bargaining, thereby tending to prolong interruption of the free flow of commerce; (5) burdens and obstructs commerce and the free flow of commerce; (6) interferes with the United States and its agencies in obtaining goods and services pursuant to contract; and (7) interferes with and obstructs the effective exercise by the several States of their respective police powers.

(*b*) The Congress further finds that the use of the channels and instrumentalities of commerce and of the mails for the transportation of goods produced by employers engaged in the activities above referred to, or for the transportation or furnishing of supplies and services for engaging in such activities, tends to spread and perpetuate such activities and the evils resulting therefrom.

(*c*) It is hereby declared to be the policy of the United States to eliminate the activities referred to in subsection (*a*) when such activities affect commerce or are engaged in by employers who are engaged in commerce, in the production of goods for commerce, or in furnishing goods or services to the United States and its agencies pursuant to contract, and to prohibit the use of the channels and instrumentalities of commerce and of the mails for the transportation of goods produced by employers who engage in such activities, and for the transportation or furnishing of supplies and services for engaging in such activities.

The Senate Bill has been referred to the Senate Committee on Education and Labor, which has set up a special committee to study the matter, while the House has referred its Bill to the Committee on Labor.

Introduction of legislation to amend U.S. Fair Labor Standards Act

In the United States Congress the chairmen of the House and Senate Labor Committees have introduced Bills embodying certain amendments to the Fair Labor Standards Act of 1938 (LABOUR GAZETTE, July, 1938, page 719; November, 1938, page 1197). As summarized in the April-May issue of *Labor Standards,* published by the United States Department of Labor, these amendments are designed to ensure greater fairness in the application of the act, and to simplify and strengthen its administration. Some of the cases of maladjustment will be taken care of by a grant of power to the Administrator to make such rules and regulations as are necessary to carry out the provisions of the act. Specially included in this power is the regulation of industrial home work and provision for the "annual wage plans" contemplated in section 7.

It is also proposed (1) to exempt employees receiving a guaranteed monthly wage of $200; (2) to eliminate the need for defining the area of production by substituting a detailed list of the agricultural processes and occupations to be exempted; (3) to provide for special treatment of Puerto Rico and the Virgin Islands by authorizing the setting up of industry committees to recommend minimum rates with the proviso that the rates set shall not give these island industries an advantage over competitors in the continental United Staes; (4) to protect against legal liability innocent purchasers of goods produced under conditions that violate the act, and employers who comply in good faith with the determinations of the Administrator.

Administrator reviews U.S. Fair Labor Standards Act

In a review of the first six months during which the Fair Labor Standards Act has been in operation Mr. Elmer F. Andrews, its administrator, details some of its accomplishments.

Dispelling some fears as to consequences, this official states: "When the law went into effect the Division was confronted with predictions of wholesale shut-downs and industrial dislocations. These prophecies have not materialized. The terrible plight of the pecan-shelling industry was one of the early dour tales, but reports from Texas showed that instead of 50,000 unemployed there were fewer than 10,000. Since then a considerable number have returned to work at 25 cents an hour, and the unemployment in this low-

wage field has been offset by new employment brought about by the hour limitations of the act. In Louisiana, where lay-offs of 30,000 had been forecast as a result of the Fair Labor Standards Act, it is estimated that actually only about 2,500 people were laid off, while approximately 3,000 new positions were created in order to keep the workweek down to the minimum specified by the act."

Discussing potential results in terms of money and in increased purchasing power, Mr. Andrews observed: "Approximately 11,000,000 employees are subject to the act. Of this number in September, 1938, there were 1,418,000 receiving less than 40 cents an hour and 2,184,000 working more than 40 hours a week. In short, several million men and women will have their way of living materially altered by the eventual objectives of the Fair Labor Standards Act—40 cents an hour for a 40-hour workweek.

"No economic utopia will be ushered in by these wage provisions of the act. An annual income of little more than $800 a year is not sufficent to provide all the necessities and comforts the average American family needs. It is far from sufficient to absorb the products which our present industrial machine, geared to mass-production, is capable of producing. But it will go a long way in that direction by providing a wider market for food, clothing, and other goods and services.

"Investigations recently made of the way families in this country spend their money reveal some interesting trends. For example, when the average family in middle-sized cities in the Southeast finds its annual income raised from around $400 to approximately $800, certain fundamental changes in its buying habits result. It spends about $104 more per year for food, $56 more for housing, $28 more for life insurance, $22 more for clothing, $18 more for medical care, $18 more for household operation, $17 more for recreation, $14 more for household furnishings and equipment, and $10 more for personal care."

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

SIX applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour recently as follows:—

(1) From approximately 362 employees in the aircraft department of the Canadian Vickers Limited, Montreal, being members of the Quebec Branch of Aircraft Employees of Canada (All-Canadian Congress of Labour). The employees claimed that the company had not replied to them in regard to a proposed schedule of wages and working conditions, and had discriminated unfairly against union members in laying off two employees. The company disclaimed any discrimination, pointing out that the two employees had been laid off, along with other workers, because of slackness in their aircraft operations and that the men would be re-engaged as soon as working conditions permitted. Since then the two men have been re-employed, and the company has indicated its willingness to negotiate with a committee of its employees looking to a collective agreement under the laws of the Province of Quebec. The Industrial Disputes Investigation Act does not apply directly to this industry, and a board can be established only with the concurrence of both parties to the dispute.

(2) From 100 sleeping car porters in the employ of the Canadian National Railways, being members of Division No. 130, Canadian Brotherhood of Railway Employees. This dispute arose out of certain changes made by the company in assigned runs between Winnipeg and Flin Flon, and Regina, involving increased hours of service for the sleeping car porters.

(3) From 225 men in the employ of Mr. F. W. Nicholas at Port McNicoll, Ont., being checkers, porters, coopers, watchmen, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The dispute relates to the employees' request for revision of the existing agreement, including certain changes in wage rates and working conditions.

(4) From 750 employees of the B. F. Goodrich Rubber Company of Canada, Limited, at Kitchener, Ont., being members of Local No. 73, United Rubber Workers of America. The cause of the dispute is stated to be the demand of the union for a signed contract with the company, a general increase of five cents per hour throughout the plant, an increase in the base rate for 21 boys in the shoe division, and payment every week, instead of every two weeks, in cash instead of by cheque. A strike has been in progress in the shoe division since April 25 and throughout the plant since May 9, as outlined elsewhere in this issue.

Upon receipt of the application it was explained to the parties concerned that as the industry is not one coming within the direct

scope of the Industrial Disputes Investigation Act, a Board of Conciliation and Investigation could be established only with the joint consent of the disputing parties. At the time of going to press the company has not yet indicated if it is agreeable to reference of the dispute to a Board of Conciliation and Investigation.

(5) From motor coach and freight truck drivers in the employ of SMT Eastern Limited, being members of Division No. 1182, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America. Thirty-five men are stated to be directly affected by the dispute and 38 indirectly. The dispute arose out of failure of the union to secure an agreement with the company covering union recognition, wages, hours and working conditions for its members in the company's employ.

(6) From sleeping car conductors and porters employed by the Canadian National Railways in its Sleeping and Dining Car Services in the Provinces of Ontario and Quebec. The employees are members of the Canadian Brotherhood of Railway Employees, 250 men being directly affected and 550 indirectly. The dispute concerns changes made by the company in various sleeping and parlour car runs resulting in increased hours of service for certain employees and loss of employment to others. These matters were made the subject of a former application submitted to the Department of Labour in January last (LABOUR GAZETTE, February, 1939, p. 126). A settlement was effected at that time (LABOUR GAZETTE, April, 1939, p. 371) through the company restoring the employees to their former respective runs and hours of assignment. On March 23 the company notified the employees of their intention to put the same changes into effect again on April 30, and the dispute has been thus revived.

Applications Withdrawn

The department was notified at the close of May that salt miners in the employ of the Malagash Salt Company, Limited, were withdrawing the application for a Board of Conciliation and Investigation which had been submitted to the Department on April 17 (LABOUR GAZTTE, May, 1939, p. 462). This decision was reached following a meeting between the management of the company and a committee of the employees, which had been arranged by conciliation officers of the Department of Labour. The employees are members of the United Salt Mine Workers Local Industrial Union No. 323 (C.I.O.).

Holidays With Pay in Great Britain

Holidays With Pay is the title of a booklet prepared by the British Ministry of Labour and published by H.M. Stationery Office.

Reference is made in the booklet to a committee under the chairmanship of Lord Amulree appointed in March, 1937, "to investigate the extent to which holidays with pay are given to employed workers and the possibility of extending the provision of such holidays by statutory enactment or otherwise and to make recommendations." This committee reported to the Minister of Labour in April, 1938 (LABOUR GAZETTE, June, 1938, page 653) and estimated that at the end of March, 1938, annual consecutive holidays with pay, in some form, were provided for about 7¾ million workpeople out of a total of about 18½ million workpeople in the employment field. Of the total of 7¾ million, a large proportion were granted paid holidays under the provisions of collective agreements between employers, or their organizations, and the trade unions concerned, the total number of manual wage-earners covered by such collective agreements being estimated at about 3 million in March, 1938, as compared with 1½ to 1¾ million when the Committee was appointed.

It is stated that since the date of the Amulree report, there has been a further extension of collective agreements providing for annual paid holidays and the total number of workpeople now covered by such agreements is estimated at about 4 million.

The booklet describes the main provisions commonly contained in the agreements. These provisions are summarized under various headings, including the definition and length of the holiday, the time at which it is to be taken, the qualifying period of service, the rates of payment, allowances made to workers leaving before the holiday is taken, arrangements in the case of casual, temporary or part-time workers, etc. The booklet also contains the actual texts of over 50 of the principal agreements or of those which include features of special interest, together with an Appendix giving a list of all industries and services in which collective agreements providing for paid annual holidays for wage-earners are known to be in operation.

It is pointed out in the study that there is a wide diversity in the terms of the different agreements and the information contained in the booklet as to the various ways in which agreements have been framed is intended to assist in the making of new agreements or revising those now in force.

STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1939

THE following table shows the number of disputes, workers involved and time loss for May, 1939, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Numbers of employees involved	Time loss in man working days
*May, 1939	11	3,424	17,203
*April, 1939	6	314	1,361
May, 1938	15	1,741	12,589

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

The number of strikes and lockouts recorded during May was considerably greater than in April but the large increases in number of workers involved and time loss were due to two strikes of rubber factory workers at Kitchener, Ont., and two strikes of coal miners in Nova Scotia, which accounted for nearly all of the workers involved and the time loss during the month. The other disputes involved small numbers of workers for short periods. The only important dispute in April was a strike of rubber factory workers at Kitchener, Ont., which was unterminated. In May, 1938, most of the time loss was due to strikes of sawmill workers at Fort Frances, Ont., and silk factory workers at Louiseville, P.Q.

Two disputes, involving 209 workers, were carried over from April and nine disputes commenced during May. Of these eleven disputes seven were terminated during the month, two resulting in favour of the employers concerned, and two in favour of the workers involved, while compromise settlements were reached in two cases and the result of one dispute was recorded as indefinite. At the end of the month, therefore, there were four strikes or lockouts on record, namely: two disputes involving rubber factory workers at Kitchener, Ont., one dispute involving rubber factory workers at Toronto, Ont., and a dispute involving cap factory workers at Montreal, P.Q.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to eight such disputes, namely: coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; lime plant employees, Blubber Bay, B.C., June 2, 1938, one employer; lithographers, London, Ont., August 31, 1938, one employer; bakers and helpers, Vancouver, B.C., November 11, 1938, one employer; dressmakers, Montreal, P.Q., January 20, 1939, one employer; and stationary engineers, Toronto, Ont., March 2, 1939, one employer.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A dispute involving 62 coal handlers, members of the Coal Handlers' local of the International Longshoremen's Association, occurred on May 22 when the union declared that a coal company had refused to employ its members and had engaged members of another union. The National Catholic Unions had entered into an agreement with the coal companies under the Quebec Collective Labour Agreements Act effective from May 21, 1938, (LABOUR GAZETTE, June, 1938, page 695) and an amendment, effective May 13, 1939, included the International Longshoremen's Association and certain additional employers, one of these being the company involved in this dispute. It was stated that the dispute would be referred to the Joint Committee set up under the agreement and the Provincial Department of Labour.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to May

RUBBER FACTORY WORKERS (SHOES), KITCHENER, ONT.—This dispute, which commenced on April 25 for increased wages for 20 workers, supported by approximately two hundred

other workers, indirectly involving about two hundred additional employees in the shoe department some days later, was unterminated at the end of May. The base rate for the work was 28·8 cents per hour with provisions under a bonus system by which many of the workers received 36 cents or 38 cents per hour. On May 9 a conciliation officer of the Federal Department of Labour visited Kitchener, at the request of the United Rubber Workers Union of America, and arranged for a conference between the parties. In the meantime 300 employees in the tire department ceased work on May 9, negotiations for the settlement of the strike and for an agreement for the whole plant with increases in wages, in progress since March, not having been successful. It was arranged that the picket would not interfere with the shipment of goods or the entrance of officials into the plant. On May 16 two conciliation officers of the Department again visited Kitchener on being advised that negotiations had not been successful. It was arranged that negotiations would be resumed and the desirability of referring the dispute to a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act was discussed. Further direct negotiations between the parties not having resulted in a settlement, on May 30 the union applied to the Minister of Labour for the establishment of a Board of Conciliation under the Act. As a Board can be established in this industry only by mutual consent of the parties to the dispute, the result of such an application was uncertain. On May 25 it was reported that five members of the picket were arrested on charges of obstructing police officers when the picket interfered with plant inspectors entering the plant, and on May 27 one of these five was summoned as a result of interfering with a truck. On May 31 the Mayor of Kitchener, having received a request from the company for extra police protection, attempted to arrange for a conference and made certain proposals for a settlement including a base rate of 30 cents per hour for men.

Fish Handlers and Truck Drivers, Winnipeg, Man.—At the request of the union a provincial conciliation officer was reported to have discussed the dispute with the management and was informed that as the workers had left their employment in violation of the agreement (which was to be in force until April 30) further negotiations were not desired. On May 8 two men who worked during the dispute were reported to have been slightly injured, when on their way to work, by strike sympathizers. On May 15 the strikers resumed work under the wages and working conditions prior to the dispute.

Disputes Commencing During May

Coal Miners, Florence, N.S.—A number of shooters and loaders in one section of a colliery ceased work on May 1 in protest against a change in the system of mining which was expected by the management to increase the production of coal and lessen the amount of stone through the elimination of bottom brushing but which the workers alleged would decrease earnings. Work was resumed on May 30 following negotiations, the new system to be given a trial in order to ascertain the effect on earnings.

Coal Miners, Springhill, N.S.—Miners in two collieries ceased work on May 8 in protest against the refusal of employment to a miner after absence during a term in jail. It was reported that before the strike the management had offered to investigate the case. On May 10 some of the miners resumed work for one shift only. Later that day the strikers returned to work under an arrangement that there would be an investigation by company and union officials into this case and two other cases. Later all three men were reinstated.

Coal Miners, New Waterford, N.S.—Miners in one colliery ceased work on May 16 when several miners who had served jail terms were refused employment. It was reported that the strike was not authorized by the United Mine Workers of America. It was stated that part of the day shift returned to work on May 17 but that the next shift remained idle. Work was again resumed on May 18, the district executive being in conference with the management as to the practice to be adopted in all of the company's mines.

Rubber Factory Workers (Tire), Kitchener, Ont.—This strike, in sympathy with the strike of shoemakers in the same establishment, is outlined in a previous paragraph regarding that dispute.

Rubber Factory Workers, Toronto, Ont.—A number of the employees, members of the United Rubber Workers of America, in one establishment ceased work on May 30 when their demands for a union agreement with provision for increased wages and for a union grievance committee were not accepted and negotiations were refused. The management had set up a committee of elected employee representatives, most of whom were union members, but the union workers were not satisfied and insisted on a union agreement. Conciliation officers of the Federal Department of Labour met the representatives of the union and of the management separately on May 16 and on May 19 but the company refused to negotiate with the union.

STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1939*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to May, 1939				
MANUFACTURING—				
Rubber Products—				
Rubber factory workers (shoes), Kitchener, Ont.	1	200	5,400	Commenced April 25, 1939; for increased wages, piece rates; unterminated.
TRADE—				
Fish handlers and truck drivers, Winnipeg, Man.	1	9	108	Commenced April 20, 1939; for recognition of union, increased wages and reduced hours; terminated May 13; return of workers; in favour of employer.
(b) Strikes and Lockouts commencing during May, 1939				
MINING—				
Coal miners, Florence, N.S.	1	5	130	Commenced May 1; against change in working conditions alleged to lower earnings; terminated May 30; negotiations; compromise.
Coal miners, Springhill, N.S.	1	1,400	2,600	Commenced May 8; against discharge of worker following jail term; terminated May 10; return of workers pending investigation; miners reinstated later; in favour of workers.
Coal miners, New Waterford, N.S.	1	1,150	2,000	Commenced May 16; against discharge of worker following jail term; terminated May 17; return of workers pending negotiations; indefinite.
MANUFACTURING—				
Rubber Products—				
Rubber factory workers (tires), Kitchener, Ont.	1	300	6,000	Commenced May 9; in sympathy with strike of shoemakers in same plant commenced April 25 and for union agreement with increased wages; unterminated.
Rubber factory workers, Toronto, Ont.	1	100	200	Commenced May 30; for union recognition and agreement with increased wages; unterminated.
Textiles, Clothing, etc.—				
Cap factory workers, Montreal, P.Q.	1	5	120	Alleged lockout of union members, commenced May 3; unterminated.
Clothing factory workers (overalls, etc.), Winnipeg, Man.	1	90	270	Commenced May 8; failure to agree on wage scale or arbitrate under agreement; terminated May 10; conciliation (provincial); compromise.
Metal Products—				
Iron and steel factory workers (bolts, etc.), Owen Sound, Ont.	1	45	125	Commenced May 25; for employment of workers previously laid off; terminated May 27; conciliation (provincial); in favour of employer.
CONSTRUCTION—				
Buildings, etc.—				
Painters, Toronto, Ont.	40	120	250	Commenced May 1; for renewal of closed shop union agreement; terminated May 4; negotiations; in favour of workers.

*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

CAP FACTORY WORKERS, MONTREAL, P.Q.—Five employees in one establishment were reported to have been dismissed on May 3, it being alleged the employer discriminated against members of the United Hatters, Cap and Millinery Workers' International Union. The establishment being under a collective labour agreement as to wages and working conditions, extended under the Quebec Collective Labour Agreements Act, 1938, to all work throughout the province on men's, boys' and children's hats, caps, etc., the dispute was referred to a provincial conciliation officer. At the end of the month a settlement had not been reported.

CLOTHING FACTORY WORKERS (OVERALLS, GLOVES, ETC.), WINNIPEG, MAN.—Employees in one establishment making shirts, overalls, mitts and gloves ceased work on May 8 as a result of failure to agree on the piece rates of wages in accordance with the clause as to wages in an agreement of May 1, 1939, with the United Garment Workers of America, or to arbitrate, without any cessation of work, as provided in the agreement. As a result of conciliation by the provincial Department of Labour work was resumed on May 11. A settlement signed by representatives of both parties provided that the schedule of piece work rates should be made by experts representing the union and the employer in accordance with the agreement, the scale to be retroactive to May 1; also that in future any dispute would be dealt with as provided in the agreement and should a deadlock occur reference would be made to the Manitoba Department of Labour.

BOLT, WIRE AND SCREW FACTORY WORKERS, OWEN SOUND, ONT.—Employees in one establishment ceased work on May 26 demanding that as business had improved, employment be given to certain workers laid off some time ago. As a result of conciliation by an official of the Ontario Department of Labour it was reported that misunderstanding as to certain clauses in an agreement following a strike in August, 1938, was cleared up and work was resumed on May 29 on the advice of a union official, the demand of the strikers not being conceded.

PAINTERS, PAPERHANGERS, AND DECORATORS, TORONTO, ONT.—A number of painters, paperhangers, decorators, etc., members of one of the locals of the Brotherhood of Painters, Decorators and Paperhangers of America, ceased work on May 1 to secure the renewal of a closed shop union agreement which had expired at the end of March, with the Toronto Hebrew Master Painters' Association and certain independent master painters. The wages and hours had been established under an agreement under the Ontario Industrial Standards Act. It was stated that about forty employers were involved. As a result of negotiations, work was resumed by some of the workers on May 2 and by the remainder on May 4, a closed shop agreement having been signed to be in force until March 31, 1940. The agreement is outlined elsewhere in this issue.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

The latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1939, issue in the review of Strikes and Lockouts in Canada and Other Countries, 1938. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is taken for the most part from newspaper reports.

Great Britain and Northern Ireland

In Great Britain the *Ministry of Labour Gazette* publishes statistics dealing with all strikes and gives some details in regard to the more important ones. These details which are published after investigation do not always agree with the information given earlier in the press.

The number of strikes which began during April was 61 and 19 were unterminated at the end of the previous month, making a total of 80 in progress during the month, involving 26,200 workers, with a resultant time loss of 143,000 man working days.

Of the 61 disputes which began during April, seven arose out of demands for increases in wages, four were against proposed reductions in wages and 16 were over other wage questions; 15 were over questions respecting the employment of particular classes or persons, seven arose out of disputes concerning work-

ing conditions and 10 were over questions of trade union principle. Two disputes were due to sympathetic action.

Final settlements reached during April number 58. Of these, 19 were settled in favour of the workers, 21 were settled in favour of the employers and 18 resulted in compromises. In the case of five other disputes work was resumed pending negotiations.

The dispute which involved the largest number of workers during April was one which began on March 16. On that date about 100 storemen employed by a London firm engaged in electrical engineering and cable making, ceased work following the dismissal of an employee. By the end of March a further 1,100 workers were rendered idle and soon after the beginning of April the dismissal of a shop steward lead to an extension of the dispute, 3,500 workers being directly involved, and 1,500 indirectly affected. It was alleged that the employer refused to discuss the matters under dispute with workers' representatives. On April 22 work was resumed on conditions existing prior to the stoppage.

A claim on the part of a section of strippers at a colliery at Shotts, Lanarkshire, for increased tonnage rates led 180 of these to strike on April 7. They were joined the same day by 2,035 other workers who ceased work in sympathy with them. Work was resumed on April 10 when an amicable settlement was effected.

On April 4, 504 fitters, tool room workers and others employed by a firm which manufactures aero engines at Crewe in Cheshire, ceased work in protest against the employment of women on a certain type of work. The strikers were unsuccessful and work was resumed on April 18 under conditions which had prevailed prior to the strike.

A strike of 439 toolmakers, setters, electricians, etc., employed by a firm at Ilford, Essex, occurred on April 4. The workers were protesting the dismissal of an employee. Work was resumed on April 6 when the dismissed worker was reinstated in another department.

On April 27, a demand for additional allowances when engaged on certain types of work, led to a strike of 450 shipwrights employed by a Birkenhead firm. Work was resumed on May 1, pending negotiations.

On May 11, an amicable settlement was reached, in a dispute which had involved two carpet manufacturing firms at Kidderminster, Worcestershire, since February 6. The strike was a protest against a proposed reduction in certain piece work rates for weaving. The number of strikers was 130, but 383 other workers were indirectly involved.

Belgium

The monthly labour review of Belgium reports six strikes as having begun during March, which together with two unterminated at the end of February, made a total of eight in progress, involving 3,226 workers and resulting in a time loss of 7,646 man-working days. With the exception of one strike which arose out of a demand for the re-employment of a worker, all these disputes were over wage questions. Seven strikes were terminated during the month; four were settled in favour of the employers and three resulted in compromises.

Eire

The Department of Industry and Commerce of Eire has recently published statistics dealing with industrial disputes during 1938. The report also gives certain figures for the previous three years.

The number of disputes which began during 1938 was 137 and 2 were unterminated at the end of 1937; these involved 13,736 workers, with a resultant time loss of 208,784 man working days. There were 145 strikes which began during 1937 and the number of workers involved in all disputes in progress was 26,734 with a resultant time loss of 1,754,949 man working days. The larger figures of workers involved and time lost in 1937 were largely due to a dispute in the building trades.

Of the strikes which began in 1938, 69 arose out of wage questions, 34 were over questions respecting the engagement or dismissal of workers, 6 arose out of questions of working hours and 11 were over other questions, respecting conditions of employment; trade union questions or refusal to conclude a union agreement gave rise to 14 strikes, one was due to sympathetic action and two were due to other causes. Of all the disputes which occurred in the years 1935 to 1938, 43 per cent were concerned with wages and these accounted for 90 per cent of the time loss in these years.

During 1938 there were 134 disputes terminated. Of these 50 were settled in favour of the workers, 25 were settled in favour of the employers, 40 resulted in compromises and the results of 19 were indefinite.

United States

Preliminary estimates of strikes in March, 1939, which as the Bureau of Labour Statistics points out, are based on "scattered information from newspaper and other sources and are subject to revision as more definite reports are received" show 220 strikes as beginning during the month, which with 125 unterminated at the end of February, made a

total of 345 in progress during the month. The number of workers involved in these disputes was 60,000 with a resultant time loss of 700,000 man working days. The comparable figures for the previous month, which have been partially revised but are not final, show that there were 315 strikes in progress, involving about 75,000 workers with a resultant time loss of 500,000 man working days.

On May 13 the United Mine Workers of America who had been negotiating with operators of bituminous coal mines in the Appalachian field for several weeks reached an agreement with the majority of the operators. As a result most of the miners who had gone on strike at various dates since April 3 (Labour Gazette, April, 1939, pages 382-383 and May, 1939, page 468) resumed work. The union had insisted that they be granted a closed shop or that the clause in the former agreement imposing a penalty against unauthorized strikes be removed. Under the new agreement they were granted a "union shop" under which all new employees would join the union. The negotiations were carried out by the Appalachian "conference" made up of 150 representatives of the union and 150 representatives of 21 bituminous coal associations. When an agreement was reached six of the owners' associations withdrew, refusing to accept its terms, but the operators making up the other 15 associations are said to employ more than 300,000 of the miners employed in the Appalachian field and most of the strikers, who were reported to number 420,000 at one time, were able to return to work on or about May 15.

Early in May it was reported that miners in the Pennsylvania anthracite field would strike if a new agreement was not reached by May 8 (Labour Gazette, May, 1938, page 468), but the parties to this dispute agreed to continue without a cessation of work and on May 27 it was announced that a new agreement granting the United Mine Workers of America a "union shop" had been accepted by miners and operators.

The strike of seamen, members of the National Maritime Union, an affiliate of the Congress of Industrial Organizations, employed on oil tankers on the Atlantic Coast, who ceased work about April 18, demanding the insertion of a preferential hiring clause in a new agreement (Labour Gazette, May, 1939, page 468) continued throughout May.

On or about May 26, following several weeks negotiations over demands for increased wages and changed working conditions, members of the Seafarers' International Union, an affiliate of the American Federation of Labour, employed by the Eastern Steamship Lines, ceased work. This company, which has its headquarters at Boston, operates 14 freight and passenger ships on the Atlantic coast between Virginia and Nova Scotia. The strikers, deckhands, engine room helpers and stewards, were said to number between 1,000 and 1,100, but by June 1, longshoremen reported to number between 1,000 and 3,000 were indirectly affected. Negotiations were being continued.

On May 22, employees of an automobile body manufacturing plant at Detroit ceased work, after negotiations for a new agreement had broken down. The strikers, members of the United Automobile Workers of America, demanded that a list of grievances be settled before a new agreement could be reached. The strikers numbered 15,000 but about 70,000 workers in automobile plants which obtain bodies from the plant at which the dispute occurred were forced to cease work on account of lack of materials. A representative of the United States Department of Labour was sent to attempt to arrange a settlement. On June 6, it was announced that a settlement had been reached and it was expected that work would be resumed on June 8. No report as to the terms of this agreement has been noted.

Mothers' Allowances in Nova Scotia

According to the ninth annual report of the director administering the Mothers' Allowance Act of the province of Nova Scotia, there were 263 applications for allowances during the fiscal year ending November 30, 1938. Of these, 199 were certified by the Commission and approved by the director, the maximum allowance of $60 being paid in 7 cases. There were 642 dependent children who benefited under the payment of mothers' allowances during the year. The total reported monthly earnings of children over 16 years amounted to $1,818.22, while their monthly contributions to families totalled $690.90.

The total amount paid in mothers' allowances in Nova Scotia for the year reviewed by the report was $412,744.94 and the cost of administration was $12,300.05. This sum was paid to a total of 1,295 families including 3,713 children.

During the month of May there were 4,625 accidents reported to the Ontario Workmen's Compensation Board, as compared with 3,443 during April, and 4,602 during May a year ago. The benefits awarded amounted to $518,878.39, of which $429,703.67 was for compensation and $89,174.72 for medical aid.

JURISDICTION OF DOMINION AND PROVINCES IN RELATION TO DRAFT CONVENTIONS AND RECOMMENDATIONS OF INTERNATIONAL LABOUR ORGANIZATION

IN accordance with the provisions of the Treaty of Versailles, the Hon. Norman McL. Rogers, Minister of Labour, tabled in the House of Commons on May 31, the texts of the Draft Conventions (19) and Recommendations (12) adopted by the International Labour Conference at its 19th to 24th sessions. At the same time the Minister tabled the text of an Order in Council approved March 7 dealing with the competence of Parliament and of the Provincial Legislatures as to the subject matter involved in these Draft Conventions and Recommendations.

The statement of the Minister of Labour in the House of Commons as reported in *Hansard,* was as follows:

Hon. Norman McL. Rogers (Minister of Labour): Mr. Speaker, in accordance with the provisions of article 405 of the treaty of Versailles and the corresponding provisions of the other treaties of peace, I desire to lay on the table of the house, and thereby to bring to the attention of parliament with a view to any action which may be desired, the authentic texts of the draft conventions and recommendations which were adopted by the international labour conference, League of Nations, Geneva, at its nineteenth to twenty-fourth sessions inclusive, comprising in all nineteen draft conventions and twelve recommendations.

With these texts, I desire also to lay on the table of the house the text of an order in council which was approved on March 7, 1939, dealing with the competence of parliament and of the provincial legislatures as to the subject matters involved in these draft conventions and recommendations.

The decision of the judicial committee of the privy council in the radio reference, 1932 Appeal Cases, 304, had given rise to the view that the parliament of Canada possessed general legislative authority to give effect to international engagements, including those arising from the ratification of labour conventions entered into by the government of Canada. In reliance upon this view, three acts of the parliament of Canada were enacted in the session of 1935 to give effect to conventions of the international labour conference previously ratified by Canada, in respect of hours of work, weekly rest and minimum wages. The validity of this legislation was the subject of a reference which came before the judicial committee of the privy council in the labour conventions case, 1937, Appeal Cases, 327. The board held the legislation to be invalid on the ground that parliament had no such general legislative authority in relation to international obligations as was claimed, and that the subject matters of the legislation fell within the exclusive legislative competence of the provinces.

The report of the Minister of Justice (Mr. Lapointe) on which the order in council of March 7, 1939, to which I have referred, is based, indicates that the individual draft conventions and recommendations adopted during the period 1935-1938 involve, with certain exceptions, subject matters in respect of which legislative jurisdiction is primarily vested in the provinces. In conformity with the decision of the judicial committee of the privy council, the procedure which was followed prior to 1935 has now been reverted to in respect of all of the draft conventions and recommendations adopted between 1935 and 1938 which were found to fall in point of subject matter primarily within the provincial sphere of authority, and authenticated copies of the said draft conventions and recommendations, together with copies of the order in council of March 7, 1939, have been transmitted through the Department of the Secretary of State to the lieutenant governors of the respective provinces for the consideration of their respective governments, with a view to the enactment of legislation, or such other action, upon the parts of the subject matter of the several draft conventions and recommendations within the provincial sphere of jurisdiction, as each government may be advised to take.

Consideration has been given also by the government of Canada to certain aspects of the foregoing draft conventions and recommendations subject to the legislative authority of parliament, and in so far as these may be approved, legislative or executive measures will be taken to give effect thereto.

As regards the draft conventions and recommendations affecting seamen which have been successively adopted by the international labour conference, since the inception of this body, all of which involve subject matters within federal jurisdiction, six draft conventions in all have been ratified already by this country, concerning: (1) minimum age for the admission of children to employment at sea; (2) unemployment indemnity in case of loss or foundering of the ship; (3) minimum age for admission of young persons to employment as trimmers or stokers; (4) compulsory medical examination of children or young persons employed at sea; (5) seamen's

articles of agreement; and (6) the marking of the weight on heavy packages transported by vessels.

Five draft conventions, Nos. 53 to 57 inclusive, and one recommendation, No. 49, which were adopted at the twenty-first session of the international labour conference in 1936, and one draft convention, No. 58, which was adopted at the twenty-second session in the same year, deal with matters affecting seamen which are competent to parliament. The provisions of these draft conventions and recommendations are being given examination in the marine section of the Department of Transport, and parliament will be advised in due course as to any measures which may be taken looking to the acceptance by Canada of the proposals which are respectively involved. Attention is being given also by the government to draft convention No. 63, and recommendation No. 50, concerning statistical matters which are within federal jurisdiction.

Report of Minister of Justice

The report of the Minister of Justice, Rt. Hon. Ernest Lapointe, approved by the Committee of the Privy Council (P.C. 507), on the subject matter of the Draft Conventions and Recommendations, together with the respective spheres of jurisdiction of the Dominion and Provinces in regard to each Convention and Recommendation, is as follows:

Ottawa, February 11, 1939.

To His Excellency,
The Governor General in Council:

The undersigned has had under consideration, upon reference from the Department of Labour, the authentic texts of the Draft Conventions and Recommendations adopted by the International Labour Conference at its Nineteenth Session (4-25 June, 1935), its Twentieth Session (4-24 June, 1936); its Twenty-first Session (6-24 October, 1936) its Twenty-second Session (22-24 October, 1936), its Twenty-third Session (3-23 June, 1937), and its Twenty-fourth Session (2-22 June, 1938), with a view to determining whether, and to what extent, the subject matter of these several Draft Conventions and Recommendations respectively lies within the competence of the Dominion Parliament or of the several Provincial Legislatures, in order that the said Draft Conventions and Recommendations may be brought by the Dominion Government (in discharge of its obligation under Article 405 of the Treaty of Peace with Germany, and the corresponding article of the other Treaties of Peace) before the authority or authorities within whose competence the matter in each case lies for the enactment of legislation or other action.

For the purpose of elucidating the present constitutional position in regard to the question of the legislative competence of the Dominion and of the Provinces respectively, to give effect to the Draft Conventions and Recommendations adopted by the International Labour Conference, certain preliminary references are necessary.

The undersigned desires to refer to the Orders of Your Excellency in Council dated July 12, 1935 (P.C. 1564 and P.C. 1565) approving the reports of the then Minister of Justice upon the Draft Conventions and Recommendations adopted by the International Labour Conference at its Seventeenth Session (8-30 June, 1933) and Eighteenth Session (4-23 June, 1934).

In the reports so approved, the then Minister of Justice expressed his opinion upon the constitutional question referred to above, in relation to the particular Draft Conventions and Recommendations then under consideration, from two alternative points of view. The first of these points of view was based upon the judgment rendered by the Supreme Court of Canada in the Reference *re* Legislative Jurisdiction over Hours of Labour (1925) S.C.R. 505, 512, where the Court decided that the obligation of Canada as a member of the International Labour Conference, is, in virtue of the terms of Article 405 of the Labour Part (Part XIII) of the Treaty of Versailles and of the corresponding provisions of the other Treaties of Peace, "simply in the nature of an undertaking to bring the Recommendations or Draft Conventions before the authority or authorities within whose competence the matter lies for the enactment of legislation or other action." That is to say, the competent authority or authorities, in respect of Canada, are the Dominion Parliament or the Provincial Legislatures, according as the subject matter of the particular Draft Convention or Recommendation under consideration falls in whole or in part within the normal legislative sphere of the one or the other of such legislative authorities. The second of the two alternative points of view so enunciated proceeded upon an interpretation of the judgments of the Judicial Committee of the Privy Council in the Aeronautics Reference (1932) A.C. 54, and in particular in the Radio Reference (1932) A.C. 304 and involved the proposition that if His Majesty's Government in Canada should ratify any of the said Draft Conventions, the Parliament and Government of Canada had plenary power, legislative and executive, to perform the obligations of Canada or of any province thereof under any Convention so ratified on behalf of Canada.

Subsequently the reference to the Supreme Court of Canada concerning the Weekly Rest in Industrial Undertakings Act, 1935, the Minimum Wages Act, 1935, and the Limitations of Hours of Work Act, 1935, reported in 1936 S.C.R. 461, and on appeal (sub. nom. The Attorney General for Canada v. The Attorney General for Ontario) in 1937 A.C. 326, raised the question whether the Government of Canada was competent effectively to ratify the three Labour Conventions upon which these Acts were respectively based. The Judicial Committee (opinion by Lord Atkin) held that the said Acts were *ultra vires* of the Parliament of Canada in that the legislation was legislation in relation to "property and civil rights in the province." Lord Atkin prefaced his judgment with the statement that,—

> "It was admitted at the bar that each statute affects property and civil rights within each Province; and that it was for the Dominion to establish that nevertheless the statute was validly enacted under the legis-

lative powers given to the Dominion Parliament by the British North America Act, 1867."

and later on again observed,—

"Now it had to be admitted that normally this legislation came within the classes of subjects by sec. 92 assigned exclusively to the Legislatures of the Provinces, namely—property and civil rights in the Province. This was in fact expressly decided in respect of the same conventions by the Supreme Court in 1925."

In brief, the decision proceeded upon the view that the legislation could not be justified:

(1) Under sec. 132 of the British North America Act as being legislation "necessary or proper for performing the obligations of Canada or any Province thereof as part of the British Empire towards foreign countries arising under treaties between the Empire and such foreign countries":

First, because the obligations under the ratified Conventions were not obligations of Canada "as part of the British Empire," but of Canada by virtue of her new status as an international juristic person and did not arise under a treaty between the British Empire and foreign countries; and,

Secondly, because the obligation to perform the Conventions did not arise under the Treaty of Versailles, nor at all until the Canadian Executive, left with an unfettered discretion, of their own volition acceded to the Conventions, a novus actus not determined by the treaty.

(2) Under the general residuary power given by sec. 91 to the Dominion Parliament to make laws for peace, order and good government of Canada in relation to all matters not coming within the classes of subjects assigned exclusively to the Legislatures of the Provinces:

First, because that power did not give the Dominion Parliament exclusive authority to legislate for performing the obligations of Canada arising out of international engagements not in terms within sec. 132 nor within any of the enumerated classes of subjects in sec. 91;

Secondly, because the legislation was not concerned with matters of such general importance as to have attained "such dimensions as to affect the body politic", and to have "ceased to be merely local or provincial", and to have "become a matter of national concern."

The second of these grounds of decision negatived the interpretation upon which one of the alternative points of view enunciated by the Minister of Justice in his reports to Your Excellency in June, 1935, as well as the judgment of the Chief Justice of Canada and two other members of the Supreme Court of Canada in the reference above cited, was founded.

The effect of this decision is to establish that Canada's obligation under the treaties of peace in relation to the Draft Conventions and Recommendations adopted by the International Labour Conference is to bring such Conventions and Recommendations before the authority or authorities within whose competence the matter in each case lies for the enactment of legislation or other action.

This decision has a further effect in that it establishes that Canada is one of the federal states to which paragraph 9 of Article 405 of the Treaty of Peace applies. That paragraph reads as follows:

"In the case of a federal State, the power of which to enter into conventions on labour matters is subject to limitations, it shall be in the discretion of that Government to treat a draft convention to which such limitations apply as a recommendation only, and the provisions of this Article with respect to recommendations shall apply in such case."

The result is, therefore, that when a Draft Convention proposes legislation within the legislative competence of the provincial legislatures it shall be within the discretion of the Government of Canada to treat such Draft Convention as a Recommendation in complying with the provisions of said Article 405.

The undersigned accordingly submits, first, a summary of the proposals contained in the said Draft Conventions and Recommendations, and secondly, his opinion concerning the legislative authority to which they should be submitted.

DRAFT CONVENTIONS AND RECOMMENDATIONS ADOPTED BY THE INTERNATIONAL LABOUR CONFERENCE AT ITS 19TH SESSION, 1935

1. *Draft Convention (No. 45) concerning the employment of women on underground work in mines of all kinds.* This Convention proposes legislation providing that women shall not be employed on underground work in any mine. It does not propose, however, that such legislation should extend to non-manual occupations.

2. *Draft Convention (No. 46) limiting hours of work in coal mines.* This Convention proposes legislation to give coal miners a maximum day's work of 7 hours and 45 minutes, and holidays on Sundays and legal holidays.

3. *Draft Convention (No. 47) concerning the reduction of hours of work to 40 a week.* This Convention declares the approval of the ratifying members to the principle of a 40-hour week, applied in such a manner that the standard of living is not reduced in consequence, and the taking or facilitating of such measures as may be judged appropriate to secure this end; and obligates them to apply this principle to classes of employment in accordance with detailed provisions to be prescribed by such separate Conventions as are ratified by those members.

4. *Draft Convention (No. 48) concerning the establishment of an international scheme for the maintenance of rights under invalidity, old age and widows' and orphans' insurance.* This Convention establishes a scheme among ratifying members for the maintenance of rights in course of acquisition with and of rights acquired with compulsory invalidity, old age and widows' and orphans' insurance institutions. The scheme is worked out in detail to give reciprocal recognition by compulsory insurance organizations in one member country of rights acquired or in the course of acquisition in another.

5. *Recommendation (No. 45) concerning unemployment among young persons.* This Recommendation is that members shall insti-

tute the following and report on their application to the international labour office:—

(*a*) A minimum age for leaving school and entering employment of 15 years.
(*b*) Compulsory attendance at school of juveniles (persons under 18) over the school-leaving age who have no employment.
(*c*) Compulsory education in those places where it does not already exist.
(*d*) Maintenance allowances where necessary for the additional periods of education recommended by Nos. (*a*) and (*b*).
(*e*) Compulsory attendance at continuation courses after leaving school until the age of 18. It is recommended that if it is not practical to apply this recommendation to all persons after leaving school, it should at least be applied to unemployed persons.
(*f*) Vocational training centres for unemployed persons between the ages of 18 and 25.
(*g*) Facilities for obtaining practical experience and scholarships.
(*h*) Recreational centres, physical training centres, etc.
(*i*) Social services and hostels.
(*j*) Special public works for unemployed young persons.
(*k*) Placing services for juveniles.
(*l*) Special employment statistics for juveniles.

6. *Draft Convention (No. 49) concerning the reduction of hours of work in glass bottle works.* This Convention applies Draft Convention No. 47 to glass bottle works. It provides a maximum week of 42 hours and provides for exceptions with adequate safeguards and compensations to meet practical objections, and for the necessary provisions for enforcement.

DRAFT CONVENTIONS AND RECOMMENDATIONS ADOPTED BY THE INTERNATIONAL LABOUR CONFERENCE AT ITS 20TH SESSION, 1936

7. *Draft Convention (No. 50) concerning the regulation of certain special systems of recruiting workers.* This Convention provides that ratifying members shall regulate the recruiting of indigenous workers in the manner set out therein, in each of its territories in which such recruiting exists or may hereafter exist.

8. *Recommendation (No. 46) concerning the progressive elimination of recruiting.* This Recommendation is that members should take steps to eliminate the recruiting referred to in Draft Convention No. 50 by improving the conditions of labour, developing the means of transport, promoting settlement of workers in areas of employment, facilitating voluntary movement of labour, and the education and development of indigenous people and the improvement of their standard of living.

9. *Draft Convention (No. 51) concerning the reduction of hours of work on public works.* This Convention proposes that the ratifying members shall provide for a maximum average working week of 40 hours per week, on all building or civil engineering work financed or subsidized by central governments.

10. *Draft Convention (No. 52) concerning annual holidays with pay.* This Convention proposes that members shall provide, by legislation, that persons in a large variety of employments set out therein shall be entitled after one year of continuous service to an annual holiday with pay of at least 6 working days, with special provisions for persons under 16, and longer service.

11. *Recommendation (No. 47) concerning annual holidays with pay.* Whereas Draft Convention No 52 sets up a minimum standard for a system of annual holidays with pay, this Recommendation deals in greater detail with a method of applying such system.

DRAFT CONVENTIONS AND RECOMMENDATIONS ADOPTED BY THE INTERNATIONAL LABOUR CONFERENCE AT ITS 21ST SESSION, 1936

12. *Recommendation (No. 48) concerning the promotion of seamen's welfare in ports.* This Recommendation sets out certain principles and methods which should be taken into consideration for the promotion of the welfare of both national and foreign seamen in port. This Recommendation includes the control of the sale of intoxicants, prohibition of employment of young persons in public houses, prohibition of the sale and use of narcotics, prohibition of the entry of undesirable persons into dock yards, safety measures, general health measures, arrangements for the material and general assistance of seamen in port, arrangements for savings and remittance of wages, and information bureaus for seamen.

13. *Draft Convention (No. 53) concerning the minimum requirements of professional capacity for masters and officers on board merchant ships.* This Convention provides for the requirement of certificates for ships' officers, but does not apply to ships of war or government vessels.

14. *Draft Convention (No. 54) concerning annual holidays with pay for seamen.* This Convention provides that with certain exceptions every officer shall have an annual holiday of not less than 12 days, and every other member of a crew shall have an annual holiday of not less than 9 days.

15. *Draft Convention (No. 55) concerning the liability of the ship owner in case of sickness, injury or death of seamen.* This Convention provides that ship owners should be liable to defray the expenses of medical care and maintenance for sickness or injury to anybody employed on their ships during the terms of their articles of service, for payment of their wages during the duration of any resulting incapacity, for expenses of repatriation where necessary, and for funeral expenses if death results. It further provides that national legislation passed under its provisions should be co-ordinated with any compulsory seamen sickness insurance, compulsory accident insurance or workmen's compensation for accidents.

16. *Draft Convention (No. 56) concerning sickness insurance for seamen.* This Convention provides that every person employed as master or member of the crew, or otherwise in the service of a ship on board any vessel other than a ship of war, registered in the ratifying member's territory and engaged in maritime navi-

79821—2½

gation or sea-fishing, shall be insured under a compulsory sickness insurance scheme.

17. *Draft Convention (No. 57) concerning hours of work on board ship and manning.* This Convention proposes legislation by which hours of work for members of the crew, other than officers, on vessels over 700 tons which make international voyages, should be limited to 8 a day. It also proposes exceptions where required by practical considerations. It further proposes legislation regulating the number of men who must be employed on all vessels over 700 tons making international voyages.

18. *Recommendation (No. 49) concerning hours of work on board ship and manning.* Whereas Draft Convention No. 57 does not apply to coasting trade and vessels below 700 tons, this Recommendation is that each member should investigate conditions in such classes of vessels in the light of the rules contained in such Convention, and take all necessary measures to prevent overwork and insufficient manning on such vessels.

DRAFT CONVENTION AND RECOMMENDATION ADOPTED BY THE INTERNATIONAL LABOUR CONFERENCE AT ITS 22ND SESSION, 1936

19. *Draft Convention (No. 58) fixing the minimum age for the admission of children to employment at sea.* With certain minor exceptions this Convention proposes legislation that children under the age of 15 should not be employed or work on vessels.

DRAFT CONVENTIONS AND RECOMMENDATIONS ADOPTED BY THE INTERNATIONAL LABOUR CONFERENCE AT ITS 23RD SESSION, 1937

20. *Recommendation (No. 50) concerning international co-operation in respect of public works.* This Recommendation is that each member should communicate annually to the international labour office statistical and other information concerning public works undertaken or planned on its territory, and that each member should co-operate in the work of any international committee which may be set up by the international labour office to study such information, and should carefully consider what action it should take on the basis of resulting reports.

21. *Recommendation (No. 51) concerning the national planning of public works.* This is a Recommendation that public works should be so timed and financed as to reduce industrial fluctuation so far as possible, and be planned to consider special classes of workers.

22. *Draft Convention (No. 59) fixing the minimum age for admission of children to industrial employment.* This Draft Convention proposes legislation that no children under the age of 15 should be employed or work on any public or private industrial undertaking, except where the only employees are members of the employer's family and the undertakng is not dangerous to life, health or morals.

23. *Draft Convention (No. 60) concerning the age for admission of children to non-industrial employment.* This Draft Convention proposes legislation similarly eliminating the employment of children under 15 in non-industrial employment, but proposes certain exceptions thereto in the case, for example, of light work after school.

24. *Recommendation (No. 52) concerning the minimum age for admission of children to industrial employment in family undertakings.* This is a Recommendation that the exception made in Draft Convention No. 59 with regard to family enterprises be removed from the proposed legislation if possible.

25. *Draft Convention (No. 61) concerning the reduction of hours of work in the textile industry.* This Draft Convention applies the 40 hour week Convention to the textile industry.

26. *Draft Convention (No. 62) concerning safety provisions in the building industry.* This Draft Convention proposes legislation to enact safety provisions with reference to scaffolding and hoisting machinery used in the erection, repair or demolition of buildings. In addition, it provides for regulations requiring personal safety equipment, first-aid equipment, and precautions against drowning accidents, for persons employed on such work.

27. *Recommendation (No. 53) concerning safety provisions in the building industry.* This recommends a model set of safety precautions that may be used in implementing Draft Convention No. 62.

28. *Recommendation (No. 54) concerning inspection in the building industry.* Recommends an effective system of inspection to implement the provisions of Draft Convention No. 62 and Recommendation No. 54.

29. *Recommendation (No. 55) concerning co-operation in accident prevention in the building industry.* This is a Recommendation that there should be set up in the building industry organizations of all concerned in effecting a reduction in the number and severity of accidents with particular regard to accident risks for which there are no statutory requirements. Such organizations are to include representatives of the employer and the persons employed.

30. *Recommendation (No. 56) concerning vocational education for the building industry.* This Recommendation is supplementary to a Recommendation adopted at the 12th Session in 1929 concerning the prevention of industrial accidents, one part of which dealt with vocational education. The present Recommendation is that technical and vocational school curricula relating to the building industry should include theoretical and practical instruction concerning—(*a*) material used in scaffolds, and the principles of erecting and maintaining scaffolds; (*b*) the construction and maintenance of hoisting appliances; (*c*) the organization and supervision of safety measures; and (*d*) safety regulations for building work.

DRAFT CONVENTIONS AND RECOMMENDATIONS ADOPTED BY THE INTERNATIONAL LABOUR CONFERENCE AT ITS 24TH SESSION, 1938

31. *Draft Convention (No. 63) concerning statistics of wages and hours of work in the principal mining and manufacturing industries, including building and construction, and in agriculture.* This Convention provides for the compilation of statistics regarding wages and hours of work in the mining and manufacturing industries, and in agriculture. It also provides for the publication of the data so compiled and communicating it to the international labour office.

The Legislative Authority to Whom the Above Draft Conventions and Recommendations Should be Submitted

The undersigned is of opinion, on consideration, that the proposals of Draft Convention No. 45, Draft Convention No. 46, Draft Convention No. 49 and Draft Convention No. 61, being concerned with working conditions in particular undertakings, involve legislation which is competent to Parliament in so far as the Northwest and Yukon Territories are concerned, but which the provincial legislatures have otherwise power to enact and apply.

The undersigned is further of opinion that Draft Convention No. 47, Draft Convention No. 52, Recommendation No. 47, Draft Convention No. 59, Draft Convention No. 60 and Recommendation No. 52, being concerned with general working conditions, involve legislation which is competent to Parliament in so far as Dominion employees, works within the legislative jurisdiction of Canada, and the Northwest and Yukon Territories are affected, but which the provincial legislatures have otherwise power to enact and apply.

With reference to Draft Convention No. 48, it is the undersigned's opinion that while the legislation involved is competent to Parliament in so far as the Northwest and Yukon Territories are affected, in view of recent decisions the provincial legislatures alone have otherwise the necessary powers.

Recommendation No. 45 proposes legislation on educational matters and social services within the provinces, and also legislation on statistics. It is the undersigned's opinion that in so far as such proposals appertain to statistics, and with reference to the other subjects in so far as the Northwest and Yukon Territories are affected, they involve legislation which is competent to Parliament, but otherwise the legislation proposed is within the competence of the provincial legislatures.

Draft Convention No. 50 and Recommendation No. 46 which concern the recruiting of labour propose legislation affecting property and civil rights within the provinces, and except for the legislative control of Parliament over the Northwest and Yukon Territories, it is submitted that they are properly competent to the provincial legislatures alone.

Draft Convention No. 51 and Recommendation No. 51 having to do with public works, propose legislation which, it is submitted, falls partly within the legislative jurisdiction of Parliament and partly within the legislative jurisdiction of the provincial legislatures.

With reference to Recommendation No. 48 concerning the promotion of seamen's welfare in port, it is the opinion of the undersigned that the proposals involve legislation which is competent to Parliament in so far as it has reference to navigation and shipping or criminal law, but which otherwise the provincial legislatures alone have power to enact and apply.

Draft Convention No. 53, Draft Convention No. 54, Draft Convention No. 55, Draft Convention No. 56, Draft Convention No. 57, Recommendation No. 49, and Draft Convention No. 58, all propose legislation affecting navigation and shipping, and it is the undersigned's opinion that such legislation is properly competent to Parliament.

The undersigned is of opinion that Draft Convention No. 62, Recommendation No. 53, Recommendation No. 54, and Recommendation No. 55, being concerned with safety provisions in the building industry, involve matters which are primarily within the legislative jurisdiction of the provincial legislatures, but which, in so far as buildings under the legislative control of Parliament and in the Northwest and Yukon Territories are concerned, involve legislation which is alone competent to Parliament.

Recommendation No. 56 proposes legislation concerning education, and the undersigned is, therefore, of opinion that, except with reference to its application to the Northwest and Yukon Territories, such legislation is properly competent to the provincial legislatures because of the provisions of section 93 of the British North America Act.

The undersigned is of opinion that Recommendation No. 50 and Draft Convention No. 63 propose legislation which has reference only to statistics, and is, therefore, properly competent to Parliament alone.

The undersigned, therefore, recommends that a copy hereof, if approved, together with authenticated copies of the said Draft Conventions and Recommendations, be transmitted to the Lieutenant-Governors of the respective provinces for the consideration of their respective governments, with a view to the enactment of legislation, or such other action, upon the parts of the subject matter of the several Draft Conventions and Recommendations within the provincial sphere of jurisdiction as each government may be advised to take.

Respectfully submitted.

(Sgd.) Ernest Lapointe,
Minister of Justice.

LABOUR LEGISLATION IN 1939 IN ALBERTA, MANITOBA, ONTARIO, QUEBEC AND SASKATCHEWAN

Alberta

The Alberta Legislature, which was in session from February 9 to April 3, enacted new statutes to provide assistance for expectant mothers who are in poor circumstances and to implement the Municipal Improvements Assistance Act passed by the Dominion Parliament. Laws governing coal mines and providing for a Bureau of Relief and Public Welfare were revised and amendments made in Acts dealing with minimum wages for men, hours of labour, industrial standards and unemployment relief.

Mines

The Mines Act, which will come into force on July 1, 1939, repeals the Coal Mines Regulation Act, 1930, which applied only to coal mines. The new statute applies to all mines in the province including those of salt, stratified ironstone, shale, clay and fire clay. The greater part of the 1930 statute has been re-enacted and new provisions added, the most important of which are summarized below.

As formerly, a maximum working day of eight hours is fixed for workmen underground, the time to be reckoned from bank to bank. For the purpose of the sections dealing with hours the term "workman" does not include a mine official, or a fan man, cager, onsetter, stable-man or pumpman. A new clause is added, however, which provides that no person employed to act as examiner or shot-firer shall be classified as an official unless he is on a monthly wage basis and no examiner or shot-lighter shall be permitted to be below ground for more than 60 hours in any one week. Where a workman is kept below ground for more than eight hours in a day for the purpose of rendering assistance in an accident or emergency he is to be paid at the rate of time and one-half for the additional time.

A number of changes relate to payment of wages. The mine owner must furnish each workman with a wage statement and where there is default in payment, the owner, agent or manager must notify the Chief Inspector of Mines on the day after the occurrence of such default. Sections of the old Act relating to the appointment of a checkweigher by the employees are re-enacted and provision is made for the appointment of one or two "check-measurers" at a mine where payment is according to the measurement of the mineral. A checkweigher may not act as check-measurer and where a check-measurer is employed it is not permitted to have a checkweigher also. A checkweigher or check-measurer must, at the time of his appointment, be the holder of a miner's certificate granted under the Act, have had three years' experience as a coal miner, and been employed as a miner at the coal face, or as a checkweigher or check-measurer at a coal mine in the province, and must at the time of his appointment have been employed in the colliery at which he is to serve for at least 12 months. Where an owner, agent or manager desires the removal of a checkweigher or check-measurer on the ground of interfering with the working of the mine or of other misconduct he may be removed by an order of a Judge of the District Court and is consequently disqualified from acting as checkweigher or check-measurer at a coal mine for three years. If the workmen desire the removal of the checkweigher or check-measurer a secret ballot is taken in the same way as when he is appointed.

The installation of weigh scales and the sale of coal on the basis of the short ton are made compulsory and the giving of overweight is prohibited. Mines must be provided with sufficient buildings and explosives may not be stored in any building which contains an office, wash house, bunk house or building frequented by any person or workmen. The Minister may, at any time, appoint a mining engineer or other person of scientific or special attainments or practical experience to make a special investigation upon any mining operations so far as they relate to the safety of life and property.

No person who has not previously been employed in a coal mine in the province and no person who has been employed as a miner outside the province may be employed in a coal mine in the province until he has furnished his employer with a certificate as to his physical fitness and ability to work in such a mine.

A new section provides for the examination and certification of mine electricians by a board or boards of examiners appointed for the purpose. When electricity exceeding in the aggregate 15 kilowatts is used in or about a mine for power or lighting, a competent person must be appointed as mine electrician. Such person must hold a certificate and is to have charge of all electrical machinery and apparatus about the mine subject to the authority of the manager and, in his absence, of the overman. On recommendation of the Chief Inspector the Minister may grant exemption from the requirement as to mine electricians on such conditions as he may impose.

The sections relating to certificates of competency and coal miners' certificates were amended. An applicant for a first or second-class certificate of competency must be at least 25 years of age and have had five years' experience in coal mining of which at least one year must have been spent in work at the coal face or in such work elsewhere in a mine as is, in the opinion of the Board, sufficient to give him a practical knowledge of coal mining; or he must have had four years' experience in coal mining with one year's practical experience as above, and have spent at least one year in a machine shop or an engineering shop; or he must hold a diploma or degree in scientific and mining training, granted after not less than two years' study at an approved educational institution, and in addition have had three years' experience in coal mining, two of which must have been in Canada and one of which must have been at the coal face or elsewhere in a mine sufficient to give him a practical knowledge of coal mining.

Miners' certificates are of two classes instead of one as formerly. Applicants for either class must have medical certificates of fitness for the work and have sufficient knowledge of English to enable them to give and understand directions in English. In addition an applicant for a Class A certificate must be at least 20 years of age, hold a Class B certificate, have had 12 months' experience at the working face in a coal mine in Alberta, or furnish written evidence that he has had charge of a working face in coal for at least two years outside Alberta, and must satisfy the district board upon examination that he is competent to have charge of a working face. An applicant for a Class B certificate must be at least 18, have been employed underground in a coal mine in Alberta for six months and show that he is competent to work at the face under the supervision of a holder of a Class A certificate. A new section embodies a schedule setting out the operations for which a miner is required to possess a Class A or Class B certificate. Provision is also made for examination of applicants for certificates as mine electricians. Such applicants must have had at least two years' practical experience in the use of electrical machinery, apparatus and cables in a mine.

Each separate mine must now be in charge of a manager and in all mines employing over 50 men there must be an overman who is not the manager and who is appointed in writing by the owner, agent or manager. The wages of the overman are not to depend upon the amount of mineral gotten by him. Examiners and fire-bosses must also be appointed in writing and the former must make their duties as examiners their first duty.

The appointment of a mine surveyor must be in writing and new provisions are made relating to verification of mine plans and abandonment of mines. No person may commence mining operations, or recommence operations at a place where they have been discontinued for 12 months, without a permit from the Chief Inspector who is to grant it only where he is satisfied that provision has been made for conduct of operations in conformity with the Act and after he has received a certificate from the Board of Public Utility Commissioners that the operator has adequate resources for carrying on operations for 12 months.

Hoisting engineers at coal mines are required to be properly qualified and competent, to be appointed in writing by the manager, or by the master mechanic with the manager's approval.

The Act contains a number of new safety provisions. No person may carry any explosives on a cage or on a man-trip while men are being hoisted or lowered. Communication roads must be five feet in width and height, instead of four feet as formerly and airway and travelling roads must be of the same dimensions unless the Minister grants exemption. Shafts and slopes must be kept clear of ice. No power-driven machinery or explosives may be used in a coal mine which are not of a kind approved by the Chief Inspector, but the latter may authorize their use for experimental and demonstration purposes under special permit and subject to conditions. The breaking of hoisting ropes causing any personal injury must be reported immediately. Further new safety provisions deal with installation of ladders in escapement shafts, safety equipment of hoisting cages, installation and maintenance of hoisting apparatus, connecting of coupling chains and the capping and recapping of hoisting ropes by a competent person appointed by the mine manager in writing. A general code of signals is also included.

Further new provisions relate to conveyor roads and long wall faces and prohibit men travelling on conveyors, lay down rules, effective August, 1941, governing the design of mine cars, prohibit the use of wooden tracks or turntables after August 1, 1940, require miners to be equipped with hard hats and protective clothing in certain circumstances and prohibit interference of any kind with the fire-boss or mine examiner in the performance of their duties.

The general rules to be observed at all mines are re-enacted with some amendments. They include prohibition of employment of any man at the working face at such distance from another employee that his cries for help cannot be heard, provision for the installation of sanitary facilities underground, for telephone communication in certain mines and for adequate ventilation where brattice or air pipes are required to be used. No person may guide any rope on to a drum, sheave, pulley, wheel or sprocket by hand or with a bar while it is in motion or cross the uncovered space of the shaft bottom except for necessary purposes. If the examiner finds any ropes, chains, signals or other apparatus to be unsafe he must stop their use.

New rules are laid down as to ventilation but the general standard of quantity remains at 200 cu. ft. of air per minute for each person and animal, except in the case of longwall operations where the district inspector may grant written exemption from this provision if that quantity of air would create uncomfortable conditions. The Act also requires fire fighting equipment to be installed and fire prevention precautions to be adopted and makes new provisions relating to the use of power drills to prevent dust.

As formerly, the workmen employed in a mine may, at their own cost, appoint two practical working miners, resident in the province, with five years' experience of underground work, and holding miners' certificates, to inspect the mine on their behalf. Amendments require certificates of such men to be of grade A, and provide that such inspections may be made 12 hours after the delivery to the manager of a written notice of intention to make such inspection. Another new section provides that where more than 30 men are employed below ground and the workmen fail to appoint their inspectors, the Chief Inspector may select from the men in alphabetical order two persons with the necessary qualifications. Such persons are to have the same powers and duties as if they were appointed by the workmen and the owner, agent or manager may make a deduction from the wages of the workmen to remunerate them.

The Chief Inspector, on the written report of a district inspector that mining methods at any mine are wasteful, may require the owner or operator to remedy the method of operation within 90 days in such manner as may be necessary, and to submit a program of future operations for the approval of the Chief Inspector. If this is not done, the Chief Inspector may prohibit the operation of any part of the mine until his orders have been carried out and a program of operations approved by him. Any dispute over such an order is to be settled by arbitration.

A new method is provided for the arbitration of disputes arising out of any orders made by the Chief Inspector or any inspector. Such cases are to be referred to a board consisting of the Chief Inspector or arbitrator appointed by the person requiring the arbitration and an arbitrator appointed by the Minister. The decision of the Chief Inspector and one arbitrator is final.

Wages and Hours of Labour

The Male Minimum Wage Act, 1936, was amended to clarify its application to all persons employed in the province except farm labourers and domestic servants. A new clause defines "overtime" as any time worked during any one day in excess of 10 hours or during any time not included in the hours of work prescribed pursuant to the Hours of Work Act as the normal hours of work in a day for any such employee, and time during any week in excess of 54 hours or during any time which is not included in the hours of work prescribed pursuant to the Hours of Work Act as the normal hours of work in a day for any such employee.

The Board of Industrial Relations may fix a minimum wage for overtime and prescribe wage periods, pay days and modes of payment, either generally or with respect to any designated class of employers or any designated employer.

The Hours of Work Act, 1936, was also amended to clarify its application as including all employees except farm labourers and domestic servants. A further change enables the Board of Industrial Relations to prescribe the hours of the day for the commencement and ending of the normal hours of work in any industry or establishment.

A section added to the Fire Departments Two-Platoon Act enables the council of any city or town with a population of not less than 8,000, and having a permanent fire department, to provide by by-law for the adoption of the three-platoon system, each platoon working for eight consecutive hours per day. Such by-law may be passed and submitted to the electors by the council of its own motion and must be passed and submitted to them upon receipt of a petition signed by not less than 10 per cent of the number of electors who voted at the last election for councillors.

The Early Closing Act which enabled the councils of cities, towns and villages to pass by-laws for early closing of shops, was extended to municipal and improvement districts. In the case of improvement districts an order of the Minister of Municipal Affairs has the same effect as a by-law in other municipalities.

An amendment in the Industrial Standards Act provides that a schedule of wages and hours shall continue in force during the pleasure of the Lieutenant-Governor in Council but after a year either the employers or the employees affected may apply to the Minister for its revocation. Upon receipt of such notice in writing, the Minister is to fix a time for inquiring into the circumstances and if he deems it proper, he is to recommend to the Lieutenant-Governor in Council that the schedule be revoked. Formerly a schedule remained in force for 12 months.

Unemployment Relief

The Bureau of Public Welfare Act is a revision of the Bureau of Relief and Public Welfare Act, 1936. The Bureau established under the former statute in charge of a Commissioner is continued and the Commissioner is authorized to provide material or other assistance for any destitute transient person out of moneys appropriated by the Legislature for this purpose. "Material aid" means any food, fuel, clothing or shelter provided out of public funds and includes money. A "transient person" is defined as a person who is not the responsibility of any municipality in the province. Where there is doubt as to whether a destitute employable person is a resident of a municipality, the Commissioner may provide him with material aid and, if it is established that a municipality is liable for such aid the Minister may recover the cost of assistance from such municipality.

The Commissioner is to superintend the collection and publication of information and statistics relating to destitution and material aid, as directed by the Minister, to supervise the administration of such Acts and measures relating to the provision of material aid as may be assigned to the Bureau by the Lieutenant-Governor in Council, and to perform other duties assigned to him by the Minister. With the approval of the Minister, the Bureau may appoint committees of not more than three persons to investigate problems relating to material aid and recommend changes and to arrange for supplies of fruit, vegetables and clothing for public distribution. Regulations may be made by the Lieutenant-Governor in Council for the granting of material aid and the disbursement of moneys pursuant to the Act.

"Resident" is defined as "a person who on the last occasion he applies for material aid has then had his home while a self-supporting person within the boundaries of a municipality for 12 consecutive months out of the 24 months immediately preceding the making of such application." If a person who is the responsibility of a municipality, while receiving material aid or any unemployment relief or within 12 months after he last received aid under this or the former statute, moves into another municipality he continues to be the responsibility of the first municipality until he has become a resident of another municipality in the province. Similar provision is made for continuing aid to persons who have resided in a municipality and have received material aid as the responsibility of such municipality. Persons who are given assistance under the Mothers' Allowances Act, the Workmen's Compensation Act and the Old Age Pensions Act, or any person in receipt of a pension or allowance for services performed, is deemed to be self-supporting to the extent of such assistance. A married woman unless judicially separated or divorced is deemed to be a resident of the same municipality as her husband.

Any municipality receiving assistance from the Dominion or from the Province, or from both, for the purpose of providing material aid must, as a condition of receiving such assistance, accept a written application for material aid from any person who represents himself to be a destitute employable person, and thereupon determine the need for such aid, and must provide adequate material aid in conformity with the Act. In case of urgent necessity it must also make provision for adequate material aid for any destitute employable person living within its boundaries but not a resident, in which case the municipality must sent written notice by registered mail to the Secretary-Treasurer of the municipality of which the person is believed to be a resident or, in case such person is not a resident of any municipality, to the Bureau. If the municipality or Bureau fails, within one month after notice, to accept responsibility the municipality providing aid may apply to a judge of the district court for an order determining responsibility.

It is the duty of a municipality, when liable, to issue an adequate food allowance and, in addition, upon presentation of a certificate from a qualified medical practitioner appointed by the municipality, an allowance to provide cod liver oil and extra food in cases of pregnancy, wasting diseases, convalescence or other reasonable causes. A municipality or the Bureau, when liable, may deduct from the adequate food allowance an amount equal to the current local retail value of such articles of food as the recipient has provided, or could reasonably have been expected to provide, from his own resources. An "adequate food allowance" means an allowance in money, or its equivalent, of such amount, having regard to the prices prevail-

ing, as will make available food of such amount as may from time to time be determined by Order in Council.

A municipality providing material aid for a person for whom another municipality is responsible may recover the cost from such other municipality. Provision is made for compelling a person receiving material aid from a municipality and who has removed from it to return to and reside in such municipality, and for settlement of disputes arising out of any such order. A destitute person who believes that he has been wrongfully refused material aid by a municipality responsible for its provision, may take proceedings before a police magistrate or a justice of the peace, and a municipality which fails, without lawful excuse, to provide material aid for a resident is liable on summary conviction to a penalty not exceeding $200 and costs.

Neither the municipality nor the Bureau is under obligation to provide material aid if the applicant is self-supporting; has refused to accept reasonable work for reasonable wages or to perform unemployment relief work or service in the municipality; having been previously in receipt of any material aid, has been steadily employed for a period of time calculated from the day he was last so employed, equal to one-half of the difference between the period of time during which his earnings while so employed, less expenditures for necessary medical and hospital care, would have been sufficient to provide him and his dependants with subsistence equivalent to the material aid which may be provided under the Act; having been previously in receipt of material aid, receives from any other source any money or liquid assets, for a period of time calculated from the day on which he receives such money or assets, equal to one-half of the time during which such money or assets, less expenditures for necessary medical or hospital care, would have been sufficient to provide him and his dependants with subsistence equal to the material aid which may be provided under the Act or who has refused to accept adequate material aid in the form and at the place designated by the Commissioner.

A destitute employable person may be required by a municipality or by the Bureau to perform any work or service in a municipality which is unemployment relief work or to give an undertaking for the repayment of the value of material aid furnished him or his dependants. In requiring performance of such work special consideration is to be given, however, to persons who served in the Great War in the Canadian Expeditionary Force or in the forces of Great Britain or of any of her Allies, and such persons, if required to perform such work or service, may not be employed for more than 40 hours in any period of one month. If a municipality requires a resident who is in receipt of material aid to perform work or service which is not unemployment relief work, the municipality must remove such person's name from their lists as a recipient of material aid and must pay him wages for the work done. Where a person required to perform unemployment relief work or service is a resident of another municipality the authority of the other municipality must be secured for ordering such work or service.

The amount of material aid furnished to any person may be reduced by the amount of the earnings of the recipient or of the members of his immediate family. The cost of such aid furnished to persons who are or have been members of a community owning property for the benefit of its members is made a charge upon such property. Penalties are provided for giving false information or concealing information in obtaining or applying for material aid and also for contraventions of the Act. The Act is to be read and construed with the Municipal District Act, the Town and Village Act, The Improvement Districts Act and any other Act or charter governing a municipality and is to prevail in case of conflict.

The Unemployment Relief Act, 1933, was continued in force until March 31, 1940. The Act enables the Government of the Province to make agreements with the Government of Canada and with municipalities concerning relief measures.

The Municipal Improvements Assistance (Alberta) Act enables the Province to take advantage of the Municipal Improvements Assistance Act which was passed by the Parliament of Canada in 1938 and authorized the Dominion Minister of Finance to make loans not exceeding in the aggregate $30,000,000 for constructing or making extensions to, or renewals of, municipal works. One condition of the loan is that the work must assist in the relief of unemployment.

Maternity Benefits

The Maternal Welfare Act provides that, upon the recommendation of the Minister of Health, the Lieutenant-Governor in Council may make regulations providing for a grant not exceeding $15 to any expectant mother who is in poor financial circumstances for the purpose of providing necessaries for her and special food and drugs for the infant during the first year of its life or for any similar purpose. The regulations may also prescribe the conditions attaching to such grants, the

persons who are to make them and the manner in which they are to be made. The Minister may also with the approval of the Lieutenant-Governor in Council appoint one or more district nurses for any area or areas where the existing nursing facilities are inadequate and may prescribe the terms of their engagement, their remuneration and duties. Expenditures made under the Act and regulations are to be defrayed out of sums appropriated by the Legislature.

Miscellaneous

The Licensing of Trades and Businesses Act was amended to distinguish between fees payable by corporations of which the majority of the capital is owned by persons resident in the province and those payable by other corporations. Ministerial orders made up to March 31, 1939, when the amending Act came into effect, and then in force are ratified and are declared as from the date of their making to have the same force and effect as if they were part of the Act.

An amendment in the Credit Union Act permits a person who is a director, officer or member of the credit committee or the supervisory committee to borrow an amount in excess of his shares, deposits and accumulated earnings if such borrowing is approved at a meeting of the members of the board of directors and the said committees other than such person by a vote equal to two-thirds of the number of all such members.

Resolution

On March 16 a Resolution was adopted that the Legislative Assembly request the Dominion Government to amend the Old Age Pensions Act so as to provide pensions of $1 per day for all needy citizens of Canada over 60 years of age, thereby removing many from the labour market and automatically providing work for the unemployed and "that the Federal Government provide the additional money required over and above the present cost of relief by a national issue of debt-free, interest-free money."

Manitoba

The Manitoba Legislature which sat from February 20 to April 17 revised the Factories Act, the Minimum Wage Act and the Old Age and Blind Persons' Pensions Act with a view to the general revision of the statues. Several obsolete enactments were repealed. Amendments were made in the Strikes and Lockouts Prevention Act, Minimum Wage Act, Shops Regulation Act, Government Liquor Control Act, Fair Wage Act, Mines Act and the Factories Act. The Unemployment Relief Loan Act was extended for another year and changes were made in the residence qualifications for relief. A pension scheme was provided for provincial government employees, and Acts were passed to implement the federal Municipal Improvements Assistance Act and the National Housing Act.

Conciliation and Investigation

To the Strikes and Lockouts Prevention Act was added a section providing that the Minister of Labour on receipt of the report of a board of conciliation and investigation is to send a copy of it by registered mail to each of the parties to the dispute, who are to submit it for acceptance or rejection to a secret vote of the employers and employees concerned and, within a week or such further time as the Minister may allow, he is to be notified of the result of the voting by each party. Immediately on receipt of this information the Minister is to forward it to the other interested parties. The clause declaring illegal strikes or lockouts prior to and pending a reference to a Board has been amended to extend the prohibited time until these new provisions have been complied with. The section has been changed, too, to make it clear that where the parties have agreed in writing, before a board has been reported, to abide by its recommendations a strike or lockout is illegal.

Wages and Hours

Changes made in the Minimum Wage Act are in line with the previous amendments in the Act which made possible its application to persons employed outside of cities and in other workplaces than factories, shops and mail-order houses as originally provided. "Employee" is now defined as a person employed in any occupation who is in recept of or entitled to wages for labour performed in his employment, but does not include a person employed in a private house as a domestic, or in a religious, charitable, political or patriotic institution or organization, or a hospital, nurses' training school, or by any municipal or other public body. "Occupation" means "any and every vocation, pursuit, trade and industry in Manitoba." It is made clear that "wages" include all compensation whether measured by time, piece or otherwise. It is no longer necessary to have one of the employers' representatives and one of the employees' representatives a woman.

New sections provide that no order is to be made for payment of wages due for more than six months before the date of the information

and complaint, that the action does not bar civil action and that an employer is deemed to have agreed to pay an employee the minimum wage fixed under the Act for the class of work done. The latter two provisions are retroactive. To this section was added during passage through the House a clause stating expressly that an employee may recover the full amount of the minimum wage by civil action.

A new section in the Shops Regulation Act limits the working hours of women and boys under 17 to 48 a week and eight a day unless a permit is obtained from the Minimum Wage Board. The section which allowed 70 hours' work a week in emergency is repealed. The normal limit was formerly 60 hours a week and 14 hours a day but under the authority of the Minimum Wage Act shorter hours for these classes have been provided for some years.

An amendment to the Government Liquor Control Act extends hours for beer vendors by requiring closing at 11 o'clock instead of nine.

An amendment in the Highway Traffic Act makes the owner of a goods or passenger vehicle, except a taxicab, liable for the offence of permitting a driver to drive more than nine hours or work in any capacity more than 12 hours in 24 except in case of a breakdown.

Part II of the Fair Wage Act which was added in 1938 and under which minimum wages and maximum hours may be fixed by order in council in certain industries if a sufficient proportion of the employers and employees agree on these conditions, was amended to restrict its application in the printing industry to job printing only. A Bill which would have taken all printing out of the jurisdiction of the Act failed to pass. Another Act amending this statute brings within Part II shoe repairing and wood cutting with a sawing machine. To the matters which may be regulated by a schedule of wages and hours in the industries under this Part is added the minimum charge which may be paid, accepted or contracted for with respect to the labour content of any service, and the fixing of a minimum charge which an employer or employee may contract for or accept. Under Part I of the Act provision is made for paying for the cost of a motor truck as well as of a team used by a contractor on public works.

The Winnipeg Charter was amended to empower the City to fix the wages to be paid to persons employed by the parks board on the same basis as those paid to civic employees. The bill as introduced included policemen's salaries but that section was struck out by the Legislature.

In the Woodmen's Lien Act, except for clarifying and correcting form there is little change. The definition of "logs and timber" is extended to cover specific cases which have arisen since the Act was passed.

Safety and Health

A new section in the Mines Act gives the Minister power to direct an inspector to make a special inquiry and report with respect to any accident in or about a mine which has caused loss of life or personal injury. The inspector may compel the attendance of witnesses at the inquiry, and the production of books, documents and things and may take evidence on oath. Regulations made for the protection of workmen need no longer be laid before the Legislature but they must, as before, be gazetted. An amendment makes it clear that the powers and duties of inspectors may be prescribed as well by regulation as by the Act. Non-compliance with an inspector's written orders is made an offence.

The provision in the Shops Regulation Act for certain sanitary conveniences is now mandatory and no longer dependent on the inspector so directing.

The section in the Factories Act authorizing the Lieutenant-Governor in Council to make regulations for dangerous trades was revised to state expressly that the power does not relate merely to factories or to the dangers from fire but includes all manufacturing, trades and businesses which are hazardous to the persons employed in them as well as to the public.

Unemployment

The provisions of the Unemployment Relief Loan Act, 1933, are extended until April 30, 1940, and give the Lieutenant-Governor in Council power to continue to borrow money from the Federal government to assist municipalities and to provide for a sinking fund as well as enabling municipalities to borrow for relief purposes. An amendment continues in effect the 1938 amendment authorizing the payment of relief expenditures out of the Consolidated Revenue Fund as well as by loans.

An amendment added during passage through the House to the Bill to amend the Municipal Act lays down rules for determining residence for destitute persons. Such a person now retains residence in the municipality in which he has established it until he acquires residence in some other province or lives elsewhere within Manitoba for a continuous year without relief. Formerly a person lost residence by remaining outside Manitoba for a continuous year even if residence was not acquired elsewhere. This amendment is also made to apply to married women who now lose residence only if they live apart from their husbands outside the province for a continouus year and acquire a residence elsewhere in their own right. The clause which

saves employees in various kinds of institutions from disqualification as to residence suffered by the inmates is amended to provide that patients employed immediately following illness for not more than six months in or about a hospital or maternity home do not benefit by that exception.

Housing and Municipal Improvements

Statutes were passed to implement the Dominion Municipal Improvements Assistance Act and the National Housing Act (Labour Gazette, 1938, pp. 892-3). The former provincial statute is retroactive to October 1, 1938, and allows municipalities to enter into agreements with the Federal Minister of Finance to borrow money for self-liquidating projects. The Municipal and Public Utility Board has power to approve by-laws without submission to the ratepayers. Unless the debt created is fully paid, a by-law creating a debt not payable within a year is not to be repealed or amended without the Board's approval. A trust fund is to be established, but deficiencies are to be made up out of general municipal funds. The province is to have a first charge or lien on all revenue derived from projects constructed or improved under the plan.

The Act to implement the provisions of the National Housing Act provides that a by-law for borrowing money from the Minister of Finance for the cost of construction of houses to be built under a low-rental housing project is to receive the assent of three-fifths of the ratepayers and, except in Winnipeg, it is to be authorized by the Municipal and Public Utility Board. The Provincial Treasurer is empowered to enter into an agreement under the provisions of the federal Act with a municipality or local housing authority and do what is necessary to carry it out. Provision is made for security to be taken by the Province from a municipal housing authority after guaranteeing its payments.

In line with this Act to enable the carrying out of the provisions of the National Housing Act for a low rental housing scheme amendments were made in the Winnipeg Charter to authorize that city to take advantage of the Dominion statute.

Old Age Pensions

The Old Age and Blind Persons' Pensions Act is amended to declare the Board administering old age pensions to be part of the Government in so far as payment of Land Titles Office fees is concerned. They are to be cancelled.

The Civil Service Superannuation Act provides for pensions for provincial government employees, and they may be provided for by by-law for employees of the City of Brandon under the Act providing a charter for that city.

Miscellaneous

As it was the original intention of the Trade Schools Regulation Act, but no specific provision was made therefor, that forms for contracts used by trade schools are to be filed with and approved by the Minister, an amendment to this effect is to come in force when the Act is proclaimed and there is a penalty for the offence of entering into a contract not so filed and approved. Formerly, there was the alternative of entering into a contract as set out in the application for registration.

An amendment in the Employment Bureau Act allows business colleges registered under the Trade Schools Regulation Act to operate private employment offices.

Employers in Brandon are required to furnish the assessor with the information concerning their employees necessary for the collection of the pool tax now payable annually by persons who have resided in the city for thirty days or more.

Bill Not Passed

A Bill dealing with freedom of association failed to pass. The right of employees to organize in labour unions and to bargain collectively through their union and its representatives was set out. Except on interprovincial railways representatives selected by the majority of the employees in a unit appropriate for collective bargaining were to be the exclusive bargaining agents of all the employees in the unit and the provincial Minister of Labour was to be authorized to determine the appropriate unit, whether the employees of one employer or of a group of employers on the craft unit, plant unit or a subdivision. The Minister was to have power also, when requested by a union, to investigate and determine which labour union should represent the employees. Decisions of the Minister on these points were to be effective for at least a year. The terms of any collective agreement were to govern conditions of workers not members of the union when the agreement was made and could be enforced by any employee. Penalties were fixed for employers who interfered with employees' rights under the Act or with unions, discriminated against union members or wilfully delayed collective bargaining with employees' representatives.

Resolution

A resolution to which the House agreed would have the Government appoint a Research Council to study economic conditions and carry on research into the natural resources

of the province with a view to ascertaining what new industries can be established, investigate the spread between producers' and consumers' prices and perform other duties referred to it by the Government to which an annual report should be made not later than February 1. The council is to inquire also into the income of wage-earners, farmers, etc., the cost of living and estimated consumption, requirements for health and decency.

Ontario

The Ontario Legislature, in session from March 8 to April 27, 1939, amended the statutes regulating mines and shops, the Industrial Standards Act and laws concerning workmen's compensation, apprenticeship, unemployment relief and old age pensions. A statute was enacted also to give effect in Ontario to any Unemployment Insurance Act that may be passed by the Dominion Parliament.

Early Closing of Shops

The Factory, Shop and Office Building Act was amended to include hairdressing shops, beauty parlours, and shoe repair shops in the definition of "shop" for the purposes of those provisions which relate to early closing by-laws and the clause exempting fruit stores from the operation of such by-laws was repealed.

Mines

A number of changes were made in the Mining Act, among which were amendments in and additions to the rules adopted in 1930 for the protection of workmen employed in mines, metallurgical works, quarries, sand, clay and gravel pits. The new rules were based on recommendations made by officers of the provincial Department of Mines, operators and miners. Changes were also made in the provisions relating to silicosis.

As regards the latter, the medical examination required annually is now required to extend for the first two years to the general physical condition as well as to the condition of the respiratory organs of any person employed underground or in ore or rock crushing operations at the surface where the ore is not kept constantly moist. No person may be so employed unless he is the holder of the certificate of physical fitness required. As before, exception is made of persons who are not usually so employed for more than 50 hours in each calendar month and the Chief Inspector may exempt any mine or any person employed there if he is of the opinion that the mine does not contain silica in quantity likely to produce silicosis or that, for any other reason, such provisions should not apply. More detailed regulations are laid down concerning the duration and renewal of certificates. Every certificate is valid only for 12 months except in the parts of the province where the examination has to be made by a travelling medical officer and the latter fails to conduct such an examination before the expiration of the period. A medical officer may, however, recall the holder for examination at any time. If a workman is found on the second examination to be fit for continued employment his certificate is to be extended for the period necessary to complete 12 months in the occupation, if he has been employed for less than 11 months, or it is to be endorsed if he has completed 11 months or more in the occupation. If the holder of an endorsed certificate is found on re-examination free from tuberculosis, he is to receive a miner's certificate which may be renewed from year to year upon the passing of a similar examination. The holder of any certificate who is out of employment in a dust exposure occupation may apply to a medical officer for the extension, endorsement or renewal of his certificate or for the issuance of a miner's certificate. A certificate is void if the holder has been out of employment in the mining industry for one year, in the case of an initial or extended certificate, or two years, in the case of a miner's certificate or a renewal thereof, and has neglected to have the certificate extended, endorsed or renewed. Where the holder of any certificate has been out of employment in the mining industry for three years or more he is not eligible for re-employment in a dust exposure occupation except as an applicant for employment who is not possessed of a valid certificate. Where a certificate has expired because of failure of the holder to present himself for examination the medical officer may extend, endorse or renew the certificate or issue a miner's certificate if satisfied that the delay was due to causes beyond the holder's control. As formerly, the Act provides that the manager or superintendent of a mine may require the certificate to be left in his custody during the holder's employment at the mine and enables the Lieutenant-Governor in Council to make regulations for carrying out of the sections relating to silicosis. Examinations are made as formerly, by medical officers appointed under the Workmen's Compensation Act.

The minimum age of persons having charge of hoisting engines at a shaft or winze in which men are handled was raised from 20 to 21 years and the section fixing a minimum age of 18 years for persons having charge of any hoisting engine was amended to make it

clear that it does not apply to any apparatus except engines. In order to facilitate inspections the persons in charge of any mining operations must keep medical certificates of hoistmen on file.

The following is a resumé of the principal changes in the rules. Every mine foreman, hoistman, deckman, cage tender, or skiptender and every person who installs or has to do with the maintenance of machinery or electrical apparatus in or about a mine and also, as formerly, every manager, shift boss and every person in charge of workmen or handling explosives or operating machinery, must know the rules applying to the work in which he is engaged. Every deckman, cage tender or skiptender must have an adequate knowledge of English to enable him to carry out his duties in a thoroughly safe manner.

Under new regulations relating to fire protection it is forbidden to accumulate inflammable refuse in or about surface buildings or to store in such buildings inflammable material or volatile or inflammable liquids or to transport such liquids underground except in approved metal containers. Where open flame lights are used at a mine not equipped with a fireproof headframe and shafthouse or portalhouse, the interior of such buildings must be tightly sheeted with metal or suitable fireproofing material to a height of eight feet. Precautions to be taken in handling calcium carbide are set forth in detail. Suitable fire fighting equipment must be provided, not only at underground crushers, tipples and at dry shafts, as formerly, but at all shaft and winze stations, pump stations and underground electrical installations, except where, in the opinion of the Inspector, no fire hazard exists, and also about surface buildings the loss of which by fire would endanger the mine entrance. There are also rules concerning the use of torches in surface buildings, underground transport of compressed gases, operation of welding and cutting torches and the storage and transfer of liquid fuel, including transfer by compressed air. No device for the generation of gas such as acetylene for supplying cutting or welding equipment may be used underground. Separate escapement shafts must be provided in every mine where a vertical or inclined shaft has been sunk or an adit driven and stoping has commenced. Unless there is first provided a second means of exit from the mine workings, no building may be erected within 50 feet of any closed-in portion of a headframe or portalhouse except the building, housing the hoist and power plant equipment which may be erected not nearer than 35 feet. No steam boiler or Diesel engine may be installed so that any portion of it is within 75 feet of the centre line of the collar of the shaft or other entrance. No internal combustion engine using highly volatile liquids or inflammable gases may be installed within 50 feet of the building housing the hoist and within 100 feet of the centre line of the collar of the shaft or other entrance. Where an internal combustion engine is installed at a mine special precautions must be taken for safely conducting the exhaust gases well outside the building. Mines producing 100 tons of ore a day and any other mines designated by the Inspector must be equipped with approved apparatus for introducing warning gas or material into the mine.

A bulkhead or a dam behind which more than 25 tons of water may be impounded may only be constructed underground with the written permission of the Chief Inspector and in accordance with plans approved by him. His written permission is also necessary for the installation or operation of an internal combustion engine underground.

Further new rules relate to the care and use of explosives, the use of electricity, shaft equipment, protection in working places, shafts, winzes, raises, etc., including a requirement that every person employed underground in a mine must wear a protective hat made for the purpose, require the keeping of a hoistman's log-book and the maintenance of proper discipline of persons riding on a cage or skip. Every air receiver installed at the surface of a mine must be inspected by a Government boiler inspector or by an inspector of a boiler insurance company at least once in 12 months and a certified copy of the report forwarded to the Chief Inspector within seven days.

Amendments in rules relating to metallurgical works require suitable means of ventilation to prevent dangerous concentrations of poisonous vapours or gases and special precautions to reduce hazards in the storing and handling of acids or poisonous compounds and forbid transfer of liquids by compressed air except where proper equipment is used. No person may enter a storage bin while material is stored unless a second person is in constant attendance and precautions are taken against the danger of caving material. Guard rails must be placed at the approach to railway tracks where the view of such tracks is obstructed in one or both directions. No person other than the operator may ride on a crane or on material carried by it except for inspection, supervision, maintenance and repair or the instruction of a new operator. A crane operated from a cab mounted on it must be equipped with a warning device.

Where an accident causing loss of life happens in any place to which the Act applies, the owner, agent, manager or superintendent

must notify the district inspector and the Chief Inspector by telephone or telegraph. Except for the purpose of saving life or relieving suffering the scene of the accident must not be disturbed until an investigation has been made by an inspector. Where it is impossible for an immediate investigation to be made, however, the Inspector may permit wreckage to be moved as far as may be necessary to permit work to be proceeded with, provided photographs or drawings of the scene have been made. The section which required the district inspector to be notified of a mine accident causing injury likely to incapacitate a workman for seven days or longer, was amended to make it apply also to metallurgical works, quarries, sand, clay and gravel pits. The following classes of mine accidents must be reported in writing to the inspector within 24 hours whether loss of life or personal injury is caused or not:—any accident involving the hoist sheaves, hoisting rope, shaft or winze conveyance or shaft or winze timbering; any inrush of water from old workings or elsewhere; any failure of an underground dam or bulkhead; any outbreak of fire below ground or above ground if it endangers any structure at the mine entrance; any premature or unexpected explosion or ignition of explosives; any asphyxiation effecting a total or partial loss of physical control; any inflammable gas in the mine workings; or any unexpected and non-controlled extensive subsidence or caving of the mine workings. A rock burst within the workings of a mine must also be reported in writing to the district inspector within 24 hours whether loss of life or personal injury is caused or not and a detailed record must be kept of all rock bursts. Written notice must be given to the Chief Inspector 14 days before the installation of a power plant or hoist or the intended erection of buildings to house them or of the closing of a mine or after the comencement of mining operations or their resumption after one month or more.

Workmen's Compensation

An amendment in the Workmen's Compensation Act, which came into force on Proclamation June 1, 1939, enables the Board to invest moneys belonging to the reserve fund in debentures issued under the Tile Drainage Act and purchased from the Treasurer of Ontario but limits to $50,000 the Board's holdings of such debentures issued by any one municipality.

Another amending Act makes a number of changes. The section stipulating that no employer, or workman of an employer within the scope of the collective liability system shall have right of action against any employer within its scope but that if a workman of such an employer is killed or injured through the negligence of an employer or the workman of an employer within the system the Board may direct that the compensation awarded may be charged against the class to which the latter employer belongs, was revised to make clear that the provision applies also where the action is against a workman of an employer in Schedule 1 and that the cost of medical aid as well as compensation may be charged against the class or group to which the employer belongs.

The payment of medical aid as well as compensation has been made dependent on the giving of notice of the accident and the making of the claim within the time fixed by the Act. The limitation of one year specified as the period for keeping in repair artificial members or appliances has been removed and the Board is authorized to replace them when necessary.

A workman suffering from silicosis, whether complicated or uncomplicated, is now entitled to the full disability compensation of 66⅔ per cent of average earnings. Formerly, where the silicosis was complicated with tuberculosis he was entitled only to 50 per cent of average earnings. The time limit for making a claim for compensation for silicosis is extended from three years to five years after leaving employment.

Industrial Standards Act

The section of the Industrial Standards Act exempting from the operation of the Act employees of the Provincial Government or of municipal corporations or of any statutory board or commission and also persons engaged in farming or mining operations was replaced by new provisions under which a schedule of wages and hours made pursuant to the Act is not applicable to the mining or agricultural industries or to any business, calling, trade, undertaking or work exempted by the regulations. The clause fixing a penalty for an employer contravening the provisions of any schedule was re-worded to make the provision that on conviction an employer should be ordered to pay the amount of wages unpaid apply, as was originally intended, to convictions for failing to pay the legal minimum rate.

Apprenticeship and Vocational Education

The Apprenticeship Act was amended to enable by Order in Council the payment of a per diem allowance and travelling expenses to members of a provincial advisory committee and the appointment and payment of examiners assisting in examinations held under the Act.

The section of the High Schools Act which permits a school board to arrange and pay for the instruction at a high school, collegiate

institute or vocational school outside its high school district of pupils who wish to take courses not provided by the board within the district, was extended to include continuation schools.

An amendment in the School Attendance Act makes it obligatory for a board of school trustees in territory which is unsurveyed or without municipal organization to appoint one or more school attendance officers.

Unemployment Insurance and Relief

The Unemployment Insurance Act enables the Lieutenant-Governor in Council to enter into such arrangements with the Governor-General in Council as may be necessary to carry out within Ontario the provisions of any Dominion Act providing for a general scheme of unemployment insurance.

The Unemployment Relief Act, 1935, was amended to enable a municipality to recover, without interest, out of the estate of a deceased recipient of direct relief any amounts which it has expended for the relief of such person or his dependants. A provision which was included in the Bill as introduced but which was deleted by the Legislature, would have required the appointment and dismissal of unemployment relief administrators in municipalities to be approved by the Minister of Public Welfare.

Mechanic's Liens

Under an amendment in the Mechanics' Lien Act a judge or other officer trying the action may deal with questions of set-off and counterclaim arising under a building contract and may use his discretion as to the amount and apportionment of the costs in respect of a counterclaim.

Electrical Workers

The section of the Municipal Act enabling the passing of bylaws in cities and towns for the licensing of electrical workers was amended to specify the classes of electrical workers to which it relates and to define them.

Pensions

A further amendment in the Municipal Act enables the council of any municipality to pass bylaws providing for pensions for full time employees of the municipality or of a local board with the exception of school teachers and Power Commission employees who are provided for under other statutes. Bylaws may be passed upon petition of not less than 75 per cent of the employees or any class of them and may provide for pensions for the employees and their wives and children by arrangement with the Dominion Government under the Government Annuities Act or by contract with a licensed insurer. Bylaws for pensions must be approved by the Department of Municipal Affairs. The municipality or local board is to deduct the employee's contribution from his wages or salary.

The Old Age Pensions Act was amended with respect to the section providing that where notice of the granting of a pension has been registered against the lands of a pensioner no instrument affecting such lands may be registered without the consent of the Commission administering the Act. The amendment prohibits also the tendering for registration or entry of any such instrument.

The Companies Act was amended to make it clear that companies may make payments to pension schemes for the benefit of employees and to similar objects.

Housing

A further change in the Companies Act empowers insurance companies incorporated under the laws of the province to make loans under the National Housing Act of the Dominion Parliament.

Credit Unions

The Co-operative Credit Societies Act was amended to change its title to Credit Unions Act and to bring its provisions into accord with present practice. New provisions enable the Minister to refuse to issue a certificate of incorporation, fix the maximum rate of interest on the unpaid balance of a loan at 1 per cent per month and forbid loans to any officer or member of a board in excess of the aggregate of his fully paid up shares and deposits unless such loan is unanimously approved at a joint meeting of the boards of credit and supervision.

Clauses forbidding board members to borrow from the society are repealed. Provision is made for the appointment of an Inspector of Credit Unions, the filing of annual statements, inspection and examination of the affairs of such unions and examination under oath of officers and board members. Penalties are provided for offences against the Act and the Lieutenant-Governor in Council is authorized to make regulations for carrying out its provisions.

Bills not Passed

Two Bills of labour interest failed to pass. A Bill to Recognize in Law the Right of Employees to Organize for the Furtherance of their Lawful Interests was based on the draft Bill of the Trades and Labour Congress concerning freedom of association. It defined a trade union and declared it lawful for

employees to form themselves into a trade union, to bargain collectively with their employer and to conduct such bargaining through the union and its officers. The Bill would also have prohibited employers from requiring as a condition of securing or retaining employment that an employee refrain from exercising his rights under the Act and provided penalties for employers seeking by intimidation or threats of dismissal or by dismissal to prevent employees from belonging to a trade union. In the case of a corporation the officers of the corporation were to be personally liable for the payment of any fine or to imprisonment for not more than 30 days.

Another Bill would have required employers to allow their employees two weeks' holidays with full wages for every 52 weeks of employment.

Quebec

The Quebec Legislature, which met on January 18 and was prorogued on April 28, enacted new statutes dealing with unemployment insurance and relief, municipal organization of mining villages, arbitration of labour disputes involving persons employed in charitable institutions, and with agricultural and technical education. Amendments were made in Acts relating to collective bargaining, mininum wages, regulation of mines and electrical works, workmen's compensation, mothers' allowances and old age pensions.

Freedom of Association and Collective Agreements

A section added to the Collective Labour Agreements Act provides that, in addition to the penalty provided for violation of the sections referred to, every employee dismissed because he is or is not a member of an association of employees, or is not a member of a particular association, or because he has lodged a complaint respecting a decree or an agreement or a violation of the Act or has testified in a prosecution or inquiry or who is dismissed with the object of forcing him to accept a classification calling for a lower wage than he is receiving, has the right to claim from his employer, as damages, the equivalent of one month's wages. The onus of proving that the employee has no right to such a claim is on the employer. In any civil or penal action brought under the Act no evidence is to be permitted as to the source of any complaints. Another amendment enables a joint committee to compel a professional employer not only to post a copy of the wage scale and of any order but to keep it posted.

Minimum Wages

Amendments in the Fair Wage Act extend its application to homeworkers and declare the Act to apply to all persons employed on the employer's premises, at home or elsewhere in the province, but those are excepted who are governed by a collective labour agreement made binding under the Collective Labour Agreements Act or an agreement under the Professional Syndicates Act, unless the Fair Wage Board, with the approval of the Minister of Labour, declares the provisions of the agreement less favourable to the employees than the provisions of the Fair Wage Order. Excepted also are agriculturists, settlers, farmhands, servants in private houses, and employees covered by the Act to Assure Reasonable Wages for Workmen Engaged in Forest Operations.

The Fair Wage Board is required to keep minutes of its proceedings and any decisions signed by its members have the same effect as resolutions of the Board. The section authorizing the Board to organize conciliation committees with a view to settling a dispute or drawing up an order is revised. The approval of the Lieutenant-Governor in Council is no longer necessary for such action and it is set out that, on application of either employer or employees or on its own initiative where an association of employees is unable to make a collective agreement with one or more employers or an employers' association, the Board may act as conciliator and organize conciliation committees and, with or without a report from a conciliation committee, may make an order fixing fair wages and hours and other working conditions for any class of workers in any district.

Power to cancel or revise orders is given to the Board when it deems it to be in the interest of the trade, industry or occupation concerned and such decision, when approved by the Lieutenant-Governor in Council, is to take effect from the twenty-first day, instead of the thirtieth day, after publication in the *Official Gazette*, or upon any other date fixed by the Lieutenant-Governor in Council. The Board may also suspend, for periods not exceeding three months at a time, the total or partial application of any order on such conditions as it considers expedient. It may issue rules of interpretation of the provisions of orders and decisions, such rules to have the same effect as if incorporated in the order and, unless otherwise provided, to be effective from the date of the coming into force of the order, without prejudice to pending

suits as to costs. All rules of interpretation, resolutions or decisions of the Board are to remain in force, unless provision is made to the contrary, until they have been suspended, changed or revoked by the Board or by the Lieutenant-Governor in Council. Rules of interpretation and resolutions suspending ordinances must be published in the *Official Gazette*.

The representative of the Board presiding over a conciliation committee made up of employers and employees may permit any other person to attend the meetings of the committee. Conciliation committees are authorized to convene conferences of employers and workmen but are not, as formerly, obliged to do so.

The section rendering it unlawful to stipulate in any agreement, other than an agreement under the Collective Labour Agreements Act or the Professional Syndicates Act, a lower wage than that fixed by an order of the Fair Wage Board was amended to bring it into line with the power given the Board to regulate working conditions other than wages and hours. Working conditions contrary to those provided for in an order may not be agreed upon. As formerly, any employee making an agreement for lower wages may claim the amount to which he is entitled under the order which applies to him and it is rendered unnecessary for him to apply for nullification of such agreement.

Regulations of the Board may require employers to include in their registers of employees those not governed by the Act as well as those who are so governed and may enable representatives of the Board to take extracts or copies from registers and payrolls of an employer. The Board may, by resolution as well as by by-law, classify operations and determine different categories of employers and employees, fix a special scale of wages for seasonal employees or those under 18 years of age, and grant certificates to mentally or physically handicapped workmen authorizing their employment on conditions other than those provided for in the order. Power is given to make any inspection or inquiry between 6 p.m. and 8 a.m. in any establishment operating during that period.

An amendment makes clear that an individual or a collective action against an employer must be brought within six months. The Lieutenant-Governor in Council may extend up to one year from the date the order went into effect the time during which may be instituted an action arising out of any order issued before March 1, 1939.

Further protection is given employees by making it unlawful for an employer to dismiss, without good and sufficient reason, proof of which shall lie upon him, an employee because he has been a member of a conciliation committee.

The section which makes it unlawful for any person to grant or accept pecuniary benefit so as to reduce the minimum wage was amended to provide that it shall not apply to a settlement of accounts between an employer and employee which is approved by the Board.

The penalty for violation of any order or by-law or any provision of the Act for which no other penalty is provided is increased from a maximum of $10 and costs to a minimum of $25 for the first offence and $100 for a subsequent offence plus costs. The maximum term of imprisonment in default of payment of fine and costs remains at 15 days in the case of a first offence and is fixed at not less than one month or more than six months for a subsequent offence. A new section provides that any person making a false declaration or representation to an officer of the Board is liable to a fine not exceeding $25 and costs and in default of payment to imprisonment not exceeding 15 days.

The section providing that the Act shall not affect collective labour agreements in effect under the Collective Labour Agreements Act or the Professional Syndicates Act was replaced by a provision that the Act shall not affect agreements under the Collective Labour Agreements Act, as amended in 1938, or under the Professional Syndicates Act unless the Board, by resolution approved by the Minister, declares the conditions thereof to be less favourable for employees than those established by the ordinances.

Seizure of Wages

Amendments were made in the sections of the Code of Civil Procedure relating to exemption from seizure of certain salaries and wages. The clause was repealed which permitted exemption from seizure of the wages of workmen employed on works undertaken to relieve unemployment with the aid of the Dominion and Provincial Governments. Sections were added under which no creditor may seize the remuneration or wages of a debtor who, within seven days from the judgment or from the resuming of work after a period of unemployment or at any time before the remuneration or wage was seized, produces a declaration under oath setting forth the amount and due dates of such remuneration or wage and the name, occupation and address of his employer or employers; who deposits the seizable portion of such remuneration or wage within the three days following the payment thereof; and who continues thereafter, until the extinction of the judgment and any

79821—3½

claims filed, to deposit, within three days of each date of payment, the seizable portion of such remuneration or wage. The declaration and deposit are to be made in the office of the Circuit Court of the Montreal district if the debtor has his domicile in the city of Montreal or in the office of the magistrate's court of the district or county where he is domiciled.

If the debtor changes his employment or ceases or resumes work or if his conditions of engagement are altered he must, within seven days, file a declaration under oath testifying to such changes. Any claim filed and any declaration by a debtor may be contested by any interested party. Every person who in bad faith or through inexcusable carelessness or neglect to inform himself properly seizes the remuneration or wages of a debtor who has complied with the above provisions or who after such seizure refuses to give the debtor a release when it has been shown that the debtor has complied with such provisions is liable to the debtor for damages.

A further amendment in the code deals with the amount exempt from seizure in the case of salaries and wages other than those of public and municipal employees, pilots and teachers. All such salaries and wages are exempt as to four-fifths when they do not exced $3 per day, three-quarters when they exceed $3 but do not exceed $6 per day and two-thirds when they exceed $6 per day. Total exemption is granted if the salary or wages do not exceed $6 per week and where they exceed $6 but do not exceed $12 they are exempt for the surplus $6 if the debtor is married or if he is a widower with one or more children whom he is supporting. Salaries and wages exceeding the amounts mentioned above are exempt in proportion but there must be left to the debtor in every case at least $6 per week if he is unmarried or $12 if he is married or a widower with one or more dependent children.

Arbitration in Labour Disputes

An Act respecting the Arbitrating of Disputes Between Certain Charitable Institutions and their Employees applies to any institution recognized as a public charitable institution under the Quebec Public Charities Act, that is, any institution which provides free care or medical or other treatment for the indigent and is recognized as such by the Lieutenant-Governor in Council. A list of such institutions must be published annually in the *Quebec Official Gazette*. The new statute makes it illegal for any person employed in or filling any position in such an institution to strike as a result of a dispute between the institution and one or more of its employees respecting emoluments, salaries or wages or hours of work but such dispute may be submitted to a council of arbitration set up in accordance with the Act.

Application for the creation of such a council must be made in writing to the Minister of Health. If made by a charitable institution it must be signed by its president or an official authorized for the purpose, and if made by employees it must be signed by the majority of those directly affected by the dispute. The Minister must, within 15 days after receiving an application, communicate to the parties his decision to grant or refuse it. A council is to be composed of three persons not concerned in the dispute, one of whom is to be appointed by the institution, one by the employees concerned and the third by the first two, or, failing agreement by them, by the Minister. If one party fails to nominate an arbitrator within eight days after he has been notified to do so by the Minister of Health, the latter, on application of the other party, may make the appointment. If an arbitrator dies or is unable to act or if he refuses or neglects to act within a reasonable period, not more than ten days, he may be replaced in the same manner as he was appointed. Each arbitrator is entitled to $10 for a full day's sitting and to $5 for a half day. The costs of the arbitration are to be borne by the party designated by the council of arbitration.

The council is to hear the parties and obtain all necessary information respecting the dispute. It must give to the Minister within the time fixed by him a full report of the evidence and of the conclusions arrived at.

An employee who strikes in violation of the provisions of the Act is liable, in addition to payment of costs, to a penalty of not less than $10 or more than $50 for each day's violation and failing payment of fine and costs to imprisonment for not less than eight days or more than one month. Any person who incites, encourages or aids in any manner an employee to go on strike or to continue a strike in contravention of the Act is liable in addition to costs to a fine of from $50 to $500 and in default of payment of fine and costs to imprisonment for not less than eight days or more than one month.

Workmen's Compensation

An amendment in the Workmen's Compensation Act provides that members of the Workmen's Compensation Commission appointed under the Act or under any prior or subsequent Act have always exercised and shall exercise their functions during the pleasure of the Lieutenant-Governor in Council. Formerly, members of the Commission were

to exercise their functions during good conduct but might be dismissed by the Lieutenant-Governor in Council on a joint address of the two Houses of the Legislature.

Mines

The Quebec Mining Act was amended to render the operator of a mine, whether owner, lessee, or occupant, and not only the owner, liable to the maximum fine of $20 and costs or imprisonment for not more than a month which has been provided by the Act for some years for contravention of certain of its provisions. These provisions forbid the employment of women and girls in the working of a mine and of boys under 15 underground in any mine or quarry and fix for boys under 17 years of age a maximum working day of 48 hours and a maximum working week of six days. They further stipulate that no male person under 20 shall have charge of hoists or windlasses used for hoisting or lowering workmen, that no boy under 18 may have charge of machinery of any kind for hoisting or hauling or for drilling or blasting and that the transmission of signals and orders for putting such machines in motion shall not be entrusted to persons under 16.

An Act respecting the Municipal Organization of Mining Villages enables the Lieutenant-Governor in Council upon the recommendation of the Minister of Municipal Affairs, Trade and Commerce and of the Minister of Mines and Fisheries to constitute as a "village municipal corporation" any territory wherein a mining village is estabilshed on Crown lands under the Quebec Mining Act. Except where inconsistent with the Act or where otherwise provided by it every such village is to be governed by the Municipal Code. A mining village municipality is not to form part of any county municipality or be subject to the jurisdiction of any county council. An officer to be called the "manager," who must be a British subject, is to be appointed by the Lieutenant-Governor in Council to take the place and have the rights and powers of a village municipal council for the first five years. Thereafter or at any earlier time fixed by the Lieutenant-Governor in Council a mining village corporation is to cease to be governed by the Act but is to retain its corporate identity and be subject to all provisions of the Municipal Code.

Electrical Works

The Electricians' and Electrical Installation Act was amended to provide for the recovery of fees for licences for electricians by civil action, independently of prosecution for offences, and to authorize the Lieutenant-Governor in Council to fix a schedule of fees for the approval of plans for the installation of electrical equipment.

Unemployment Insurance and Relief

The preamble to an Act to Promote Unemployment Insurance states that it is recommended that an unemployment insurance system be established by co-operation between the federal and provincial authorities. The Lieutenant-Governor in Council is authorized to enter into an agreement with the Dominion Government in conformity with the constitutional rights of the Province in order to establish such a system. The expenditure incurred is to be paid from the Consolidated Revenue Fund of the Province.

Another statute provides that expenditure for works to relieve unemployment is to constitute capital expenditure and when it is paid from the Consolidated Revenue Fund the Lieutenant-Governor in Council may authorize the Provincial Treasurer to borrow on such terms as he may determine, the sums required to reimburse the Consolidated Revenue Fund in whole or in part. These provisions are to be deemed to have been in effect from September 1, 1936. As long as these loans are not reimbursed, neither the amounts paid by the Government for such works nor their value are to be taken into account for loan purposes in the assets of municipal corporations.

An Act to Establish a Board of Economic Reconstruction provides for the creation of a board of four members of the Government, viz: the Provincial Treasurer and the Ministers of Roads, Public Works and Labour. The Board is to administer unemployment relief and funds for relief works. The Act amends the Unemployed Aid Act, 1931, to make it clear that the Government, since the coming into force of the 1931 Act has been authorized to make such expenditure as it deems necessary to aid the unemployed by providing for public works and allowances to the unemployed.

Youth Training and Vocational Education

An Act to Amend The Youth Aid Act increases to two million dollars the amount which may be expended from the Consolidated Revenue Fund of the Province for the purpose of assisting young persons to establish themselves in suitable employment.

Provision was made for an annual subsidy for the agricultural school at Ste. Anne de la Pérade and to continue or increase the subsidies for agricultural schools at Nicolet, Ville-Marie, Chicoutimi and in the Gaspesian area and for increasing the borrowing power of the Polytechnic School of Montreal from $500,000 to $750,000.

Housing

An Act to Increase the Powers of Municipal Corporations with Respect to the Building of Sanitary Houses enables municipal corporations to take advantage of the provisions of the National Housing Act passed by the Parliament of Canada for the construction of low-rental dwelling houses.

Mothers' Allowances

An amendment in the Needy Mothers' Assistance Act makes it clear that it applies only to mothers of at least two legitimate children under 16 years of age.

Old Age Pensions

The Blind Persons Aid Act was amended to enable a notice of the granting of a pension to be registered against any real property owned by a pensioner.

Co-operative Associations

An Act to aid Co-operative Agricultural Associations provides for the creation of an annual fund of $150,000 to be used by the Lieutenant-Governor in Council on the recommendation of the Minister of Agriculture for guarantees or advances to such associations. An amendment in the Co-operative Agricultural Associations Act enables associations formed before April 4, 1930, to accept the terms of the Act as amended since that date upon the decision of a two-thirds majority of the members present at a meeting called for the purpose. Dissenting members are entitled to a refund of the sums which they have paid into the capital if they declare dissent during the meeting or within ten days thereafter.

An Act to Promote the Organizing of Fish Co-operative Federations enables three or more fish co-operatives of the maritime fisheries district to be constituted as a federation to promote their economic and social interests. The Quebec Co-operative Syndicates Act is to apply to such organizations.

Saskatchewan

The Saskatchewan Legislature during its session from January 19 to April 1 passed new laws for the regulation of trade schools, the provision of municipal medical and hospital services and the establishment of an Industrial Development Board, and for implementing the Municipal Improvements Assistance Act and the National Housing Act passed by the Dominion Parliament in 1938. Laws dealing with motor vehicles and co-operative associations were revised, and amendments made in the Industrial Standards Act and in statutes providing for the two-platoon system in municipal fire departments and for unemployment relief, mothers' allowances and old age pensions.

Vocational Education

The Trade Schools Regulation Act, which is to come into force on June 1, 1939, is generally similar to statutes enacted in Alberta in 1931, in British Columbia in 1936 and in Ontario and Manitoba in 1938. The Act defines a trade as the skill and knowledge requisite for, or intended for use in, an industrial or commercial occupation or vocation, including the construction, repair and operation of aeroplanes, automobiles, steam engines, boilers, internal combustion engines and machinery of all kinds, bricklaying, building, carpentry, the work of a stonemason, plastering, plumbing, fabrication of iron and steel, aviation, mining, lumbering, barbering, beauty culture, hair-dressing, dressmaking, millinery, stenography, typewrting, bookkeeping or accounting, clerical work and any other occupation or vocation designated as a trade by the regulations. The last five occupations were added to the Bill in Committee. A trade school means a place where any trade is taught or where any course of study of a trade by correspondence is organized or carried on, but does not include a school, place or course of study by correspondence kept or taught by the University of Saskatchewan or by any education authority under the Government of Canada or of Saskatchewan, or an aviation club operated under a Government Department.

No person may operate a trade school unless he is registered and schools now in operation must make written application for registration to the Minister charged with the carrying out of the Act before July 1. Registration must be renewed annually. Contracts for the purchase or sale of any correspondence course of a trade school may only be solicited or made if the school is registered or the agent registered as an agent for a school outside the province.

Before issuing a certificate of registration the Minister must be satisfied that the trade school is provided with competent instructors and sufficient equipment for the teaching of any specified trade or trades and is furnishing proper instruction at reasonable rates. Provision is made for inspection of trade schools and for cancellation of certificates if the requirements are not met, or if the holder is convicted of any violation of the Act or regulations.

A penalty of not less than $10 nor more than $100 and, in default of payment, imprisonment for not more than two months may be imposed on any person who obstructs the

Minister or any one acting under his authority in making an inspection or who refuses or neglects to give information or to produce books or records. For operating a trade school without registration, for giving instruction in a trade not specified in the certificate or for failing to comply with the regulations under the Act there is a penalty, for a corporation, of a fine of betwen $100 and $500, and, for a natural person, of a fine of between $50 and $250 and in default of payment to imprisonment for not more than three months. A fine of not less than $10 and not more than $100 or imprisonment for a maximum of three months is provided for any person acting as agent for a trade school in the province which is not registered or for a trade school outside the province without being registered as an agent.

The Lieutenant-Governor in Council may make regulations prescribing the security to be provided by a trade school for performance of its contracts, the accommodation and equipment required, minimum hours of instruction, minimum and maximum fees, terms of payment, and the conditions of registration of agents, controlling advertising, regulating the sale of courses of instruction, fixing registration fees, governing examinations of students and issue of certificates, providing for annual returns and furnishing information to the Minister and generally as to the operation and management of trade schools. Further matters which may be the subject of regulations were added to the Bill during its passage through the Legislature: fixing the price of articles produced, materials used, or services rendered by students, and the time during which the public may obtain services in a trade school and limiting the sale of such articles and the extent of such services so as not to compete unfairly with similar goods or services sold in a factory or shop.

Industrial Standards

Amendments in the Industrial Standards Act include a provision authorizing the Commissioner of Labour and Public Welfare, with the concurrence of the proper advisory board and the approval of the Lieutenant-Governor in Council, to make an order amending the provisions of any schedule of wages and hours under the Act. The order is to be gazetted and, unless stipulated otherwise, it is to become effective on the tenth day after publication. Not only the maximum number of hours comprising the regular working day may be prescribed in a schedule but also the hours of the day during which work may be performed. Overtime work may be prohibited except with a permit and the advisory board may be authorized to issue such permits, subject to the conditions laid down. The number or proportion of the employees of an employer affected by the schedule who may be apprentices, learners or inexperienced workers may also be stipulated in the schedule. Other changes in the Act are designed to insure continuity of operation of schedules. Formerly a schedule might be declared in force during pleasure or for the period, not exceeding twelve months, stipulated in it. After the expiration of twelve months a conference might be called to negotiate a new schedule. The Act now provides that a schedule may be declared in force during pleasure or for the period stipulated in it, but a conference for the negotiation of a new schedule may be summoned at any time. An employer is required to keep in his principal place of business in the province, a record of the wages and hours of his employees. On demand of the Commissioner or any officer having his written authority, he must produce for inspection his registers, payrolls, financial statements, time and attendance records, contracts of employment and any other documents required. The clause was repealed which provided that no prosecution should be instituted except with the written consent of the Commissioner. Amendments were made in the section dealing with the powers of advisory boards, which formerly had authority to hear complaints, to assist in carrying out the Act and regulations and, notwithstanding anything contained in any schedule, to fix special minimum rates of wages for handicapped workers. Such a board may now hear complaints and assist in carrying out the Act and regulations as before and may also assist in carrying out the provisions of the schedules applying to its zone or zones. In addition it has jurisdiction and authority to do any thing which it is authorized to do by the provisions of any such schedule.

Wages and Hours

An amendment in the Attachment of Debts Act, effective June 1, 1939, provides that the amount of wages or salary of a married person to be exempt from attachment shall be $40 in cases where the garnishee summons is issued under a judgment or order for alimony or a judgment founded upon a separation agreement. In other cases $75 of the wages or salary of a married person is exempt.

The scope of the Mechanics' Lien Act was extended to include work done on any mining claim, mining land, water, gas, oil or other well, or gas or oil pipe line. A lien in respect of any mine, mining claim, mining land, oil well or gas well extends to the fixtures, machinery, tools, appliances, equipment and other property in or on such mine, land, claim or well, or appurtenances. A claim

for lien on any such property held from or under the Crown is to be made to the Supervisor of Mines, Department of Natural Resources, Regina, instead of to the registrar of land titles. Such lien is not to affect the rights of the Crown.

An amendment in the Fire Departments Two-Platoon Act which came into effect on May 1, 1939, provides that the Act, which formerly applied only to cities of 15,000 population and over, shall apply to those of not less han 10,000, but in the case of a city of between 10,000 and 15,000 population it is to apply eight months from the date of the coming into force of the amendment unless within that period a by-law to the contrary effect has been passed.

An amendment in the Town Act enables an early closing by-law passed upon petition to be amended or repealed by unanimous consent of the council at a meeting at which every member is present. Formerly such a by-law might only be repealed or amended if it appeared to the council that more than one-third of the occupants of the class of shops affected were opposed to its continuance.

Under an amendment in the Village Act an early closing by-law may require the shops of the class to which it relates to close at 5 p.m., instead of 6 p.m. as formerly, or at 12 noon instead of 1 p.m. The council may now pass such a by-law of its own motion whereas formerly it might do so only on petition of three-fourths of the occupiers of shops of the class or classes affected. On receipt of such a petition the council is now required to pass such a by-law within four weeks. A new clause provides that the council may also, on petition of two-thirds of the occupiers of shops throughout the village, require by by-law that all shops shall be closed on any one day of the week after 12 o'clock noon or such later hour as may be deemed advisable. The definition of "closed" was amended to correspond with that in the City Act and the Town Act by providing that "serving of customers" shall include the receiving of orders from customers.

Chauffeurs

The Vehicles Act, 1939, is a consolidation of the Vehicles Act and the Public Service Vehicles Act with amendments. Labour provisions of both measures are embodied in the new statute without material change. The Highway Traffic Board may make regulations governing hours of employment and wages of drivers of both passenger and goods vehicles. These provisions were proclaimed in force May 15, 1939.

Unemployment Relief

The Direct Relief Act, 1936, was amended to require a municipal council to make provision for the necessary medical and hospital care and treatment of any indigent person to whom it is giving aid or relief in another municipality, and the appropriate municipal Act respecting care of the indigent sick is to apply to such cases. The Minister of Municipal Affairs may charge back to a local improvement district the amount of any expenditures connected with the medical or hospital care and treatment of an indigent person who is a resident of such district. If the Director of Relief, the Minister of Municipal Affairs (in the case of a local improvement district) or any officer administering relief in a municipality or district believes that money has been paid to, or is payable by any person, bank or corporation to an applicant for or a recipient of relief, which is not disclosed in the application or has not been reported to the proper official, the Director, Minister or officer must make a written request to such person, bank or corporation for a statement of the sums paid or payable. For failure to comply with such request within seven days or to furnish a written statement that no money has been paid or is payable a fine of $10-$50 may be imposed for each day of default.

The Relief Act, 1935, was continued in force until March 31, 1940. This Act, enables the Lieutenant-Governor in Council to make agreements with the Dominion Government and with municipalities for the purpose of providing relief within the province.

Amendments in the Municipalities Relief and Agricultural Aid Act, 1937, and in the Local Improvement Districts Relief Act, 1936, provide for further assistance to distressed persons in rural areas.

The Municipal Improvements Assistance (Saskatchewan) Act is designed to implement the provisions of the Municipal Improvements Assistance Act, 1938, of Canada which was summarized above in the paragraph dealing with the complementary statute enacted in Alberta.

Municipal Medical Services

The Municipal Medical and Hospital Services Act authorizes the council of a town, village, or rural municipality to submit to the voters a by-law empowering the council to make provision for medical or hospital services, or both, for residents of the municipality. Upon receipt, before November 1 in any year, of a petition for the repeal of such a by-law signed by not less than 25 per cent of the resident voters, the council must submit to the voters at the next annual election a by-

law to that effect. In the case of a rural municipality, such by-laws may relate to a portion of the municipality only.

Where a by-law for medical services has been approved, the council may make agreements with physicians, surgeons, and hospitals, and also with municipalities which have passed similar by-laws for providing medical and hospital care and sharing the cost. In addition, the council must prepare within 30 days of the passing of the by-law, and annually thereafter, an estimate of the cost of such services and the tax to be levied in respect of them. All agreements and tax estimates must be approved by the provincial Health Services Board. The total tax in respect of a family consisting of father, mother and dependent members under the age of 21 years, may not exceed $50 and a minimum tax of $2 is fixed for emyloyees engaged in seeding, harvesting or threshing operations. Every resident of the municipality over 21 years of age, and every resident under that age who is living apart from his parents and supporting himself, is personally liable for the tax. Where taxes collected in any year are not sufficient to meet expenditures provision is made for loans from the general funds of the municipality. An annual municipal census is to be taken during the time a by-law remains in force. Persons over 21 and those under that age living apart from their parents must register with the clerk or secretary of the municipality. Employers must register every employee within five days of the commencement of employment and must give notice if any person leaves his employment. The Lieutenant-Governor in Council may make regulations for carrying out the Act.

Mothers' Allowances

Sections of the Child Welfare Act relating to mothers' allowances were amended as from June 1, 1939, to provide for an allowance, if the applicant is otherwise eligible, to a mother whose husband is permanently disabled and in cases where the husband or the father of the children, having resided in Saskatchewan, moved out of the province, leaving his wife and child or children in the province, and died within one year thereafter. "Child" is defined to include a lawfully adopted child.

Pensions

A retroactive amendment in the Old Age Pensions Act enables the Superintendent of Old Age Pensions as well as the Commissioner to lodge a caveat making pension payments a charge on the land of a pensioner.

The City Act and the Town Act were amended to empower a council to pass a by-law for the establishment of a superannuation or benefit fund for municipal employees, or any group of them, or of members of the police force, library or hospital boards, or all or any of them, and for their dependents, to classify the employees affected, or any group, as to age or otherwise and to make contribution to the scheme compulsory or optional as to all employees or any group or class. Such a by-law is not to be deemed a money by-law.

Miscellaneous

The Housing Act, 1939, enables the province to take advantage of the National Housing Act, 1938, enacted by the Parliament of Canada. The latter statute authorizes the Dominion Minister of Finance to grant assistance in the building of houses by making loans to approved lending institutions and local authorities, to make loans to local societies and corporations to enable them to carry out schemes of low-rental housing, and to assist persons to build houses for their own occupation at a maximum cost of $4,000 on lots sold by the municipality for not more than $50 each by paying a portion of the taxes for three years.

The Industrial Development Board Act, which came into force on May 1, 1939, provides for the appointment by the Lieutenant-Governor in Council of a board to encourage industrial development in the province, in particular to give assistance in establishing new industries and developing those already existing, especially industries based on the natural resources of the Province, and to encourage industrial art schools, re-afforestation and mineral prospecting as aids to employment, and to co-operate with manufacturers in vocational training.

The Co-operative Associations Act which enables any five or more persons to apply for incorporation as a co-operative association, was revised and amended. Amendments were also made in the Co-operative Marketing Associations Act, 1938. Changes in the Credit Union Act, 1937, come into effect June 1 next and enable a credit union to receive the savings of its members in joint as well as individual accounts, and to deposit, with the written permission of the registrar, in post-office savings banks and with trust companies as well as with chartered banks. A director, officer or member of a committee may now borrow in excess of his shares, deposits and accumulated earnings, upon the unanimous vote of a majority of the other members of the board and of the credit committee and the supervisory committee sitting together, the said director, officer or member not being present when the vote is taken. A member may be expelled by a two-thirds vote of the directors but appeal may be taken to the

next general meeting of the union which may, by a majority vote, confirm or rescind the action of the directors. Formerly a member might be expelled after any hearing by a two-thirds vote of the members at a special meeting called to consider the matter.

Resolutions

On February 21 a resolution was adopted favouring the making of a survey by the Commissioner of Labour and Public Welfare to determine whether persons employed in logging and lumber camps should come under the Minimum Wage Act or the Industrial Standards Act.

A resolution agreed to on March 21 recommends that the Government of Saskatchewan co-operate to the fullest extent with the Government of Canada in finding a permanent solution to the unemployment problem and that pending such solution the government of the province should urge the Dominion Government to give temporary relief in the province by a continuation and extension of work under the Prairie Farm Rehabilitation Act and its extension into Northern Saskatchewan, immediate completion of the Trans-Canada Highway as a hard-surfaced highway, and of hard-surfaced trunk highways connecting the National Parks system with highways of neighbouring provinces and the United States, an extended program of water, forest, game and fur conservation and construction of highways to mining settlements in the northern portion of the province and the territories beyond, construction of other public works, and continuation and enlargement of the Youth Training Plan.

RECENT REGULATIONS UNDER DOMINION AND PROVINCIAL LEGISLATION

Pilots—Sign Painters and Bill Posters in Alberta—Seasonal Wage Rates and Hours in British Columbia—Wage Regulations for Pulpwood Workers in Ontario—Minimum Wage Orders in Quebec, Etc.

Regulations made recently relate to pilots in the Districts of Quebec and Sheet Harbour, Nova Scotia, permit sign painters and bill posters in Edmonton and Calgary to work overtime without extra remuneration, amend the orders for the examination of electricians in Alberta, fix seasonal rates and permit longer hours in fruit and vegetable canneries in British Columbia, regulate wages of workers on pulpwood for export on Crown lands in Ontario, amend certain minimum wage orders in Quebec and require a register to be kept of persons employed in selling beer in Saskatchewan.

Canada Shipping Act

Amendments in the by-laws for the Pilotage District of Quebec, approved April 19, relate to the licensing of apprentice pilots and provide for extra compensation in certain cases. Where a request for a pilot is cancelled after he reports for duty he must be paid the sum of $5 if dismissed within two hours. If dismissed later or detained on board a vessel for more than two hours for any cause other than the weather, he must be paid an additional $1 an hour up to $10 for each 24 hours of detention.

An applicant for an apprentice pilot's licence must have served 12 months on deck on a sea-going vessel, have satisfactory discharge papers and pass prescribed examinations as to health and education. He must be between 16 and 25 or if between 25 and 30 years of age must have had his name on the application list before April 1, 1939, and have obtained before his 25th year a certificate not lower than a Mate in the Home Trade. All pilots, before the end of five years of apprenticeship, must have such a certificate and have served, in addition to the above 12 months, two years on deck on a sea-going vessel.

By-laws for the Pilotage District of Sheet Harbour, N.S., approved by order in council of May 13 are generally similar to those governing the District of Digby, Annapolis and Bear River. (LABOUR GAZETTE, April, 1939, p. 396).

Alberta Male Minimum Wage Act

An order effective April 29 relates to designers, wall men, sign painters, helpers, bill posters and construction mechanics engaged in outdoor advertising and sign painting in Edmonton and Calgary. Such persons, if employed steadily throughout the year and earning at least $25 a week for an average week of not more than 50 hours, are exempt from the provisions of Order 6 of February 28 which requires overtime to be paid at the rate of time and a half. Overtime as defined in the Hours of Work Act is any time in excess of 10 hours in one day or in excess of 54 hours in a week.

Alberta Tradesmen's Qualification Act

Regulations of March 21 (LABOUR GAZETTE, May, 1939, p. 473) for the examination of electricians were amended on April 18 to strike out the provision requiring that examinations be held monthly.

British Columbia Hours of Work Act

By an order of May 23 the regulation which exempted the fruit and vegetable industry from the Hours of Work Act up to March 31, 1939 (LABOUR GAZETTE, 1938, p. 405) is extended for a year from that date.

British Columbia Minimum Wage Acts

Orders 63 and 64 of the Board of Industrial Relations of May 23, 1939, vary from June 1 to the end of the year with respect to canneries orders 46 and 47 fixing minimum wage for both sexes in the fruit and vegetable industry. Except for an increase from 80 cents to 81 cents in the daily minimum wage for both sexes in the fruit and vegebasis and a ½ cent increase in the overtime rate fixed for males for the first two hours, the rate being now 52½ cents, the orders are similar to those made last season for tomato canneries. (LABOUR GAZETTE, 1938, p. 1094). Both new orders stipulate that employees must be paid at least semi-monthly the wages due up to a day not more than seven days before the date of payment.

Ontario Crown Timber Act

An order in council of May 9 provides that local labour must be used on all work connected with the cutting or preparing of pulpwood for export and that the wages paid must be fair and reasonable and in accordance with the wage schedules under the Industrial Standards Act where such have been established.

Quebec Fair Wage Act

Two orders of April 25 continue in force until October 1 Order 5 relating to the silk textile industry (LABOUR GAZETTE, 1938, p. 985) and for another six months Order 6 (LABOUR GAZETTE, 1938, p. 624) concerning stationary enginemen on the Island of Montreal but another order gazetted April 29 exempts stationary enginemen in charitable and religious or teaching institutions except those operated by school boards. This exemption is made retroactive to January 1, 1939, in line with the exemption of such employees in hospitals provided by a previous order gazetted March 3 (LABOUR GAZETTE, April, 1939, p. 397).

An order of May 5 suspends for two months from June 3 Order 24 fixing a minimum wage for persons employed in the manufacture of doors, sashes and other wooden building supplies. (LABOUR GAZETTE, February, 1939, p. 158).

Saskatchewan Liquor Act

New regulations effective May 15 replace former regulations of March 4, 1935, but continue to require a register to be kept of persons engaged in the selling of beer in hotels. This register must be kept up to date, open for inspection by authorized persons and a copy must be forwarded to the Liquor Board. The Act prohibits the employment of any person under 21 or of any female on licensed premises and the new regulations forbid as before the employment of persons under 21 on canteen premises.

Immigration to Canada During 1938

The Immigration Branch of the Department of Mines and Resources has issued a statement of immigration to Canada covering the year 1938.

During the year 17,128 immigrants entered Canada compared with 15,645 in 1937, an increase of 9·5 per cent. Of the total entering the Dominion, 3,373 were from the British Isles; 5,663 from the United States; 1,366 from Northern European countries; while other races numbered 6,726. In each classification increases in the number entering Canada were recorded in comparison with 1937, the largest increase (15·6 per cent) being under the classification "Northern European races"; 13·5 per cent increase in the number of persons coming from the British Isles; 15·0 per cent under the classification "other races"; and ·4 per cent in the number coming from United States.

Adult males entering Canada during 1938 numbered 4,133; adult females, 6,760; and children under eighteen comprised 6,235 of the total of all persons entering the Dominion during the year.

Of this total, there were listed under farming class, 1,750 males, 1,067 females and 2,007 children. The labour class comprised 301 males, 73 females and 130 children; mechanics 480 males, 227 females and 131 children; trading class 689 males, 391 females and 240 children; mining class 34 males, 10 females and 4 children; female domestic servants eighteen years and over numbered 757, under 18 years, 173; "other classes" accounted for the remainder of the total there being 879 males, 4,235 females and 3,550 children in this classification.

The destination of the largest number (6,824) of the immigrants to Canada during 1938 was given as Ontario; 3,454 were going to Quebec; 1,698 to Manitoba; 1,667 to Alberta; 1,563 to British Columbia; 813 to Nova Scotia; 675 to Saskatchewan; 359 to New Brunswick; 61 to Prince Edward Island; 11 to the Yukon Territory; and 3 to the Northwest Territories.

COMBINES INVESTIGATION ACT

Proceedings in Alberta Against Alleged Tobacco Combine

COURT hearings of charges under section 498 of the Criminal Code against tobacco manufacturers and wholesalers were concluded in Edmonton before Magistrate A. I. Millar, K.C., on April 29 when thirty-five corporations and ten individuals were remanded for trial before the superior court. The case was conducted pursuant to informations laid following a report under the Combines Investigation Act. Presentation of oral and documentary evidence by the Crown occupied twenty-three days. The charges under section 498 alleged the existence of combinations and agreements with relation to tobacco products including cigarettes, tobacco, cigarette papers, snuff and cigars, (1) to unduly limit facilities for manufacturing, supplying, storing or dealing, (2) to restrain or injure trade or commerce, (3) to unduly prevent, limit or lessen manufacture or production, (4) to unreasonably enhance prices, and (5) to unduly prevent or lessen competition. Two other charges originally laid against the accused under the common law and section 444 of the Criminal Code were withdrawn on April 29 at the request of the Crown.

Written agreements and other documents were secured by the Crown under search warrants in November, December and January at the cities of Quebec, Montreal, Toronto, Winnipeg, Saskatoon, Edmonton, Calgary and Vancouver. Over fifty persons residing at points throughout Canada from Saint John, New Brunswick, to Vancouver, British Columbia, were served with subpoenas to appear as witnesses at the preliminary inquiry, which opened before Magistrate A. I. Millar at Edmonton on March 20, 1939. A. L. Smith, K.C., of Calgary, H. J. Wilson, K.C., Assistant Deputy Attorney General of Alberta, and N. J. McNeill of Calgary, represented the Crown. Counsel appearing for the accused included L. A. Forsyth, K.C., and C. Sinclair, K.C., of Montreal; H. G. Nolan, K.C., of Calgary; H. H. Parlee, K.C., S. B. Smith, N. D. Maclean, K.C., S. A. Dixon, K.C., G. H. Steer, K.C., and L. Y. Cairns, K.C., of Edmonton; and J. A. MacAulay, K.C., and W. P. Fillmore, K.C., of Winnipeg. The persons charged with offences under section 498 of the Criminal Code included fifteen tobacco manufacturing companies and subsidiaries, with head offices at Montreal, Quebec, Toronto, and Hamilton, nine of which were owned or controlled by the Imperial Tobacco Company of Canada, Limited; twenty wholesale distributors of tobacco products with head offices at Winnipeg, Vancouver, and at Calgary, Edmonton and other points in Alberta, and nine persons operating unincorporated wholesale tobacco businesses in Alberta.

Forty-one witnesses were called and examined by the Crown, including manufacturers, wholesalers and retailers of tobacco products and officers of wholesale tobacco associations operating in the provinces of Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia. The witnesses included persons stated to have taken an active part in formulating a system of price fixing prevailing in the tobacco industry and in the formation of other agreements and combinations alleged by the Crown to have restrained trade, enhanced prices and unlawfully suppressed or eliminated competition in the industry. The evidence presented covered the principal matters set out in the report of the investigation under the Combines Investigation Act (LABOUR GAZETTE, October, 1938, pages 1090-1092). These were supplemented by many further details obtained by the Crown in its extensive preparations for the opening of the case, which were carried on by and under the immediate direction of H. J. Wilson, K.C., of Edmonton, Assistant Deputy Attorney General of Alberta, from November, 1938, to March, 1939. The services of members of the Royal Canadian Mounted Police, with the co-operation of city and provincial police where necessary, were utilized at main points throughout Canada involved in the case, in matters including the execution of search warrants and the service of summonses on the accused persons and witnesses.

Approximately three thousand exhibits were filed before the Magistrate. No witnesses were produced by the accused. At the conclusion of the hearings all accused were remanded for trial on all five counts to the next superior court of criminal jurisdiction, opening at Edmonton on May 15. On May 15 a bill of indictment was preferred before Mr. Justice Shepherd charging forty-four persons on each of the five counts. Application by counsel for the accused to defer pleading to the charges to the September sitting of the court, and to set as the date of the trial the opening of the criminal sittings of the following month of January, was granted by Mr. Justice Shepherd.

EMPLOYEES' RETIREMENT PENSION PLANS UNDER CANADIAN GOVERNMENT ANNUITIES ACT

AS previously described (LABOUR GAZETTE, November, 1938, pages 1229-1233) an increasing number of employers and institutions have been setting up retirement annuity plans for their staffs, many of whom have chosen to use the facilities of the Government Annuities Branch of the Department of Labour at Ottawa. The following organizations have, since November, 1938, adopted group pension plans under the Government Annuities Act:

Firm or Institution	Approximate number of employees under Plan to date
Robert Duncan & Co., Hamilton	31
Hiram Walker-Gooderham & Worts Ltd., Walkerville, Ontario	334
T. G. Bright & Co., Ltd., Niagara Falls	72
The Teachers of St. John's College, Winnipeg	5
Continental Paper Products, Ltd., Ottawa	9
Hamilton Auto Body and Fender Co. Ltd., Hamilton	8
The Teachers of King's College, Halifax	7
The Brethren of the Mennonite Synod, New Dundee, Ontario	54
The Teachers of Ontario Ladies' College, Whitby Ontario	6
Lysaght Dominion Sheet Metal Corp. Ltd., Hamilton	11
Merck & Co., Montreal	50
The Staff of University of Western Ontario, London	177

An analysis of one of these plans which is typical of many being put into effect follows:

Retirement Annuity and Group Life Insurance Plan of Hiram Walker-Gooderham & Worts Limited

This Company and its wholly owned subsidiaries recently instituted a plan to provide their employees in Canada with an assured regular income after retirement together with life insurance protection before retirement. The employees' and the employer's contributions for retirement annuities are administered mainly by the Annuities Branch of the Department of Labour. A small portion of these contributions along with all contributions for group life insurance are administered and underwritten by three insurance companies. The retirement annuity feature of the plan is described as follows.

Eligibility.—Each employee of the Company is eligible to join the plan who, on January 1, 1939, or on the first day of any month thereafter, (1) has completed at least six months of service as a regular employee and (2) has attained his thirtieth but not his sixty-fifth birthday. An eligible employee must sign a special application form and authorize the necessary payroll deductions to become a member of the plan.

Contributions.—Each member authorizes a payroll deduction of 4 per cent of all his earnings from the Company in respect of service after January 1, 1939, referred to as "future service." These deductions are immediately turned over to the Annuities Branch or the Insurance Companies. The employer will contribute the amount necessary to pay the balance of the total cost of future service retirement annuities. It is estimated that, on the average, this contribution will be approximately equivalent to respective employees' deductions.

In addition the Company hopes and expects, wholly at its own expense, by periodical payments over a number of years, to purchase past service retirement annuities. These will be purchased for all members of the plan having to their credit service before January 1, 1939 (referred to as "past service"), and who remain in service until their respective normal retirement dates. Under certain conditions, described below, these will also be purchased for members of the plan who retire earlier, but the amount purchased will decrease according to age at earlier retirement.

Retirement.—The normal date of retirement for all members, male or female, is the first day of the month following the sixty-fifth birthday. With the Company's specific approval, a member may postpone his retirement but his retirement annuity will not increase. If, for any reason, a member leaves the service of the Company before his normal date of retirement and, if he has completed fifteen years of service and has attained the age of 45 or over, he will receive, commencing at normal retirement date, the retirement annuity purchased to date by his own contributions and by the Company's contributions in his behalf for future and past service. If he wishes the retirement annuity from all contributions to commence earlier, he must accept an amount of annuity reduced according to age at commencement. If the above requirements as to length of service and age are not fulfilled, any member retiring before his normal retirement date will receive whatever annuity his own contributions only will purchase.

Determination of the Amount of Retirement Annuity.—The annual amount of the future service retirement annuity commencing at normal retirement date shall be 40 per cent of the member's total contributions. The annual amount of the past service retirement

annuity commencing at normal retirement date shall be 1 per cent of the member's annual earnings as of December 31, 1938, multiplied by the number of years and twelfths of a year of continuous past service. Thus take for example a man aged 45 with fifteen years of past service as of December 31, 1938, earning in that year $1,200, who works until age 65, salary increases raising his average earnings for the twenty years to $1,400. His total contributions towards retirement annuity will be 20 x 4/100 x $1,400=$1,120 in twenty years. His future service annuity at normal retirement will be 40/100 x 1,120=$448, and his past service annuity will be $1,200 x 1/100 x 15=$180, making a total retirement annuity of $628 at age 65. These payments are guaranteed payable for five years in any event after retirement, so that in this case $3,240 would be returned to him or to his estate if he should die shortly after retirement.

Other Death Benefits.—If a member of the plan dies before retirement, all his own contributions toward retirement annuity together with interest thereon will be paid to his estate in addition to a death benefit of approximately 140 per cent of current annual salary payable under the group life insurance plan.

LABOUR AND INDUSTRY IN NOVA SCOTIA IN 1938

Fifth Annual Report of Department of Labour

THE fifth annual report of the Deputy Minister of Nova Scotia for the fiscal year ending November 30, 1938, indicates that industrial conditions throughout the province have improved over the previous year. The Nova Scotia Department of Labour was established under the Department of Labour Act (LABOUR GAZETTE, August, 1934, page 748) and included in the annual review are the reports of the Minimum Wage Board, the Employment Service Offices, the Inspector of Factories and the Supervisor of Unemployment Relief.

Unemployment and Relief.—Summarizing the relief situation the Deputy Minister stated: "From figures quoted in attached statements, it will be seen that the average number of heads of families assisted through Direct Relief during the past year averaged 1,620 per month as compared with 2,522 heads of families per month for the year 1936-37, and that the total number consisting of both heads of families and dependants under Direct Relief for the past year averaged 7,887 per month, as compared with 9,213 per month for the year 1936-37. From the figures quoted, it would appear that industrial conditions throughout the Province have improved over the previous year. The total cost of Direct Relief, Work Projects, grants to Red Cross Society, Seed and Fertilizer, amounting to $598,331.01, as compared with the total cost of $892,252.11 for the corresponding assistance during the previous year, was considerably less than for several of the preceeding years . . . ."

Youth Training.—The Deputy Minister also indicated the extent and diversity of youth training projects in the province. In addition to mine apprenticeship training, courses conducted under the federal-provincial program included classes under the provincial Department of Agriculture and in household training for domestics.

Mine Apprenticeship Project.—A detailed report was made by the Director of the Mine Apprenticeship Project which indicated that since the commencement of the plan in May, 1937, up to December 1, 1938, 357 young men had received some training. Except for those still in training, 241, or 76 per cent received employment. Contributing to the provision of this employment were 28 mining companies in Nova Scotia and northern Canada.

The method of enrolling apprentices and their subsequent examination and training are described by the director who stated that "Mainly due to the publicity achieved through letters from trainees to their home towns, requests for application forms are continually being received."

Reporting on instruction and training, the Director shows every detail of a trainee's progress to each different job in mines, advancement depending upon the skill required. "Trainees are apprenticed to every skilled man on the plant," records the Director who outlines the basis of pay and allowances and workmen's compensation. In regard to placement, the Director reported that a total of 241 young men from the training school are now employed as miner's helpers, mill hands, diesel operators, mechanics, electricians, etc., in Nova Scotia and other parts of Canada.

With a view to broadening the trainee's practical experience before sending him to permanent employment, it is now customary to arrange for the underground men to complete their training at a privately operated mine in Nova Scotia. This generally covers the last three or four months of their training and during this time they receive regular wages without board or other allowances. The Mine Apprentice Project participates in these wages on a fifty-fifty basis up to a limit of $1.50 per day.

Factory Inspection

The report of the chief factory inspector reviewed the factory inspection of the province and the administration of the Industrial Standards Act. In reporting on industrial accidents the inspector again drew attention to the employment of boys at dangerous occupations, and observed: "During the year two boys, both between the ages of sixteen and seventeen, were among those fatally injured. Boys cannot be expected to be patient enough to follow safety regulations or even to take ordinary precautions, and consequently they should not be employed at occupations where steadiness and dependability are necessary."

After discussing safety and health measures, the inspector concluded his report by a reference to overtime as follows: "There is a provision in the Factories Act intended to regulate overtime for women and girls, but by the removal of a sub-section some years ago the Section containing the provision was so mutilated that it is doubtful if the regulation could be enforced. It has been possible, notwithstanding, to keep overtime fairly well under control because the employers were not aware of the condition mentioned, but the experience of the past year has shown clearly that the Section regulating hours of labour should be amended so that its intention can be enforced."

Industrial Standards Report

According to the report of the Industrial Standards Act Inspector, the operation of this enactment during the past year "has shown that, generally speaking, it has the approval of employers and workmen, and that if carefully administered it can become firmly established. The provisions of the schedules regulating the hours of labour and prohibiting overtime are fulfilling their intention by making a greater spread of the work, and thereby helping the unemployed."

As indicative of the method of enforcement in Nova Scotia the following paragraphs are extracted from the inspector's report:

In the enforcement of the Act a limited amount of persuasion was used where the circumstances justified it, but whether persuasion or sterner methods were used, it has been made plain that the law must be respected. The manner of enforcing the law has not been questioned; the official representatives of the workers are not inclined to be vindictive and usually a warning to employers is all that is necessary to effect the desired results.

Three employers were summoned to court—two for not providing the Inspector with proper time sheets and payrolls, and one for not paying the scheduled rate of wages. One of them was fined twenty-five dollars and costs, and twelve dollars "unpaid" wages, which the magistrate directed the Inspector to hand over to the worker; another was fined twenty-five dollars and costs; and the third ten dollars and costs. Nine workmen were summoned—one for working on Labour Day, on which day work is prohibited, was fined ten dollars and costs; and eight for working on Saturday afternoon, when work is also prohibited. Two of the eight were each fined fifteen dollars and costs, and the other six were each fined five dollars and costs. Fines totalling $130 were turned over to the Provincial Treasurer.

A large number of complaints and inquiries were received, mostly from persons who did not come under the Act. When the complaints were regular, they received immediate attention. In some instances workers made complaints, and after the cases had been investigated, the employer, realizing that he was liable to be prosecuted, settled with the worker who then promptly disappeared from the scene. Unless the circumstances are unusual, an employer who violates the law should not be allowed to escape the consequences of his act, merely by settling with the worker.

Minimum Wage Board

Included in the report of the Department is the report of the Minimum Wage Board covering the eighth year of the administration of the Minimum Wage For Women Act. The Board chairman declared that: "We have good reason to believe that the enforcement of the Orders issued by the Board have had the effect of standardizing wages and hours for the working women of this Province."

The following paragraphs show how the Act and its administration operate in Nova Scotia.

"All complaints coming to the office received the personal attention of the Secretary and the Board; no matter how trivial the complaints may seem, they are always investigated and dealt with promptly.

"Wage sheets are gathered every year from the different industries, for the purpose of checking on hours and wages, any apparent lack of conformity with the Orders are taken up, and an explanation or adjustment must be made to the satisfaction of the Board.

"Investigations into hours and wages were made throughout the Province during the year, and back wages collected to the amount of $649.25. No court actions were necessary."

Tabular statistics compiled from wage sheets indicate the average number of female workers in the various industries and the average hours and wages.

Employment Offices

The Superintendent of the Nova Scotia Employment Offices, detailing the work of this branch, stated: "Placements are slightly below those of 1937, due to the fact that highway construction was not so heavy; however the cost per placement shows a decrease, being $1.36 for 1937 and $1.31 for 1938. On the total number of placements this shows a decrease of $668.80.

LABOUR EDUCATIONAL ASSOCIATION OF ONTARIO

Summary of 37th Annual Convention

WITH an attendance of seventy-eight delegates representative of all sections of the province, the thirty-seventh annual convention of the Labour Educational Association of Ontario was held in the Labour Temple, Hamilton, on May 24 under the chairmanship of the president, Mr. O. H. Hughes.

Addressing the delegates at the opening session, Mr. J. F. Marsh, Ontario Deputy Minister of Labour, and a former president of the Association, stated that the organization had been of inestimable value to the workers of Ontario in obtaining improvements not only in municipalities but in the broader provincial field.

The delegates were given a comprehensive review of the work of the Association in the "Officers' Reports," published in pamphlet form. Included in this review were the representations contained in the legislative programs of the Trades and Labour Congress of Canada to the Dominion and Provincial governments. Matters coming within the jurisdiction of Federal authority which were dealt with at the last convention were also the subject of representations made to the respective Ministers concerned, and these were outlined. The labour measures dealt with during the 1939 session of the Ontario Legislature were also summarized. Other subjects reviewed included the Royal Visit, International Peace, League of Nations Society in Canada, Union Labels, Shop Cards and Buttons, etc. The report was unanimously adopted.

The convention paused in its deliberations to pay a tribute of honour and respect to departed members who had actively participated in the work of the Association. These included: Joseph T. Marks, founder and former Secretary-Treasurer of the Association and Frank Healey, member of the Executive, James Simpson, a former Vice-President of the Trades and Labour Congress of Canada and Hon. M. M. MacBride, late Minister of Labour for Ontario.

Resolutions

Included in the adopted resolutions were several relating to the Operating Engineers Act. These called for amendments to include all power plants, irerspective of pressure or horse power; annual renewal of power plant certificates, revenue to be utilized in providing adequate inspection throughout the province; that a certified engineer be on duty at all times in all power plants; stricter enforcement of the section permitting operation of plants, during illness or holidays, by an engineer holding a certificate of lower grade than is normally required, substituting for a period of 21 days in any one year. Legislation was also urged providing for a maximum work-week of 48 hours for all engineers coming within the scope of the Act.

With a view to permitting earlier closing of barber shops, etc., a resolution was concurred in seeking amendment of the Factories, Shops and Office Buildings Act to allow municipalities to enact early closing by-laws conforming to the hours requested by any trade on receipt of a proper and lawful petition.

By another resolution the Association requested government investigation of group insurance schemes with a view to ascertaining how far this form of insurance is affecting the employment of older workers in industry. During the debate on this resolution it was charged that workers over 40 years of age were denied employment because of restrictions on the age-limit in order to avoid higher premiums.

Regarding the right of workers to organize in trade unions a resolution was approved which expressed regret at the failure of the Ontario Legislature to enact the bill submitted during the session just closed and instructed the Executive to continue efforts, in conjunction with the Trades and Labour Congress of Canada, to secure enactment of the Congress' Draft Bill at the next session of the Legislative Assembly.

The convention again went on record in favour of adequate superannuation for municipal and civil employees, including part time employees in the service for many years, and also strict adherence to the retirement age limit.

Endorsation of the "Union Blue Label" of the Cigar Makers' International Union was again recorded and a resolution adopted urging affiliated members and their friends to see to it that this label appeared on the box or other container when purchasing cigars.

The convention authorized that representations be made to the Canadian railways in regard to the wages and hours of extra section help.

In the election of officers which was conducted by Delegate Tom Moore, former President of the Trades and Labour Congress of Canada, O. H. Hughes, Kitchener, and Ald. Peter Grant, St. Catharines, were accorded acclamations for third terms as President and

Vice-President, respectively, while Rod. Plant, Ottawa, was also re-elected to start his 10th consecutive year as Secretary-Treasurer.

Members of the Executive Board were elected as follows: F. Ackerknecht, Kitchener, Mrs. E. Finkle, Toronto, J. F. Cauley, Hamilton, E. A. Smith, Ottawa, Thos. Vyles, London, J. C. Farnsworth, Niagara Falls, Geo. Lauder, Windsor, J. P. Nicol, Thorold, Arthur Lacey, St. Catharines, and Len Lear, Brantford. Kitchener was chosen as the Convention City for 1940.

WORKMEN'S COMPENSATION IN ONTARIO, 1938

ACCORDING to its report for the year 1938, there were 59,834 accidents reported during the year to the Workmen's Compensation Board of Ontario, compared with 70,582 in 1937 and 61,382 in 1936.

The report states that a decrease in employment in industry under Schedule 1 of the Workmen's Compensation Act was reflected in both assessments received and in accidents reported. The provisional payroll in Schedule 1 for 1937 was estimated at $488,259,450 at an average rate of $1.39 on every $100 of payroll while for 1938 the provisional payroll was estimated at $481,275,700, at an average rate of $1.31.

The total benefits awarded during 1938 amounted to $6,464,261.19 as compared with $6,129,960.55 during 1937, and $5,643,798.79 during 1936. Of the total benefits awarded, $5,310,366.20 was for compensation and $1,153,894.99 was for medical aid. It is interesting to note that total benefits awarded from the commencement of the Act (January 1, 1915) to January, 1939, amounted to $128,801,147.99, and total number of accidents reported during the same period was 1,313,157.

Assessments.—The report states that after two years' trial of an experimental plan of differential rating, which had been adopted on the recommendation of employers' group associations, by which an employer could be called upon (based upon the accident cost of the last completed year) to pay as high as double the preferred rate, the Board cancelled the plan, and refunded to employers all assessments in excess of the preferred rate. The amounts refunded or credited to employers were $749,042.97 for 1936 and $717,394.56 for 1937, a total of $1,466,437.53. Notwithstanding these refunds the Board, without impairing financial security was enabled to reduce the average provisional rate from $1.39 in 1937 to $1.31 for 1938, a decrease of 6 per cent.

For 1938 the total amount collected for assessments and estimated to be collected was $6,299,406.55, as compared with a total of $6,778,602.04 for 1937.

Employers in Schedule 2 are assessed their share of the expense of administration, amounting in 1938 to $32,565.12, compared with $23,159.11 in 1937 and $26,616.04 in 1936. Proportionate to the amount of compensation awarded, administration expenses in Schedule 2 and Crown cases were 6·71 per cent in 1938, compared with 4·94 per cent in 1937 and 5·80 per cent in 1936.

Compensation, etc.—Compensation awarded in Schedule 1 industries during 1938, including an estimate of what is still to be awarded for accidents happening during the year, and for adjustment of prior years' accidents, amounted to $5,355,976.13; medical aid including an estimate for what is outstanding amounted to $992,747.43; administration expenses for Schedule 1, including $18,849.08 for mine rescue work, $2,066.03 for occupational therapy clinic amounted to $383,375.72, and $192,250 was paid to employers' safety associations.

Total expenditures and charges for the year amounted to $5,782,376.57, while the provisional surplus for the year was $554,676.02. The balance forward from prior years was a surplus of $3,209,014.24, which added to the surplus for the year, less the carry-over from prior years' claims which amounted to $1,141,972.71, leaves a net provisional surplus of $2,621,717.55 at December 31, 1938.

The total amount of compensation awarded in Schedule 2 industries and Crown cases during 1938 was $947,748.20. Of this amount $216,119.20 was for workmen of municipal corporations; $200,513.43 for steam railroads; $8,036.26 for electric railways; $71,927.79 for navigation companies; $2,117.13 for express and sleeping-car companies; $11,992.47 for telephone and telegraph companies; and $574.72 for all other industries in Schedule 2; $254,565.95 for Dominion Crown cases and $181,901.25 for Provincial Crown cases. Of the total amount awarded, $568,244.47 was for pensions in pension cases and $379,503.73 was for cases not pension cases and for compensation not pensions in pension cases.

Administration.—The report shows that the gross administration expenses of the Board during 1938 were $449,765.47, including an amount for special statistical services for which refunds were received of $10,750, making the total administration expenses $439,-015.47 as compared with $386,397.37 during

1937. The employers pay the whole expense of the administration of the Act. The amount is divided according to the number of accidents handled, among Schedule 1 (Accident Fund Silicosis Account), Schedule 2 and Dominion and Provincial Crown cases.

Of the total administration expenses the amount charged to the Silicosis Account was $12,702.68; to the Rehabilitation clinic, $1,000; to mine rescue work, $897.58; to Schedule 1 employers, $360,831.33; to Schedule 2, $32,565.12; to Dominion Crown, $20,521.29; and to Provincial Crown cases, $10,497.47.

Safety Associations.—During 1938, the Board paid $192,250 to safety associations, an increase of 17·2 per cent over the $164,000 paid in 1937.

The safety associations are organizations of the employers for accident prevention work. Of the amount expended by the Board for this purpose $26,400 was paid to the Lumbermen's Safety Association; $13,300 to the Ontario Pulp and Paper Makers' Safety Association; $11,500 to Class 5 Accident Prevention Association; $125,000 to the Industrial Accident Prevention Associations; $5,550 to the Electrical Employers' Association of Ontario; and $10,500 to the Construction Safety Association of Ontario.

Funds.—The report also gives details concerning the financial standing of the various funds established under the Act.

Schedule 1 funds known and referred to in the Act as the "Accident Fund" comprise, in addition to current funds out of which temporary payments of compensation, medical aid, and administration expenses are paid, the Pension Fund, Disaster Reserve, and Compensation Deferred. The balance of assets in excess of liabilities standing to the credit of the Accident Fund at December 31, 1938, was $3,779,879.36, which was made up of $217,887.73 Disaster Reserve, $2,621,717.55 standing to the credit of the classes, and $940,274.08 set aside as a reserve for depreciation of securities.

The balance in the Pension Fund at the commencement of 1938 was $22,275,818.13. During the year, $2,423,809.52 was transferred for pension awards; $1,133,733.08 was added to the fund by way of interest and $2,185,981.45 was paid for pensions leaving a balance in the fund at the end of the year of $23,647,379.28. The transfers for pension awards during the year included $99,348.73 transferred from the Silicosis Account to provide for pensions in cases of silicosis in Class 5.

The Disaster Reserve Fund which is set aside to meet any unforeseen disaster or other circumstance which might unduly burden the employees in any class of industry, showed a balance at the end of 1938 of $217,887.73.

Particulars are also given concerning the Silicosis Account which was established to take care of special assessments and payments in Class 5 necessitated by the addition of silicosis contracted in mining operations to the list of industrial diseases under the Act. The balance in this account at the beginning of 1938 was $1,879,877.04 of which $607,163.08 was collected by way of assessment; $162,034.92 was paid for compensation; $17,835.25 for medical aid; $70,369.06 for salaries and expenses in connection with examination of underground mine-workers, $12,702.68 was transferred to the accident fund for expenses of supervision and handling claims; and $3,814.35 was paid for salaries and expenses of the Referee Board. The surplus in this account at December 31, 1938, was $2,220,283.86.

There is also included detailed information concerning operations during 1937, which was not available when the report for last year was made. Statistical information is given regarding accidents occurring during 1937, their causes, the nature of the injuries involved, the number, time loss, total and average cost of the different classes of cases, the age, wage, nationality, and marital condition of the injured workmen.

The Annual Report on Child Welfare, for the Third Session of the Advisory Committee on Social Questions of the League of Nations, has recently been received.

At its 1933 session, the Child Welfare Committee passed a resolution—approved by the Council on May 22 of the same year—the object of which was to obtain, each year, particulars of the progress made in child welfare in the various countries, both from the legislative and administrative points of view.

To this end, Governments are asked to furnish reports to the Secretariat, in response to which request certain of them send in ready drafted memoranda while others supply material from which a report can be prepared or from which their own notes can be supplemented.

Since the end of the second session of the Advisory Committee on Social Questions, the Secretariat has received material relating to twenty-nine countries. It has also been able to draw up a study of the position of child welfare in China, based on original sources.

The present report contains information relating to these countries.

FACTORY INSPECTION STANDARDS AND QUALIFICATIONS FOR FACTORY INSPECTORS IN THE U.S.A.

The Division of Labor Standards of the United States Department of Labor recently issued a pamphlet entitled *Factory Inspection Standards and Qualifications for Factory Inspectors,* prepared by an Advisory Committee on Safety and Health.

The booklet details the specific recommendations of the Advisory Committee on Safety and Health on desirable qualifications of a factory inspector and as to a merit system of selection. The recommendations deal entirely with the qualifications necessary for that part of the work of factory inspection relating to safe and healthful working conditions.

The necessity for more widespread application of safety methods is emphasized in the fact that more than 19,000 deaths and 1,600,000 disabling injuries, 75,000 of the latter involving permanent disability, occur annually in industry in the United States. It is estimated in the report of the Committee that the direct money cost of this yearly toll of industrial accidents is about $700,000,000 and indirectly aggregates a much higher sum.

In this regard the report observes: "The reason for this annual loss, now more or less constant, is primarily because smaller industrial establishments have not kept pace with the larger enterprises in respect of organized safety effort. The significance of this is obvious when it is remembered that 92 per cent of the manufacturing plants in this country employ fewer than 100 persons. In many of these smaller establishments safety programs and the application of engineering technique to accident and disease prevention are either neglected or ineffectively carried on. The general acceptance of this situation is reflected in the past and present demand for action by the State in establishing and enforcing specific regulatory provisions looking to better protection of the worker against occupational hazards."

It is pointed out that as a rule State regulations represent only the minimum standards expected to bring about a reasonable degree of protection, and in the enforcement of these regulations the factory inspector performs an important service.

In its report the Committee expresses the belief that "any present or future regulatory approach to the industrial-accident problem will largely be ineffectual unless the factory inspector is in fact an expert in the detection of accident hazards and thoroughly conversant with technical and practical methods of eliminating or controlling them." The Committee was therefore of the opinion that "the first outstanding need in the field of industrial safety and health endeavour is a well devised and widely applied system of selecting, training, and retaining qualified inspection personnel . . . . and recommends the introduction in every State of a system of merit tests, a sound training program, and a plan that will reasonably insure a tenure of service for the competent inspector."

The report outlines a proposed competitive merit test prepared by the Advisory Committee. The examination is intended to be productive of the following information regarding the candidates for the position of factory inspector—citizenship, experience, education and age and physical qualifications. A written examination would cover "(*a*) ability to express himself clearly and effectively in writing (*b*) ability to apply his knowledge to specific problems pertinent to the work (*c*) practical knowledge of accident prevention and industrial health conservation methods." A proposed oral examination is also outlined and a suggested basis of rating offered in the report.

Referring to training the report recommends a one-year probationary period of training and experience with a final qualifying examination before permanent appointment. An outline of the course the period of training should take is also given.

In dealing with security of tenure of office the Committee states: "Equally as important as appointment and training is a reasonable assurance of permanence of office for competent inspectors. Administrative experience is not only a valuable public asset, which should be conserved, but, moreover, insecurity in office for non-service reasons tends to demoralize law enforcement. It is, therefore, urgent that the system give qualified inspectors the protection of civil service tenure or its merit-rating equivalent. The adoption of a competitive merit system in the selection of inspectors and a sound training program will go far in creating a public consciousness which will not tolerate arbitrary dismissal of qualified inspectors."

Concluding its report the Committee states: "Through the adoption of this program the Advisory Committee visualizes a factory inspector who commands the respect of industry and invites the confidence of workers because of his knowledge, integrity, and ability to bring about a greater degree of health, safety, and comfort."

79821—4½

RELATIONSHIP OF OCCUPATION AND HEALTH AMONG INDUSTRIAL WORKERS IN GREAT BRITAIN

IN the April issue of the *National Health Review* published by the Department of Pensions and National Health, Ottawa, an abstract is made of an article by Dr. H. M. Vernon, appearing in the January number of *Occupational Psychology*. The review of the article is as follows:

The recently published Registrar General's Occupational Mortality Supplement for England and Wales shows that the mortality rates of men employed in different occupations differ widely. The figures given suggest that occupation has much influence on health, but the Registrar General considers that the effect of occupation on male mortality is probably on the whole more indirect than direct, that it is "influenced more by the conditions of life implied by various occupations than by the direct occupational risks entailed." In this paper Dr. Vernon attempts to assess the relative importance of direct occupational factors and of the social environment.

In the five years 1930-34 over 300 deaths per year were known to be caused by silicosis in England and Wales, but this figure undoubtedly omits some of the coal miners. There were about 13 fatal cases of asbestosis a year. Lead poisoning now causes an average of eight fatal and 136 non-fatal cases a year. Over 2,000 persons receive workmen's compensation for skin affections each year, but it is estimated that 20,000 to 30,000 cases, usually of a mild character, arise each year.

Taking all industries together, about 2,300 fatal accidents and 380,000 non-fatal ones are compensated each year. The fatality rate is eight times greater in coal miners than in factory workers. "Beat knee," "beat elbow" and "beat hand" account for nearly 6,000 cases amongst miners each year. In 1933 compensation was paid for 9,603 cases of miners' nystagmus, 8,068 of these being carried over from previous years.

Less clear-cut are the effects of certain environmental factors, but exposure to high temperatures and subsequent chilling account for respiratory illness and rheumatism, as in steel smelters and foundry men, and in coal miners. On the other hand high temperatures and humidities were not found to cause an excess of sickness in Lancashire cotton mills. It would appear that occupation affects the incidence of tuberculosis but clear proof is difficult to obtain.

These direct occupational effects account for only a small fraction of the mortality and morbidity of industrial workers. The effect of social environment is indicated by the Registrar General's classification of occupational groups according to social class. The five classes are I, professional, etc.; II, intermediate, between I and III; III, skilled workers; IV, intermediate, between III and V; V, unskilled workers. The standard mortality rates for all males of these five groups for 1930-32 were respectively 90, 94, 97, 102 and 111; the rates for married women of these groups were 81, 89, 99, 103, 113, and the infant mortality rates (deaths per 1,000 births) were 33, 45, 58, 67 and 77. In all cases there is a steady increase with fall in social status. In all the social groups the men had higher mortality rates than the women (38 per cent excess on the average), and part of the excess was probably occupational. The lower grades are the poorer paid, and consequently their social environment is poorer, their standards of housing and nutrition are worse. Of the social factors, nutrition is by far the most important. Figures are quoted to show that many members of the industrial classes are below the poverty line and cannot secure adequate nutrition. Heredity probably exerts its influence mainly through the intelligence. An intelligent worker will make ends meet more easily and look after himself better than will a person of low intelligence.

Dr. Vernon attempts to assess the relative importance of heredity, direct occupational effects, and the social environment (including nutrition) as regards their effects on health. Assuming that everyone possesses an average degree of intelligence, he puts the importance of heredity at 10 per cent, occupation at 20 to 30 per cent, and social environment at 60 to 70 per cent; while, when he takes into account the indirect effects of intelligence, he puts heredity at 40 per cent, occupation at 10 to 20 per cent, and social environment at 40 to 50 per cent.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, APRIL 1939

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on May 1 was 11,607, the employees on their payrolls numbering 1,030,718 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for April was 1,910, having an aggregate membership of 242,398 persons, 13·9 per cent of whom were without employment on May 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of May, 1939, as Reported by Employers

Data tabulated by the Dominion Bureau of Statistics from 11,607 firms showed an increase in the employment they afforded at the beginning of May, their staffs aggregating 1,030,718 persons, or 12,149 more than in the preceding month. Reflecting this advance, the crude index, based on the 1926 average as 100, rose from 104·9 at April 1 to 106·2 at the date under review, when it was about a point lower than at May 1, 1938; practically the same as at May 1, 1937, it was higher than at that date in any other year since 1930. The general industrial expansion reported at the beginning of May, 1939, was not so pronounced as usual for the time of year, partly owing to the lateness of the spring in many sections of the country. The index when corrected for seasonal influences, therefore declined, falling fractionally from 111·1 in the preceding month, to 110·3 at the beginning of May.

The unadjusted indexes at May 1 in recent years are as follows: 1939, 106·2; 1938, 107·4; 1937, 106·3; 1936, 99·5; 1935, 95·2; 1934, 92·0; 1933, 77·6; 1932, 87·5; 1931, 102·2; 1930, 111·4; 1929, 116·2; 1928, 106·8 and 1927, 101·8.

Manufacturing as a whole reported moderate seasonal improvement at the date under review, mainly in food, lumber and iron and steel plants. On the other hand, the leather and tobacco divisions released employees. Logging and coal-mining also showed considerable curtailment of a seasonal character, while communications, services, trade, transportation and construction afforded decidedly more employment. The gain in communications and services approximated the average at May 1 in earlier years of the record; that in trade was unsually large, while the increases in the remaining industries were rather less than average; in some cases, this was due to the retarding effect of the late spring.

A brief review of the situation at May 1, 1938, shows that the 10,551 firms then cooperating had employed 1,024,702 persons, as compared with 1,001,202 in the preceding month. Most of the improvement had been reported in services, trade, transportation and construction.

Employment in Financial Organizatons

For some months, statistics of their employment have been collected from banks, trust companies and stock market operators. For May 1, 414 firms and branches in these lines of business reported staffs aggregating 33,043 persons, compared with 33,053 in the preceding month. The addition of these figures to the returns furnished in the manufacturing, logging, mining, transportation, communications, construction, service and trade industries bring the total number of employees included in the May 1 survey of employment to 1,063,761, and slightly raises the index of 106·2 in the industries above enumerated, to 106·3; when the data of employment in financial organizations are added to the general figures for April 1, the index was increased from 104·9 to 105·0; comparable data for 1938 are not available.

Employment by Economic Areas

Heightened activity was reported in New Brunswick, Quebec and the four Western Provinces, but small losses were indicated in Prince Edward Island, Nova Scotia and Ontario. In Manitoba, Saskatchewan, Alberta and British Columbia, the level of employment was rather higher than at May 1, 1938; in Quebec and Ontario, the indexes were lower by one point and two points, respectively, while in the Maritime Provinces as a unit there was a more pronounced falling-off in that comparison.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

Maritime Provinces.—The advance in employment in the Maritime Provinces generally was not equal to the average gain recorded at May 1 in the years since 1920. Eight hundred and twenty-two firms reported 73,872 employees, or 311 more than at April 1, 1939. Activity was seasonally curtailed in logging camps and in transportation and railway construction and maintenance. On the other hand, manufacturing was decidedly brisker, mainly in the lumber, textile, iron and steel, fish-preserving and chemical divisions. Construction also showed considerable improvement.

The 762 establishments furnishing statistics for the beginning of May last year had an aggregate payroll of 78,210 persons, being greater by 2,618 than at April 1, 1938. The index then stood at 107·3 compared with 100·2 at May 1, 1939.

Quebec.—An upward movement was indicated in Quebec, according to 2,857 employers of 317,373 men and women, as against 311,228 in the preceding month; this increase of 6,145 was smaller than that noted at May 1, 1938, being also less-than-average in the experience of the last eighteen years. Improvement on the whole took place in manufacturing; there were additions to staffs in lumber, food, iron and steel and some other plants, while leather and textile factories were quieter. Logging camps continued to make seasonal reductions in their personnel, and the railway construc-

tion and maintenance group was slacker. On the other hand, transportation, building and highway construction, services and trade afforded more employment, the gains in transportation and construction being most pronounced. Employment was not quite so brisk as at the beginning of May of last year, when 2,540 firms had reported 314,201 employees, or 14,460 more than in the preceding month; the index then stood at 112·6, or one point higher than at the date under review.

Ontario.—There was a slight falling-off in industrial activity in Ontario, where the trend at May 1 in past years has usually been upward. Improvement was noted in manufacturing, mining, local and water transportation, building and railway construction and maintenance and trade, while there were contractions in logging, steam railway operation and highway work. In the manufacturing group, considerable gains were reported in lumber, food, pulp and paper, electric light and power, clay, glass and stone, iron and steel and some other classes, but textile and tobacco factories recorded declines. The working forces of the 5,076 co-operating establishments included 427,463 persons, compared with 427,675 at April 1. Employment at May 1, 1938, had shown a moderate advance, and the index was then two points higher than at the latest date, when it stood at 107·9. The 4,645 employers from which information was tabulated for the same date in 1938 had reported a combined staff of 428,351.

Prairie Provinces.—Manufacturing, transportation, construction and trade showed heightened activity, the greatest additions being in highway and railway construction; in the group of factory employment, a substantial part of the increase took place in the food, textile, and oil-refining, divisions. On the other hand, coal-mining and logging were seasonally slacker. Statements were compiled from 1,669 firms in the Prairie Provinces, whose employees increased from 118,493 at the beginning of April, to 122,072 at May 1. This advance was more pronounced than that recorded at the same date in 1938, but was rather smaller than the average gain noted at the beginning of May in the years since 1920. The index, standing at 94·5, was slightly higher than that of 91·5 at the corresponding date of last year; statistics had then been received from 1,506 establishments with 116,450 employees.

British Columbia.—The situation in British Columbia showed a betterment, which however, was on a scale below the average at May 1 in the experience of the last eighteen years. The latest index stood at 103·3, compared with 102·8 at May 1, 1938, and 103·4 at May 1, 1937; these indexes are higher than at the same date in other years since 1930. An aggregate payroll of 89,938 persons was reported by the 1,183 employers furnishing data, who had 87,612 on their staffs at April 1, 1939. Logging, transportation, railway construction and maintenance, services, trade and manufacturng showed heightened activity; within the last-named, the greatest gains were made by lumber and food factories. On the other hand, mining and highway construction and maintenance were quieter. For May 1, 1938, 1,098 employers had reported 87,490 workers, as compared with 85,229 in the preceding month.

Table I gives index numbers by economic areas.

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

—	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
May 1, 1927	101·8	100·5	100·6	104·5	99·0	99·4
May 1, 1928	106·8	101·3	103·0	110·1	108·5	105·4
May 1, 1929	116·2	108·3	107·3	123·8	119·7	111·6
May 1, 1930	111·4	113·1	106·1	115·7	109·2	110·7
May 1, 1931	102·2	104·0	102·3	103·8	100·0	96·1
May 1, 1932	87·5	87·8	86·0	89·5	87·6	82·7
May 1, 1933	77·6	80·3	75·4	79·5	79·2	72·2
May 1, 1934	92·0	98·3	85·5	98·5	85·4	88·4
May 1, 1935	95·2	97·4	89·7	101·7	87·9	92·6
May 1, 1936	99·5	103·4	96·4	103·4	92·7	99·0
May 1, 1937	106·3	110·7	105·2	111·2	93·2	103·4
May 1, 1938	107·4	107·3	112·6	109·9	91·5	102·8
Jan. 1, 1939	108·1	109·2	114·9	108·8	97·1	98·0
Feb. 1	106·5	100·5	113·0	109·2	93·9	96·2
Mar. 1	106·5	101·2	112·8	109·1	94·3	96·7
Apr. 1	104·9	99·7	109·4	108·0	91·7	100·5
May 1	106·2	100·2	111·6	107·9	94·5	103·3
Relative Weight of Employment by Economic Areas as at May 1, 1939	100·0	7·2	30·8	41·5	11·8	8·7

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

Employment by Cities

Improvement was indicated in seven of the eight cities for which separate tabulations are made; firms in Montreal, Quebec City, Toronto, Hamilton, Windsor, Winnipeg and Vancouver reported greater activity, while a moderate decline took place in Ottawa. The largest gains were in Montreal. A comparison with the figures for last year shows a higher level of employment in Quebec, Toronto, Ottawa and Vancouver; in Montreal, the index was the same, while in the remaining centres the situation at May 1, 1939, was not so favourable as at that date in 1938.

Montreal.—Manufacturing, transportation, construction, services and trade recorded advances in Montreal, those in the two groups first-named being extensive. Within the manufacturing division, considerable additions to staffs were made in food and iron and steel factories. The 1,674 co-operating employers reported 161,646 persons on their payrolls, compared with 158,092 at April 1; that this increase was not equal to the average gain at the beginning of May in preceding years for which statistics are available was partly owing to the adverse effect of the late spring. The level of employment indicated was the same as at May 1, 1938, when the industrial expansion reported by 1,459 establishments had been more pronounced; they then employed 157,510 men and women.

Quebec.—Statements were tabulated from 209 firms with 17,223 employees, as against 16,568 at April 1. Most of the improvement took place in shipping, but construction was also somewhat more active, while manufacturing was quieter. The general increase involved more workers than that recorded at the corresponding date in 1938, when the index was many points lower. The 179 employers furnishing data had then had 13,887 workers on their payrolls.

Toronto.—Transportation, construction and maintenance, trade and manufacturing reported increases in personnel in Toronto; within the last-named, iron and steel plants showed most improvement. According to information furnished by 1,731 concerns in Toronto, their staffs aggregated 137,683 persons, as compared with 135,931 at April 1. This increase was much larger than that indicated at May 1 of last year, but approximated the average gain at the same date in the years since 1922, when the record for Toronto was commenced. Employment was in slightly greater volume than at the beginning of May last year, when statistics had been received from 1,581 establishments employing 132,737 assistants, or 414 more than in the preceding month; the index then stood at 106·3, compared with 107·6 at the latest date.

Ottawa.—Manufacturing and trade showed moderate improvement in Ottawa, but construction was not so active; 226 employers reported payrolls aggregating 14,532, compared with 14,658 in the preceding month. Although the general tendency in this city was downward at the beginning of May, the index, at 106·4, was over three points higher than at the same date of last spring. Two hundred firms had then made returns, showing staffs numbering 13,581, or 219 more than at April 1, 1938.

Hamilton.—A combined working force of 33,251 was employed by the 327 co-operating establishments, as against 32,241 at April 1. Manufacturing was brisker, and trade, transportation and construction also showed some improvement. Industrial activity in Hamilton was at a lower level than in the same month of last year, despite the fact that a smaller advance had then been recorded by 297 reporting employers, whose personnel included 34,282 men and women.

Windsor.—The movement in Windsor was favourable. Returns for May 1 were tabulated from 198 firms with 19,461 workers, compared with 19,232 in the preceding month. There were moderate gains in manufacturing, construction and trade. Additions to their payrolls had been indicated by the 187 industries reporting at May 1, 1938, when they employed 20,329 persons. Employment was then at a rather higher level, the index standing at 148·9, as compared with 140·8 at the date under review

Winnipeg.—Manufacturing, construction and trade showed heightened activity in Winnipeg, where the 518 co-operating employers had a staff of 39,033, compared with 38,316 at April 1. Employment was not quite so active as at the same date of last year, when a rather larger advance had been noted in the 490 establishments from which information had been received; their personnel had included 39,353 men and women.

Vancouver.—The number employed in manufacturing increased in Vancouver, mainly in food factories; trade, services, transportation and communications was also rather brisker, while other industries showed little general change. The gains in trade were largest. According to data received from 515 firms, they had an aggregate working force of 36,627 persons, compared with 35,719 at April 1. The index was several points higher than at the beginning of May, 1938, when a smaller advance had been reported in the payrolls of the 460 co-operating businessmen, whose employees had numbered 34,312.

Employment by Industries

Manufacturing.—There was a moderate improvement in manufacturing at May 1, when 6,329 establishments reported a staff of 553,579 persons, compared with 547,016 in the preceding month. Factory employment has usually increased at May 1 in the experience of past years, the average gain being rather greater than that recorded at the latest date. While the crude index showed a rise from 107·1 at April 1 to 108·4 at the beginning of May, the seasonally-adjusted index declined slightly from 108·0 at the former to 107·6 at the latter date.

The unadjusted index numbers at May 1 in recent years are as follows:—1939, 108·4; 1938, 110·6; 1937, 113·8; 1936, 102·7; 1935, 95·6; 1934, 90·2; 1933, 76·8; 1932, 85·8; 1931, 100·7; 1930, 112·4; 1929, 119·8; 1928, 109·0 and 1927, 103·9.

TABLE II.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

Industries	[1]Relative Weight	May 1 1939	Apr. 1 1939	May 1 1938	May 1 1937	May 1 1936	May 1 1935	May 1 1934
MANUFACTURING	53·7	108·4	107·1	110·6	113·8	102·7	95·6	90·2

[1] For explanation of term "Relative Weight", see footnote to Table I.

Considerable increases were noted at May 1, 1939, in lumber, iron and steel, animal and vegetable foods. Chemical, clay, glass and stone, electric light and power, electrical apparatus, pulp and paper, mineral product and miscellaneous manufacturing plants also recorded heightened employment. On the other hand, the leather, musical instrument, textile and tobacco divisions showed curtailment. The losses in the textile and tobacco industries were seasonal; those in the former were below the average indicated at May 1 in the last eighteen years, while those in the latter were on much the same scale as in recent springs.

For May 1, 1938, information had been received from 6,082 factories employing 562,733 persons, a contra-seasonal decrease of 1,126 from their April 1 payrolls. The most marked losses had then occurred in the pulp and paper, iron and steel, textile and tobacco divisions.

Animal Products, Edible.—Increases in employment were noted in the meat, fish and dairying divisions; the improvement was more extensive than that reported at May 1, 1938, when the index was 2½ points lower. Statements were tabulated from 316 firms in this group, employing 24,545 persons, or 882 more than at the beginning of April. There was expansion in all provinces, that in British Columbia being most pronounced.

Fur and Fur Products.—The fur products group showed slightly less activity, according to the 64 co-operating manufacturers, who had 1,983 workers, compared with 2,004 at April 1; the index was fractionally lower than at the same date of last year, when an increase had been indicated.

Leather and Products.—The leather industries reported some curtailment, according to 320 establishments with 22,881 employees, a reduction of 358 from their staffs in the preceding month. The loss, which occurred mainly in Quebec, exceeded that noted at May 1, 1938; the index then was slightly lower.

Lumber and Products.—Marked seasonal improvement was recorded in this group, particularly in sawmills. Data were received from 912 employers of 41,122 men and women, as against 38,501 in the preceding month. There were general additions to personnel, those in Ontario being greatest. A much smaller increase had been registered at May 1, 1938, when the index was the same as at the beginning of May of the present year.

Plant Products, Edible.—The production of vegetable foods showed an advance, mainly in sugar and syrup factories and fruit and vegetable canneries. The upward movement was, on the whole, rather more pronounced than that indicated by the firms co-operating at May 1, 1938; the index then stood at 107·4, or fractionally lower than that of 107·7 at the date under review. Statements were compiled from 520 plants, whose payrolls aggregated 32,751, as compared with 31,854 at April 1, 1939. The gains were made chiefly in Quebec, Ontario and British Columbia.

Pulp and Paper Products.—Increased activity was noted in these industries, in which employment on the whole was slightly brisker than at the same date in 1938, when curtailment had been reported. The moderate improvement at May 1, 1939, took place in pulp and paper mills and in printing and publishing concerns. The working forces of the 706 co-operating establishments aggregated 65,215, as against 64,827 in their last report. The largest advances were in Ontario.

Rubber Products.—Employment in rubber factories showed little general change from April; returns were tabulated from 55 manufacturers employing 13,181 workers, or practically the same number as in the preceding month. The index was a few points higher than at the corresponding date of last year, when the situation was unchanged from April 1, 1938.

Textile Products.—The trend of employment was downward in this group at the beginning of May, according to statistics from 1,157 manufacturers having 104,415 men and women on their payrolls, compared with 104,543 in the preceding month. Woollen, silk and garment and personal furnishing factories were slacker. A much larger contraction had been shown at the same date of last year, but the index then stood at 122·3, compared with 120·4 at the date under review.

Beverages.—Data was received from 147 plants in this group employing 8,750 persons, or practically the same number as in the preceding month. Employment was in much the same volume as at May 1 in 1938.

Tobacco.—Important seasonal curtailment was reported in tobacco factories at the first of May; 45 establishments had a combined paylist of 7,520 workers, compared with 9,138 at April 1. Most of the loss occurred in Ontario. The index was some ten points lower than at the beginning of May of last year, when a similar decline had been noted.

Chemicals and Allied Products.—Employment in chemical and allied products showed a further increase; this occurred mainly in Nova Scotia and New Brunswick. Information was compiled from 299 manufacturers, whose staffs included 18,600 employees, as against 18,209 in April. The gain was smaller

than that of May 1 a year ago, when the index was several points higher.

Clay, Glass and Stone Products.—Building material factories in all provinces indicated seasonal improvement; although this resulted in the employment of a rather larger number of additional workers than that reported at the beginning of May last year, the index then was practically the same as that of 82·2 at the date under review. The 216 co-operating firms had 9,189 employees at May 1, 1939, as against 8,582 in the preceding month.

Electric Light and Power.—Improvement was recorded at the beginning of May in electric current plants, in which employment was brisker than in the spring of 1938. Statements were received from 100 companies employing 15,975 workers, an increase of 343 over their April 1 forces.

Electrical Apparatus.—Employment, on the whole, advanced moderately in electrical appliance works, according to data furnished by 124 establishments which had 16,998 employees. Similar additions to staffs had been registered at May 1, 1938, when the index was many points higher.

Iron and Steel Products.—The rolling mill, machinery, automobile, railway car, structural iron and steel and some other groups reported heightened activity at May 1, while the agricultural implement and certain other industries were rather quieter. The trend was upward in Quebec and Ontario, while elsewhere the changes were slight. Returns were tabulated from 915 manufacturers with 127,303 operatives, as compared with 125,299 in the preceding month. Although general curtailment had been indicated at the beginning of May of last year, the level of employment then was higher.

Non-Ferrous Metal Products.—Non-ferrous metal products showed little general change, according to statistics from 188 firms with a working force of 24,338 persons, or 15 fewer than at April 1. There was an advance in smelting and refining, but other branches of the industry were dull. An upward movement had been recorded in this group in the same month in 1938, and the index number then was two points higher.

Mineral Products.—Oil refineries and other plants classed in this division reported increased activity; the gain in personnel was smaller than that which occurred at May 1 of a year ago, when employment was in greater volume. Reports were received from 101 manufacturers, whose payrolls included 12,167 persons, as compared with 11,816 in the preceding month. The greatest gains were in Ontario and the Prairie Provinces.

Logging

The seasonal losses indicated at May 1 were on a smaller scale than those reported at the same date in 1938, but exceeded the average for May 1 in the last eighteen years; increases in British Columbia were much more than offset by reductions in other provinces, those in Quebec and Ontario being particularly large. The 399 co-operating firms employed 14,898 men, or 3,768 fewer than at April 1. The index, at 51·0, was many points lower than at the beginning of May in 1938, or any other year since 1933.

Mining

Coal.—Employment in coal-mining showed a contraction of a seasonal character; this was larger than that noted in the same month of last year, when the index was slightly higher than at May 1, 1939. Data were received from 105 operators with 22,474 employees, as compared with 23,915 in the preceding month. The decline took place mainly in the Prairie coal-fields, but there were also losses in British Columbia.

Metallic Ores.—The movement was favourable in metallic ore mines, chiefly in Quebec and Ontario. An aggregate working force of 41,612 persons was employed by the 234 co-operating firms, who had 41,252 in their last report. A contraction had been indicated at the beginning of May a year ago, and activity then was not so great as at the date under review, when it reached the maximum recorded at May 1 in the years since 1920.

Non-Metallic Mineral (Other than Coal).—Employment in this group showed a seasonal gain; 101 employers enlarged their payrolls by 266 workers to 8,194 at the beginning of May. The index was the same as at May 1, 1938, when the indicated advance had been somewhat more extensive.

Communications

Increased activity on the whole was noted in communications, in which the level of employment was very slightly lower than at the corresponding date of last year. The co-operating branches and companies reported a combined personnel of 21,909 men and women, of whom 16,709 earned their livelihood on telephones.

Transportation

Street Railways and Cartage.—Improvement was shown in local transportation at May 1, when the 279 firms from whom information was received, reported 27,810 employees, or 352 more than in the preceding month. The index was several points higher than at the same date in 1938, although a larger gain had then been noted. Ontario registered most of the advance recorded at May 1, 1939.

Steam Railways.—Steam railway operation afforded less employment in the Maritime Provinces and Ontario, while in the other economic areas heightened activity was shown. Statements were received from 100 employers in this division, whose payrolls were reduced from 56,470 at April 1 to 56,264 at the beginning of May. A small gain had been noted at May 1, 1938, when the index was slightly higher.

Shipping and Stevedoring.—A combined staff of 14,392 men, as compared with 12,061 in the preceding month, was reported by the 125 firms furnishing statistics in the water transportation group. Partly as a result of the late spring, this improvement was much less pronounced than that noted at the same date last year, and the index then was many points higher. There were considerable seasonal losses at May 1, 1939, in the Maritime Provinces, while in Quebec, Ontario and British Columbia the tendency was upward.

Construction and Maintenance

Building.—Employment in building construction showed seasonal expansion; the working forces of the 824 co-operating contractors aggregated 19,519 persons, as against 18,330 at the beginning of April. The greatest improvement was in Quebec and Ontario. The index was fractionally lower than at May 1, 1938, when the increase had been on a rather larger scale.

Highway.—Work on roads and highways was slightly more active at the beginning of May; 203 men were taken on by the 380 employers making returns, who had 69,864 on their staffs. There were gains in the Maritime and Prairie Provinces and Quebec, while in Ontario and British Columbia curtailment was indicated. A much greater advance had been recorded at the same date last year, but highway construction work did not then provide employment for so many men as in the spring of the present year.

Railway.—Thirty-four companies and divisional superintendents in this group employed 24,122 workers, as against 22,201 in their last report. There were increases in Ontario and the Western Provinces. A rather smaller gain had been noted at the beginning of May a year ago, but the index number then was slightly higher than at the date under review.

Services

The service group showed considerably heightened activity, according to statements from 587 establishments employing 29,316 persons, as against 28,911 in their last report. Gains were made in laundries and dry-cleaning plants, while the hotel and restaurant division showed little general change. Employment was brisker than at May 1 of 1938, when the movement had also been favourable.

Trade

Continued additions to personnel were shown generally in wholesale and retail trade; 2,024 trading establishments enlarged their forces by 3,751 persons to 126,765 at the date under review. The increase in the group as a whole exceeded the average for May 1 in the years, 1921-1938; this was probably due in part to the fact that the date of the enquiry fell at the week-end. The index was higher than at the beginning of May in any other year of the record.

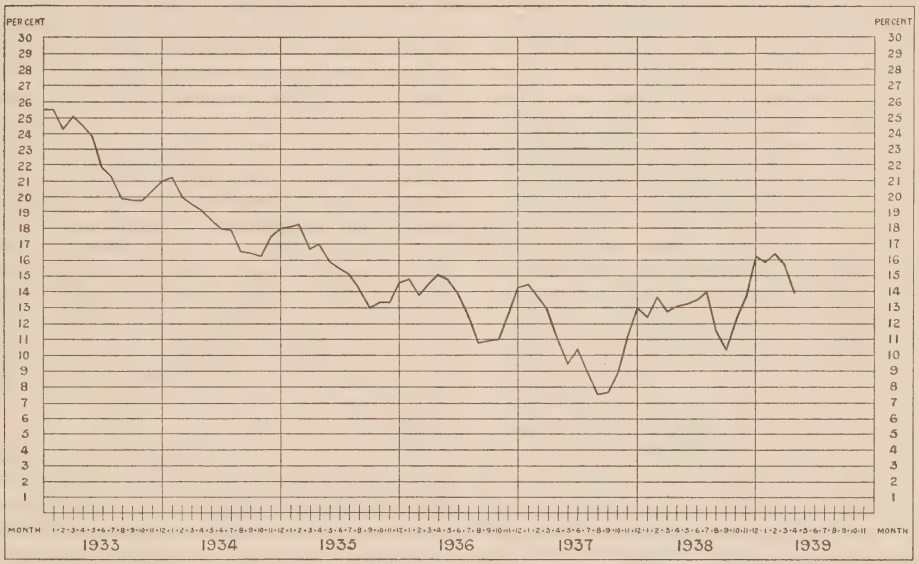
TABLES

Tables I and II give index numbers of employment by economic areas and industries. The columns headed "relative weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at May 1, 1939.

(2) Unemployment in Trade Unions at the Close of April, 1939

The term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades or who are idle due to illness are not considered as unemployed, while unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

There was a further though moderate increase in the volume of work afforded local trade union members at the close of April from the preceding month, as manifest by the returns compiled from 1,910 labour organizations embracing a total of 242,398 members. Of these, 33,593, or a percentage of 13·9, were idle at the end of the month in comparison with 15·7 per cent of inactivity in March. A less favourable trend, however, was noted from April, 1938, though the change was but fractional, unemployment for that month standing at 13·1 per cent. Quebec unions, largely due to the better conditions prevailing in the garment establishments of the province and in somewhat lesser degree to gains in the transportation industries, recorded a 3 per cent rise in employment for March. Improvement



of over 2 per cent was shown in both British Columbia and Ontario, the fishing industry in the former province and the transportation industries in the latter being the determining factors in the more favourable employment movement. Activity in Nova Scotia, Manitoba and Saskatchewan also tended upward from March, though the variations were less than one per cent. Minor contractions, however, occurred in New Brunswick and Alberta. When contrasting with the returns for April, 1938, moderate employment advancement was recorded by British Columbia unions during the month reviewed and the trend of activity in Alberta was but nominally improved. Rather noteworthy employment recessions were indicated by Nova Scotia members, the coal mines and the iron and steel group particularly, showing less active conditions. In New Brunswick and Manitoba there were declines on a smaller scale and slight employment curtailment was manifest in Saskatchewan, Quebec and Ontario.

A separate tabulation is made each month showing the unemployment existing among trade union members in the largest city in each province, with the exception of Prince Edward Island. Montreal unions during April indicated fair sized gains in work afforded from March and improvement in smaller measure was recorded by Edmonton, Vancouver, Winnipeg and Toronto members. Employment in Regina, Saint John and Halifax, however, subsided slightly. Compared with the returns for April, 1938, heightened activity of rather noteworthy degree was reported by Halifax members and in Vancouver and Regina conditions were somewhat better. Employment for Saint John members was considerably curtailed from April of last year and the situation declined moderately among Edmonton and Winnipeg unions. Fractional recessions only were evident in Montreal and in Toronto.

From the chart which appears with this article and illustrates the trend of unemployment by months from January, 1933, to date it will be seen that the curve during April continued in the downward course noted in March, an evidence of improved conditions. There was little variation in the level of the curve at the close of April from the corresponding month in 1938, though the tendency was less favourable during the period reviewed.

Continued gains in employment were indicated in the manufacturing industries during April, the 560 unions from which reports were tabulated, with 94,029 members, showing that 11,068 or 11·8 per cent were unemployed, as compared with 13·3 per cent in March. A considerable proportion of the advance took place among garment workers in the province of Quebec, who reported a much larger number of their members busy than in March. The percentage increase among glass workers was quite pronounced, but affected few persons as their membership was rather small. Conditions for hat, cap and glove workers were moderately better than in March and lesser

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

increases were registered by bakers and confectioners, cigar and tobacco workers, paper makers, wood and gas workers and metal polishers. On the contrary, general labourers and fur workers showed a rather marked drop in work afforded and curtailment in activity on a somewhat smaller scale was evident among meat cutters and butchers. Employment for iron and steel, textile and carpet, brewery, leather and jewellery workers, mill and smeltermen, and printing tradesmen subsided slightly. A more favourable movement was noted in the manufacturing industries, as a whole, from April last year when 13·9 per cent of the members reported were out of work. In this comparison as in the previous one the garment trades were largely responsible for the rise in employment shown over April, 1938. Decided expansion was also reflected by wood and fur workers, and noteworthy gains were evident among bakers and confectioners, and metal polishers. Heightened activity of lesser degree was registered by hat, cap and glove, glass, cigar and tobacco, and gas workers, meat cutters and butchers, and papermakers. Leather workers, however, suffered extensive losses in work available from April last year and the situation for textile and carpet, brewery, and iron and steel workers, and general labourers was considerably less favourable. Jewellery workers showed more moderate curtailment and fractional declines only were reported by printing tradesmen and mill and smeltermen.

From unions of coal miners 60 reports were received during April, which involved a membership of 22,271 persons, 3,178 of whom or a percentage of 14·3 were idle, compared with 12.7 per cent in March and a percentage of 13·4 in April last year. In Nova Scotia and British Columbia coal fields there was a slightly upward trend of employment during April from the preceding month, while in Alberta some curtailment in activity was noted. When comparing with returns for April a year ago, British Columbia mines were much quieter during the month reviewed and conditions were also less active in the Nova Scotia mines. In Alberta, however, the situation showed noteworthy improvement. Short time work also was prevalent among the coal miners throughout April.

The building and construction trades showed a tendency toward increased employment during April when compared with the returns for March, though the change was merely nominal. This was apparent from the returns compiled from 216 associations of these tradesmen, with 27,411 members, 10,975 or a percentage of 40·0 of whom were idle, contrasted with 40·2 per cent in the preceding month. Unemployment was, however, considerably in excess of that recorded in April, 1938, when 33·7 per cent of the membership involved were without work. Important seasonal increases in activity were evident among painters, decorators and paperhangers, and tile layers, lathers and roofers during April from the preceding month, and gains, on a much smaller scale, were noted by bricklayers, masons and plasterers, and plumbers and steamfitters. Bridge and structural iron workers, and electrical workers, on the contrary, suffered noteworthy curtailment in employment, and more moderate recessions occurred among steam shovelmen and carpenters and joiners. The tendency for granite and stonecutters, and hod carriers and building labourers, while less favourable, showed little variation from March. When making a comparison with the returns for April, 1938, large increases in slackness were registered by steam shovelmen, bridge and structural iron workers, carpenters and joiners, electrical workers and granite and stonecutters during the period under review and noteworthy contractions in employment were manifest by painters, decorators and paperhangers. Lesser declines were evident among tile layers, lathers and roofers, and plumbers and steamfitters. Hod carriers and building labourers, and bricklayers, masons and plasterers were the only tradesmen to reflect improvement in the situation from April last year, the gains recorded being of a moderate degree.

Better conditions prevailed in the transportation industries during April than in the previous month according to the returns compiled from 811 unions with a membership total of 64,274 persons. Of these, 6,109 or a percentage of 9·5 were out of work on the last day of the month, as compared with 13·2 per cent in March. Some falling off in activity, however, was apparent from April last year when 8·2 per cent of the members indicated were unemployed. Navigation workers were much busier during April than in March and among steam railway employees, whose returns included over 79 per cent of the entire group membership reported, moderate advancement was noted. Employment for teamsters and chauffeurs was but nominally retarded from March, while among street and electric railway employees the situation remained unchanged in the two months compared. Navigation workers, steam railway employees and teamsters and chauffeurs all participated in varying

degrees in the less favourable movement shown from April last year, teamsters and chauffeurs reflecting the most noteworthy change. Street and electric railway employees, on the other hand, indicated a fractional rise in work afforded.

Retail shop clerks reported 0·5 per cent of unemployed members during April in contrast with 0·1 per cent in March and with a fully engaged situation in April last year. The percentage for April this year was based on the returns tabulated from 6 associations of these workers with an aggregate membership of 1,866 persons.

Activity for civic employees tended favourably during April from the previous month, though the variation was quite slight, the 81 associations making returns with a membership numbering 10,127 persons showing 1·4 per cent of idleness in contrast with 2·2 per cent in March. Employment was fractionally retarded from April last year, when 0·9 per cent of the members reported were without work.

A higher level of employment was reflected in the miscellaneous group of trades during April than in either the previous month or April a year ago, the 139 labour organizations forwarding reports, with 11,518 members, indicating that 756 were out of work on the last day of the month, a percentage of 6·6 contrasted with percentages of 9·8 in March and 7·4 in April, 1938. Unclassified workers showed pronounced improvement in conditions from March and moderate gains were evident among barbers. Activity tended favourably for hotel and restaurant, and theatre and stage employees, and stationary engineers and firemen, though the variations from March were less than one per cent. Contrasted with the returns for April of last year barbers, stationary engineers and firemen, and theatre and stage employees showed a better level of activity during the month reviewed, while among unclassified workers and hotel and restaurant employees some curtailment in work afforded was indicated. The changes throughout, however, were not particularly outstanding.

Fishermen with 5 associations reporting a membership of 1,980 persons during April, showed that 328 or a percentage of 16·6 were out of work on the last day of the month, compared with 36·7 per cent in March. In April, 1938, only 0·5 per cent of inactivity was recorded.

At the close of April reports were tabulated from 4 unions of lumber workers and loggers with an aggregate of 1,806 members, 554 or 30·7 per cent of whom were without work, in contrast with a percentage of 31·5 in March. A considerable slump in employment was reflected from April last year when 4·6 per cent of idleness was reported.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1929 to 1938, inclusive, and also the percentages of unemployment by provinces for April of each year from 1929 to 1936, inclusive, and for each month from April, 1937, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1929.....	4·0	1·6	7·7	4·3	7·1	5·3	6·4	5·9	**5·7**
Average 1930.....	5·4	3·7	14·0	10·4	9·6	10·6	13·3	11·6	**11·1**

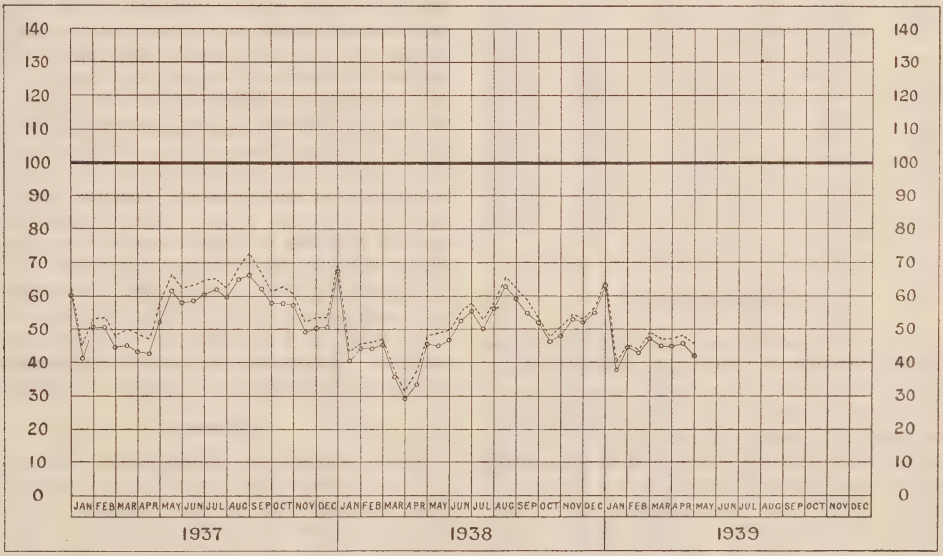
(3) Employment Office Reports for April, 1939

The volume of business transacted by the offices of the Employment Service of Canada during April, 1939, as indicated by the average daily placements effected, showed a nominal loss from March, but a gain of nearly 15 per cent over April a year ago. In comparison with the preceding month losses were recorded in construction and maintenance, logging, services and trade, the first named being very heavy. These declines, however, were offset, in part, by gains in farming, manufacturing, transportation and mining, that in farming being the only one of moment. When compared with the corresponding period a year ago, construction and maintenance recorded a very substantial gain, which much more than counterbalanced the losses shown in logging, farming, transportation, mining, manufacturing and trade, all of which, with the exception of that in logging, were comparatively small. A gain was registered in services, which was likewise minor in volume.



tion during the first half of April being slightly higher in trend, but during the latter half both curves pursued a downward course and at the close of the month under review the levels attained were about three points below those reached at the end of the corresponding period a year ago. The ratio of vacancies to each 100 applications was 48·3 and 45·5, respectively, during the first and the second half of April, 1939, in contrast with ratios of 38·0 and 48·2 during the corresponding periods of 1938. The ratios of placements to each 100 applications during the periods under review were 45·6 and 42·1 as compared with 33·4 and 45·5 during April, 1938.

The average number of vacancies reported daily to the offices of the Service throughout Canada was 1,174, as compared with 1,152 in the previous month and with 1,045 in April a year ago.

The average number of applications for employment received daily by the offices dur-

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements—o—o—o—o—o—o

The accompanying chart shows the trend of employment from January, 1937, to date, as represented by the ratio of vacancies offered and of placements effected for each 100 applications for employment registered at the offices throughout Canada, computations being made semi-monthly. It will be seen from the graph that the curves of vacancies and placements in relation to applications showed little varia-

ing the month under review was 2,499, as compared with 2,443 in March and with 2,444 in April last year.

The average number of placements made daily by the offices of the Service during April, 1939, was 1,094, of which 590 were in regular employment and 504 in work of one week's duration or less, as compared with a total daily average of 1,097 during the preceding

month. Placements in April, 1938, averaged 954 daily, consisting of 627 in regular and 327 in casual employment.

During the month of April, 1939, the offices of the Service referred 26,484 persons to vacancies and effected a total of 25,146 placements. Of these, the placements in regular employment were 13,572, of which 8,804 were of men and 4,768 of women, while placements in casual work numbered 11,574. The number of vacancies reported by employers was 16,403 for men and 10,591 for women, a total of 26,994, while applications for work numbered 57,469, of which 42,006 were from men and 15,463 from women. Reports for March, 1939, showed 31,086 positions available, 65,948 applications made and 29,604 placements effected, while in April, 1938, there were recorded 25,072 vacancies, 58,638 applications for work and 22,889 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada each year, from January, 1929, to date:—

Year	Placements		
	Regular	Casual	Totals
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939 (4 months)	62,628	51,088	113,716

Nova Scotia

During the month of April, 1939, positions offered through Employment Offices in Nova Scotia were nearly 2 per cent higher than in the preceding month, but 6 per cent below the corresponding month of last year. There was an increase of nearly 6 per cent in placements when compared with March, but a decrease of nearly 5 per cent in comparison with April, 1938. Placements in construction and maintenance and services were higher than in April of last year, but there were declines in mining, farming and logging. The changes in all other groups were small. Industrial divisions in which most of the placements were effected during the month were logging, 50; construction and maintenance, 346, and services, 636, of which 540 were of household workers. During the month 110 men and 155 women were placed in regular employment.

New Brunswick

There was a decrease of nearly 1 per cent in the number of positions offered through Employment Offices in New Brunswick during April, when compared with the preceding month, but an increase of over 11 per cent in comparison with the corresponding month of last year. The same percentages of change were reported in placements under both comparisons. There was a large increase in construction and maintenance when comparing the placements with April, 1938, and smaller gains in manufacturing and logging. Small losses, however, were reported in services and trade and nominal changes, only, in all other groups. Placements by industrial divisions included manufacturing, 34; construction and maintenance, 357, and services, 627, of which 499 were of household workers. There were 31 men and 92 women placed in regular employment.

Quebec

Opportunities for employment, as indicated by orders received at Employment Offices in the Province of Quebec during April, were nearly 13 per cent less favourable than in the preceding month and over 21 per cent below the corresponding month of last year. There was a decrease also in placements of 19 per cent in comparison with March and of nearly 22 per cent when compared with April, 1938. Substantial declines in logging and construction and maintenance, with a smaller loss in manufacturing, accounted for the decrease in placements for the province as a whole, though there were small reductions also in mining, transportation and farming. Services was the only group to show any improvement. Industrial divisions in which most of the placements were effected during the month were manufacturing, 146; logging, 130; construction and maintenance 2,142; trade, 102, and services, 2,587, of which 2,369 were of household workers. Placements in regular employment numbered 2,368 of men and 1,544 of women.

Ontario

Orders received at Employment Offices in Ontario during April called for 14 per cent fewer workers than in the preceding month, but 21 per cent more than during the corresponding month of last year. There was a decrease in placements of nearly 16 per cent when compared with March, but a gain of nearly 23 per cent in comparison with April, 1938. The improvement in placements over April of last year was due to a substantial increase in construction and maintenance, offset in part by large declines in logging, services and farming. Of the changes in other

(Continued on page 610)

groups, a gain in manufacturing and losses in transportation and trade were the most important. Placements by industrial divisions included manufacturing, 495; farming, 1,185; construction and maintenance, 3,716; trade, 204, and services, 3,591, of which 2,481 were of household workers. During the month 2,649 men and 1,453 women were placed in regular employment.

MANITOBA

Employment opportunities, as indicated by orders received at Employment Offices in Manitoba during April, were nearly 15 per cent better than in the preceding month and nearly 23 per cent above the corresponding month of last year. There was an increase also in placements of 14 per cent when compared with March and of over 24 per cent in comparison with April, 1938. Except for a minor loss in logging, all industrial divisions participated in the increase in placements over April of last year, the most important gain being in farming. Placements by industrial divisions included manufacturing, 67; farming, 837; construction and maintenance, 96, and services, 818, of which 698 were of household workers. During the month 1,001 men and 388 women were placed in regular employment.

SASKATCHEWAN

The demand for workers, as indicated by orders received at Employment Offices in Saskatchewan during April, was nearly 32 per cent higher than in the preceding month and over 8 per cent above the corresponding month of last year. There was an increase also in placements of over 44 per cent when compared with March and of over 7 per cent in comparison with April, 1938. Small increases in construction and maintenance, services and farming accounted for the gain in placements over April of last year, there being little or no change in all other groups. Industrial changes in which most of the placements were effected during the month were farming, 865; construction and maintenance, 81, and services, 617, of which 481 were of household workers. There were 952 men and 381 women placed in regular employment.

ALBERTA

Employment Offices in Alberta were notified of nearly 16 per cent more vacancies in April than in the preceding month, but over 12 per cent fewer than during the corresponding month of last year. Placements were nearly 13 per cent higher than in March but nearly 14 per cent below those of April, 1938. A fairly large decrease in farming, with smaller losses in construction and maintenance, services and manufacturing, accounted for the decline in placements from April of last year, all other groups showing minor improvement. Placements by industrial divisions included manufacturing, 51; farming, 643; transportation, 67; construction and maintenance, 222, and services, 624, of which 480 were of household workers. During the month 810 men and 447 women were placed in regular employment.

BRITISH COLUMBIA

Positions offered through Employment Offices in British Columbia during April were nearly 43 per cent less than in the preceding month, but nearly 108 per cent above the corresponding month of last year. There was a decrease of nearly 43 per cent in placements when compared with March, but an increase of nearly 106 per cent in comparison with April, 1938. The substantial increase in placements over April of last year was due to a large gain in construction and maintenance and moderate improvement in services and logging. The changes in all other groups were quite small. Industrial divisions in which most of the placements were effected during the month were logging, 119; farming, 132; construction and maintenance, 2,105, and services, 806, of which 525 were of household workers. There were 883 men and 308 women placed in regular employment.

Movement of Labour

During the month of April, 1939, the offices of the Employment Service of Canada made 13,572 placements in regular employment, 5,808 of which were of persons for whom the employment found was outside the immediate locality of the offices at which they were registered. Of the latter, 203 were granted the Employment Service reduced transportation rate, 151 going to centres within the same province as the despatching office and 52 to other provinces. The reduced transportation rate which is 2·5 cents per mile with a minimum fare of $4.00 is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may wish to travel to distant employment for which no workers are available locally.

In Quebec during April the Hull office transferred 41 bushmen to employment in the Pembroke zone. From Ontario centres during April 54 persons were conveyed at the reduced rate to provincial points. The Port Arthur

office was instrumental in the despatch of 35 bush workers, 1 mine carpenter and 1 cook, the Fort William office of 8 bush workers, 2 hotel employees, 1 cook and 1 teamster and the Sudbury office of 2 bush workers to various sections within their respective zone. Destined to the Port Arthur zone in addition was 1 mine worker sent from Timmins. The Ottawa zone received 1 tool maker from Toronto, and the London zone 1 oiler from Kingston. The labour movement in Manitoba during April was entirely from Winnipeg and involved the transfer of 16 persons, 5 within the province and 11 outside. The latter were for the Port Arthur zone and included 7 mine employees, 1 bushman, 1 lineman, 1 teamster and 1 labourer. Provincially 4 farm hands and 1 mine worker were transported to centres in the Winnipeg zone. Benefiting by the reduced rate in Saskatchewan during April 1 labourer secured a certificate at the Estevan office for transportation to Moose Jaw. Offices in Alberta during April issued 87 reduced rate certificates, all provincial. For employment within its own zone the Edmonton office transferred 51 transportation company employees, 10 farm hands, 1 farm housekeeper, 5 miners, 4 highway construction workers, 2 hotel employees, 2 sawmill hands, 2 fish company employees, 1 teacher, 1 building construction worker, 1 blacksmith, and 1 housekeeper. From Edmonton also, 2 farms hands were despatched to Lethbridge. The Calgary office was responsible for the transfer of 1 farm hand to Drumheller and of 3 farm hands to points in the Calgary zone. Vouchers for transportation were granted in British Columbia during April to 4 persons going to provincial employment. These were issued at Vancouver, from which centre 1 lumber grader and 1 handyman went to Kamloops, 1 cook to Nelson and I miner to a point in the Vancouver zone.

Of the 203 workers who took advantage of the Employment Service reduced transportation rate during April 134 travelled by the Canadian National Railways, 66 by the Canadian Pacific Railway, 1 by the Temiskaming and Northern Ontario Railway, 1 by the Northern Alberta Railway, and 1 by the Pacific Great Eastern Railway.

(4) Building Permits Issued in Canada During April, 1939

The Dominion Bureau of Statistics tabulated returns from 58 cities which granted permits for construction work valued at $5,936,806 during April, as compared with $3,351,194 in the preceding month, and $4,890,677 in the same month of last year. There was, therefore, an increase of $2,585,612 or 58·3 per cent as compared with March, and of $1,046,129 or 21·4 per cent over April of last year.

The estimated value of the construction authorized in the first four months of the present year was $12,888,791; this was slightly higher than the aggregate of $12,775,777 reported in the period, January-April, 1938, although it was lower than in 1937. The cumulative total for the first four months in each of the years since 1931 has been decidedly smaller than the average in the period since 1919. The wholesale prices of building materials have recently been rather lower than in the same months of 1938 or 1937, but were higher than in other years since 1930.

Some 50 cities furnished detailed statistics for April, 1939, showing that they had issued more than 500 permits for dwellings valued at approximately $1,800,000 and for over 2,300 other buildings, estimated to cost almost $3,600,000. There were also two engineering projects valued at $7,000. In March, authority was given for the erection of about 300 dwellings and 1,400 other buildings, valued at approximately $1,000,000 and $2,100,000, respectively.

All provinces except Prince Edward Island reported increases in the value of the building represented by the permits issued during April as compared with the preceding month, the greatest advance of $1,229,309 or 158·8 per cent taking place in Quebec. The return for Prince Edward Island shows that no permits were taken out during the month under review.

As compared with April, 1938, there were increases in New Brunswick, Quebec, Ontario, Manitoba and British Columbia. In this comparison also, the largest gain was in Quebec, where the permits were higher in value by $1,159,173 or 137·3 per cent. Declines from April, 1938, were recorded in the remaining provinces, that of $535,659 or 53·1 per cent in Alberta being most pronounced.

Of the four largest cities, Montreal, Winnipeg and Vancouver showed increases in the building authorized during April as compared with the preceding month, and also over April, 1938. In Toronto, the estimated value was lower than in March, 1939, but was slightly higher than in April of last year. Of the other centres, Syd-

ney, Moncton, Quebec, Sherbrooke, Brantford, Chatham, Fort William, Galt, Guelph, Hamilton, Kingston, Kitchener, London, Oshawa, Port Arthur, St. Catharines, Sault Ste. Marie, Welland, St. Boniface, Calgary, Lethbridge, Kamloops and North Vancouver reported increases in the value of the construction work represented by the permits issued, as compared with March, 1939, and also with April, 1938.

Table I gives the value of the building authorized by 58 cities during April and in the first four months of each year since 1926, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first four months of the same years are also given (1926=100).

TABLE I

Year	Value of permits issued in April	Value of permits issued in first four months	Indexes of value of permits issued in first four months (1926=100)	Average indexes of wholesale prices of building materials in first four months (1926=100)
	$	$		
1939	5,936,806	12,888,791	31·0	87·4
1938	4,890,677	12,775,777	30·8	91·2
1937	6,106,693	16,634,685	40·0	93·8
1936	3,237,366	8,829,837	21·3	84·2
1935	6,300,046	14,807,316	35·6	81·5
1934	2,269,157	4,980,156	12·0	82·4
1933	1,595,502	4,661,323	11·2	75·1
1932	4,370,863	13,823,873	33·3	79·1
1931	13,495,165	38,241,259	92·1	83·7
1930	16,978,076	46,471,338	111·9	96·2
1929	29,656,709	72,606,937	174·8	99·4
1928	18,606,167	51,769,505	124·6	95·7
1927	17,312,470	42,340,823	101·9	96·3
1926	19,044,499	41,538,073	100·0	101·7

As already stated, the aggregate for the first four months of this year was slightly larger than in the same period of 1938; it was also greater than in 1936, 1934 or 1933, but was exceeded by the January-April total in 1937, 1935 or 1932 and also by the figures for preceding years for which data are available. The index numbers of wholesale prices of building materials in 1939 were lower than in the months, January-April in 1938 or 1937, but were rather higher than in earlier years since 1930.

Table II gives the value of the building permits issued by 58 cities during April and March, 1939, and April, 1938. The 35 cities for which records are available since 1910 are marked thus "*."

[1]Report not received in time for tabulation.

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF MAY, 1939

Reports of the Superintendents of the Employment Service of Canada

THE employment situation at the end of May, 1939, was reported by the superintendents of the Employment Service of Canada to be as follows:—

Farmers in the Maritimes were busy with spring ploughing and planting, city markets being well patronized and prices firm. Lumbering was confined chiefly to pulpwood cutting and peeling, men being sent out as needed. Sawmills were operating steadily. Big hauls of herring and gaspereaux were reported along the Northumberland Strait, but catches of salmon and lobsters were only fair. Coal mines in the New Glasgow area operated from three to five days per week, while those in Cape Breton and vicinity worked three and a half to six days. Establishments manufacturing confectionery and foodstuffs reported business good, but some idleness was reported in the iron and steel industry. Building construction showed improvement and highway work progressed steadily. Passenger and freight traffic was quite heavy and trade above the average. A number of requests was received in the Women's Division for housemaids and charworkers and placements were made accordingly.

The demand for farm hands in the Province of Quebec was particularly heavy in the regions served by Montreal and Sherbrooke offices, although in the latter district spring work had been delayed by poor weather. River driving provided employment for about 1,000 men at Chicoutimi, while many others were working at Hull and Matane. A number of manufacturing centres reported improvement, amongst them being Bagotville and Matane—paper mills; Hull—match, paper and toy plants; LaTuque —building materials; Montreal—shoes and macaroni factories, and Sherbrooke—iron and steel and machinery establishments. The leather industry at Quebec City was operating at half capacity, but clothing was very active. Sash and door factories were slack at Rouyn, as building construction had been delayed due to unfavourable weather, but they had resumed operations at Val d'Or, although only the older employees there had been re-engaged. At Three Rivers, conditions were normal. Construction of many new buildings including dwellings, factories and apartment houses was reported from all parts of the province and at LaTuque many men had secured employment at the St. Maurice Power Dam. Repairs to sidewalks, streets, bridges and highways also afforded work for a number of persons. Trade, in general, was good, being exceptionally brisk at Montreal, as a result of Their Majesties' visit. Re-opening of ports also provided need for additional labour. Numerous placements of women in household service, likewise, were recorded.

Farm orders in Ontario increased slightly, but the call was unusually slow for the season of the year, seeding and planting having been greatly retarded through continued cold weather. Pulp cutters were being sent out to logging camps, and river driving was under way. Sawmills, also, were starting operations and in some districts were already running with full crews. Mining was normal, with a fair demand reported for various classes of mining men. No material change was noted in manufacturing; some lines manifested additional activity, partly seasonal, while others still registered slackness, which was apparent in reduced working hours and lower staff levels. Recorded activity in construction was being maintained and employment for building mechanics was increasing, the work at present being chiefly confined to repairs and small dwellings .Maintenance of highways continued, although highway camps were not yet open; however, several extra railway gangs had been sent out. Few calls were received for marine help, but shipments of freight on the Great Lakes were very good. Trade was better. Requests for capable domestics for city and country positions were numerous, nevertheless experienced household workers were not always available and with spring cleaning nearly completed, the calls for casual help in domestic service were slightly below those previously recorded. A few placements of women also were made in industrial plants.

There was little demand for farm help in the Prairie Provinces as seeding was completed. Crop conditions in nearly all sections were very good, owing to an abundant supply of moisture. Logging was fairly active, a number of pulpwood cutters having been sent out. Mining was quiet and manufacturing unchanged. Building construction was particularly brisk at Winnipeg; elsewhere, some improvement was noted, although not in any marked degree. Work continued on highways and a few men were placed on extra gangs for the railways. A considerable amount of temporary employment also resulted from preparations for the Royal

Visit. Trade was rather slack. In the Women's Division an increase was reported in city calls for restaurant and household workers, for which experienced help was provided; country vacancies, however, were difficult to fill.

Farming in British Columbia was quiet, but logging camps and shingle mills continued active, although there was no great movement of labour. Mining was rather slack, except for development work, which was being carried on near Penticton. Considerable improvement was noted in building, a number of smaller sized homes being erected, while Their Majesties' visit was responsible for a great demand for casual labour, especially in the construction of scores of stands along the route of the Royal procession in Victoria. Section men and extra gang labourers also had been sent out by all railroads for summer work and plenty of longshore work was available on the waterfronts at New Westminster and Victoria. Trade was good, but collections slow. There was a steady demand for experienced domestics at fair wages, with casual work for women likewise better.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, May, 1939, summarized the employment situation as follows:—

Employment showed a further improvement between March 13 and April 17. It was most marked in building, public works contracting, agriculture and horticulture, ship building and repairing, engineering, iron and steel manufacture, the motor vehicle, cycle and aircraft industry, metal goods manufacture, the cotton and tailoring industries, the distributive trades, hotel and boarding house service, entertainments, sport, etc., and railway and shipping services. On the other hand, employment declined in the wool textile and hosiery industries and in boot and shoe manufacture.

It is provisionally estimated that at April 17, 1939, the number of insured persons, aged 16-64, in employment in Great Britain was approximately 12,511,000. This was 108,000 more than at March 13, 1939, and on a comparable basis, about 270,000 more than at April 4, 1938.

Among insured persons, aged 16-64, the percentage unemployed in Great Britain and Northern Ireland, at April 17, 1939, was 11·4 compared with 12·1 at March 13, 1939. For April 4, 1938, the percentage (which excludes the classes brought into insurance in April, 1938) was 12·4. For persons insured under the general scheme the corresponding percentages were 11·6 at April 17, 1939, 12·3 at March 13, 1939, and 12·7 at April 4, 1938. For persons within the agricultural scheme the percentages were 6·1, 7·8 and 5·7 respectively.

At April 17, 1939, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,343,295 wholly unemployed, 238,729 temporarily stopped, and 62,370 normally in casual employment, making a total of 1,644,394; this was 82,535 less than at March 13, 1939, and 103,370 less than at April 4, 1938.

The total of 1,644,394 persons on the registers in Great Britain at April 17, 1939, included 896,790 persons with claims admitted for insurance benefit, 538,880 with applications authorized for unemployment allowances, 34,946 persons with applications for insurance benefits or unemployment allowances under consideration, and 173,778 other persons, of whom 51,761 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at April 17, 1939, was 1,726,083, as compared with 1,813,987 at March 13, 1939, and 1,842,115 at April 4, 1938.

United States

According to a press release issued May 25 by the Secretary of Labor, Miss Frances Perkins, there was a decline of approximately 280,000 workers in bituminous-coal mining between mid-March and mid-April indicated in preliminary reports supplied to the U.S. Bureau of Labor Statistics. This decline more than offset the estimated increase of over 200,000 workers in other fields of non-agricultural employment and resulted in a net loss of 76,000 workers over the month interval. With the exception of bituminous-coal mining, the report showed that employment changes conformed generally with the usual April pattern.

The following paragraphs taken from the official press release indicate the employment situation in the United States to be as follows:—

Despite the pronounced decrease in bituminous-coal mining employment, there were

approximately 185,000 more workers employed in non-agricultural industries in April, 1939, than in April of last year. These figures do not include employees on Works Progress Administration and National Youth Administration projects nor enrollees in the Civilian Conservation Corps.

Retail trade establishments employed approximately 59,000 additional workers in April to handle spring trade. Increased activity in the construction industry resulted in general employment gains in all areas. Substantial seasonal gains were also reported by dyeing and cleaning establishments and quarries and non-metallic mines, and smaller gains were reported in metal mining, public utilities, laundries, insurance, hotels, and anthracite mining. The employment increase of 2·9 per cent in the anthracite mining industry was accompanied by a pay-roll increase of 32·3 per cent, reflecting the increased production which resulted from orders placed because of the shut-down in the bituminous-coal mining industry. Class 1 steam railroads reported an increase of 1,700 workers.

With the exception of bituminous coal, reported employment decreases in non-manufacturing industries were not significant. Brokerage and crude petroleum producing companies reported decreases of 0·9 per cent and 0·4 per cent, respectively. Employment in factories and in wholesale trade establishments showed virtually no change, the declines being only one-tenth of 1 per cent.

Factory Employment.—There was a decline of 0·1 per cent of 8,000 wage earners in manufacturing industries between March and April, while pay rolls declined 2·2 per cent or $3,600,000 per week.

Of the 87 manufacturing industries surveyed, 38 showed gains in employment in April and 31 reported pay-roll increases. Employment in the durable-goods group of industries as a whole advanced for the third consecutive month, the increase of 0·7 per cent raising the April durable goods index (84·1) to the highest point recorded since December, 1937. The pay-roll index for this group (80·1) showed no change over the month interval. In the non-durable industries, employment fell 0·9 per cent, the April index (98·0) being below the levels reached in the latter half of 1938 and the early months of 1939. Pay rolls for this group dropped 4·3 per cent to an index of 90·5.

Non-manufacturing Employment.—Retail trade establishments reported an employment gain of 1·8 per cent, or 59,000 workers between March and April. This increase did not reflect the Easter rise in employment, since the Easter peak of 1939 occurred too early to affect employment in the April 15 pay period reported to the Bureau. The increase, however, was slightly greater than that which has taken place in earlier years with an early Easter season. In wholesale trade the slight employment decline, 0·1 per cent, followed the usual seasonal trend between March and April.

In bituminous coal mines the suspension of operations pending the signing of new agreements resulted in an employment decrease of 69·7 per cent or 280,000 workers between mid-March and mid-April, according to firms reporting to the Bureau of Labor Statistics. The employment decline was accompanied by a pay-roll loss of 77 per cent or over six and a half million dollars in weekly wages.

Anthracite mines took on 2·9 per cent or 2,200 more workers in April and pay rolls were increased by 32·3 per cent. Increased production resulting from orders received during the shut-down of bituminous mines accounted for the sharp rise in pay rolls.

Private Construction Employment.—Employment in private building construction showed an increase of 11·4 per cent from March to April, according to reports received from 13,714 contractors employing 114,455 workers. The April increase in employment, a further rise over the substantial seasonal gains reported in March, has been exceeded during the past seven years only by the April gains of 1934 and 1936. Pay rolls increased 15·5 per cent.

Public Employment.—Because of curtailed funds employment in April on projects operated by the Works Progress Administration dropped to 2,629,000, a decrease of 287,000 as compared with March. There were 46,000 more workers employed on these projects than in the same month in 1938. Pay-roll disbursements of $148,000,000 were $8,871,000 less than in March and $16,581,000 more than in April, 1938. On Federal projects under The Works Program there was an increase in employment; on work projects of the National Youth Administration there was a decrease. No change in the number on Student Aid was reported.

As a result of the seasonal increase in road building and the accelerated pace in naval construction, employment and pay rolls on construction projects financed from regular Federal appropriations were greater than in the preceding month, bringing the number employed up to 190,000 and pay rolls to $19,095,000 for the month ending April 15.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is

vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages, rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

NATIONAL HARBOURS BOARD

Construction of a concrete retaining wall in front of Sheds 24 and 25, Montreal Harbour, Montreal, P. Q. Name of contractor, L. G. Ogilvie & Co., Ltd., Montreal, P.Q. Date of contract, May 2, 1939. Amount of contract, $4,590. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 45
Boatmen (rowboats)	0 40
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Compressor operators (gasoline or electric)	0 50
	Per day
Divers (full day's pay to be allowed whether employed full or part time)	$14 00
Divers' tenders (full day's pay to be allowed whether employed full or part time)	5 00
	Per hour
Drivers	$0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drill runners	0 50
Engineers, operating, steam:	
Single or double drum	0 65
Three or more drums	0 75
Engineers on steel erection	0 75
Engineers, crane (steam, gasoline or electric)	0 70
Firemen, stationary	0 50
Hoist operators—tower (gasoline or electric)	0 60
Labourers	0 40
Machinists	0 65
Machinists' helpers	0 45
Motor boat operators	0 45
Motor truck drivers	0 45

	Per hour
Motor truck driver and truck	1 45
Pile driver and derrick foremen	0 75
Pile driver and derrick engineers	0 65
Pile driver and derrick men (rigging, setting and signalling)	0 55
Pile driver and derrick firemen	0 50
Pile driver and derrick labourers	0 45
Pumpmen	0 50
Riggers (general)	0 55
Rodmen—reinforced steel	0 50
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 85
Structural steel workers	0 75
Tractor operators	0 50
Watchmen	0 35
Welders and burners—acetylene or electric	0 60
Welders and burners on steel erection	0 75

	Per day
Lock tenders	$6 50
Assistant lock tenders	4 00
Gauge tenders	4 50

Men working under compressed air (sandhogs):—

Pressure	Maximum working hours	Maximum first and second period in compressed air hours	Minimum rest period in open air hours	Wages per day
Normal to 18 pounds	8	4	½	$ 6 50
18 pounds to 26 pounds	6	3	1	7 25
26 pounds to 33 pounds	4	2	2	8 00
33 pounds to 38 pounds	3	1½	3	8 70
38 pounds to 43 pounds	2	1	4	9 40
43 pounds to 48 pounds	1½	¾	5	10 15
48 pounds to 50 pounds	1	½	6	10 90

Department of National Defence

Construction of an auxiliary active Air Force Hangar at Sea Island, Vancouver, B.C. Name of contractor, Smith Bros. & Wilson, Ltd., Vancouver, B.C. Date of contract, May, 13, 1939. Amount of contract, $27,295. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 10
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 50
Carpenters and joiners	0 90
Cement and concrete mixer operator:	
Steam	0 90
Gasoline or electric	0 60
Cement finisher	0 90
Compressor operators (gasoline or electric)	0 60
Driver, horse and cart	0 60
Driver, team and wagon	1 00
Driver	0 45
Electricians (inside wiremen)	1 00
Engineers, operating, steam	0 90
Firemen, stationary	0 50
Hoist operators (gasoline or electric)	0 60
Labourers	0 45
Motor truck driver	0 50
Motor truck driver and truck:	
1 to 2 tons	1 50
3 tons	2 00
Painters and glaziers	0 80
Rodmen—reinforcing steel	0 75
Roofers, felt and gravel	0 50
Sheet metal workers	1 00
Watchman	0 45
Plasterers	1 00
Plasterers' helpers (mixing and tempering material)	0 62½
Plumbers and steamfitters	1 00
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 50

Department of Public Works

Construction of a float and approach at Yuculta Landing, Stuart Island, B.C. Name of contractor, Vancouver Pile Driving & Contracting Co., Ltd., Vancouver, B.C. Date of contract, March 1, 1939. Amount of contract, $3,631.88. A fair wages schedule was included in the contract as follows:—
lation.'

	Per hour
Pile driver foreman	$1 25
Pile driver engineer	1 12½
Pile driver man	1 00
Boomman	1 00
Bridgeman	1 00
Fireman	0 68¾
Labourer	0 45

Alterations to the fourth floor of the federal building at Vancouver, B.C. Name of contractor, Allan & Viner Construction Co., Ltd., Vancouver, B.C. Date of contract, May 17, 1939. Amount of contract, $2,875. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$1 10
Brick and hollow tile layers' helpers, (mixing and tempering mortar)	0 50
Carpenters and joiners	0 90
Cement finishers	0 90
Concrete mixer operator:	
Steam	0 90
Gasoline and electric	0 60
Drivers	0 45
Drivers, horse and cart	0 60
Drivers, team and wagon	1 00
Electricians	1 00
Hoist operators	0 60
Labourers	0 45

	Per hour
Lathers, metal	1 00
Lathers, wood	0 75
Linoleum layers	0 75
Marble setters	1 10
Marble setters' helpers	0 50
Mastic floor spreaders and layers	0 85
Mastic floor rubbers and finishers	0 60
Mastic floor kettlemen	0 60
Mastic floor labourers	0 50
Motor truck drivers	0 50
Motor truck driver and truck	1 50
Ornamental iron workers	1 12½
Painters, spray	0 80
Painters and glaziers	0 80
Plasterers	1 00

Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
4 tons	2 35
Ornamental iron workers	0 50
Painters and glaziers	0 50
Plasterers	0 70
Plasterers' helpers (mixing and tempering material)	0 35
Plumbers and steamfitters	0 55
Roofers, felt and gravel	0 35
Roofers, sheet metal	0 55
Sheet metal workers	0 55
Stonecutters	0 60
Stonemasons	0 70
Stonemasons' helpers (mixing and tempering mortar)	0 35
Structural steel workers	0 75
Watchman	0 25
Welders and burners on steel erection	0 75

Harbour improvements, Caribou Harbour, Pictou County, N.S. Name of contractors, Donald F. Cantley, New Glasgow, N.S., and Charles Sproull, Pictou Landing, N.S. Date of contract, May 15, 1939. Amount of contract, $159,940.50, approximately. A fair wages schedule was included in the contract as follows:—

	Per hour
Axemen	$0 40
Blacksmith	0 55
Blacksmith's helpers	0 40
Boatmen (rowboat)	0 35
Carpenters and joiners	0 55
Compressor operators (gasoline or electric)	0 45
Crane operator (gasoline or electric)	0 50
Derrick engineer	0 60
Derrick fireman	0 40
Dragline operators (steam)	0 85
Dragline firemen	0 55
Dragline oilers	0 50
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Drill runners	0 45
Engineers, locomotive crane (steam, gasoline or electric)	0 65
Engineers, operating, steam:	
Single or double drums	0 60
Three or more drums	0 70
Fireman (stationary)	0 40
Hoist operators (gasoline or electric)	0 45
Labourers	0 35
Machinists	0 60
Motor truck drivers	0 40
Motor truck drivers and trucks:	
1 to 2 tons	1 40
3 tons	1 90
4 tons	2 40
5 tons	2 90
Motor boat operators	0 40
Pile driver foreman	0 70
Pile driver engineers	0 60
Pile driver firemen	0 40
Powdermen	0 45
Pumpmen	0 45
Riggers (general)	0 45

	Per hour
Road grader operators (horsedrawn)	0 40
Road grader operators (including team)	0 70
Road grader operators (gasoline)	0 45
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 85
Timbermen and cribmen (measuring, scribing and by use of the axe, adze, etc., cutting and fitting timber)	0 42
Tractor operators	0 45
Watchmen	0 30
Welders and burners (acetylene or electric)	0 60

Construction of a public building, Wynyard, Saskatchewan. Name of contractor, Shoquist Construction Limited, Saskatoon, Sask. Date of contract, April 11, 1939. Amount of contract, $15,330 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 42½

Name of contractors, Canadian Vickers, Ltd., Montreal, P.Q. Date of contract, May 16, 1939. The preceding fair wages schedule was also included in this contract.

Supply of forty airscrews, two-bladed, wood, Schwarz finish, to AM. Drawing Z.3931, for Cheetah X Engine installed in Oxford Aircraft. Date of contract, May 28, 1939. Amount of contract, $6,912. A fair wage schedule was included in the contract as follows:—

	Per hour
Engine assembly—	
Fitter (A.E.)	$0 60
Fitter's helper (A.E.)	0 40
Machinist	0 65
Machinist's helper	0 40
Machine operators	0 50
Sandblasters	0 55
Labourers	0 35
Air frame construction and assembly—	
Fitter (A.F.)	0 60
Fitter's helper (A.F.)	0 40
Machinist	0 65
Machinist's helper	0 40
Machine operator	0 50
Woodworker (joiner)	0 60
Woodworker's helper	0 40
Welder	0 60
Welder's helper	0 40
Electrician	0 65
Electrician's helper	0 40
Painter and doper	0 55
Painter and doper's helper	0 40
Fabric worker—female	0 40
Fabric worker's helper	0 30
Upholsterer	0 55
Upholsterer's helper	0 40
Sandblaster	0 55
Labourer	0 35
Erector	0 60
Erector's helper	0 40
Sheet metal worker	0 60
Sheet metal worker's helper	0 40
Riveters	0 50
Riveter's helpers	0 40
Apprentices to fitters, machinists, and sheet metal workers only—(16 to 21 years of age)	
First year	0 20
Second year	0 25
Third year	0 35

Note.—Only one helper to be employed to each journeyman.

No more than one apprentice to be employed to each five journeymen.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Textiles and Clothing

TORONTO, ONTARIO.—MILLINERY MANUFACTURERS' ASSOCIATION AND THE UNITED HATTERS, CAP AND MILLINERY WORKERS' INTERNATIONAL UNION, LOCAL 46.

Agreement to be in effect from March 1, 1939, to March 1, 1941, unless terminated on March 1, 1940, after 30 days' notice from either party.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, November, 1938, page 1293, with certain minor changes.

The hours remain at 40 per week and minimum weekly wage rates are the same, that is $32 for all round blockers, $29 for straw operators, blockers, fabric operators and cutters, $20 for drapers, $15 for trimmers. Wages for workers in these classes who are not skilled may be at a less rate to be decided between the employer and the union, but at no time may the number of such lower paid workers be more than 20 per cent of the workers.

Construction: Buildings and Structures

TORONTO, ONTARIO.—GENERAL CONTRACTORS' SECTION OF THE BUILDERS' EXCHANGE AND CONSTRUCTION ASSOCIATION OF TORONTO, LOCAL NO. 2 (BRICKLAYERS) AND LOCAL NO. 26 (STONE MASONS).

Agreement to be in effect from March 28, 1939, to March 1, 1940.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, May, 1938, page 572, with this exception:—

Minimum wage rate for journeymen bricklayers and stonemasons, from April 1, 1939: $1.00 per hour (a decrease of 5 cents per hour from last year's rate).

The 40-hour week, with time and one-half for overtime and double time for work on Saturdays, Sundays and holidays, remains in effect.

TORONTO, ONTARIO.—THE HEBREW MASTER PAINTERS' ASSOCIATION, CERTAIN OTHER CONTRACTORS AND THE TORONTO AND DISTRICT CENTRAL COUNCIL OF THE BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS (LOCAL NO. 864).

Agreement reached following strike reported on page 555 of this issue. Agreement to be in effect from May 2 and May 4, 1939, to March 31, 1940, and thereafter from year to year subject to notice.

Only union members to be employed, if available, and the union will give preference to employers parties to the agreement in supplying painters.

Hours and wages are as in the Industrial Standards Act schedule (LABOUR GAZETTE, April, 1939, page 436), that is, 75 cents per hour except spray painters for whom rate is 85 cents, with a 40-hour week.

Employees sent out of the district to be supplied with transportation, room and board and paid for travelling time.

One apprentice allowed to each five journeymen; wages for apprentices to be governed by the Ontario Apprenticeship Act.

A joint arbitration committee to be formed for the settlement of disputes, and no strike or lockout until a dispute has been brought to this committee and a decision arrived at unless strike is called by the Building Trades Council. The decision of the arbitration board to be final and binding.

Transportation and Public Utilities: Water Transportation

GREAT LAKES AND ST. LAWRENCE RIVER.—CERTAIN STEAMSHIP COMPANIES AND THE CANADIAN SEAMEN'S UNION (INTERNATIONAL).

Agreement to be in effect from September 1, 1938, to April 1, 1940, and thereafter from year to year subject to notice from either party given 60 days' prior to April 1, 1940, or any subsequent year. The agreement applies to crews of the steamers, exclusive of certificated deck officers and engineers doing duty as such.

The companies recognize the union as the exclusive representative of the seamen employed by them with regard to wages and working conditions. The companies to give preference to members of the union when employing new or additional men, qualifications and ability being equal or better; subject to this provision, the masters and chief engineers of the ships retain the right to select and engage their own crews. No discrimination against employees because of their membership in the union. The union agrees not to intimidate, coerce or threaten employees in any manner. The union may appoint one of its members on each ship as its delegate to represent it.

Hours: if any member of the crew is called on to work over 12 hours in any one day, he will be given time off to compensate for such extra work as soon as possible thereafter. No scaling, painting, overhauling or other unnecessary work between 6 p.m. and 6 a.m. daily, nor on Saturday afternoon, Sundays and statutory holidays; but all regular watches will be served and regular cleaning incident to loading and unloading of cargo and the regular washing down will be classed as necessary work.

Monthly wage rates (in addition to maintenance): wheelsmen $77.50, watchmen $62.50, lookout and patrol $62.50, deckhands $55, oilers $77.50, firemen $72.50, coal passers $55, first cook (Canallers) $110, first cook (Upper Lakers) $120, second cook $57.50, porter $50.

Vessel crews will not be required to handle cargo or otherwise perform longshoremen's work except where no longshoremen are available or where the custom of the port otherwise provides, in which cases this shall be considered extra work and paid at 40 cents per hour.

The parties agree to meet at reasonable times to discuss matters affected by the agreement and to endeavour to reach a settlement. Any disputes which cannot be settled by negotiation within a reasonable time to be referred to the federal Minister of Labour to be decided by him or by an arbitrator or arbitration committee appointed by the Minister, the decision in such arbitration to be final and binding. No cessation of work on the part of union members during the term of the agreement.

GREAT LAKES AND ST. LAWRENCE RIVER.—CERTAIN STEAMSHIP COMPANIES WHO ARE MEMBERS OF THE CANADIAN LAKE CARRIERS' ASSOCIATION AND THE CANADIAN SEAMEN'S UNION (INTERNATIONAL).

Agreement to be in effect from September 1, 1938, to April 1, 1940.

The general conditions and those as to hours, wage rates, longshore work, and settlement of disputes by negotiation or arbitration are similar to the agreement summarized above for certain other steamship companies.

The companies who have not previously done so to employ competent lookouts or watchmen on their vessels.

GREAT LAKES AND ST. LAWRENCE RIVER.—CERTAIN STEAMSHIP COMPANIES AND THE NATIONAL SEAMEN'S ASSOCIATION OF CANADA (AFFILIATED WITH THE CANADIAN BROTHERHOOD OF SHIPS' EMPLOYEES).

Agreements to be in effect from March 21, 1939 (April 5, 1939 for one company) for the 1939 navigation season, and thereafter from year to year, subject to notice from either party 30 days prior to expiration date. The union may open up negotiations about August 15 to consider any readjustments as to wages or conditions.

The steamship companies agree to give consideration to members of this union when filling vacancies, when they are available, but "free and independent action respecting qualifications necessary to fill such positions shall be vested in" the companies. The union may set up agencies for the employment of crews for the vessels which when utilized for this service shall recommend competent seamen to the companies. There is nothing in the agreement, however, to prevent the companies hiring their crew or discharging any employee who is unsatisfactory. All members of the crew irrespective of union affiliation to be governed by the working conditions of the agreement. Authorized representatives of the union may board any vessel at reasonable times to consult members of the crew.

Hours: two 6-hour watches with 6 hours' rest between to constitute a day's work on Inland Lake vessels, with a maximum of 12 hours per day; firemen, however, may work 3 hours on and 6 hours off; cooks to conform to usual custom of hours of their work. No scrubbing, chipping, painting or extra work to be done on Sundays or legal holidays.

Monthly wage rates (in addition to maintenance): wheelsman $80, watchman $65, deckhand-seaman $57, cook-steward (Canal Size) $110, cook-steward (Upper Laker) $120, second cook $57, porter (where carried) $50, oiler $80, fireman $75, coal passer $57.

When vacancies occur on board ships, lower grade rating to be promoted if competent.

The handling of cargo and the operation of winches for the handling of cargo by members of the crew to be considered overtime and be paid at 25 cents per hour in addition to regular wage.

Crews joining ships in the spring and remaining for the entire season or until ship put out of commission to have their fare to the ship refunded and their fare paid home in the central inland Lakes or waterway districts.

No strikes or lockouts to occur during the period of the agreement. All disputes relating to this agreement or its interpretation to be submitted to a board, made up of two representatives of the union, two of the companies and a fifth selected by them, or if they fail to agree on a chairman, the federal Department of Labour to appoint him. If this board fails to reach a settlement, the matter will be referred to arbitration under the Industrial Disputes Investigation Act.

GREAT LAKES AND ST. LAWRENCE RIVER.—UNION WAGE SCHEDULE OF NATIONAL ASSOCIATION OF MARINE ENGINEERS OF CANADA, INC.,

CENTRAL DIVISION, ACCEPTED BY CERTAIN STEAMSHIP COMPANIES.

This wage schedule was adopted in 1938 and remains unchanged for the 1939 season.

Wage scale: vessels 8,000 reg. gross tons and over and passenger vessels 5,000 reg. gross tons and over—chief engineer guaranteed contract $3,000 per year, first assistant engineer $190 per month, second assistant engineer $130 per month; vessels 5,000 to 8,000 reg. gross tons—chief engineer guaranteed contract $2,800 per year, first assistant engineer $190 per month, second assistant engineer $130; vessels 3,000 to 5,000 reg. gross tons—Upper Lake package freighters, chief engineer guaranteed contract $2,700 per year, bulk freighters 3,000 to 5,000 reg. gross tons and St. Lawrence Canal size package freighters $2,600, first assistant engineer $175 per month, second assistant engineer $130 per month; vessels 1,300 to 2,500 reg. gross tons—chief engineer guaranteed contract $2,400 per year, first assistant engineer $160 per month; vessels under 1,300 reg. gross tons—chief engineer guaranteed contract $2,200 per year, first assistant engineer $160 per month.

This scale does not include self-unloading colliers, tankers, sand and gravel vessels, conveyor-equipped vessels, ferries, tugs, etc.

PORT ARTHUR AND FORT WILLIAM, ONTARIO.—UNION WAGE SCALE OF NATIONAL ASSOCIATION OF MARINE ENGINEERS OF CANADA, INC., CENTRAL DIVISION (MARINE ENGINEERS ON TUG BOATS).

This schedule was adopted in 1938 and remains unchanged for the 1939 season.

Monthly wage schedule: tugs requiring a chief engineer with second class certificate—chief engineer $200, assistant engineer $140; tugs 25 to 50 N.H.P. compound type or tugs 15 N.H.P. or over high pressure type—chief engineer $165, assistant engineer $130.

GREAT LAKES AND ST. LAWRENCE RIVER.—CERTAIN STEAMSHIP COMPANIES AND THE CANADIAN BROTHERHOOD OF MARINE ENGINEERS (AFFILIATED WITH THE CANADIAN BROTHERHOOD OF SHIPS' EMPLOYEES).

Agreement to be in effect from March 21, 1939, for the 1939 navigation season and thereafter from year to year subject to notice from either party 30 days prior to expiration date.

The general terms of this agreement are similar to those of the agreement between the steamship companies and the National Seamen's Association of Canada, as summarized above.

Monthly wage scale for marine engineers (in addition to maintenance): chief engineer as per contract specially agreed; second engineer of Upper Laker size vessel $160; second engineer of Canal type and size vessel $150; third engineer $110.

GREAT LAKES AND ST. LAWRENCE RIVER.—CERTAIN STEAMSHIP COMPANIES AND THE MERCANTILE MARINE OFFICERS' GUILD OF CANADA (AFFILIATED WITH THE CANADIAN BROTHERHOOD OF SHIPS' EMPLOYEES).

Agreement to be in effect from March 21, 1939, for the 1939 navigation season and thereafter from year to year subject to notice from either party 30 days prior to expiration date.

The general terms of this agreement are similar to those of the agreement between the steamship companies and the National Seamen's Association of Canada, as summarized above.

Monthly wage scale for marine officers (in addition to maintenance): first mate (Upper Laker vessel) $170, first mate (canal size and type) $160, second mate (Upper Laker vessel) $130, second mate (Lower Laker and canaler) $120.

MONTREAL, QUEBEC.—A CERTAIN TUG COMPANY AND THE NATIONAL SEAMEN'S ASSOCIATION OF CANADA, CANADIAN BROTHERHOOD OF MARINE ENGINEERS AND THE MERCANTILE MARINE OFFICERS' GUILD OF CANADA (ALL AFFILIATED WITH THE CANADIAN BROTHERHOOD OF SHIPS' EMPLOYEES) (SEAMEN, MARINE ENGINEERS AND OFFICERS).

Agreement to be in effect for the 1939 navigation season and thereafter from year to year subject to notice.

This agreement is similar to the agreement summarized above between certain Steamship Companies and the National Seamen's Association, with these exceptions:—

Hours: due to irregularity of orders for tug service, there are no fixed hours of work, but it is agreed that out of every 24 hours sufficient periods of rest to be given crews.

Minimum monthly wage (in addition to maintenance): masters $200, mates (if carried) $125, wheelsmen (if carried) $75, deckhands $45, chief engineers $165 with second class certificate and $130 with third class certificate, firemen (coal) $60, firemen (oil) $50, cooks $50.

Collective Labour Agreements Act, Quebec

The following agreements and amendments to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:

Bakers, Quebec District (amendment).

Men's and Boys' Hats and Caps, Province of Quebec.

Corrugated Paper Box Manufacturing Industry, Province of Quebec (amendment).

Building Materials Industry, Province of Quebec.

Longshoremen (Inland and Coastal Navigation), Montreal.

Coal Handlers, Montreal (amendment).

Retail Store and Hotel Workers, Donnacona (amendment).

Garage and Service Station Employees, Quebec (amendment).

Barbers and Hairdressers, Chicoutimi (cancellation of amendment).

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are summarized in a special article below:

ONTARIO

Loggers, Thunder Bay District.
Electrical Workers, Kingston.
Painters, Hamilton.
Carpenters, Timmins.
Electrical Workers, Kirkland Lake.
Barbers, Wingham.

ALBERTA

Loggers, Flatbush, Chisholm, Spurfield and Faust Zones (extension).
Lathers, Edmonton.
Sheet Metal Workers, Edmonton.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938, issue of the LABOUR GAZETTE, page 503. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues beginning May, 1938.

Recent proceedings under the Act include: the extension by Orders in Council of agreements affecting the men's and boys' hat and cap industry throughout the province, the building materials industry throughout the province and longshoremen (inland navigation) at Montreal and amendments to other agreements, all of which are summarized below. In addition, Orders in Council approving the constitution and by-laws of certain joint committees and other Orders in Council authorizing certain joint committees to levy assessments on employers and employees were published, and are listed below.

Mining, Non-ferrous Smelting and Quarrying

BUILDING MATERIALS INDUSTRY, PROVINCE OF QUEBEC.—The quarrying of granite, marble and stone is included in this agreement, as noted below under "Manufacturing: Non-Metallic Mineral Products."

Manufacturing: Vegetable Foods

BAKERS, QUEBEC DISTRICT.—An Order in Council, approved May 8, and published in the *Quebec Official Gazette,* May 13, amends the previous Orders in Council for this trade (LABOUR GAZETTE, December, 1937, page 1385, April, 1938, page 451, January, 1939, page 96 and April, page 434) by excluding the county of Lotbinière from the territorial jurisdiction.

Manufacturing: Textiles and Clothing

MEN'S AND BOYS' HATS AND CAPS, PROVINCE OF QUEBEC.—An Order in Council, approved May 8, and published in the *Quebec Official Gazette,* May 13, makes obligatory the terms

of an agreement between certain hat and cap manufacturers and the United Hatters, Cap and Millinery Workers International Union, Local No. 36.

The Order in Council to be in effect from January 1, 1939, to January 1, 1940. It applies throughout the province of Quebec to the manufacture of men's and boys' hats and caps and headwear for children of both sexes (except babies' bonnets). (The previous agreement under this Act with the same wage rates and hours of work had applied only to the Montreal district).

Hours: 44 per week divided into 5 or 5½ days.

Overtime: all overtime exceeding 2 hours per day and 10 hours per week is forbidden. No work on Saturday afternoon or Sunday. No overtime work at any of the trades mentioned is permitted to foremen, contractors, partners or share holders.

Wages for the skilled workers: work may be paid at either hourly or piece rates, but in either case the following minimum wages to be effective—cutters 50 cents per hour, $22 per week of 44 hours: operators 45½ cents per hour, $20 per week; blockers 35 cents an hour, $15.40 per week; lining makers (female) 28½ cents per hour, $12.50 per week. Any worker receiving less than $25 per week to be entitled to a bonus of 5 per cent on his wages or piece work rate in excess of what he was receiving January 1, 1939. The joint committee may issue certificates to workers who have not acquired the necessary ability for normal execution of their work or who are handicapped.

Manufacturing: Pulp, Paper and Paper Products

CORRUGATED PAPER BOX MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved May 8, and published in the *Quebec Official Gazette,* May 13, with correction in the issue of May 19, amends the previous Orders in Council for this industry (LABOUR GAZETTE, February, 1939, page 218 and March, page 335) by adding another manufacturer of boxes and the association of employees of that company to the parties to the agreement.

Manufacturing: Metal Products

BUILDING MATERIALS INDUSTRY, PROVINCE OF QUEBEC.—Ornamental iron and bronze shop workers are included in the building materials industry agreement, as summarized below under "Manufacturing: Non-Metallic Mineral Products."

Manufacturing: Non-metallic Mineral Products, etc.

BUILDING MATERIALS INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved May 8, and published in the *Quebec Official Gazette,* May 13, makes obligatory the terms of an agreement between (1) certain owners and operators of granite quarries and granite cutting plants, (2) certain owners of quarries of limestone, sandstone, artificial stone and all other kind of stone except granite and marble, (3) certain owners of marble and terrazzo plants, (4) certain manufacturers and contractors in ornamental iron and bronze, and the following unions: La Féderation Nationale Catholique des Métiers du Bâtiment (The National Catholic Federation of Building Trades) and its branches comprising Le Syndicat des Tailleurs de Pierre de Montrèal (The Union of Stonecutters of Montreal), Le Syndicat National Catholique des Briqueteurs-Maçons et Tailleurs de Pierre du Canada, Section No. 1 Quebec (The National Catholic Union of Bricklayers, Masons and Stonecutters of Canada, Section No. 1, Quebec), L'Union Nationale Catholique des Tailleurs de Pierre des Trois-Rivières (The National Catholique Union of Stone Cutters of Three Rivers), Le Syndicat Catholique des Travailleurs aux Carrières de St-Marc des Carrières (The Catholic Union of Quarry Workers of St. Marc des Carrières), Le Syndicat National Catholique aux Carrières de Frontenac (The National Catholic Quarry Union of Frontenac) and The Canadian Ornamental Iron and Bronze Workers Union of Montreal.

The Order in Council to be in effect from January 1, 1939, to December 31, 1939.

GRANITE INDUSTRY

This part of the agreement covers, throughout the province of Quebec, all granite extracting, breaking, crushing and finishing operations.

Hours: for granite cutters, apprentice granite cutters and letterers, 8 per day, 5 on Saturdays, a 45-hour week; for blacksmiths, 8 per day, 5 on Saturdays in plants, and 9 per day, 5 on Saturdays in quarries; for other trades mentioned in the wage scale, 9 per day, 5 on Saturdays, a 50-hour week.

Overtime: time and one-quarter.

Hourly wage rates: granite cutters 70 cents in the city of Quebec, the Island of Montreal, the cities of Sherbrooke and Three Rivers and 60 cents in the rest of the province; labourers 30 cents; quarrymen 40 cents; blacksmiths 50 cents; gang saw operators 45 cents; machine polishers 50 cents; apprentice polisher-1st year 25 cents; expert hand polishers, after one year 40 cents; hoist operators 45 cents; planer operators 50 cents; carborundum machine operators 45 cents; chief engineer 60 cents; mechanical engineers 50 cents; assistant engineers 45 cents; travelling-crane operators 45 cents; firemen 45 cents; letterers and designers on composition (whether journeymen granite cutters or not) 70 cents in cities, 60 cents in rural districts; sand blast operators (who are neither designers nor journeymen granite cutters) 50 cents.

Handicapped workers may be employed at lower wage rates, as determined by the joint committee, but not more than one such worker to be employed for each ten granite cutters.

The joint committee may, upon request, issue piece-work permits in establishments usually employing less than four employees.

Apprentices in the granite cutters trade to serve four years, and not more than one apprentice to each 8 granite cutters to be employed in each plant. Apprentice granite cutters to be paid from 20 cents per hour during first year to 50 cents during fourth year.

MARBLE INDUSTRY

This part of the agreement covers, throughout the province of Quebec, all operations in the marble, terrazzo and tile industry and similar operations.

Hours: for marble cutters and apprentice marble cutters, 8 per day, 4 on Saturday, a 44-hour week; for other trades mentioned in the wage scale below, 10 per day, 5 on Saturdays, a 55-hour week.

Overtime: time and one-quarter.

Hourly wage rates: marble cutters 60 cents; compressor operators and saw setters 35 cents; helpers 30 cents; millwrights and sawyermen on gang saws 40 cents; carborundum machine operators 50 cents; bed-rubber face polishers 45 cents; bed-rubber and polishers 35 cents; machine polishers (marble and terrazzo) 40 cents; hand polishers, boxers, 35 cents; terrazzo casters 55 cents; cranemen 40 cents.

Handicapped workers may be employed at rates set by the joint committee but not more than one such worker may be employed to each ten normal marble cutters.

Apprentices in the marble cutting trade to serve four years, apprentice carborundum machine operators 18 months; not more than one apprentice to each five journeymen marble cutters, and one apprentice to each three carborundum machine operators; apprentice marble cutters to be paid from 20 cents per hour during first year to 50 cents during fourth year; apprentice carborundum machine operators from 35 cents during first six months to 45 cents during third six months.

STONE INDUSTRY

This part of the agreement governs, throughout the province of Quebec, all finishing work in the industry of limestone, sand stone, artificial stone, cement blocks and similar industries with the exception of granite and marble.

Hours: for stone cutters and apprentice stone cutters, 8 per day, 4 on Saturdays, a 44-hour week; for other trades mentioned in the wage scale, 10 per day, 5 on Saturdays, a 55-hour week.

Overtime: time and one-quarter.

Hourly wage rates: stone cutters 60 cents, planermen 45 cents, carborundum machine operators 40 cents, stone turners 45 cents, sawyermen (including gang saw operators) 40 cents, cranemen 40 cents, cranemen's helpers 30 cents, blacksmiths 50 cents, artificial stone finishers 50 cents, artificial stone rammers and moulders 40 cents, helpers 30 cents, artificial stone pattern makers 60 cents. To encourage the use of limestone for the infilling of buildings, piece work is allowed for rock face stone (Random, Ashlar, Scotch Work or Petite Course) if it is not over 11¾ inches high, at the rate of pay of $1.25 per square yard.

Handicapped workers may be paid at lower rates to be established by the joint committee, but not more than one such worker to each 10 normal stone cutters.

Apprentices to serve four years in the stone cutters trade and 18 months' continuous employment in the planerman trade; not more than one apprentice to each eight journeymen in each of these trades. Wages of apprentice stone cutters from 20 cents per hour during first year to 50 cents during fourth year; apprentice planermen 35 cents during first 9 months and 40 cents during second nine months.

ORNAMENTAL IRON AND BRONZE INDUSTRY

This part of the agreement governs the fabrication and erection of ornamental iron and bronze material. The territorial jurisdiction of this part comprises the Island of Montreal, Ile Bizard, the counties of l'Assomption, Terrebonne, Laval, Deux-Montagnes, Argenteuil, Vaudreuil, Soulanges, Beauharnois, Châteauguay, Laprairie, Chambly, St-Jean, Richelieu and Iberville.

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: time and one-half until midnight; thereafter and all work on Sundays and five specified holidays, double time.

Minimum hourly wage rates: mechanics 66 cents, fitters 55 cents, fitters' helpers 45 cents, erectors 66 cents, erectors' helper 50 cents. In the establishments governed by this part of the agreement, 17 per cent of the employees shall receive 66 cents, 33 per cent 55 cents and 50 per cent 45 cents.

Apprentice mechanics in the shop to serve four years, that is 208 weeks, with one apprentice allowed to each seven mechanics in a shop. Apprentices in the shop to be paid from 25 per cent of journeymen's wage during first six months to 75 per cent during fourth year. For erection work apprentices to be considered as helpers after a 6-month probation during which they will be paid at 45 cents per hour.

For work outside the city of Montreal, board, room, travelling expenses and travelling time (up to 8 hours a day at regular rate) to be paid by the employer.

Transportation and Public Utilities: Water Transportation

LONGSHOREMEN (INLAND AND COASTAL NAVIGATION), MONTREAL.—An Order in Council, approved May 8, and published in the *Quebec Official Gazette,* May 13, makes obligatory the terms of an agreement between certain steamship companies and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

The Order in Council is in effect from April 1, 1939, for the whole navigation season of 1939, and applies to the loading and unloading of all ships (except the handling of grain) engaged in inland and coastal navigation in the Harbour of Montreal including the Lachine Canal zone. (The Order in Council for last year's navigation season was summarized in the LABOUR GAZETTE, July, 1938, page 799, and the union agreement for this year in the May, 1939, issue, page 523.)

Hourly wages for longshoremen: for work between 7 a.m. and 7 p.m., 50 cents (an increase of one cent over last year's rate); for work between 7 p.m. and 7 a.m., 51 cents (no change from last year's rate); foremen 10 cents per hour extra, walking boss 20 cents per hour extra; longshoremen required to operate piling machines or tractors 5 cents over regular rate, longshoremen engaged in handling sugar at refineries to be paid one cent per hour additional to the regular rate; water boys 36 cents per hour.

Longshoremen required to work during meal hour to be paid at time and one-half for the meal hour and until relieved from duty, unless the work can be finished in one hour from beginning of meal hour, in which case regular rate of pay for such hour. Time and one-half for work on Sundays and six specified holidays. Men called to work Sunday or on a holiday to be paid a minimum of ten hours' pay.

For the first call of the day, gangs will wait for 15 minutes for orders without pay. If put to work they will receive a minimum of one hour's pay unless work on the ship is finished in less time. If not put to work at the first call gangs may be ordered for any other time except meal hours and will be paid a minimum of one hour's pay whether put to work or not. Time for shifting and rigging ships or time required to move from one place to another to be paid at prevailing rate.

COAL HANDLERS, MONTREAL.—An Order in Council, approved May 8, and published in the *Quebec Official Gazette,* May 13, amends the previous Order in Council for these workers (LABOUR GAZETTE, June, 1938, page 695) by adding to the parties to the agreement three employers including two coal companies and La Coopérative Catholique des Consommateurs de Combustible Limitée (The Catholic Co-operative of Fuel Consumers, Limited) and one union, the International Longshoremen's Association Local No. 1450.

Trade

RETAIL STORE AND HOTEL WORKERS, DONNACONA.—An Order in Council, approved May 8, and published in the *Quebec Official Gazette,* May 13, amends the previous Order in Council affecting these establishments (LABOUR GAZETTE, June, 1938, page 695) by extending the period to May 1, 1940, unless repealed by 60 days' notice from either party.

Service: Custom and Repair

GARAGE AND SERVICE STATION EMPLOYEES, QUEBEC.—Two Orders in Council, both approved May 8, and published in the *Quebec Official Gazette,* May 13, amend the previous Orders in Council for these workers (LABOUR GAZETTE, June, 1938, page 696, December, page 1174, February, 1939, page 218, April, page 435 and May, page 529). One Order in Council excludes the county of Portneuf from the territorial jurisdiction. The second Order in Council provides that from January 1, 1939, the minimum rate of wages of any employee which is not determined in the agreement is 20 cents per hour, with the same hours as for other employees, but the rate of wages of such employee who was receiving a higher rate when this became effective may not be reduced.

Service: Personal and Domestic

BARBERS AND HAIRDRESSERS, CHICOUTIMI.—An Order in Council, approved May 8, and published in the *Quebec Official Gazette,* May 13, repeals a previous Order in Council of February 25, 1939, which had removed Grand-Baie from the territorial jurisdiction. Grand-Baie is, therefore, restored to the territorial jurisdiction by this latest Order in Council.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the May 13 issue of the *Quebec Official Gazette:*

Employers and employees, Donnacona,
Paper box manufacturing industry, Province of Quebec,
Bakers, Quebec (amendment),
Building trades, St. Jerome,
Work gloves manufacturing industry, Province of Quebec,
Building trades, Joliette.

Notices were published in the *Quebec Official Gazette,* May 19, that authorization was given by Orders in Council to levy assessments at the rate of ½ of one per cent of wages on employers and employees concerned (except in case of coal handlers of Montreal for whom the rate is ⅜ of one per cent) to the following joint committees:—

Barbers, Chicoutimi and Lake St. John,
Bakers, Hull,
Taverns, Quebec,
Funeral directors, Montreal,
Paper box manufacturing, Province of Quebec,
Building trades, Quebec,
Building trades, St. Jerome,
Building Trades, Eastern Townships,
Fur industry, Montreal,
Coal handlers, Montreal,
Work glove industry, Montreal,
Men's and boys' clothing, Province of Quebec,
Building trades, Joliette.

There were 3,443 accidents reported to the Workmen's Compensation Board of Ontario during the month of April, as compared with 4,540 during March, and 4,026 during April a year ago. The benefits awarded amounted to $506,738.29, of which $414,983.38 was for compensation and $91,754.91 was for medical aid.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario and Alberta

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council on all employers and employees in the industry in the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers: in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour, who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the LABOUR GAZETTE, as follows: Ontario, in the issue of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, and May, 1938, page 501; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, and June, 1938, page 633; Nova Scotia, in June, 1936, page 604; Saskatchewan, in the issue of June, 1937, page 635, and May, 1938, page 507. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Logging

LOGGERS, THUNDER BAY DISTRICT.—An Order in Council, dated May 9, and published in *The Ontario Gazette*, May 13, makes binding the terms of a schedule of wages and hours in the logging industry, from April 21, 1939, to March 31, 1940.

The terms of this schedule are the same as for the schedule for the Port Arthur Forestry Division which was published in the LABOUR GAZETTE, May, 1938, page 579, except for the scale of piecework rates, in which several operations have lower rates of pay in this present schedule.

The monthly and daily wage rates in this schedule are the same as in the above mentioned schedule, with a minimum rate of $42.50 per month for general bushmen and handyman helpers, $40 for cookees and kitchen staff and the same higher rates for other classes as were published in the May, 1938, LABOUR GAZETTE noted above. All monthly and daily paid workers are given board and lodging in addition to their wages.

Construction

ELECTRICAL WORKERS, KINGSTON.—An Order in Council, dated May 9, and published in *The Ontario Gazette*, May 13, makes binding the terms of a schedule governing the electrical repair and construction industry in the city of Kingston and adjacent district from May 23, 1939, "during pleasure." The schedule does not include maintenance work done by regularly employed workers of a manufacturing, industrial or service institution, nor by persons engaged in manufacturing processes or those doing repair or service work in a repair or service shop or department.

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: overtime before 10 p.m. from Mondays to Fridays inclusive and before 6 p.m. on Saturdays, $1.05 per hour; all other overtime, including work on Sundays and five specified holidays, $1.40 per hour.

Minimum wage rate: 70 cents per hour. The advisory committee may fix a special minimum rate of wages for any handicapped employee.

PAINTERS, HAMILTON.—An Order in Council, dated May 9, and published in *The Ontario Gazette*, May 13, makes binding the terms of a schedule governing the painting and decorating industry in the city of Hamilton, the town of Dundas and adjacent district, from May 23, 1939, "during pleasure." It does not include maintenance workers regularly employed in repair, maintenance and upkeep of the premises of the employer for the purposes of his business.

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: time and one-half; work after noon on Saturdays, all work on Sundays and on six specified holidays, double time. The advisory committee may, however, issue a permit to an

employer allowing overtime work between Saturday noon and the beginning of the following regular working day at a minimum rate of one and one-quarter times the established rate for work performed during the regular working periods, these permits for this rate of overtime only to be issued when the work is of such a nature that it cannot be done during regular working periods.

Minimum wage rate for painters: 65 cents per hour, spray painters 85 cents. The advisory committee may fix a special lower minimum rate for any handicapped worker.

Apprentices to be governed by the Apprenticeship Act.

CARPENTERS, TIMMINS.—An Order in Council, dated May 9, and published in *The Ontario Gazette,* May 13, makes binding the terms of a schedule governing the carpentry industry in the town of Timmins and neighbouring townships from May 23, 1939, "during pleasure." It does not govern maintenance work.

Hours: for the months of March to October inclusive, 9 per day, 5 on Saturdays, a 50-hour week; for the months of November to February inclusive, 8 per day, a 48-hour week.

Overtime: overtime performed on Saturdays before 4 p.m. or during a three-hour period immediately following any other regular working day, $1.12½ per hour; all other overtime including work on Sundays and four specified holidays, double time.

Minimum wage rate: 75 cents per hour. The advisory committee may fix a lower special minimum rate for any handicapped employee.

ELECTRICAL WORKERS, KIRKLAND LAKE.—An Order in Council, dated May 9, and published in *The Ontario Gazette,* May 13, makes binding the terms of a schedule of wages and hours governing the electrical repair and construction industry in the townships of Teck, Lebel, Gauthier, McVittie, McGary and Hearst in the District of Temiskaming, to be called the Kirkland-Larder Lake zone, from May 23, 1939, "during pleasure." It does not govern maintenance work done by a regular employee of a manufacturing, industrial or service institution, nor persons engaged in manufacturing processes or in the repair or servicing of electrical equipment or appliances for repair or service shops or departments or when done by regular employees of manufacturers of electrical goods or their agents.

Hours: 9 per day, 5 on Saturdays, a 50-hour week.

Overtime: overtime work before 10 p.m. on Mondays to Fridays inclusive or before 6 p.m. on Saturdays, $1.50 per hour; all other overtime, including work on Sundays and four specified holidays, $2 per hour.

Minimum wage rate: $1 per hour. The advisory committee may fix a special minimum rate for any handicapped employee.

Service: Business and Personal

BARBERS, WINGHAM.—An Order in Council, dated May 9, and published in *The Ontario Gazette,* May 13, makes binding the terms of a schedule of wages and hours governing the barbering industry in the town of Wingham and the villages of Brussels, Blyth, Lucknow and Teeswater, from May 23, 1939, "during pleasure."

Hours: the regular working period for all employers and employees to be the hours during which barber shops are permitted to be open by municipal by-laws of the place where the baber shop is located.

Minimum wage rates: for those given full time employment on a straight salary basis, $18 per week; for those given full time employment on a percentage or commission basis or paid a salary plus commission, $13 per week plus 50 per cent of the proceeds in excess of $19 from the work of the employee; for those working four hours per day or less from Monday to Friday inclusive and all day or less on Saturday, $7.50 per week plus 50 per cent of the proceeds in excess of $12.50 from the work of the employee; for those working on Saturdays or the day before a holiday and on the previous evening only, $5 per week plus 50 per cent of the proceeds in excess of $7.50 from the work of the employee; for those working on Saturday or the day before a holiday only, $3.50 per day or part thereof, plus 50 per cent of the proceeds in excess of $6 from the work of the employee; for those working on days other than Saturdays or the day before a holiday, $2.50 per day or part thereof, plus 50 per cent of the proceeds in excess of $4 from the work of the employee.

No deduction may be made from wages for materials supplied, laundry service or operating expenses of any kind.

A scale of minimum charges which must be charged for each operation is included in the schedule.

Alberta

Logging

LOGGERS, FLATBUSH, CHISHOLM, SPURFIELD AND FAUST ZONES.—An Order in Council, dated May 22, and published in *The Alberta Gazette,* May 31, extends the terms of the previous schedule for this industry (LABOUR GAZETTE, January, 1939, page 99) to be in effect from June 10, 1939, "during pleasure."

Construction

LATHERS, EDMONTON.—An Order in Council, dated May 11, and published in *The Alberta Gazette,* May 15, makes binding the terms of a schedule governing the lathing industry in the city of Edmonton and within a 20-mile radius of the post office, from May 25, 1939, for a period of 12 months, or "during pleasure."

Hours: 8 per day, 4 on Saturdays, a 44-hour week. For night shift, 8 hours' pay for 7 hours' work.

Overtime: time and one-half; work on Sundays and seven specified holidays, double time. Employees required to set hangers in connection

with the pouring of concrete, however, may work until completion at single time rates.

Minimum wage rates for lathers: (*a*) wood lath $4 per thousand; (*b*) for patch work, second class lathers must put on not less than 1,100 lath in 8 hours to receive 65 cents per hour, first class lathers must put on not less than 1,500 lath in 8 hours to receive 80 cents per hour; (*c*) for nailed on metal and metal patchwork, plasterboard, gyprock or any material covered with plaster (such as insulation), floor metal lath for pan construction, first class lathers 80 cents per hour, second class lathers 65 cents; (*d*) for metal furring and tied on lath work and attached ceilings—first class lathers 90 cents per hour, second class lathers 70 cents per hour. (These are increases in most cases over the rates in effect last year which were summarized in the LABOUR GAZETTE, June, 1938, page 701.)

For work out of the city, transportation to be paid by the employer and first class lathers to be paid a minimum of 80 cents per hour, second class lathers 65 cents. Where a lather is required to stay one night or more he will be paid a minimum of $4.25 per thousand wood lath.

Apprentices to be indentured by the Board of Industrial Relations. Each employer or shop who regularly employs at least two qualified lathers to be allowed one apprentice; apprentices to be paid at least $3.50 per thousand wood lath, 40 cents per hour on all lath work other than wood lath.

SHEET METAL WORKERS, EDMONTON.—An Order in Council, dated May 9, and published in *The Alberta Gazette,* May 15, makes binding the terms of a schedule of wages and hours governing the sheet metal workers industry in the city of Edmonton and within a 10-mile radius of the post office, from May 25, 1939, for a period of 12 months or "during pleasure."

Hours: 8 per day, 4 on Saturdays, a 44-hour week. For night shifts, 7 hours to be worked for 8 hours' pay. For out of town work, 10 hours per day may be worked at single time rates.

Overtime: time and one-half; work after 5 p.m. on Saturdays, all work on Sundays and six specified holidays, double time.

Minimum wage for journeymen sheet metal workers: 90 cents per hour.

For work out of the city, transportation and board to be paid by the employer. Two hours' time to be credited to men while travelling between 5 p.m. and 8 a.m.

Apprentices to be indentured by the Board of Industrial Relations. Each shop allowed one apprentice and an additional apprentice for each three additional journeymen employed. The minimum wage of an advanced apprentice to be 70 cents per hour.

PRICES RETAIL AND WHOLESALE IN CANADA, MAY, 1939

Cost of Living, Prices of Staple Articles and Index Numbers

PRICES in May continued to show little change. The cost per week, in terms of retail prices, of a list of staple foods, fuel and lighting, and rent entering into a family budget was again slightly downward and the Dominon Bureau of Statistics weekly index number of wholesale prices was somewhat higher during the month than in April except for the last week when it was at the same level as for the last week in April.

The cost per week of a list of twenty-nine staple foods entering into a budget for a family of five in terms of average retail prices in sixty-nine cities was $8.13 at the beginning of May as compared with $8.14 for April, $8.50 for May, 1938; $8.58 for May, 1937; $7.82 for May, 1936; $6.67 for March, 1933 (the low point in recent years); and $11.17 for May, 1930. Seven items in the list were higher in cost than in April, twelve were lower and ten were unchanged. Changes were mostly of a minor nature the most important being increases in potatoes, mutton and sugar and decreases in eggs, butter, veal, pork and flour. Including the cost of fuel and rent with that of foods the total list cost $17.02 at the beginning of May as compared with $17.04 for April; $17.36 for May, 1938; $17.28 for May, 1937; $16.36 for May, 1936; $15.41 for June, 1933 (the low point during recent years); $21.49 for May, 1930; $20.57 for May, 1922; $26.92 for July, 1920 (the post war peak); and $14.21 for May, 1914. Fuel was slightly lower due to lower prices for anthracite coal in some cities while rent averaged somewhat higher.

In wholesale prices the Dominion Bureau of Statistics weekly index number has moved within narrow limits since the autumn of 1938 but in May was at the highest point reached in that period. It was, however, about 9 per cent lower than in May, 1938, and about 14 per cent lower than in May, 1937. Some comparative figures are 73·5 for the week ended June 2; 73·7 for that ended May 5 and 73·5 for that ended April 28. The latest figures available on a monthly basis are for April when the index was 73·4, compared with 80·3 in May, 1938; 85·5 in May, 1937; 71·9 in May, 1936; 63·5 in February, 1933 (the low point in recent years); 93·4 in May, 1929; 98·5 in May, 1922; 164·3 in May, 1920 (the post war peak); and 64·2 in May, 1914 In the grouping according to chief component materials changes in all groups were slight, animal products, textile products and wood products being higher, while vegetable products, iron products, non-ferrous metals and non-metallic minerals were lower. Prices of wheat,

COST PER WEEK (IN TERMS OF THE AVERAGE RETAIL PRICES IN SIXTY-NINE CITIES IN CANADA) OF CERTAIN STAPLE FOODS, FUEL AND LIGHTING, IN THE QUANTITIES STATED, AND RENT ENTERING INTO A FAMILY BUDGET.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family.

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended June 2, 1939; monthly figures not yet available

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

oats, hogs, cotton, wool and raw silk, zinc and tin were higher and prices of steers, raw sugar, pulp, steel sheets, crude oil, lead and copper were lower.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of May of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unem-

ployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received, and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1939

(Average prices in 1913=100)

*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18¼%; Clothing, 18¼%; Sundries, 20%.

Retail Prices

The prices of beef in May continued the gradual upward movement in progress since the end of 1938. Sirloin steak averaged 27·9 cents per pound in May, 27·5 cents in April and 24·9 cents in December, 1938. Veal averaged 15·9 cents per pound in May and 16·6 cents in April. Mutton was about one-half cent per pound higher than in the previous month at 24·5 cents. Fresh eggs declined in most localities but decreases were greater in the prairie provinces than elsewhere. The Dominion average price was about two cents per dozen lower at 26·1 cents per dozen. The average price for milk has been unchanged at 10·9 cents per quart since September, 1938. Creamery butter averaged 26·1 cents per pound in May, 26·6 in April and 33·3 cents in May, 1938. The price of flour averaged 2·9 cents in May, 3 cents in April and 4·3 cents in May, 1938. The Dominion average price for potatoes was $1.56 per 90 pounds in May, $1.38 in April and 87 cents in May, 1938. Prices of this commodity were considerably lower in the prairie provinces than elsewhere in the Dominion. Anthracite coal was down in the average from $14.64 per ton in April to $14.54 in May.

The following are the prices per ton reported for Welsh coal, "cobbles" and "French nut"; Charlottetown $14; Moncton $16; Sant John $14.50; Quebec $14; Three Rivers $15 and $14; Sherbrooke $14.75; St. Hyacinthe $15; Thetford Mines $17.25; Montreal $14 and $14.25; Ottawa $16.50; Kingston $15; Belleville $16.50; Peterborough $16.75; Oshawa $15.50; Toronto $15; St. Catharines $15; Hamilton $15 and $14.50; Galt $16-$16.50; St. Thomas $16.50; Cobalt $19.50; Timmins $19.25; Port Arthur $17.75; Fort William $17.75; Winnipeg $20.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices, in Great Britain and certain of the principal industrial and commercial countries appeared in the April issue of the LABOUR GAZETTTE.

Great Britain and Northern Ireland

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 97·2 for April as compared to 96·6 for March, an increase of 0·6 per cent for the month. The index of prices of food and tobacco increased 1·4 per cent while that for industrial materials and manufactures increased 0·1 per cent. Compared with a year earlier there was a fall of 5·7 per cent in the general index, food prices being 8·9 per cent lower and those of industrial materials and manufactures 4·1 per cent lower.

The Statist index number, on the base 1867-1877=100, was 90·5 at the end of April as compared with 89·0 at the end of March, an increase of 1·7 per cent for the month. Both the foodstuffs and materials groups contributed to the rise, the index for the former having increased 1·1 per cent during the month to 79·7, while the index for the latter increased 2·1 per cent to 98·5. The most important increase among the sub-groups was that of 5·8 per cent in textiles. The general index for April, 1938, was 93·5, the corresponding figure for this year being 3·2 per cent lower.

COST OF LIVING.—The Ministry of Labour's index number on the base 1914=100, was 153 at the first of May, showing no change from the figure for the previous month. The index of food prices declined during the month from 135 to 134 due to decreases in the prices of milk, butter, bacon and fish in many areas, which was partially offset by increases in the prices of potatoes and sugar (the duty on which was raised in April). The index of rent which had been 161 for the previous six months increased to 162 at the end of April. Other groups were practically unchanged. The cost of living index at the first of May, 1938, was 156.

Eire

COST OF LIVING.—The cost of living index number of the Department of Industry and Commerce, on the base July, 1914=100, was 173 at mid-February, as compared to 176 at mid-November. During the quarter, food prices decreased from 163 to 160 due mainly to seasonal decreases in the prices of eggs which were only partially offset by increases in the prices of potatoes and butter. The indexes of prices of clothing and of fuel and light were unchanged at 225 and 184 respectively.

France

WHOLESALE PRICES.—The General Statistical Office index number, on the base 1914=100, was 681 for April, showing no change from the March figure. The index of food prices declined from 653 to 636 during the month there being decreases in both the animal and vegetable sub-groups with only a small increase

in the sugar, coffee and cocoa sub-group. The index for all industrial materials increased from 706 to 722 there having been increases in all its sub-groups, the most important of which was one of 6·7 per cent in textiles. The index based on gold currency, 1914=100, was unchanged at 55.

Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office, on the base 1913=100, was 106·4 for April as compared with 106·6 for March. During the month the index of prices of agricultural products declined from 107·8 to 107·3, that for raw materials and semi-manufactured goods was unchanged at 94·5, while that for manufactured goods rose from 125·7 to 125·9.

COST OF LIVING.—The official index number on the base 1913-1914=100, was 125·9 for April as compared to 126·0 for March. During the month food prices and prices of heating and lighting materials decreased 0·2 per cent; clothing and sundries increased 0·2 per cent and 0·1 per cent respectively; rents were unchanged.

India

WHOLESALE PRICES.—The index number of the Labour Office, Government of Bombay, on the base July, 1914=100, was 99 for February as compared to 100 for the previous month. The index of food prices dropped from 104 to 101 while that for non-foods declined from 99 to 98.

COST OF LIVING.—The official index number of the working class cost of living at Bombay, on the base July, 1933, to June, 1934=100, was 103 for March as compared to 104 for February. The index of food prices declined from 110 to 109, that for fuel and lighting materials from 103 to 102, and that for sundries from 96 to 95. The price indexes for rent and for clothing were unchanged at 100 and 85 respectively.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number, on the base 1926=100, was 76·7 for March as compared with 76·9 for each of the two preceding months. Of the ten groups which make up this index two, metals and metal products and housefurnishing goods, showed no changes from the February figures; farm products declined 2·1 per cent; foods 1·8 per cent and hides and leather products 0·1 per cent; five groups showed increases as follows: textile products and miscellaneous goods 0·8 per cent each, chemicals and drugs 0·3 per cent, building materials 0·2 per cent and fuel and lighting materials 0·1 per cent. The all commodity index was 3·8 per cent lower than a year ago.

COST OF LIVING.—The index number of the Bureau of Labour Statistics on the base 1913=100, was 142·9 on March 15, 1939, showing a decrease of 0·9 per cent from the figure for December 15, 1938, which was 144·2. The index of food prices declined from 124·5 to 121·1 during the three months, there having been decreases in the price of bread as well as the usual seasonal price decreases. The index of prices of fuel and lighting materials rose 0·5 per cent, that for rent was unchanged, while those for clothing, furniture and sundries showed comparatively small decreases.

The index number of the Industrial Conference Board, on the base 1923=100, was 85·0 for April as compared with 84·9 for March. An increase in food prices and rent more than offset decreases in the prices of clothing and fuel and lighting materials.

Housing and Home Improvement Loans

The Honourable Charles A. Dunning, Minister of Finance, recently released figures showing total Home Improvement and National Housing Act loans for May aggregating nearly $4,000,000, the peak for any month since operations began under the Dominion's housing legislation. Loans approved under the National Housing Act account for $2,426,491 of this amount, and loans reported under the Home Improvement Plan amount to $1,467,986.

The Minister's statement shows that up to May 31st, 1939, loans totalling more than $62,500,000 have been made under these two measures. New construction and improvement work financed by these advances is estimated at $69,000,000.

Based on the generally accepted estimate that 80% of the cost of construction goes to labour directly or indirectly, it is apparent that building activity financed under the Dominion's housing legislation accounts for a payment to labour of approximately $55,000,000, and that a steadily increasing contribution to the employment of labour in the home building and related industries is being made in line with the expanding volume of these loans.

Total Home Improvement Loans reported to the Department in May numbered 3,907, and aggregated $1,467,986.17, indicating a volume of advances for May 35% to 40% greater than for the same month last year, and at a new high for any month since operations began under this Plan in November, 1936.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Claim for Wages Under Collective Labour Agreement Denied by Quebec Appeal Court

On April 1 the Quebec Court of King's Bench reversed a judgment of the Superior Court of the District of St. Francis awarding $428.77 and costs as wages considered due under a collective agreement made obligatory under the Collective Labour Agreements Act for the printing industry. Two of the five members of the Court dissented. The action was brought on behalf of the workers in a printing establishment on Rock Island by the Joint Committee appointed under the Act for this industry. The amount claimed, $696.80, was the difference between the amount which would have been earned at the 50-cent hourly rate fixed by the agreement for journeymen printers on the Island of Montreal and within a 100-mile radius and the wages actually paid but since the Act limits the time for which wages may be claimed to six months, the Superior Court had given judgment for the amount at the 50-cent rate only for that period.

The defence had contended that Rock Island was more than 100 miles from the Island of Montreal both by highway and railroad and consequently not within the territorial jurisdiction of the agreement. The Superior Court, however, held that radius means a straight line from the centre of a circle to its circumference and that Rock Island was within a 100-mile radius of Montreal Island. The appeal court approved the opinion of the lower court on this point.

Chief Justice Tellier, in holding that the appeal should be allowed, pointed out that the wages fixed in the agreement apply only to journeymen who are defined in the agreement as persons who have completed a required apprenticeship and who have obtained certificates of competency in accordance with the Act, that is, either from a board of examiners if such is appointed by the joint committee or from the trade union of which they are members. The workers concerned in the action did not hold such certificates and were not members of a union. However, a by-law of the joint committee stipulated that certificates are obligatory only in municipalities of over 10,000 people and Rock Island has a smaller population. Moreover, an amendment of 1936 in the Act gives a joint committee power to establish a board of examiners only in municipalities of over 10,000. Nevertheless, according to the wording of the Act, if a board of examiners is established only those workers who have been granted a certificate of qualification from it or who are members of a trade union may claim the benefits of the Act. There was evidence that a board of examiners had been appointed. The Chief Justice was of the opinion, then, that the workers in question had no claim to the 50-cent rate fixed in the agreement.

Mr. Justice Hall expressed his concurrence with this decision. He stated that if the three employees of the appellant were paid the hourly rate of 50 cents instead of the 15 and 20 cents for the two women and 35 cents plus a weekly bonus of $1 for the man, the wages would exceed the gross income of the business. He held that since the committee had under the Act no power to require certificates of competency in places with more than 10,000 people and since the wage-rate of 50 cents fixed in the agreement applied only to journeymen compositors as defined in it, employers in smaller places could employ compositors who were not "journeymen" and they were not within the scope of the agreement. Further, though the Act provided that workmen who are, according to the custom of the trade, experienced workmen may exercise their rights under a collective agreement on their declaration under oath to that effect, this provision is dependent on the joint committee not establishing a board of examiners and so does not apply in this case. Mr. Justice Hall was of the opinion also that such declaration must precede the period of employment in question and evidence given at the trial as to the workers' qualifications and experience cannot be accepted as the basis for a claim antedating that testimony.

In dissenting, Mr. Justice Walsh pointed out that the Act stipulated that if a joint committee does not consider it desirable to set up a board of examiners for the whole or part of the area over which it has jurisdiction, the workers may exercise their civil claims under the agreement on their sworn declaration that they are qualified and experienced workmen according to the custom of the trade. In his opinion, no board of examiners was appointed to function in Rock Island and the appellant's workmen had the right to exercise their claims on their sworn declaration that they had had five years' experience in the trade. Since they were not anxious to prosecute their employer, the joint committee had power to act and to establish the competency of the workmen on their own testimony. He would dismiss the appeal.

Mr. Justice Letourneau, also dissenting, emphasized that the persons for whom the claim was made had served longer than the five years' apprenticeship required by the Act

and he held that it was sufficient to establish this fact by oath in court in order to enable them to exercise their rights in virtue of the agreement. *Holland v. Printing Industry Joint Committee for Montreal and District* (1939) 66 Rapports Judiciaires de Quebec, Cour du Banc du Roi, 360.

Application for Writ Prohibiting Saskatchewan Magistrate from Hearing Industrial Standards Case Dismissed

On May 5 Mr. Justice MacDonald of the Saskatchewan Court of King's Bench dismissed an application for writ of prohibition to prohibit a Saskatoon police magistrate from hearing a charge against a barber who was alleged to have accepted less than the minimum price fixed under the Industrial Standards Act for a hair cut in barber shops in Saskatoon.

The application was based on the contention that the Magistrate had no power to hear such a charge because the Industrial Standards Act was ultra vires of the provincial legislature being contrary to the provisions of the Dominion Combines Investigation Act and section 498 of the Criminal Code of Canada. The counsel opposing the application claimed that the issue of a writ of prohibition or a decision on the validity of the Act in this case by the Court of King's Bench would be premature since the police magistrate had not adjudicated on the contention of the applicant that the Act is ultra vires and the Court could not issue a writ of prohibition on the assumption that the judgment of the police magistrate would be wrong. The judge, however, concluded that the application was not premature and proceeded to deal with the question of the constitutional validity of the Industrial Standards Act.

The point to be determined was whether the Act constituted a combine within the meaning of the Combines Investigation Act or section 498 of the Criminal Code. In the judge's opinion the Act was not such a combine since this section of the Code and the Combines Act as amended in 1935 apply only to combines in respect of articles or commodities which may be the subject of trade and commerce while the Industrial Standards Act is solely concerned with hours of labour, wages and charges that may be made for services.

Among the judgments referred to by the counsel for the applicant was the recent judgment of Mr. Justice Gibsone of the Superior Court of the District of Montreal in Lazarovitch v. The Court of Sessions of the District of Montreal (LABOUR GAZETTE, March, 1939, p. 360), a case involving a collective agreement in the shoe-repairing business on the Island of Montreal which had been legalized by order in council under the Collective Labour Agreements Act of Quebec and which fixed prices to be charged customers. Mr. Justice MacDonald distinguished the Quebec case from that before him as one concerning an industry using materials the cost of which formed the greater part of the price of repairs while the Industrial Standards Act was concerned only with wages, hours of labour and the price of services.

It was therefore held that the latter statute was not in conflict with the Dominion statutes and was within the legislative competence of the province. The application was dismissed with such costs as were not excluded by the order on the application for intervention made by the barbers' and plumbers' trades. *In re Rex v. Pulak, Saskatchewan Court of King's Bench, May 5, 1939.*

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

INDUSTRIAL employment in Canada at the beginning of June showed widespread expansion, according to data tabulated by the Dominion Bureau of Statistics from 11,718 firms, each employing a minimum of 15 persons, the returns being representative of all industries except agriculture, fishing, hunting and highly specialized business. The reporting firms had 1,098,908 employees at June 1, as compared with 1,032,068 in the preceding month. This gain of 6·5 per cent substantially exceeded the average increase recorded from May 1 to June 1 in the period 1921-1938, while on only two occasions in the last twelve years have larger additions to payrolls been reported, viz., at June 1 in 1937 and in 1928, when there were percentage gains of 7·5 and 6·7, respectively. The unadjusted index rose from 106·2 at May 1, 1939, to 113·1 at the beginning of June, being then slightly higher than that of 111·9 at June 1, 1938. The seasonally-corrected index, also at 113·1 at the date under review, showed a gain of 2·8 points from the preceding month. Improvement was reported in each of the provinces and, on the whole, in practically all industrial groups.

The indexes for June 1 in recent years of the record are as follows: 1939, 113·1; 1938, 111·9; 1937, 114·3; 1936, 102·0; 1935, 97·6; 1934, 96·6; 1933, 80·7; 1932, 89·1; 1931, 103·6; 1930, 116·5; 1929, 122·2; 1928, 113·8 and 1927, 107·2. The 1926 average is taken as 100 in calculating these index numbers.

Unemployment in Trade Unions.—At the beginning of June, 1939, the unemployment percentage reported by local trade unions was 11·7, contrasted with percentages of 13·9 at the beginning of May and 13·2 at the beginning of June, 1938. The percentage for June was based on the reports tabulated by the Department of Labour from 1,909 labour organizations, covering a membership of 238,724 persons.

Employment Office Reports.—Reports received by the Department of Labour from the offices of the Employment Service of Canada showed that the number of placements effected daily during May, 1939, was considerably greater than that recorded during the previous month, as well as during May, 1938, the major gains in industrial groups under both comparisons being in services, logging and construction and maintenance, with the only declines recorded being that in farming under the first comparison and that in transportation under the second. Vacancies in May, 1939, numbered 35,539, applications 63,320, and placements in regular and casual employment 33,694.

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget was slightly lower at $16.92 for June as compared with $17.02 for May, there being small decreases in the cost of foods and fuel. Comparative figures for certain earlier dates are $17.43 for June, 1938; $17.20 for June, 1937; $15.41 for June, 1933 (the low point during recent years); and $21.44 for June, 1930. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics changed little week by week during June and was 73·3 for the week ended June 30 as compared with 73·5 for the week ended June 2 and 73·7 for the week ended May 5. Comparative figures on a monthly basis are 73·7 for May; 80·1 for June, 1938; 84·6 for June, 1937; 72·3 for June, 1936; 63·5 for February, 1933 (the low point in recent years); and 93·4 for June, 1929.

Business Statistics.—The table on page 648 gives the latest information available reflecting industrial conditions in Canada. The index of the physical volume of business was upward in May, continuing the movement in progress since February. The increase as compared with April was four per cent and as compared with May, 1938, was about 10 per cent. Of the principal groups used in the construction of the index mineral production was again considerably higher in May than in April, there being increases in the ship-

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† For the week ended June 30, 1939.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending July 1, 1939, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending June 17, May 20, and April 22, 1939; June 18, May 21, and April 23, 1938. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation.

ments of gold and silver, as well as in imports of bauxite and the production of coal while exports of copper and nickel recorded declines after adjustment for seasonal change. The index of the volume of manufacturing also advanced, greater volume being indicated for certain foodstuffs, textiles and iron and steel products. Other principal groups to show advance were electric power output, carloadings, imports and exports while construction was somewhat lower. All of the above principal factors recorded advance in May of the present year as compared with May, 1938, the most important being in mineral production, manufacturing, carloadings, imports and exports. Information available for June shows employment and contracts awarded at higher levels than in May and higher also than in June, 1938. The number of cars of freight was smaller than in the preceding month but greater than in June, 1938. The index of wholesale prices has shown stability in recent months but is considerably lower than in June, 1938.

Strikes and Lockouts.—The number of strikes and lockouts during June was 11, involving 2,023 workers with time loss of 8,963 man working days, as compared with 11 disputes in May, involving 3,424 workers and causing time loss of 17,203 days. Nearly 70 per cent of the time loss in both of these months was due to strikes of rubber workers at Kitchener, Ont., and Toronto, Ont. The other disputes, except two strikes of coal miners in each month and a strike of sawmill workers at Timmins, Ont., in June, involved comparatively small numbers of workers for short periods. In June, 1938, there were 22 disputes, involving 2,516 workers, with time loss of 12,672 days. The important disputes during that month involved hosiery factory workers at Hamilton, Ont., lime plant workers at Blubber Bay, B.C., and sawmill workers at Timmins and Fort Frances, Ont. Of the eleven disputes recorded for June, 1939, ten were terminated during the month, five resulting in favour of the workers involved, two resulting in compromise settlements, one being partially successful and the results of two being recorded as indefinite. One dispute, a lockout involving five workers, was recorded as unterminated at the end of June. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Industrial Disputes Investigation Act

During the month of June six applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department.

Particulars concerning these six applications and other proceedings under the Act will be found on page 654.

Statistics of material aid recipients for May

Preliminary figures from the National Registration show that the grand total of all classes of persons on urban and agricultural aid in May this year was 934,000, a decrease of 7 per cent from the April figure, more than 2 per cent less than in May a year ago, and 10 per cent less than in May, 1937.

The Dominion total of unemployed but fully employable persons on aid in May this year was 170,000, a decrease of 8·6 per cent from the revised April total of 186,000. The figure for May this year, although it showed an increase of 10·4 per cent over May a year ago, was down by almost 21 per cent from May, 1937.

A total of 632,000 persons were receiving non-agricultural aid last May, a decrease of 7·7 per cent from the previous month. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a net increase of 9·7 per cent from the figure for May, 1938, but was over 14 per cent lower than the figure for May two years ago.

The number of farmers and members of their families in receipt of agricultural aid continues to show a decline from a year ago. A total of 66,000 farmers who, together with their dependents, account for a farm population of 302,000, were reported as receiving agricultural aid for subsistence in May. Of these, 252,500 were located in the Province of Saskatchewan.

The Dominion total on agricultural aid in May showed a decrease of more than 5 per cent from the April figure, was almost 21 per cent less than in May, 1938, but was one-half of one per cent greater than in May, 1937. The total of farmers and their families on aid in Saskatchewan continued to hold the improvement over a year ago, May showing a decrease of over 23 per cent in this comparison, and a decrease of almost 5 per cent from April, 1939. However, due to crop conditions in 1937 and 1938, Saskatchewan this year showed 43·7 per cent more on agricultural aid than in May, 1937.

Dominion-Provincial youth training agreements

Agreements under which youth training projects will will be carried on for three years in eight provinces, were approved on June 22 by the Dominion Government and sent forward to the Provincial Governments concerned for completion. These agreements will provide for a continuation and expansion of the work carried on under the Dominion-Provincial Youth Training programme. Since that programme became effective, 117,912 young Canadians, of whom 70,442 were men and 47,470 women, have been given training.

In the past year nearly 16,000 men and women were given training in various types of projects designed to prepare them for wage-earning employment. These projects included forestry, mining, urban occupational training, farm apprenticeship, and home service training. In urban occupational courses alone more than 11,000 received training. Those enrolled in forestry and mining projects were actually employed on work projects for which wages were paid.

In addition to the number trained in projects designed directly to prepare them for wage-earning employment 31,676 attended agricultural and rural training courses, and 24,258 physical training courses.

After the provinces have signed the agreements, the way will be cleared for proceeding with projects which the provincial governments feel to be of value in meeting their unemployed youth problem. Schedules covering these projects will be added to the main agreements.

The Province of Quebec, at the time of going to press, had not intimated its readiness to accept the Dominion allocation for carrying on youth training. Of the eight other provinces, all but Ontario are taking up their full share of the $1,500,000 made available to them this year. Ontario has indicated that approximately 68 per cent of the federal allocation will be required.

Provision for youth training forestry projects under these agreements is in addition to that made through the national forestry programme, for which $1,000,000 was provided at the last session. Separate agreements covering forestry training projects under the National Forestry Programme have also been signed here and went forward to the provinces some time ago. In some cases this work is already proceeding. It is anticipated that about ten thousand young men will have received forestry training and employment during the present year under projects initiated or assisted by the federal Department of Labour.

The general youth training agreements are comprehensive in their nature, permitting a wide variety of types of training. Under them work and wages projects, occupational training in cities and towns, rural courses, apprenticeship and learnership training in varied activities, aviation mechanics, handicrafts and other types of courses are all carried on.

The agreements provide for the employment of placement officers to assist trainees in securing positions, as well as supervisors to direct training. Under their provisions, travelling expenses of young men and women to the point of training, may be paid, as well as board and lodging. Provision is made for supplying necessary machinery and equipment, and also for advertising and publicity.

Dominion-Provincial agreements on material aid

Agreements with all the provinces—under which the Dominion Government will contribute dollar for dollar with the provinces to the cost of material aid (food, fuel, clothing and shelter) for those in need up to 40 per cent of the total cost and also provide approximately $7,500,000 as a contribution to labour costs to expand employment through a civic improvement programme —have been approved.

In respect to transients (persons without provincial residence) the Dominion will contribute 50 per cent. These arrangements have been effective since April 1st.

The agreements contain a new and important feature in respect to transients. This provides for collaboration by the provinces along the lines of reciprocal action in respect to needy persons who lack provincial residential qualifications. The purpose of this provision is to make sure that no resident of Canada shall become ineligible to receive material aid because of having lost residence in one province before having established it in another. It is designed to reduce the number of destitute transients moving across the Dominion.

In carrying out its undertaking, given at the last session of Parliament, the Dominion will pay 50 per cent of direct labour costs of approved municipal improvement projects, as an alternative to material aid. The agreements provide that the provinces shall contribute the other 50 per cent, costs of materials and supervision being borne by the municipalities. The money so expended will reduce the amount paid by the several governments for material aid on the percentage basis now established.

This Dominion contribution will enable a number of municipalities where unemployment is serious, to enlarge their normal pro-

gramme of civic improvements. Assuming that the full amount of the Dominion allotment is taken up by the Provinces, approximately $15,000,000 will be made available for this programme. It is provided that projects under it must be submitted by the municipalities to the Provinces and, subsequently, to the Dominion. Projects will be located where the need is greatest.

Under the terms of the agreements, persons employed on these municipal improvement projects must be certified as unemployed and in necessitous circumstances, by a committee on which the Dominion, the Provinces and the municipalities are represented. Prevailing wages will be paid, and provision is made under which part of the wages may be deferred until the completion of the project at the discretion of the Province or the municipality concerned.

Application of Bata Shoe Company for Establishment in Canada

During the latter part of June the Dominion Government has been considering the application of the Bata Shoe Company (which has its main plant in Zlin, Czecho-Slovakia with Canadian headquarters at 80 King Street West, Toronto) for admission to Canada of a number of "key" technicians with the object of establishing what has been reported as a "million dollar industry" in a Canadian community.

It is understood that Mr. Thomas Bata, vice-president of the Company, originally requested permits for 250 technicians and their families, but that this application was revised to allow entry of only a limited number within the next few months.

On June 29 the press reported a statement by the Prime Minister, Rt. Hon. W. L. Mackenzie King, as follows:—

"Officials of the Labour Department will be asked to ascertain to what extent foreign technicians are required in the establishment of a branch of the Bata shoe manufacturing concern in Canada should the company decide to come here.

"The Government was glad to see new capital come to Canada and welcomed the opening of new industries. If labour were available in Canada the Government would expect Canadian labour to be employed.

"If technicians from abroad were needed the Government would consider admitting them and would follow the usual practice of asking the Labour Department to advise on the matter."

The plans of the Bata Shoe Company call for more than the manufacture of shoes in Canada. In addition the company intends to manufacture shoe machinery, not only for its proposed Canadian plant, but for its factories in other countries. The company also plans to carry on extensive research work here.

According to press reports, the company has been considering various possible sites in Ontario, with Frankford, near Trenton, being most prominently mentioned. It is understood that buildings to the value of $1,500,000 will be erected within the first two years. This expenditure is exclusive of machinery, two shipments of which have already arrived in Montreal.

Prosecution of alleged combine of paper box manufacturers

Prosecution of the alleged combine of manufacturers of paperboard shipping containers and related products, investigated recently under the Combines Investigation Act, is being undertaken at the instance of the Attorney General of Canada. Following the report of the Commissioner of the Combines Investigation Act (LABOUR GAZETTE, April, 1939, pages 391-393) copies of the report and of the evidence taken in the extensive investigation under the Combines Investigation Act were remitted to the Attorneys General of the provinces of Ontario and Quebec. On June 30, the Attorney General of Ontario announced that Ontario would not proceed in the matter in view of considerations including the proceedings already instituted and carried out by the Dominion authorities and the fact that the alleged combine was operating in a number of other provinces.

The greater number of those involved in the price fixing combination against which criminal proceedings will now be taken are located in Ontario, where head offices and plants of eleven companies manufacturing corrugated and solid fibreboard products are situated. Two other companies involved in this alleged combine have their principal offices in Montreal, and single additional companies are situated at Halifax, Saint John, Winnipeg and Vancouver. The headquarters of the alleged combine have been maintained at the offices of Messrs. Hardy and Badden in Toronto. J. C. McRuer, K.C., has been appointed by the Minister of Justice to conduct the prosecutions.

Survey of sickness in industry

The Dominion Bureau of Statistics, in collaboration with the Department of Pensions and National Health and the Department of Labour, has undertaken to make an inquiry in the establishments of the larger employers of labour throughout Canada who report monthly to the Bureau on employment. Information will be secured as to whether or not a physician, nurse, or first-aid is provided for employees, if there is a sick benefit association, sickness insurance,

a medical examination of employees; if a record is kept of time lost through sickness, exclusive of lost time covered by the provincial Workmen's Compensation Fund, and if the employer contributes to that fund. The Advisory Committee on Industrial Hygiene, appointed by the Department of Pensions and National Health in connection with the establishment of a Division of Industrial Hygiene in January, 1938, recommended an inquiry of this kind at its meeting on April 12, 1939. An account of the meeting appears elsewhere in this issue.

Meeting of Canadian Council on Nutrition

The Canadian Council on Nutrition held its second meeting at Toronto, Ont., on June 14 and dealt with a revision of the dietary standard considered at its first meeting on April 20, 1938, and a proposed pamphlet for popular use with lists of menus, etc. Consideration was also given to nutrition surveys being carried on in Canada (LABOUR GAZETTE, December, 1938, page 1325). A report was received from the Committee on Food Analyses. The Canadian Public Health Association was meeting in Toronto at this time and the members of the Council attended its session on nutrition on June 14. The Council consists of representatives of the Departments of Pensions and National Health, Agriculture, and Labour, of the National Research Council and the Dominion Bureau of Statistics and of various organizations of consumers and social workers, with a number of scientists from the various provincial Departments of Health, universities and scientific organizations. The Department of Labour was represented by Mr. R. M. Cram of the Statistical Branch. An account of the proceedings will appear in a later issue.

Canadian Medical Association and health insurance

In the June issue of the LABOUR GAZETTE (page 549) reference was made to the Ontario Medical Association's endorsement of a committee report advocating compulsory health insurance on a national basis.

The Canadian Medical Association at its 70th annual convention refrained from taking a stand for or against health insurance but approved of recommendations for further study of the question. Mr. H. H. Wolfenden, consulting actuary of Toronto, was retained to advise the Association's committee of experts investigating the subject.

Workmen's compensation legislation in Canada

The mimeographed pamphlet on workmen's compensation legislation in Canada which has been issued annually by this Department for some years has been thoroughly revised and brought up to date.

Only the main points of the provincial legislation are covered in the analysis. The scale according to which compensation is paid under these laws is set out in tabular form. A summary is given of the provisions of the conventions and recommendations of the International Labour Conference on workmen's compensation for industrial accidents and diseases and for equality of treatment for national and foreign workers in the matter of such compensation. A comparison is thus made possible between the standards adopted by the Conference and the Canadian statutes.

Appointment of assistant supervisor of youth training (women's projects)

Announcement of the appointment of Miss Isabelle Alexander to the post of Assistant Supervisor in charge of Women's Projects under the Dominion-Provincial Youth Training Program, was made by Honourable Norman McL. Rogers, Minister of Labour, recently.

In making the announcement, Mr. Rogers stated that the Dominion Supervisor of Youth Training felt that the progress of women's courses under the Program had been so marked that it was now advisable to have a competent women's supervisor to assist in this branch of the work. Miss Alexander, the Minister stated, had excellent qualifications for the position. She was a graduate in Home Economics and had taken post-graduate work. For some years Miss Alexander had been Assistant Supervisor of rural women's work in the Province of Manitoba and, subsequently, Supervisor in Alberta. For the past two years she has been actively associated with women's projects under the Dominion-Provincial Youth Training Program.

Extension of Social Security Act in U.S.A.

On page 123 of the February issue of the LABOUR GAZETTE reference was made to a speech delivered by President Roosevelt on January 16 before Congress in which he asked that the benefits of the Federal-State unemployment compensation system be extended to "all of our people as rapidly as administrative experience and public understanding permit."

On June 2, the Committee on Ways and Means reported favourably on a Bill to amend the Social Security Act. By an almost unanimous vote of 361 to 2 the Bill was passed by the House of Representatives.

The broad intent of the amendments is to liberalize slightly the benefits of the Act and to lessen the immediate tax burden under it. It is considered that reserves are piling up faster than required according to actuarial experience.

These amendments were based upon an exhaustive study of the operation of the Act made by the Social Security Advisory Council and endorsed by the Board. Provision is made through these amendments for a statewide reduction-of-taxes plan in those States which show that they can maintain a satisfactory compensation benefit at less than the present 2·7 per cent of payroll tax. In addition to this condition, the State must also meet the following minimum benefit standards if it desires to reduce its general rate:—

1. At least 16 weeks of benefits within a period of 52 consecutive weeks or one-third the individual's earnings, whichever is less.
2. A waiting period of not more than 2 weeks in any 52 consecutive weeks.
3. Weekly benefit rates averaging at least 50 per cent of full-time weekly earnings with a $5 minimum benefit and a maximum benefit of at least $15.
4. Partial benefits for individuals whose weekly earnings fall below their benefit rate for total unemployment.

It is reported that forty-three states are in a position to take advantage of this proposed amendment and that it will save employers between $200,000,000 and $250,000,000 during the calendar year 1940 and as much as $100,000,000 during the present year. Further savings to employers are provided by limiting the unemployment compensation tax to the first three thousand dollars of annual wages. Savings in this connection are estimated to approximate $65,000,000 a year. In the interests of simplification and uniform reporting the tax base for unemployment compensation is changed from "wages payable" to "wages paid," which is the definition used in old-age insurance.

Because of the amendments to the Act some 200,000 additional persons now employees of certain federal organizations such as national banks and state bank members of the Federal Reserve System will be brought under the Act. Other extensions affecting employees working on Government-owned land are also included.

Twenty-fifth session of the International Labour Conference

Elsewhere in this issue a complete report is given of the proceedings of the twenty-fifth session of the International Labour Conference held at Geneva, Switzerland, from June 8 to 28.

The Conference met under disturbed international conditions which were reflected in postponement of action in regard to two items on the agenda, viz.: generalization of the reduction of hours of work in industry, commerce and offices; and the reduction of hours of work in coal mines.

The Conference adopted a Draft Convention (supplemented by four Recommendations) concerning the regulation of working hours and rest periods in road transport; and also two Recommendations concerning technical and vocational training and apprenticeship. It also adopted a number of important resolutions. The texts of the Draft Conventions, Recommendations and Resolutions are included in the article reviewing the proceedings of the Conference.

There were 5,207 accidents reported to the Workmen's Compensation Board of Ontario during the month of June, as compared with 4,625 during May, and 5,206 during June a year ago.

The benefits awarded amounted to $522,494.79, of which $430,299.22 was for compensation and $92,195.57 was for medical aid.

This brings the total benefits awarded during the half year ending June 30 to $3,039,136.85, as compared with $3,193,248.27 during the corresponding period of 1938. The accidents reported during the first six months numbered 26,664, as compared with 29,242 during the same period last year.

According to a report issued by the Mining, Metallurgical and Chemical Branch of the Dominion Bureau of Statistics, there were 43 firms engaged in contract diamond drilling of Canadian mineral deposits during 1938. The income received by this industry from drilling operations conducted during the year under review totalled $3,956,564, the number of wage-earners was reported at 1,627, and the amount of wages paid amounted to $1,801,988.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

SIX applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour during the month of June as follows:—

(1) From 32 employees of the Royal Edward Hotel at Fort William, Ontario, being members of Local 761, Hotel and Restaurant Employees International Alliance. The dispute relates to the employees' request for an agreement embodying increased wages. The industry is one which does not come within the direct scope of the Act and a Board of Conciliation and Investigation can be therefore established only with the consent of the employer. Concurrence in board procedure has been refused by the management of the Royal Edward Hotel.

(2) From 75 employees of the Corporation of the City of Winnipeg being high pressure pump employees, pumphouse employees, electrical maintenance men, engineers, etc., members of the Electrical and Mechanical Workers' Unit of the Federation of Civic Employees. The dispute concerns the request of the employees for cancellation of the balance of the wage reductions in certain cases and for wage increases in other cases, together with certain changes in working conditions.

(3) From 58 employees of the Corporation of the City of Winnipeg being meter repairmen, hydrant repairmen, turnkeys, etc., members of the Water Workers Operators' Union. The request of the employees for cancellation of the balance of the wage decreases is stated to be the cause of the dispute.

(4) From 400 employees of the Hydro Electric System and Water Works System of the Corporation of the City of Winnipeg comprising its clerical forces and meter readers and being members of the Federation of Civic Employees' Clerical Branch. This dispute also relates to the employees' request for cancellation of the balance of wage decreases.

(5) From 40 employees of the Corporation of the City of Winnipeg being diggers, air-compressor men and joint makers, members of the Water Workers' (Diggers) Unit, One Big Union. The dispute concerns the employees' request for cancellation of the balance of the wage reductions for certain employees and for wage increases for others, together with certain changes in working conditions.

(6) From 160 electrical workers in the employ of the Winnipeg Hydro-Electric System at Winnipeg, Pointe du Bois and Slave Falls, Manitoba, being members of Local Unions Nos. B964, 1037 and B1129, International Brotherhood of Electrical Workers. The employees' request for cancellation of existing wage reductions is stated to be the cause of the dispute.

The Department has been advised by the management of the Ottawa Electric Railway Company that the recommendations of the Board of Conciliation and Investigation which dealt with a dispute involving its street railway employees, members of Division No. 279, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, have been accepted and implemented by the company, with the exception of the recommendation concerning holidays with pay, which, it is stated, will receive further consideration.

The department was notified on June 10 of the withdrawal of the application for a Board of Conciliation and Investigation which had been made during May by linemen, operators, etc., in the employ of the Eastern Light and Power Company, Limited, at Sydney, N.S., members of Local Union "B" 1089, International Brotherhood of Electrical Workers. Conciliation officers of the Department of Labour had mediated in this dispute and as a result of the assistance which they rendered a settlement was effected.

CONCILIATION WORK OF THE DEPARTMENT OF LABOUR FROM APRIL 1, 1939, TO JUNE 30, 1939

CONCILIATION proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

The Department of Labour has on its staff conciliators and mediators who are stationed

at Vancouver, Toronto, Ottawa, and Montreal. The territory of the officer resident in Vancouver comprises the four western provinces. The conciliation officer resident in Toronto confines his activities to Ontario, while the officer in Montreal covers the province of Quebec and the Maritime Provinces. The headquarters of the Chief Conciliation Officer are at Ottawa.

The following statement covers the more important conciliation matters dealt with during the period April 1, 1939, to June 30, 1939. (An article covering the period January 1, 1939, to March 31, 1939, appeared in the Labour Gazette, April, 1939, page 377.)

Truck Drivers, Hamilton, Ont.—In the spring of 1939 at the request of the President of the Canadian Brotherhood of Railway Employees a conciliation officer of the Department of Labour investigated a dispute between the Davison Transport Company, Hamilton, Ont., and its truck drivers, members of the Automotive Transport Section of the Brotherhood. The employers had given notice of the termination of the existing agreement with the union. As a result of the Departmental officer's mediation the dispute was settled, and on May 18 the Company withdrew its notice. Twenty-two employees were covered by this agreement.

Truck Drivers, Waterloo, Ont.—In December, 1938, the management of A. H. Foell and Company, Waterloo, Ont., notified representatives of their truck drivers, members of the Automotive Transport Section of the Canadian Brotherhood of Railway Employees, of their desire to terminate the existing agreement covering wages and hours of service. At the request of the union a departmental officer mediated. A settlement was secured, and on April 27, the Company notified the employees that the agreement would be continued in force. Twelve drivers were employed by the Company at the time.

Truck Drivers, Guelph, Ont.—In December, 1938, the management of Brown's Transport, Limited, Guelph, Ont., gave notice of their desire to cancel the existing agreement with the Automotive Transport Section of the Canadian Brotherhood of Railway Employees which covered truck drivers in their employ. Upon request, a conciliation officer of the Department of Labour discussed the situation with both parties and, under date of April 26, 1939, the notice of cancellation was withdrawn. Thirteen employees were covered by the agreement.

Textile Factory Workers (Artificial Silk) Cornwall, Ont.—In the month of April the services of a conciliation officer were requested in connection with a dispute in the plant of Courtaulds (Canada) Limited, Cornwall, Ont. It was alleged that the seniority clause of the existing agreement with the United Textile Workers' Federal Union (Rayon Section) had been violated and that as the manager of the Company had refused to compromise a strike was imminent. A conciliator immediately proceeded to Cornwall and, upon arrival there on the morning of the 21st, learned that a number of the employees in one of the departments had ceased work for about one hour. They had remained in the plant, however, and had resumed work upon being advised that an officer of the Department of Labour would investigate the complaint. The conciliator was informed that the dispute had arisen as a consequence of a reduction in staff which had taken place a few weeks before involving approximately 300 workers. The situation was aggravated by the fact that a further lay-off of a considerable number was in sight. The conciliator conferred with each of the parties affected, and subsequently arranged for a joint conference in which he also participated. As a result a few days later a compromise settlement was made which provided for a rearrangement of the staff. Certain other grievances of a minor nature were also disposed of at this time. Approximately 1,000 workers are employed at this plant.

Stationary Engineers, Hamilton, Ont.—At the request of the Cecretary of Local Union No. 200, International Union of Operating Engineers, Hamilton, Ont., a conciliation officer of the Department of Labour on April 11 and 12, 1939, investigated a dispute existing between the management of the Royal Connaught Hotel and stationary engineers in their employ, members of that union. It was stated that officials of the union had presented a proposed agreement to the management but that the management had not indicated its acceptance or otherwise. The Departmental officer ascertained from the manager of the hotel that he would not consider any agreement with the union until such time as certain dissension which then existed within the union itself and among the hotel employees was eliminated, but he did agree to meet the business agent of the union at any time to discuss any matters he might desire to bring to the attention of the management. Eight employees were affected by this dispute.

Coal Miners, Westville, N.S.—In April, 1939, the Department of Labour was requested to mediate in a dispute between the Intercolonial Coal Company of Westville, N.S., and Local No. 1, Mines Branch, Co-operative Labour Protective Association, regarding the dismissal of two miners and one loader from the employ of the Company. Officers of the Department visited Westville

early in June and interviewed the manager. It was found that the men had been discharged following an error in loading, which the management stated was not the first offence. At the time of the officers' visit, however, two of the men had already been reinstated, and it was agreed that the third man, who had found employment elsewhere, would be re-employed if he made application and could furnish a reasonable explanation of the error.

SALT MINE WORKERS, MALAGASH, N.S.—Under date of April 17, 1939, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with a dispute between the Malagash Salt Company, Limited, New Glasgow, N.S., and certain of their employees being members of the United Salt Mine Workers Local Industrial Union No. 323 (C.I.O.). It was stated that the employees had asked for the institution of an 8-hour day for all employees, an increase in daily wages, and certain other changes in working conditions, and that negotiations between officials of the Company and representatives of the Local Union had failed to bring about a satisfactory adjustment, as had also mediation efforts by the Provincial Deputy Minister of Labour. One hundred and three employees were stated to be directly affected by the dispute. Conciliation officers of the Department of Labour visited New Glasgow and Malagash and interviewed both parties to the dispute in an effort to settle the issue without recourse to Board procedure. It was ascertained that the financial position of the Company was not such as would justify any increase in operating costs, and through the efforts of the Departmental officers the situation was clarified to the extent where it was stated that the Board application would be withdrawn. The union officers agreed to take joint action with the Company to explore other means of attaining their objects.

STEVEDORES, CHECKERS, COOPERS, ETC., PORT ARTHUR AND FORT WILLIAM, ONT.—On April 17, 1939, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with a dispute between the Canadian National Railways and certain of its employees at Port Arthur, Ontario, being stevedores, coopers, sealers, checkers, porters, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. It was stated that 300 employees were directly affected by the dispute and 700 indirectly. The application was made when negotiations for general wage increases, changes in working conditions and the inclusion in the agreement of monthly rated positions had failed.

On the same date an application for a Board was also received covering similar classes of workers, members of this Brotherhood, employed by the Canadian Pacific Railway Company at Fort William. In this instance it was stated that 400 employees were affected directly, and 700 indirectly.

Conciliation officers of the Department discussed the matters in dispute with representatives of the employees and with officials of both Railway Companies, and at the end of June there were indications that a settlement would be concluded shortly.

MARINE ENGINEERS, CANADIAN PACIFIC STEAMSHIPS, LTD. (TRANS-PACIFIC SERVICE), VICTORIA AND VANCOUVER, B.C.—On May 2, 1939, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with a dispute between the Canadian Pacific Steamships Limited (Trans-Pacific Service) and its marine engineers, the majority of whom were members of Councils Nos. 6 and 7, National Association of Marine Engineers of Canada, Inc., Victoria and Vancouver, B.C., respectively. The application stated that the dispute affected 40 members of the union and 21 non-members. It was said that repeated efforts by representatives of the employees to confer with officials of the Company regarding an agreement with the Association covering increased rates of pay and changed leave conditions had failed. A conciliation officer of the Department endeavoured to pave the way toward negotiations between the parties directly affected, and at the end of June the case was still receiving attention.

DECK OFFICERS, CANADIAN PACIFIC STEAMSHIPS, LTD. (TRANS-PACIFIC SERVICE), VANCOUVER, B.C.—Under date of May 12, 1939, the assistance of the conciliation service of the Department of Labour was requested in connection with a dispute involving the Canadian Pacific Steamships Limited (Trans-Pacific Service), and its deck officers, members of the Canadian Merchant Service Guild, Inc. Representatives of the employees had been endeavouring for a period of months, without success, to arrange conferences with the company for the purpose of reaching an agreement covering increased rates of pay and adjustment of leave conditions. An officer of the Department endeavoured to bring the parties together for the purpose of opening negotiations, and at the end of June the case was still before the Department.

RUBBER WORKERS, TORONTO, ONT.—In May, 1939, the President of Local 118, United Rubber Workers of America, Toronto, advised the Department of Labour that efforts of a union committee to negotiate with the management of the Seiberling Rubber Company of that city respecting wages, hours, working conditions and recognition of the union had not been successful, and the assistance of the Department was requested. At the suggestion of the management a committee composed of one man from each department of the plant had been elected and several meetings between the latter committee and officials of the company had taken place but no progress towards a settlement had been made. On May 16 a conciliation officer of the Department conferred with represenatives of the union, and later in the week with officials of the company. The company, however, still refused to negotiate with a union committee, although they were willing to continue conferences with the plant committee. The departmental officer upon being advised that there was nothing further he could do at that time withdrew from the case. On May 30 a strike occurred of approximately 100 members of the union, with some 60 other workers being directly affected by the cessation of work. Particulars of the strike appeared in the June issue of the LABOUR GAZETTE.

SEAMEN EMPLOYED ON THE GREAT LAKES.—In May, 1939, the Minister of Labour was advised that a dispute existed between the Canadian Lake Carriers' Association and the Canadian Seamen's Union regarding the alleged non-observance by one member of the Association of a clause of the existing agreement respecting preference of employment to members of the union. Another clause of the agreement provided that in the event of a dispute arising which could not be settled by negotiation within a reasonable time it might be referred by either party to the Dominion Minister of Labour or an arbitrator appointed by him, the decision of such arbitrator to be final and binding. Accordingly, under date of June 2, Professor Norman A. M. MacKenzie of Toronto was appointed sole arbitrator pursuant to the provisions of the agreement.

RUBBER FACTORY WORKERS, KITCHENER, ONT.—The conciliation service of the Department of Labour was requested early in May to investigate a dispute which had arisen involving the B. F. Goodrich Rubber Company of Canada, Limited, Kitchener, Ont., and certain of its employees, members of Local No. 73, United Rubber Workers of America. The management had refused to grant a 5-cent per hour wage increase in the basic rates of 21 young men who, it was alleged, were doing the work of men at boys' wages These young men had ceased work on April 25, and approximately 175 sympathizers had also walked out. This action tied up the whole department and involved approximately 450 workers. On the morning of the 9th the union had called out an additional 300 employees in the tire department, which tied up operations throughout the entire plant. Negotiations respecting an agreement with the union covering the whole plant had failed and the workers had taken strike action with a view to obtaining a settlement of all outstanding differences.

The conciliation officer conferred with each of the parties and subsequently a basis of settlement was put forward which it was hoped would be accepted. A joint conference between the parties directly involved followed, but misunderstandings arose, and on May 16 two officers of the Department again visited Kitchener. Arrangements were made for further negotiations between the disputing parties, and the question of procedure under the Industrial Disputes Investigation Act was also discussed. No progress was made during these negotiations and subsequently the employees submitted an application for a Board of Conciliation and Investigation. As the Company did not concur in the application and as disputes in this industry are not within the direct scope of the Industrial Disputes Investigation Act procedure in this direction was not possible. Toward the end of May trouble in connection with the picketing developed and the Mayor of Kitchener and officials of the Ontario Department of Labour intervened. On June 9 a settlement was reached in the offices of the Provincial Minister of Labour. This provided for the immediate resumption of work, the prompt renewal of negotiations, and also that no discrimination or intimidation would be exercised against any employee in respect of trade union membership. Further references to this dispute will be found in the June issue of the LABOUR GAZETTE (page 552), also elsewhere in this issue on page 660.

LINEMEN, OPERATORS, ETC., SYDNEY, N.S.—An application for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act was received in the Department of Labour on May 6, 1939, to deal with differences between the Eastern Light and Power Company, Limited, Sydney, N.S., and certain of its employees being electrical workers on lines, operators, etc., members of Local Union "B" 1089, International Brotherhood of Electrical Workers. Recognition of the union, general wage increases of 10 cents per hour, double

pay for overtime, holidays with pay, and improved working conditions had been requested by the men. Forty-one employees were stated to be directly affected. On June 2 conciliation officers of the Department of Labour visited Sydney and on following days conferred with both parties to the dispute, finally arranging a joint conference at which the management agreed to recognize the union, to concede a general wage increase of 2 cents per hour with a 5-cent increase to the lower-paid men, and to make certain minor adjustments in working conditions. These concessions were acceptable to the employees and the Board application was accordingly withdrawn. On June 9 an agreement between the Company and its employees, members of Local Union "B" 1089 of the International Brotherhood of Electrical Workers, was signed.

CHECKERS, PORTERS, COOPERS, ETC., PORT MCNICOLL, ONT.—On May 25, 1939, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with a dispute between Mr. F. W. Nicholas, contractor for the Canadian Pacific Railway Company, and checkers, porters, coopers, coal handlers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, employed at the Railway Company's wharf at Port McNicoll, Ont. The application had been filed when negotiations respecting a new agreement covering increased rates of pay and changes in working conditions had failed. It was stated that 225 employees were affected by the dispute. Departmental officers took up the case with representatives of the employees, and also interviewed officials of the Company in Montreal in an effort to bring about a settlement without Board procedure. At the end of June the matter was still before the Department.

MOTOR COACH AND TRUCK DRIVERS, SAINT JOHN, N.B.—On June 5, 1939, an application was received in the Department of Labour for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the SMT Eastern Limited, Saint John, N.B., and its motor coach and freight truck drivers, members of Division No. 1182 Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America. The cause of the dispute was stated to be the failure of the union to secure an agreement with the employers covering union recognition, wages, hours and working conditions of the drivers. A conciliation officer of the Department conferred on several occasions with representatives of each of the parties in Saint John in an effort to adjust the dispute. The employees agreed that if a settlement of the other matters in dispute could be secured their demand for union recognition would not be pressed at this time. The Company, however, maintained that it was not then prepared to negotiate an agreement respecting wages but it was agreed that some concessions in this regard, and also in respect to seniority and distribution of work, would be made at once. The management stated that 56 drivers were employed. At the end of June the matter was still undetermined.

NAVIGATING OFFICERS AND MARINE ENGINEERS, VANCOUVER, B.C.—A dispute involving the British Columbia Towboat Owners' Association, Vancouver, B.C., and its navigating officers, members of the Canadian Merchant Service Guild, Inc., and marine engineers, members of Council No. 7, National Association of Marine Engineers, Inc., has received the attention of a conciliation officer of the Department for the past several months. The employees in each instance had been endeavouring through their union representatives to secure an agreement with the employers covering increased rates of pay and adjustments in working conditions. The Departmental officer was successful in bringing together a committee representing the employers and officers of the Canadian Merchant Service Guild, and at the end of June there was reason to believe that a mutually acceptable agreement would be concluded shortly. It was anticipated that conferences with officers of the National Association of Marine Engineers would commence without undue delay.

Accident Prevention in Cement Industry

The Portland Cement Association in its publication for June states that "only once previously in the 26 years of organized safety work in the portland cement industry has a better accident prevention performance been recorded than in 1938. The downward trend of disabling injuries so definitely established in 1937 continued, and the problem of disproportionately high severity of injuries appeared nearer solution.

"The frequency of injuries declined 11 per cent during the year to 4·61 per million man-hours worked. The severity of injuries decreased 22 per cent to 2·44 days lost per thousand man-hours, the second consecutive year in which injury severity was reduced more than one-fifth. The best previous year was 1932 when 4·5 cement workers were injured per million man-hours and the number of days lost on account of injuries was 1·80 per thousand man-hours.

STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1939

THE following table shows the number of disputes, workers involved and time loss for June, 1939, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Numbers of employees involved	Time loss in man working days
* June, 1939	11	2,023	8,963
* May, 1939	11	3,424	17,203
June, 1938	22	2,516	12,672

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

While in June the number of strikes and lockouts was the same as in May and the number of workers involved and the time loss in man working days were lower, seventy per cent of the time loss was due to strikes of rubber factory workers at Kitchener, Ont., and Toronto, Ont., carried over from May but terminated in June. Except for strikes of coal miners at Glace Bay, N.S., and Blairmore, Alta., and of sawmill workers at Timmins, Ont., the other disputes involved small numbers of workers for short periods. In June, 1938, the important disputes involved hosiery factory workers at Hamilton, Ont., lime plant workers at Blubber Bay, B.C., and sawmill workers at Fort Frances and Timmins, Ont.

Five disputes were carried over from May, including one involving house wrecking company employees at Toronto, Ont., reported to the Department too late for inclusion in the June issue of the LABOUR GAZETTE, and six disputes commenced during June. Of these eleven disputes, ten were terminated during the month, five resulting in favour of the workers involved, two resulting in compromise settlements, one being partially successful and the results of two being recorded as indefinite. At the end of the month, therefore, there was only one strike or lockout on record, namely: cap factory workers, Montreal, P.Q.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to eight such disputes, namely: coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; lime plant workers, Blubber Bay, B.C., June 2, 1938, one employer; lithographers, London, Ont., August 31, 1938, one employer; bakers and helpers, Vancouver, B.C., November 11, 1938, one employer; dressmakers, Montreal, P.Q., January 20, 1939, one employer; and stationary engineers, Toronto, Ont., March 2, 1939, one employer.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowance for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A dispute involved 300 coal miners on one shift in a colliery at Sydney Mines, N.S., in a stoppage on May 25 to enforce a demand of five chain runners to be placed on contract rates of pay in place of datal rates. Work was resumed the next shift when officials of the United Mine Workers of America stated that this demand would be dealt with when negotiations were resumed for an agreement covering wages and working conditions for the mines of the company.

A dispute as to the rates of pay for two hoisting engineers in one mine at Dominion, N.S., resulted in loss of work for half of a shift for 200 men on June 2, and for part of the next shift for other men, when on orders of the union committee they refused to hoist coal though running the hoist for other work. A change had been made in the operation of the mine which increased the amount of coal to be hoisted on certain days and an increase to the rate on the main shift was demanded. The management had offered to compromise at the rate paid in another mine for similar work but this was refused. Later this offer was accepted.

A strike of 75 caddies at a golf course in Halifax, N.S., occurred on June 10, an increase in rates of pay from 40 cents to 60 cents per round being demanded. Work was resumed next day pending negotiations. A rate at 50 cents was finally agreed upon. Particulars as to this dispute were not received in time for inclusion in the statistical tables.

The Board of Arbitration appointed to deal with the dispute between the Dominion Rubber Company, Limited, and its employees in two plants at Kitchener, Ont., members of the United Rubber Workers of America, as to an increase in wages of five cents per hour, reported to the Ontario Minister of Labour at the end of June. The agreements signed on the settlement of a strike from February 8 to March 10 provided that the wage demand should be arbitrated. The Board consisted of Professor Norman MacKenzie of the University of Toronto, Chairman, appointed by the Ontario Minister of Labour, J. L. Cohen, K.C., representing the employees and J. A. Martin, vice president of the company. The award was an increase in wages of one and one-half cents per hour.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to June

RUBBER FACTORY WORKERS (SHOES), KITCHENER, ONT.—At the end of May, on behalf of the workers involved in the strike in the shoe department of one company which commenced on April 25 and in the subsequent strike in the tire department which commenced on May 9, members of the United Rubber Workers of America made an application for a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. The demands of the workers included an agreement with the employing company, a general increase in wages of five cents per hour, an increase in the base rate for twenty-one youths in the shoe division and payment every week in cash instead of fortnightly by cheque. Negotiations for an agreement had been in progress for some time until the strike of twenty-one youths on April 25. A Board can be established in this industry only on application or consent of both parties and the consent of the employing company was not received. The management had sent a letter to each employee asking for a reply from each person willing to return to work on previous conditions, and stated that a substantial number had replied and that the plant would soon be opened under police protection. Proposals for a settlement made by the Mayor of Kitchener were not accepted and the Ontario Minister of Labour met representatives of the parties to the dispute in Toronto on June 5 and again on June 9. A settlement was reached which provided that work would be resumed immediately in accordance with production requirements and senority rights and without discrimination, that negotiations would be continued for a mutual understanding on all matters involved, and for a policy or program *re* employment of youths, and that neither party would discriminate against or intimidate any employee in respect to trade union membership. This settlement was accepted by a vote of employees at a meeting on June 10. Work was resumed on June 12, about 330 employees being taken on, the remainder, over 400 workers, being expected to be required by the end of the week. On June 2, sixty-eight members of the picket were charged with intimidation under Section 501 of the Criminal Code, as a result of preventing inspectors from entering the plant. Along with the cases against five others, charged in May, the proceedings in the magistrate's court were adjourned from time to time. The picketing was suspended on June 6, the day of the visit of their Majesties, the King and Queen, to Kitchener.

RUBBER FACTORY WORKERS (TIRES, ETC.), KITCHENER, ONT.—This strike which commenced on May 9 in sympathy with that of workers in the shoe department in the same establishment on April 25, is outlined in the paragraph immediately preceeding.

RUBBER FACTORY WORKERS, TORONTO, ONT.—This strike, which commenced on May 30 to secure a union agreement with the United Rubber Workers of America and an increase in wages of ten per cent for those receiving over 60 cents per hour and 15 per cent for the others, with minimum rates at 50 cents and 35 cents for male and female employees respectively, was terminated on June 30 as a result of conciliation by officers of the Ontario Department of Labour. It was arranged that work would be resumed on July 4, all workers on the pay-roll on May 29 being recalled as required and that hours per week would be forty instead of fifty. The employer reported that eighty workers out of 168 were on strike while the union reported 110 on strike, 40 of whom secured work with other employers during the strike. On June 2 a deputation from the Toronto Trades and Labour Council protested to the Police Commission against the restriction of picket members to four. A member of the picket was arrested on May 30 on a charge of assaulting a police officer, being released on bail and the hearing adjourned. The union picketed retail stores selling the company's products.

CAP FACTORY WORKERS, MONTREAL, P.Q.—A settlement of this dispute, alleged to be a lockout of union workers, was not reported at the end of the month but negotiations for a settlement were reported to be in progress.

BUILDING WRECKERS, TORONTO, ONT.—This strike, reported too late for inclusion in the June issue of the LABOUR GAZETTE, commenced on May 31 to secure an agreement with the International Hod Carriers, Building and

STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1939.*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to June, 1939				
MANUFACTURING—				
Rubber Products—				
Rubber factory workers (shoes), Kitchener, Ont.	1	200	1,800	Commenced Apr. 25, 1939; for increased wages, piece rates; terminated June 10; conciliation (provincial); indefinite.
Rubber factory workers (tires, etc.), Kitchener, Ont.	1	300	2,700	Commenced May 9, 1939; in sympathy with strike in shoe department in the same plant commenced Apr. 25, and for union agreement; terminated June 10; conciliation (provincial); indefinite.
Rubber factory workers, Toronto, Ont.	1	80	2,000	Commenced May 30, 1939; for union recognition and agreement with increased wages, etc.; terminated June 30; conciliation (provincial); compromise.
Textiles, Clothing, etc.—				
Cap factory workers, Montreal, P.Q.	1	5	130	Alleged lockout of union members, commenced May 3, 1939; unterminated.
CONSTRUCTION—				
Buildings, etc.—				
Building wreckers, Toronto, Ont.	1	4	20	Commenced May 31, 1939; for union agreement and increased wages; terminated June 5; negotiations; in favour of workers.
(b) Strikes and Lockouts commencing during June, 1939				
MINING, ETC.—				
Coal miners, Glace Bay, N.S.	1	750	1,025	Commenced June 2; against discharge of worker following jail term; terminated June 5; negotiations; in favour of workers.
Coal miners, Reserve, N.S.	1	40	40	Commenced June 21; against temporary employment of a shot firer to replace a coupler; terminated June 21; negotiations; in favour of workers.
Coal miners, Blairmore, Alta.	1	294	588	Commenced June 23; to secure "make up" of piece work earnings to minimum day rate; terminated June 24; negotiations; in favour of workers.
MANUFACTURING—				
Miscellaneous Wood Products—				
Sawmill workers, Timmins, Ont.	4	225	600	Commenced June 6; against reduction in rates of wages; terminated June 9; conciliation (municipal); partially successful.
TRANSPORTATION—				
Water—				
Pulpwood loaders, Nipigon, Ont.	n, ...	50	50	Commenced June 14; for wages at prevailing piece rates instead of per hour; terminated June 14; negotiations; in favour of workers.
SERVICE—				
Recreational—				
Caddies, Dartmouth, N.S.	1	75	10	Commenced June 10; for increase in wages; terminated June 10; negotiations; compromise.

* In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

Common Labourers' Union of America providing for 45 cents per hour for ground men and 50 cents per hour for bar men. As a result of negotiations the agreement was signed and work was resumed on June 6.

Disputes Commencing During June

COAL MINERS, GLACE BAY, N.S.—Miners in one colliery ceased work on June 2 when a miner who had been absent from work for thirty days serving a jail term, was refused employment. Strikes had occurred recently in other mines operated by the same company as a result of discharge of workers for extended absence chiefly owing to imprisonment for offences against liquor laws, etc., and negotiations were proceeding between the district executive of the United Mine Workers of America and company officials to reach agreement as to the practice to be adopted. Work was resumed on June 6 pending the result of these negotiations. Later it was reported that the miners in this and similar cases were reinstated and in the agreement the clause dealing with regular attendance was changed to provide for suspension when an employee absents himself from his work for a period of two days without the consent of the company, other than because of illness, and for dismissal on the third offence. For absence for a period in excess of one month, except in case of accident or illness, the employee is to be considered discharged.

COAL MINERS, BLAIRMORE, ALTA.—Coal miners in one colliery ceased work on June 23 claiming that the earnings for certain miners at piece rates had not been "made up" to the minimum day rate as specified in the agreement with the union. Following negotiations work was resumed on June 26, operations in that part of the mine affected by the dispute having been suspended pending a settlement. It was reported that the management had finally agreed to make up the difference to the miners concerned for the two weeks ended June 17.

SAWMILL WORKERS, TIMMINS, ONT.—Employees in three mills ceased work on June 6 in protest against a reduction in the rate of wages for labourers from $3.25 per day of ten hours to $3. A fourth mill involved had not yet commenced operations. A strike in these mills in 1938 had resulted in an increase in wages for labourers from $2.75 per day to $3.25 and for higher paid classes of ten cents per day. Following conciliation by the Acting Mayor of Timmins, work was resumed in one of the mills on June 8, an agreement with the Lumber and Sawmill Workers' local of the United Brotherhood of Carpenters and Joiners of America having been signed. Under this agreement, outlined elsewhere in this issue, the labourers' rate was continued at $3.25 per day of ten hours. Work was resumed in the other mills on June 9 following negotiations, the employees having accepted the reduced rate at 30 cents per hour for labourers. It was also reported in the press that the rate for board was increased from 85 cents per day to $1 but this was not confirmed.

PULPWOOD LOADERS, NIPIGON, ONT.—A number of the workers employed at loading boats with pulpwood ceased work on June 14, claiming that the hourly rate of wages at 45 cents was not equal to the piece rates usually paid. Work was resumed the next day at the piece rates and the hourly rate was raised to 50 cents for those who had not joined in the stoppage.

CADDIES (GOLF), DARTMOUTH, N.S.—A dispute on June 11 involved about seventy-five caddies in a stoppage for an hour and one-half to secure an increase in the rate of pay for a round of eighteen holes from 35 cents to 45 cents. It was reported that work was resumed when the rate was increased to 40 cents pending the result of further negotiations as to a final settlement. A similar strike at Halifax is noted in a previous paragraph.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1939, issue in the review of Strikes and Lockouts in Canada and Other Countries, 1938. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is taken for the most part from newspaper reports.

Great Britain and Northern Ireland

In Great Britain the *Ministry of Labour Gazette* publishes statistics dealing with all strikes and gives some details of the more

important ones. These details which are published after investigation do not always agree with the information given earlier in the press.

The number of strikes which began during May was 72 and 15 were unterminated at the end of the previous month, making a total of 87 in progress during the month, involving 26,000 workers with a resultant time loss of 128,000 man working days.

Of the 72 disputes which began during May, there were 12 which arose out of demands for increases in wages, 2 against proposed wage reductions and 16 on other wage questions; 21 were over questions respecting the employment of particular classes or persons, 12 arose out of disputes concerning working conditions and 8 out of questions of trade unionism. There was one dispute due to sympathetic action.

Final settlements reached during May numbered 56. Of these, 18 were settled in favour of the workers, 24 in favour of the employers and 14 resulted in compromises. In the case of 9 other disputes work was resumed pending negotiations.

The coal mining industry had the greatest number of men idle in May because of industrial disputes. There were two outstanding strikes, the first near Barnsley, beginning May 19, involved 1,160 miners who ceased work in protest against unsatisfactory drinking water supplied them. Work was resumed on May 24, but under what conditions was not reported. The other miners' strike was in Durham county and directly affected 1,280 men who on May 22 refused to continue working with non-unionists. In this case work was resumed the same day on the advice of trade union officials (apparently under the same conditions).

One other large dispute involved apprentices at Clydeside, approximately 2,000 of them by May 27, though the dispute which began in one establishment on May 18 affected only a few at first. Later other firms were involved, the apprentices demanding that their six months compulsory military service be considered as part of their apprenticeship period. They also asked for improvements in wages and other conditions of employment.

On June 14 at Liverpool, according to a press report, 5,000 union workers in an aircraft factory ceased work against the discharge of an engine fitter who refused to do work other than engine fitting.

Strikes and Lockouts in 1938

The May issue of the *Ministry of Labour Gazette* contains a statistical review of strikes and lockouts which took place in Great Britain and Northern Ireland during 1938.

The number of disputes resulting in stoppages of work reported as having begun during 1938 was 875 as compared with 1,129 in 1937. The number of workers directly involved in these disputes was about 211,000, and about 63,000 workers were indirectly involved. In addition, about 1,000 workers were involved, directly or indirectly, in 10 strikes which were unterminated at the end of 1937. The number of workers involved either directly or indirectly in all disputes in progress during 1938 was about 275,000 as compared with 610,000 the previous year, the resultant time loss being 1,334,000 man working days as compared with 3,413,000 in 1937.

The industry most affected by industrial disputes was coal mining: the 363 strikes in this industry involved 63·1 per cent of the workers involved in all disputes and the resultant time loss was 52·2 per cent of the total for the year. Engineering and shipbuilding with 76 strikes accounted for 11·3 per cent of the total number of workers involved and 11·6 per cent of the total time loss. Building, public works, contracting, etc., had 110 strikes, which involved 5·0 per cent of the total number of workers and resulted in 8·6 per cent of the total time loss.

The classification according to the number of workers involved shows that of the 875 strikes recorded during 1938, 582 or 66·5 per cent involved less than 250 workers in each case, and in only 10 strikes was the number involved 2,500 or more.

Most of the strikes during 1938 were of comparatively short duration, 618 or 70·6 per cent having been terminated in less than a week. Seven strikes accounted for 31·8 per cent of the total time loss through disputes beginning during 1938.

Wage questions were the cause of 339 or 38·7 per cent of the strikes which began during 1938. Employment of particular classes or persons caused 257 strikes or 29·4 per cent of the total. Disputes over working arrangements, rules and discipline accounted for 130 strikes or 14·8 per cent, and trade unionism differences were responsible for 92 strikes or 10·5 per cent of the total number.

As for results, strikes ending in favour of the employers accounted for one-half of the disputes beginning in 1938 and for over one-half of the workers directly involved. Over one-quarter of the disputes ended in compromises and less than one-quarter resulted in favour of the workers.

The most frequent method of settlement of disputes in 1938, as in previous years, was direct negotiation, three-fifths of all strikes and lockouts being settled this way. Disputes

in which work was resumed on the employers' terms without negotiations accounted for over one-quarter of the number of strikes and for 30 per cent of the workers directly involved in disputes.

Jamaica

A waterfront workers' strike at Kingston which started during the third week of June was the cause of serious rioting on June 18. One man was killed when the police fired on a mob which refused to disperse after attempting to set fire to the headquarters of the Jamaica Ex-Servicemen's Trade and Labour Union. Soldiers and police patrolled the city, and all waterfront work was carried out under armed guard. The riots were reported to be the result of trade union dissension and a popular belief that the government's unemployment relief program was an attempt to reduce wages. Later information is that the situation had become less tense and no further outbreaks were expected.

New Zealand

The Dominion of New Zealand has recently published statistics dealing with industrial disputes during the first quarter of 1939. During that period there were 23 strikes, which involved 5,710 employees of 38 firms and which resulted in a time loss of 23,611 man working days. The estimated loss in wages was £28,095. During the corresponding three months of 1938, there were 26 strikes, involving 3,898 workers and resulting in the loss of 9,988 man working days.

United States

Preliminary estimates of strikes in April, 1939, which, as the Bureau of Labour Statistics points out, are based on "scattered information from newspaper and other sources and are subject to revision as more definite reports" are received show 220 strikes as beginning during the month, which with 125 unterminated at the end of March, made a total of 345 in progress during the month. The number of workers involved in these disputes was 455,000 with a resultant time loss of 6,000,000 man-working days. The comparable figures for the previous month, which have been partially revised but are not final, show that there were 325 strikes in progress, involving about 40,000 workers with a resultant time loss of 600,000 man-working days.

The strike of deckhands, engine room helpers and stewards employed by one steamship company at Boston (LABOUR GAZETTE, June, 1939, page 557) terminated June 4. The demand was for increased wages but no information about the settlement has been reported. Longshoremen and others at Yarmouth, N.S., and Saint John, N.B. were seriously affected by the disputes, particularly at Yarmouth where business suffered from a loss in tourist trade and from a shortage of fruit regularly brought from Boston by an Eastern Steamship Lines vessel.

The strike of oil tanker seamen of the Atlantic Coast declared on April 18 (LABOUR GAZETTE, June, 1939, page 557) for a preferential hiring clause in a new agreement was called off June 14 by the National Maritime Union (affiliated with the Congress of Industrial Organizations) in order to forestall the organizing of company unions on Standard Oil Company tankers.

Through the efforts of a Federal conciliator the large strike of automobile body workers at Detroit which began about May 22 (LABOUR GAZETTE, June, 1939, page 557) was ended June 7, a new agreement being signed giving the United Automobile Workers of America (C.I.O.) sole bargaining rights in all plants of the Briggs Manufacturing Company.

Further stoppages of work occurred in the automobile industry when the United Automobile Workers (affiliated with the American Federation of Labor) called strikes about June 9 in General Motors plants at Flint and Saginaw, Michigan, in order to force recognition of the A.F. of L. union as sole bargaining agent for all employees instead of the United Automobile Workers of America affiliated with the Congress of Industrial Organizations. Approximately 8,000 men ceased work. Pickets of the A.F. of L. union clashed with the C.I.O. men reporting for work. State Police action being necessary to restore order. Some were seriously hurt and a number of arrests were made. Factory operations were curtailed but did not cease, and on June 13 were reported almost normal by the corporation, most of the strikers having returned to work.

Another automobile workers' strike of large proportions occurred at Milwaukee, Wisconsin on June 10 where 7,500 employees of the Allis-Chalmers Manufacturing Company, members of the (C.I.O.) United Automobile Workers, walked out for reasons not reported in press despatches at hand. Rioting took place, members of the picket stoning street cars carrying office workers to the plant and the police used tear gas. The Governor of Wisconsin refused to call out State Militia. The dispute terminated June 17 following conferences between the parties and the State Governor.

On June 3, approximately 1,000 cold storage warehousemen in New York City employed in 22 plants ceased work following failure to reach a new agreement. The previous contract expired May 31, 1939, and was

a closed shop agreement signed by the Inland Warehousemen's Union, Local 318 of the International Brotherhood of Teamsters, etc. (A.F. of L.) and the Cold Storage Warehousemen's Association. The union demanded a 40-hour week instead of 44 hours with no change in weekly pay of $35, and time and one-half for work on Saturdays. The State Mediation Board intervened and was successful in having a new agreement signed which conceded the principal demands of the union.

At San Francisco, some 5,000 waterfront workers ceased work on June 17 because ten shipping clerks were hired on a monthly instead of an hourly basis. Both parties claimed violation of standing agreements. The United States Maritime Labour Board intervened on June 19; conferences of the interested parties were arranged but no settlement of the dispute has been reported.

Also on June 17, the entire sugar industry in Philadelphia was at a standstill owing to a strike of about 2,700 employees, members of the Sugar Refinery Workers' Union (A.F. of L.). No other information is available at present except that a city-wide contract had expired the day before.

On or about June 17 according to a press despatch, in Los Angeles 1,200 lumber and sawmill workers and operating engineers struck work for causes not reported. Pickets were posted at the seventeen lumber yards affected.

In Washington, D.C., sometime during June, 1,400 carpenters, members of the United Carpenters and Joiners of America, ceased work to secure an increase in wages from $1.50 to $1.62½ per hour. There were also 1,600 members of three locals of the A.F. of L. building labourers' union on strike to secure wage rates from 80 cents to $1 per hour instead of 70 cents.

STRIKES IN 1938

The Bureau of Labor Statistics of the United States Department of Labor has recently published in their Monthly Labor Review for May, 1939, an "Analysis of Strikes in 1938." Lockouts are included in the record.

The year 1938 was a year of comparatively numerous small strikes of short duration, but the number of strikes, 2,772, was greater, with the exception of 1937, than in any year since 1920. The number of workers involved in strikes, 688,376, was smaller than in any year since 1932 while the resultant time loss, 9,148,273 man working days, was less than in any year since 1931.

In 1938, the usual seasonal trend of strikes was noticeable, with an increase in number during the early months to a peak in the spring or early summer, a fairly high level until autumn, and then a decline during the late months. The smallest number of strikes beginning in any month was 168 in January, strikes then becoming more numerous until May when there were 300. The greatest number of workers involved in strikes, however, was in September, when one of the largest strikes of the year began in the motor trucking industry in New York City and New Jersey. The largest time loss in any month in 1938 was in May when it amounted to 1,174,052 man working days.

STRIKES IN THE UNITED STATES, 1919 TO 1938

Year	Strikes	Workers involved (a)	Time loss in man working days
1919	3,630	4,160,348	(b)
1920	3,411	1,463,054	(b)
1921	2,385	1,099,247	(b)
1922	1,112	1,612,562	(b)
1923	1,553	756,584	(b)
1924	1,249	654,641	(b)

(a) The number of workers involved in strikes between 1919 and 1926 is known for only a portion of the total. However, the missing information is for the smaller disputes and it is believed that the total here given is fairly accurate.
(b) Figures not compiled.

Half of the strikes during 1938 were in four industrial groups. The largest number was in textiles and its products (including clothing) which had 536 strikes, also the largest number of workers involved and the greatest time loss. Trade was second with 339 strikes, followed by the construction industry with 315, and transportation and communication with 211. While the transportation equipment industry (which includes automobile manufacturing) had only 49 strikes, it had the second largest number of workers involved.

Exactly half of the strikes which occurred during 1938 arose out of various questions of union organization and these disputes involved 32·6 per cent of the strikers and resulted in 44·4 per cent of the time loss. Causes grouped under "wages and hours" accounted for 28·0 per cent of the strikes, 36·7 per cent of the workers and 34·8 per cent of the time loss. "Miscellaneous" causes led to 22·0 per cent of the strikes, involving 30·7 per cent of the workers and causing 20·8 per cent of the time loss.

The method of classifying strikes by results used by the United States Bureau of Labor

Statistics differs from that used in Canada. In this country results of strikes are classified as being in favour of workers, in favour of employers, compromise or partially successful, and indefinite or unterminated. In the United States results are classified where possible according to the degree of success from the workers' standpoint. Strikes arising out of jurisdictional or factional disputes are not classified as to results. The results of strikes which would be shown as indefinite in the Canadian classification are shown in the United States as "not reported" but a footnote states that during 1938 many of the strikes so classified were small strikes in the women's clothing industry, and while the union involved regarded many of them as being satisfactorily settled the exact terms were not reported. Results according to this classification are shown in the accompanying table.

RESULTS OF STRIKES IN THE UNITED STATES, ENDING IN 1938

—	Strikes		Workers involved		Man-days idle	
	Number	Per cent of total	Number	Per cent of total	Number	Per cent of total
Substantial gains to workers	1,110	40·0	203,201	29·6	2,379,845	26·7
Partial gains or compromises	829	29·9	333,207	48·4	3,956,864	44·3
Little or no gains to workers	578	20·9	100,156	14·6	1,673,684	18·8
Jurisdiction, rival unions or factions	150	5·4	34,513	5·0	851,591	9·5
Indeterminate	25	0·9	13,339	1·9	28,286	0·3
Not reported	80	2·9	3,213	0·5	35,829	0·4
Total	2,772	100·0	687,629	100·0	8,926,099	100·0

Other subjects dealt with in this analysis of strikes are as follows: states and cities affected, number of workers involved, number of establishments involved, duration, sex of workers, labour organizations involved, methods of negotiating settlements and sit-down strikes.

Compulsory Training of Labour in Japan

Industrial and Labour Information, the weekly periodical published by the International Labour Office, in its issue of May 29, reviews a recent feature of industry in Japan, viz., the compulsory training of labour. This review points out that the growing need to cope with the shortage of skilled labour in the munitions and other industries has led the Japanese Government to draft Imperial Orders in execution of the provisions of the General Mobilization Act passed in March, 1938. These Orders, approved in December, 1938, by the General Mobilization Committee, were promulgated on March 31 and came into effect on April 5, 1939. A summary of their provisions is given in part below.

Every head of an undertaking engaged in operations which appear on a schedule drawn up by the Minister of Welfare, and normally employing more than 200 workers over the age of sixteen, is required to organize a technical training course for a certain number of his workers. The Minister may also extend this regulation to employers who have less than 200 but more than 50 workers over sixteen in their factories, provided that the latter are engaged in one of the scheduled processes. The Minister has scheduled 22 kinds of work, all connected with metal refining and the manufacture of machinery and tools; the technical branches in which training is to be given number 61. The number of workers to be trained must not exceed six per cent of all workers in each factory.

The workers to be trained must be over fourteen and under seventeen years of age at the time their training begins. They must have attended a higher primary school for two years, or received another form of education recognized to be equivalent to this by the Minister of Education. They will, in general, be required to undergo three years' training, but this may be reduced to two years in special cases, with the permission of the competent Minister, or to less than two years if the necessities of the war so demand.

During the three years, the workers to be trained are to be given in all 220 hours of general education and 500 hours of technical education. These hours are to be deemed to be included in working hours within the meaning of the Acts and Orders governing hours of work.

The cost of training is to be borne entirely by the employers, for whom, however, certain compensation and subsidies within the limits of the State budget will be granted by Ministerial Order.

In addition the Minister of Education may call upon certain universities, technical schools and training institutions to train technicians in certain classes and numbers to be prescribed by himself.

LABOUR LEGISLATION ENACTED BY THE PARLIAMENT OF CANADA IN 1939

LEGISLATION of special interest to workers passed at the 1939 session of Parliament which opened on January 12 and closed on June 3 includes an amendment in the Criminal Code for the protection of trade union members, provision for employees' pension and insurance funds in trust and loan companies and compensation for employees displaced or adversely affected by economy schemes of the Canadian National and Canadian Pacific Railway Companies. Unemployment and agricultural assistance is again provided for but the Dominion-Provincial youth training program has been brought under a special Act with a separate appropriation. Moneys appropriated under the Technical Education Act of 1919 which have not yet been used by any province to the limit fixed by the Act are to be available for another five years.

Freedom of Association

A private member's Bill to amend the Criminal code so as to protect freedom of association on the part of workmen which failed to reach a vote in 1938 was re-introduced this year and later incorporated with amendments in a Government Bill and passed.

This Act makes it an offence, punishable on indictment or on summary conviction for any employer or his agent, whether a person, company or corporation, wrongfully and without lawful authority, to refuse to employ or to dismiss a person for the sole reason that such person is a member of a lawful trade union or lawful association of workmen "formed for the purpose of advancing their interests in a lawful manner and organized for their protection in the regulation of wages and conditions of work." Similarly, it is an offence to seek, by intimidation, threat of loss of position or by actual loss of position or by threatening or imposing any pecuniary penalty to compel an employee to abstain from belonging to such a trade union or association, or to conspire or agree with any other employer to do any of these things. The penalty for an offence under this section is a fine not exceeding $100 or three months' imprisonment in the case of an individual and a fine not exceeding $1,000, in the case of a company or corporation.

Youth Training

The Youth Training Act, 1939, provides for the appointment by the Governor in Council of a supervisor of youth training and appropriates four and one-half million dollars for a period of three years to be paid out to the provinces to enable them to carry on a program of youth training. The general object of the Act, which is to be administered by the Minister of Labour, is to promote and assist in the training of unemployed young persons to fit them for gainful employment in Canada. Unemployed young persons, for the purposes of the Act, include all young persons between 16 and 30 years of age who are not gainfully employed and whose families are not in a position to pay the full cost of their training, who are registered for employment with the Employment Service of Canada or are certified as eligible by the clerk of the individual's home municipality or by an appropriate provincial authority or are deserving transients certified as eligible by an appropriate provincial authority.

The money is to be paid from the Consolidated Revenue Fund to the provinces on the basis of agreements, approved by the Governor in Council, between the provincial Governments and the Federal Minister of Labour. The yearly grant to any province is to be determined by the Governor in Council but must not exceed the amount which the provincial government agrees to expend on projects undertaken under the Act within the year. The money is to be available at the rate of a million and one-half dollars a year for three years and any unexpended portion of the allotment for the first or second year may be carried forward but no part of the total amount is to be paid to any province after March 31, 1943. The period, terms and conditions of the appointment of the Supervisor of Youth Training are to be determined by the Governor in Council.

During the past two years funds for a similar youth training program were provided each year under the Unemployment and Agricultural Assistance Act but the operation of the Youth training program was considered to be impaired by the temporary nature of the provision made under an Act which is in force for one year only.

The Technical Education Extension Act, 1939, makes available to the provinces, until March 31, 1944, any unexpended portion of their share of the $10,000,000 appropriated for technical education under the Technical Education Act, 1919. In debate, the Minister of Labour stated that Manitoba was the only province which has not taken up its allotment under the original legislation and the amount which may still be claimed by that province is $286,037.59.

Unemployment Relief

The Unemployment and Agricultural Assistance Act, 1939, extends until March 31, 1940, the provisions of the 1938 Act of the same

title. The statute enables the Governor in Council to authorize the carrying out of such undertakings as he may deem desirable and practicable to give employment to relief recipients registered with the Employment Service of Canada in the Province where the work is to be executed. Where the undertakings come under provincial jurisdiction but are given financial assistance from the Dominion, the contracts are to be approved by the federal Minister of Labour and the work supervised by a Dominion Government officer.

The Governor in Council may enter into an agreement with any province for the payment of moneys appropriated by the Dominion Parliament during the fiscal year 1939-40 for the alleviation of unemployment and agricultural distress and with any corporation, partnership or individual engaged in industry respecting the expansion of industrial employment. Loans, advances or guarantees may be made to the provinces to assist them in paying their share of expenditures incurred in carrying out agreements under this Act or the Youth Training Act, 1939. No financial assistance is to be granted any province unless it agrees to furnish such information and permit such examination and audit as the Dominion may deem necessary. Provision is also made for continuation of commitments made and agreements entered into under the 1936, 1937 and 1938 Acts.

The Governor in Council may make regulations for carrying out the Act and a report showing the amount of money expended, the loans made and the obligations contracted is to be laid before Parliament within thirty days after March 31, 1940 or, if Parliament is not then in session, it is to be published and distributed by the Department of Labour.

Employees' Pensions

Three Acts relate to employees' pensions, one applying to persons employed by the Canadian National and Canadian Pacific Railway Companies and the other two relating to persons employed by trust and loan companies.

The Trust Companies Act and the Loan Companies Act are amended to make it clear that every trust company and loan company incorporated under federal legislation has and has had since its incorporation power to establish staff pension and insurance funds, either by itself or jointly in association with any loan or trust company, as the case may be.

The Act to amend the Canadian National-Canadian Pacific Act, 1933, provides for the payment of compensation by the two railway companies to those of their employees who are deprived of employment or adversely affected by co-operative measures undertaken by the Canadian National Railway Company and the Canadian Pacific Railway Company in accordance with the statute of 1933. The amendment is in the form of a schedule to the Act and applies to all persons employed by the two railway companies or by any new company controlled by stock ownership equitably apportioned between the companies and includes persons employed at any time during the twelve months immediately preceding the date of the coming into force of the schedule except those doing temporary work not part of regular operations. The scheme, however, does not apply to workers who have become pensioners or annuitants under any railway pension or superannuation plan of which they are members, voluntarily retire or are dismissed for misconduct or incapacity.

The schedule provides for an adjustment allowance for employees deprived of their employment by any co-operative scheme undertaken by the railway companies for the purposes of economy, a displacement allowance for employees required to take a position with less pay on account of such a scheme, compensation for certain losses incurred in a change of residence due to the same cause and for a committee of adjustment and a board of arbitration to deal with disputes arising out of the payment of such allowances or compensation.

The adjustment allowance must be paid by the company last employing the workman and is to be equal to 60 per cent of his average monthly wage during the last year preceding the commencement of the co-operation scheme. It is payable from the date he is laid off for a period ranging from six months for one to two years' service to five years for service of 15 years or over. In lieu of the adjustment allowance the employee may, at his option, accept a separation allowance ranging in amount from three months' pay for from one to two years' service to 12 months' pay for service of 15 years or over.

Length of service is to be determined from the date the employee last acquired employment status with the railway company employing him and he is to be credited with every month's service no matter in what capacity he is hired. His status is not to be interrupted by furlough where he has a right to and returns to service when called. An officer or other official representative of an employee organization is to be credited with service for the company at any time he is on leave of absence in connection with the work of the organization.

An employee receiving an adjustment allowance must return to work if notified in accordance with the working agreement and must perform other reasonably comparable work for which he is qualified if his return does

not infringe on the employment rights of other workmen. His allowance ceases during re-employment and the period of his re-employment is to be deducted from the total period for which he is entitled to an allowance. If he receives temporary employment with either company the amount of his wages is to be deducted from his adjustment allowance. The allowance ceases entirely if the employee fails without good cause to return to work after being properly notified, retires on pension or on account of age or disability, resigns, dies or is dismissed for justifiable cause.

The displacement allowance is payable to any employee continued in employment for a period not exceeding five years after the effective date of any co-operative plan but in a position paying less wages than he was earning before the adoption of the plan and who, in the exercise of his seniority rights under existing agreements and without changing his place of residence, is not able to obtain a position at least equivalent to his former one. The displacement allowance is to be paid during any month in which he performs work in which his earnings are not equal to his average monthly earnings for the 12 months of service immediately preceding his displacement. It is to be equal to the difference between such average earnings and the amount actually earned. The allowance is to be reduced by the wages payable for any time lost on account of voluntary absences to the extent that he is not available for service equivalent to his average monthly time during the 12-month period preceding his displacement but he must be compensated, in addition, at the rate of the position filled for any time worked in excess of the average monthly time paid for during that period.

At the end of each year there is to be made a recapitulation of the total compensation received by employees in receipt of displacement allowances and the necessary adjustment made in respect of each allowance so that no employee may receive compensation greater than the total compensation paid to him during the last 12 months preceding his displacement.

An employee continuing in employment and transferred from one place to another or from the service of one railway company to another is not to be deprived of his pension rights and he may continue to contribute to the pension fund of the company by which he was formerly employed and upon retirement be entitled to receive his pension from that company.

An employee who is required to change his residence as a direct result of some co-operative plan must be compensated by the company by which he is employed for all reasonable travelling and moving expenses of himself and his family and for working time lost in moving, for any financial loss suffered in the sale of his home for less than its fair value or because of holding an unexpired lease of a dwelling. No claim for expenses or financial loss is to be paid unless presented within three years of the commencement of the co-operative plan or in respect to change in residence made subsequent to the initial change caused by the plan and due to the normal exercise of seniority in accordance with working agreements.

Where a dispute arises as to the amount of compensation due in respect of the sale of a house or the termination of a lease the dispute must be referred to the committee of adjustment and if the committee is unable to settle the dispute to a judge of a county or superior court who will determine the amount of compensation and whose decision is to be final.

The committee of adjustment is to be a permanent committee consisting of representatives of the two railway companies and of employees' organizations holding working agreements with the companies relative to wages and working conditions and applicable to the class or classes of workers affected by any co-operative plan. It is to meet from time to time to inquire into all matters of interpretation, application or enforcement of the schedule and to deal with any dispute arising out of its operation. Any dispute, except one in respect of compensation for losses incurred in the sale of a home or termination of a lease, if not settled within 30 days, is to be referred to a board of three arbitrators to be named, one by the representative of the employees, one by the companies and the third by the two so named, or in case the two arbitrators fail to name a third, by the Minister of Labour. This board is to have exclusive jurisdiction to inquire into and determine all matters arising from the dispute and its award, or the award of a majority of its members, is to be final and not open to question or review in any court. The board's proceedings may not be restrained by injunction, prohibition or other process or be removed by certiorari or otherwise into any court. Its award, on the application of either party, must be enforced in the same manner as a judgment or order of a court of record. The costs and expenses of the board are to be borne equally by the parties to the proceedings.

Wage Assignments

The Small Loans Act provides for the licensing, by the Minister of Finance, and inspection, by the Superintendent of Insurance, of money-lenders and small loan companies dealing in loans of $500 or less. A loan

as defined in this Act includes the consideration for a wage assignment and "wage assignment" is defined as a sale, assignment, transfer or order for payment of wages, salary, commission, or other remuneration for services whether earned or to be earned, made or given in consideration of the payment of $500 or less in money, credit or choses in action. The Act limits the cost of any loan, including all charges made on the borrower and also the amount which any wage assignment exceeds the amount of consideration actually paid for such assignment, to 2 per cent per month on unpaid balances for a loan for a period of 15 months, and in the case of a loan for more than 15 months to 1 per cent per month on unpaid balances plus such a proportion of 1 per cent per month as 15 is of the period of the loan expressed in months. No charges such as discounts, etc., are to be made in advance and all costs must be calculated on the money actually advanced to the borrower.

Bills Not Passed

A proposed amendment in the Criminal Code relating to picketing was talked out before the second reading of the Bill. It would have amended the clause added to Section 501 of the Code in 1934 and declaring attending at or near a house or place of business merely to obtain or communicate information not to be watching or besetting within the meaning of the section. The changes proposed were the addition of the words "peaceful picketing" at the beginning of the clause so that these words were defined in the following words of the clause and the extension of the object of the picketing to include not only the obtaining and communicating of information but the peaceful persuasion of any person to work or abstain from working and the directing of others' attention to grievances. Further, the Bill would have amended Section 87 of the Code defining an unlawful assembly as any assembly of three or more persons assembled for any common purpose and in such manner as to cause persons in the neighbourhood to fear, on reasonable grounds, the disturbance of the peace tumultuously, or needlessly and without any reasonable occasion provoke other persons to disturb the peace tumultuously. The amendment stipulated that such fear is not to be deemed to be caused on reasonable grounds if it is the result of peaceful picketing as defined in the Code.

A Bill which was passed by the House of Commons last year but was so amended in the Senate that it was withdrawn by its sponsor and which was introduced again this year but was defeated in the Senate would have amended the Lord's Day Act to make a director or officer of a corporation personally liable for a violation of the Act which he authorizes or directs on the part of any employee who is subject to his orders.

A Bill to amend the Companies Act related to public companies manufacturing goods which are protected by tariff protection. It would have enabled the Secretary of State to require such a company to furnish in the annual returns to the Government particulars showing the amount paid in cash or otherwise at the time of subscription, for the shares issued at the date of the return, the names and remuneration of the directors and the names of shareholders and the number of shares held by each of them. In addition every such company was to furnish annually a list of its officers and workmen with their occupations, hours of work and the total amount of salary or wages received by each during the year together with an annual balance sheet, including a statement of the assets, liabilities, receipts, payments and profits during the year and any additional information required by the Secretary of State. Until this return was made and the consent of the Secretary of State obtained no company to which the amendment applied could declare or pay dividends.

A proposed amendment in the Immigration Act which was withdrawn on motion for a second reading was designed to protect immigrants who are receiving public relief pending their naturalization. The Act provides that any alien on relief may be deported if the Board of Inquiry or examining officer is satisfied that such a person belongs to a prohibited or undesirable class within the meaning of the Act. The amendment would provide that the Board could report against the deportation of such person where the sole complaint is that he has become a public charge or where the Board is satisfied that if deported he would be liable to suffer trial and punishment or punishment without trial in the country to which he would be deported, for an alleged crime of a political nature not subject to any extradition law or treaty between Canada and such country and which would not be punishable as a crime in Canada.

LABOUR LEGISLATION IN NOVA SCOTIA AND THE YUKON IN 1939

THE Nova Scotia Legislature which met on February 28 and was prorogued on April 15 enacted laws to provide for the regulation of trade schools and to enable the Province to take advantage of the Dominion Municipal Improvements Assistance Act, 1938. Among amendments in existing statutes were changes in the Industrial Standards Act and the Apprenticeship Act. The Nova Scotia Labour Act, 1933, giving priority to labour within the province was continued in force for another year.

Vocational Education and Apprenticeship

The Trade Schools Regulations Act is generally similar to statutes enacted in Alberta, British Columbia, Manitoba, Ontario and Saskatchewan. "Trade" includes the construction, repair and operation of aeroplanes, steam engines, boilers, internal combustion engines and machinery of all kinds, building and construction, the fabrication of iron and steel, aviation, mining, lumbering, dressmaking and millinery, and any other occupation, vocation or profession designated as a trade by the regulations. A trade school means any school or place or any course of study by correspondence or otherwise wherein or whereby any trade is taught or purported to be taught. The Act does not apply, however, to any university recognized by the Department of Education of Nova Scotia or to any trade school or home study course maintained under any Act of the Legislature or to any person, school or home study course exempted by regulations made under the authority of the Act.

No person may conduct a trade school unless he holds a certificate of registration under the Act, for which application must be made in writing to the Minister of Labour and which must be renewed annually. The fee for registration is $25. All forms of contracts, agreements or undertakings must be filed with the Director of Technical Education who may also require copies of textbooks or home study courses proposed to be sold in the province, together with a sworn statement of their cost price and the price at which they are to be sold. The Director may demand any other information, including statements in respect of the staff of instructors, equipment and curriculum and particulars of laboratory or shop practice where such is offered in any school or training centre.

No person may sell or offer for sale any course of instruction or home study course unless he has obtained a certificate of registration as an agent and the school or course is registered under the Act. Application for an agent's certificate, which must be renewed annually, is to be made in writing to the Minister. The fee for registration is $10.

It is forbidden to publish or cause to be published any misleading advertisement relating to a trade school or home study course or to admit any person under 16 years of age to any course offered by a trade school. No operator or agent of a trade school or home study course may guarantee a position to a student or prospective student unless at the time of such representation there is a written contract between the trade school or the conductor of the home study course and an employer, whereby the latter is bound to furnish employment, as represented. No person who keeps or operates a trade school or home study course may offer instruction in a trade not specified in his certificate of registration or enter into a contract other than that set out in his application for registration or which has not been approved by the Minister.

The Director or any person authorized by him may inspect a trade school at any time and no person may obstruct such inspector or refuse to give any information or thing reasonably required for purposes of inspection. The Minister may suspend or cancel the registration of any person who operates or conducts a trade school or home study course or the registration of any agent of any such person.

The Lieutenant-Governor in Council may make regulations prescribing the security to be provided by the operator of a trade school or home study course for the performance of his contracts, the accommodation and equipment required, minimum hours of instruction, maximum fees, the diploma or certificate issued by a trade school or home study course, and controlling advertising, regulating the sale of courses of instruction, designating any occupation or vocation as a trade within the Act, fixing the times during which the public may obtain service in a trade school, exempting any trade school or home study course from the operation of the Act, providing for annual returns and furnishing of information to the Minister and, generally, as to the management of such schools and courses.

For violation of the Act or regulations any person is liable to a fine not exceeding $200 and in default of payment imprisonment for not more than three months, and any corporation to a fine not exceeding $1,000.

The Apprenticeship Act was amended to add the trade of a steamfitter to the trades to which the Act applies.

Industrial Standards Act

An amendment in the Industrial Standards Act empowers the inspectors appointed under the Act to enter at all reasonable hours any place where an industry is being carried

on to determine whether the Act is being violated. An employer or other person who obstructs or hinders the making of such inspection is liable to a penalty not exceeding $100 and in default of payment to imprisonment for not more than 30 days. The inspector may require employers' statements as to names, addresses, wages, hours and working conditions of employees, to be made under oath.

Non-Resident Workers

The Nova Scotia Labour Act, which is continued in force until May 1, 1940, forbids any employer of 25 or more workmen to hire a workman who has not been a resident of the province for at least a year unless the latter produces a certificate from the Government Employment Agent in the city or town where he is to be employed or, if there is no employment office, from the town or municipal clerk, that there are no unemployed persons resident in the city or town capable of doing and willing to do the work.

Public Works

The Municipal Loans Guarantee Act enables municipalities in the province to take advantage of the Municipal Improvements Assistance Act passed by the Parliament of Canada in 1938.

Motor Transport

The Motor Carrier Act was amended to exclude from its operation "public utilities" as defined in the Public Utilities Act. Under this definition, as amended, "public utility" includes, inter alia, any corporation (other than a municipal corporation, except as otherwise provided), company, person or association of persons owning, operating and controlling a tramway for the conveyance of passengers or a motor vehicle for the conveyance of passengers, in respect of the operation of such motor vehicle (except as a taxi) in conveying passengers from one point within a city or incorporated town in which any such tramway is operated to any other point within such city or town. Regulations issued under the Motor Carrier Act in 1938 (LABOUR GAZETTE, 1938, p. 510) limit hours of labour of drivers of motor vehicles carrying for gain passengers or passengers and freight to 10 hours in every 24 hours.

The section of the Motor Vehicle Act enabling the council of a city or town to make regulations or by-laws regulating and licensing persons transporting for hire by means of any vehicle passengers or goods within the boundaries of a city or town, was also amended to except public utilities as defined by the Public Utilities Act.

Housing

The Nova Scotia Housing Commission Act was amended to provide for the appointment of a secretary to the Commissioner and other officials necessary for carrying out the duties of the Commission, and for the payment of such expenditures of the Commission as the Lieutenant-Governor in Council considers advisable. The Commission is empowered, as from October 1, 1933, to make loans to companies formed under the Act for the purpose of building and providing suitable dwelling houses and selling or leasing such homes or apartments and rooms therein, such loans to be secured by first mortgage on the lands and premises.

Credit Unions

Changes in the Credit Union Societies Act provide that the Registrar shall not register any memorandum of association of a credit union unless it has been approved by the Inspector of Credit Unions, and that the fiscal year of all credit unions shall end September 30 and the annual meeting take place not later than November 15 in each year.

Agriculture, Marketing and Land Settlement

The Agriculture and Marketing Act consolidates and amends the laws on those subjects and repeals a number of statutes including the Nova Scotia Land Settlement Act, 1932, and the Natural Products Marketing Act, 1938. The latter Act is incorporated in the new statute without material change. Part 18 of the new Act, which replaces the Nova Scotia Land Settlement Act, provides for the continuance of the Land Settlement Board with power to acquire, hold and dispose of farms, live stock, agricultural machinery and equipment, erect buildings, make permanent improvements and carry on farming operations on farms and lands owned by the Board; to enter into agreements with the Government of Great Britain, Canada or any part of the British Empire, or with any organization, for the settlement or operation of lands in the province on terms approved by the Lieutenant-Governor in Council, to collaborate with educational authorities in the training of settlers and to make regulations for carrying out the Act. Subject to the approval of the Lieutenant-Governor in Council, the Board may constitute local committees to advise it and to assist in carrying out the provisions of Part 18 of the Act. The Lieutenant-Governor in Council may raise by way of loan the moneys necessary for purposes of the Act.

An applicant for assistance under the Act must be a male British subject, between 21

and 41 years of age, who has resided in Nova Scotia for at least five years and had at least two years' practical experience in farm work. He may be required to appear before the Board and must submit satisfactory evidence that he intends to live and engage in farming upon the land he may purchase from the Board, that he has sufficient experience in farming, and that he has, or is in a position to acquire, sufficient stock and equipment to maintain and operate the farm properly. The selling price of any property of the Board sold to a settler may not be greater than the purchase price together with subsequent expenditures thereon. No agreement of sale may be for an amount exceeding $3,000 nor for a term longer than 30 years. The purchase price is to be payable in equal consecutive monthly, semi-annual or annual payments or instalments of principal and interest, as may be determined by the Board, the first payment to be made not later than the 1st of November following the execution of the agreement. The interest rate is to be determined by the Lieutenant-Governor in Council but may not exceed 5 per cent per annum. The Board has a first lien on the property of a settler so long as any part of the sale price or any advance made by the Board remains unpaid.

Taxation of Non-Residents

The Sydney Charter was amended to require any person, not a resident of Nova Scotia, upon commencing any employment in the City, to pay a tax of $10. Upon payment of the tax he becomes entitled to engage in such employment at any time during the civic year but must pay a further tax of like amount upon commencing employment in a subsequent year.

Yukon

Legislation enacted by the Yukon Council during the present year includes amendments to ordinances dealing with workmen's compensation and regulation of mines.

Workmen's Compensation

The Workmen's Compensation Ordinance of 1917 was amended to provide compensation for certain industrial diseases, lead poisoning, arsenic poisoning and mercury poisoning or their sequelae, silicosis, and infected blisters, where the disease is due to the nature of any employment in which the workman was employed at any time within twelve months previous to the date of disablement, whether in one or more employments, unless the workman at the time of entering the employment, wilfully and falsely represented himself in writing as not having previously suffered from the disease. If the workman, at or immediately before the date of disablement, was employed in any process or industry which is proved to be one in which there is danger of contracting the industrial disease in question, the disease is to be deemed to be due to the nature of that employment unless the contrary is proved. If the workman, during the twelve months previous to disablement, worked for more than one employer in such process or industry, notice and claim for compensation is to be given to every such employer and if a compromise settlement of the claim is not effected, the matter is to be settled by the Territorial Court in the same manner as other disputed claims under the Ordinance, and the judge is to apportion the liability as he deems just.

Mining Regulations

Amendments in the Miners' Protection Ordinance include a new section requiring that every workman whose work takes him into a quartz mine or into any ore-crushing or rock-crushing operation of any mine shall be examined at least once in every six months by a physician selected and paid by the employer. The examination is to include X-ray as well as a general examination. If the physician finds the workman free from disease of the respiratory organs and generally fit for work underground he is to give him a certificate to that effect. Such certificate is to remain in force for not more than six months and if the employer so requires it is to remain in his custody during the period of the workman's employment.

The rule requiring drills used in stoping to be equipped with a water jet, spray or other appliance to prevent the escape of dust, was amended to require instead that such drills be equipped with a water needle. Under a new rule all ores or other material which have been broken by blasting and all ores when they are entering the crusher must be thoroughly sprayed with water to prevent dust.

RECENT REGULATIONS UNDER DOMINION AND PROVINCIAL LEGISLATION

Dominion Government Employees—Welders, Commercial Printers, Trade Schools and Safety Regulations in Alberta—Minimum Wages in Alberta, British Columbia and Quebec.

A RECENT regulation under the Dominion Civil Service Act amends the rules governing compensation to Dominion Government employees for injury received while on duty. In Alberta, new orders were issued for the examining and licensing of welders and the general Minimum Wage order applying to male employees was revised. The fees for licences for commercial printers were reduced, safety regulations for persons employed in and around water wells and in logging and wood-working industries were issued for the first time, and several changes were made in trade school regulations under the Trade Schools Regulation Act.

In British Columbia, three Minimum Wage orders relate to women employed in summer resort hotels, delivery boys in shops and carpenters in the Kootenay district. In Quebec a by-law of the Fair Wage Board authorizing a payroll levy on certain employers was approved by order in council and a temporary wage order was issued for June and July for workmen engaged in the manufacture of wooden building supplies.

Dominion Civil Service Act

Regulations relating to compensation for employees disabled by accidental injury received in the performance of their duties were amended on June 9. As before, they provide that leave of absence with pay may be granted by the deputy head of a department to any such employee if the injury was not caused by the latter's own negligence and if the application for leave is properly supported by a certificate from a qualified medical practitioner. If the employee receives compensation for a temporary disability from a provincial Workmen's Compensation Board under the Government Employees' Compensation Act, the new regulations state that he is not entitled to receive salary in that amount. Formerly, it was expressly provided that the amount of the award should be deducted from his salary. Further, if he obtains a judgment or settlement against a person other than his employer allowing damages for such injury, out of the amount received as damages, other than for permanent disablement, he must refund to the Receiver General the amount in excess of his medical, surgical, hospital or other expenses, but not exceeding the amount received as salary during disablement or the amount due the Government may be deducted from his future salary.

Alberta Licensing of Trades and Businesses Act, 1937

An order effective June 15, reduces the fees to be charged for the licences required to be held by persons carrying on the trade of commercial printing under a former order of December 9, 1938.

Alberta Male Minimum Wage Act

Two orders of the Board of Industrial Relations, Nos. 8 and 8A, effective June 15, replace General Order No. 1 of September 24, 1937, (LABOUR GAZETTE, 1937, p. 1100).

Order 8, like Order 1, is a blanket order applying, with certain exemptions, to all male employees in the province within the scope of the Act, that is, to all but farm labourers and domestic servants. Neither does it apply to indentured apprentices, employees governed by schedules of wages and hours under the Industrial Standards Act or by codes drawn up under the Department of Trade and Industry Act, persons employed on a commission basis or for a stated weekly, monthly or yearly wage and hired by contract approved by the Board, workers hired for temporary work not for the purpose of the employer's business, or to any other employees from time to time declared exempt by the Board.

Order 8A exempts from the provisions of Order 8 persons employed in saw mills, box factories and other wood-working plants and in logging and the railway tie industry in rural districts, boys under 18 employed in delivering merchandise from shops and persons engaged in fighting prairie or forest fires. Special rates were fixed for persons employed in logging and woodworking by Order 5 (LABOUR GAZETTE, 1938, p. 174) and for delivery boys by Order 1C (LABOUR GAZETTE, 1938, p. 750). Another earlier order fixed a minimum wage of 33½ cents an hour until October 1, 1939, for all workmen engaged on irrigation projects under the Water Resources Act.

Order 8 applies to the same classes of employees as General Order 1 but Order 8 expressly exempts persons employed at a stated salary payable by the week, month or year by a contract approved by the Board.

As before, workers are divided into two classes, (1) those employed by the week or

any period in excess of a week including those who work on commission where the contract of hire is not approved by the Board or at piece-work; (2) those employed in any other manner. Regular employees, whose work-week is less than 42 hours, must be paid for that number of hours and part-time employees hired for less than four hours must be paid for four hours.

Order 1 distinguished between workmen under 21 and those over that age but workmen under 21 with two years' experience when starting were entitled, after one year, to the 33⅓ cent rate for adults. The new Order distinguishes between those under 19 and those over that age, the latter being entitled to the same rate as adults. Under the former Order the minimum was based on experience as well as age. Order 8 fixes rates only with regard to age.

Under Order 8, employees hired by the week or longer period must be paid at least 20 cents an hour if under 17 years of age, 25 cents if 17 years old and 30 cents if 18 years. Workmen 19 years of age and over have a minimum of 33⅓ cents, the minimum fixed also by Order 1 for those over 21. If hired for a shorter period than a week, the respective minima are 25 cents, 30 cents, 35 cents and 40 cents.

Order 8 reproduces the provisions of Order 6, effective February 28, 1939, requiring the payment of time and one-half for time worked in excess of the hours of work prescribed by or pursuant to the Hours of Work Act. The Hours of Work Act defines overtime, in the case of male workers, as time worked in excess of 10 hours a day or 54 hours a week.

The maximum charges for board and lodging that may be made by an employer to his employees under Order 8 are the same as those provided by Order 1E effective August 15, 1938, (LABOUR GAZETTE, 1938, p. 1093) namely, $5 for a week's board of 21 meals, 25 cents for single meals, $2 for seven days' lodging, and 25 cents for a single day's lodging.

Alberta Tradesmen's Qualification Act

Regulations for the licensing and examining of acetylene gas and electric welders were revised on May 30. As before, the two trades are designated as trades within the scope of the Act, a board of examiners is appointed and provision made for the issuance of certificates of proficiency to persons qualifying at the examinations.

All persons engaged in these trades in the part of the Province south of the 55th meridian must hold certificates from the Department of Public Works. A journeyman's certificate entitles the holder to engage in any kind of gas or electric welding or both except on pressure vessels under the Boilers Act, 1929. The holder of a provisional certificate may do similar work under the direct supervision of a journeyman. A special certificate is issued to any person who does gas or electric welding or both in the course of his employment as a pipe welder, oil and gasoline drum welder, storage tank welder, structural steel welder, metal burner, tool facer, auto body welder, automotive welder, sheet metal welder, or plant maintenance welder or any other employment specified by the Department. Apprentices' certificates are issued on application without examination to persons satisfying the Department that they are working under the direct supervision of a man holding a certificate for the work in which he is engaged. Temporary certificates for all classes but apprentices may be issued for not more than six months to persons engaged in such welding operations as may be specified in the certificate. Journeyman's and special certificates may be renewed on application within 60 to 30 days of expiration or at other times under special circumstances. Provisional certificates may be renewed for one year at the discretion of the Department.

Candidates for certificates must pass both a written and a practical examination on the nature and the use, especially with regard to accident prevention, of welding equipment, methods of work and the design and fabrication of joints, pipes and other materials used.

All applications are to be made on forms supplied by the Department and accompanied by prescribed fees and testimonials. Application for temporary certificates must be made by the employer. All applicants for certificates, except temporary and apprentice certificates, must have had 12 months employment in Alberta and all, except apprentices, total employment ranging from 24 to 48 months according to the class of certificate. An applicant with a certificate from a School of Technology approved by the Department is to be deemed to have been employed for the period during which he received practical training or one year, whichever is the least, and for one-half the period of his theoretical training or six months, whichever is the least.

Persons now holding final certificates under the Boilers Act may be granted, without further examination, journeymen's certificates under this Act on making application, paying a prescribed fee, and satisfying the Department that they have at least 36 months' experience in general welding.

Alberta Trade Schools Regulation Act

Regulations applying to trade schools gazetted October 15, 1936 (LABOUR GAZETTE, 1936, p. 1002), were amended on June 7 to change

certain provisions relating to barbers and hairdressers and to add new sections applying to all trade schools within the Act. Trade schools included are all places except the University of Alberta where any skill and knowledge requisite for an industrial occupation, calling or vocation, is taught or purported to be taught.

The amendment provides that the hours of instruction in barbering are to be completed between 9 a.m. and 1 p.m. on Saturday and between 9 a.m. and 6 p.m. on other week days. The required weekly instruction for beauty parlour operators is increased from 36 to 44 hours and the total number of weeks of instruction increased from 26 to 34. Operators with at least one year's practical experience may be given short courses lasting at least four weeks, with the approval of the Minister of Trade and Industry. Formerly, such courses were open only to persons with two years' experience and had to last at least eight weeks during which a course in one subject only could be taken.

Security must be deposited by the operator of any trade school with the Minister to be used by him to satisfy any judgment against the operator in respect of any course of instruction or contract for such or to repay any refund owing to the students under the regulations. Students signifying, by one month's notice, their intention to cease taking any course must be refunded any amount paid in advance except that the fees for the current month may be retained by the operator. No fees may be collected or retained by operators of schools not registered under the Act and any fees obtained by false representation of any trade course offered or the nature of the contract to be entered into must be returned to the person paying such fees. No student is to be retained in the school on a commission or salary basis after the completion of his six months' course.

Alberta Workmen's Compensation Act

Safety regulations of May 25 apply to the digging, drilling, cleaning and repairing of water wells and to logging and woodworking industries.

As in the British Columbia regulations of March 30 (LABOUR GAZETTE, May, 1939, p. 474) the rules for logging prohibit the working of employees in the bight of any line, require the removal of dangerous objects from the site of operation and the keeping of records of machine operators' experience and ability and make the foremen, as well as the employer, responsible for safe conditions in felling and bucking. There are special regulations regarding brake equipment and the loading of tractors and motor trucks, work on tugs and floats, roads and bridges and the transport of workmen. Detailed rules are laid down to ensure safe conditions in connection with different operations, including the use of machinery in sawmills, and woodworking establishments. Operators must inspect band mill wheels monthly and the record of such inspection must be submitted to the provincial inspector. Sawdust and shavings must be removed from machines by mechanically operated conveyors, exhaust fans or non-mechanical metal chutes where practical.

In sinking, cleaning or repairing water wells provision must be made to prevent the possibility of workmen being injured from a cave-in, gas fumes or from falling material. Wells sunk by hand must be lined with approved materials in a specified manner. A ladder, securely fastened to well curbing with a four-inch clearing from the well wall, is to be provided in each well over 24 inches in diameter. Drums are to have safety stops and ropes and cables safety hooks that will hold weights approved by the manufacturer allowing a safety factor of ten. Metal buckets, with metal bales extending down the sides and across the bottom, must be provided for hoisting material.

Wells must be tested for gas before workmen are permitted to enter and while they are working. There must be a workman at the top and sufficient help must always be available to rescue workers overcome by gas. In cleaning and repairing wells, workmen must wear approved safety belts with a sufficient length of rope to reach 15 feet outside the well when the worker is at the bottom. If a well is more than 20 feet deep, a two-foot platform with a six-inch toe-board on the inside must be placed around the well. The employer must see that workmen wear safety boots and hard hats.

British Columbia Female Minimum Wage Act

Order 52D of June 14 again varies for the summer season from June 15 to September 15 Order 52 applying to the hotel and catering industry. The new Order is identical with Order 52A issued last year (LABOUR GAZETTE, 1938, p. 510) and permits a 54-hour week and 10-hour day instead of the maximum 48-hour week and 8-hour day fixed by Order 52.

British Columbia Male Minimum Wage Act

An amendment effective June 15 in Order 59 (LABOUR GAZETTE, 1938, p. 1235) governing the mercantile industry provides that the employer must pay "all reasonable costs" in-

curred in connection with an employee's bicycle while it is in use on behalf of the employer.

A new Order covers carpenters in the Kootenay area from August 1. Except for an extension in the group of employees exempt from its provisions, the regulation is similar to Order 58 governing the trade in Vancouver, New Westminster, Burnaby, West Vancouver and North Vancouver. (Labour Gazette, 1938, p. 1095.) As in that order the minimum wage is 75 cents an hour and employers must pay at least semi-monthly all wages due up to a day not exceeding seven days prior to payment. There is the same exemption of indentured apprentices. Whereas the Vancouver Order exempted "employees in the carpentry trade who are permanently employed at maintenance work in industrial and (or) manufacturing establishments, public and private buildings," under the Kootenay Order the exemption applies to carpenters "engaged in work in connection with the repair, servicing or upkeep of the plant and equipment used in the operation of such industrial or manufacturing plant or establishment." This Order also exempts regular employees of such establishments engaged on new installations, alterations or extensions of the plant or equipment.

Quebec Fair Wage Act

On June 2 a by-law of the Fair Wage Board authorizing a levy of one-third of 1 per cent on the payroll of certain employers in cities and towns with a population of 20,000 or more was approved by order in council. A temporary order relating to employees engaged in the manufacture of wooden building supplies and a new table of percentages for the classification of workers, where more than one minimum rate has been fixed, were gazetted on June 3. The table relates to orders permitting a maximum of 20 per cent of the employees to be paid a certain minimum, 40 per cent another minimum and not less than 40 per cent of the workers the highest minimum prescribed by the order. Tables to facilitate the application of other orders providing for different classifications of workers were noted in the Labour Gazette, October, 1938, p. 1097 and April, 1939, p. 397.

The levy is payable by employers on wages paid after June 1 for work done within the province by employees governed by orders of the Board. The order imposing it amends a previous order proposing a levy of one-half of 1 per cent (Labour Gazette, 1938, p. 1096) from October 1, 1938, the collection of which was suspended. No contribution to the assessment may be required of workmen by employers. The earlier levy applied to all employers of persons within the scope of fair wage orders in cities and towns but as amended the by-law relates only to those with a population of 20,000 or more. In determining the amount on which assessment is to be made, no account is to be taken of wages in excess of $250 a month paid to any employee. Further, until a notice to the contrary is issued, the levy is not payable if during any consecutive three months less than four persons are employed or if the total payroll for such a period does not exceed $750. In order to take advantage of this exemption the employer must file with the Board on the first of every quarter the names, addresses and the amount of wages paid to his employees.

The date and mode of payment is to be determined by resolution of the Board and notice given by the Board to employers. Interest at 5 per cent is to be charged on any assessment not paid within 15 days after it becomes due. The Board may require from the employers any sworn statements or reports it deems necessary to ensure the observance of the by-law and the Board has full power to determine what is necessary.

The order governing the wages and hours of employees engaged in any part of the province in the manufacture of doors, sashes, frames and other wooden building supplies is to apply for two months from June 3. During this period, Order 24 of November 29, 1938 (Labour Gazette, February, 1939, p. 158), applying to this industry is suspended. Except maintenance men and stationary enginemen, all employees in this industry must be paid at the rates laid down by Order 4 (Labour Gazette, 1938, p. 512) but the rates apply in the case of general employees to a work-week of 50 hours and in the case of watchmen, chauffeurs, drivers and their helpers to the weekly hours specified in Order 4. Maintenance men are entitled to a minimum of $8 a week for a week of 56 hours and stationary enginemen to the rates provided by Order 6. (Labour Gazette, 1938, p. 624.).

That the principal factors in the unemployment of young people in Belgium were general industrial stagnation and the lack of general and specialized training among the young persons is indicated by a Belgian census taken in September 1938. The census revealed that more than 85 per cent of the young males with work experience had had only primary-school education and only 4 per cent had had occupational or technical training. Practically the same situation was found among the girls.

81706—3

REPORT OF INDUSTRIAL RELATIONS COMMITTEE OF CANADIAN MANUFACTURERS' ASSOCIATION

REFLECTING the views of employers represented in the Canadian Manufacturers' Association, the report of the Industrial Relations Committee of that body (incorporated in the Executive Council's report presented to the annual general meeting at Bigwin Inn, June 19-21) dealt with such matters as Unemployment Insurance, Trade Union Legislation, Minimum Wage and Industrial Standards Legislation, the Dominion-Provincial Youth Training Programme, etc.

In commencing its report, the Committee referred to the 1938 session of the International Labour Organization at which the employers of Canada were represented by Messrs. A. R. Goldie and J. M. McIntosh. It gave a summary of the action taken by the former on the question of the reduction of working hours (LABOUR GAZETTE, July, 1938, page 827), and of the latter in regards to technical and vocational education and apprenticeship (LABOUR GAZETTE, July, 1938, pages 824-5).

Unemployment Insurance

In reference to unemployment insurance, the Committee stated:

So far as government action is concerned, the only development since the last annual meeting has been that the Province of Ontario has passed an Act empowering the Lieutenant-Governor in Council to take all steps necessary for the carrying out within Ontario of any general scheme of unemployment insurance, which may be established by Dominion legislation. So far as the Dominion Government is concerned, its position is that it still professes belief in the desirability of unemployment insurance legislation, but considers it impossible to legislate in view of the continued refusal of Alberta, Quebec and New Brunswick to give the necessary constitutional waiver. Action by the Association since the last annual meeting has consisted of representations to both the Dominion and the Ontario Governments, opposing the enactment of unemployment insurance legislation on the grounds that it would do practically nothing to solve the pressing unemployment problem, that it would involve the setting up of elaborate and expensive administrative machinery to administer what is really a stable employees' savings scheme, and that the cost to industry and to the country as a whole would be unduly heavy in itself, and out of all proportion to the benefits accruing. Steps are also being taken to bring these views to the attention of governments generally and of the public.

(Following an address by Mr. W. D. Black, retiring president, entitled "Pitfalls of Unemployment Insurance" and the subsequent discussion, the convention decided to have a sub-committee of the Industrial Relations Committee study the question of unemployment insurance.)

Trade Union Legislation

The Committee expressed the attitude of the Association in regard to legislation pertaining to collective bargaining and the right of organization as follows:

Seven of the provinces of Canada have in the past three years passed legislation laying it down that employees have the right to form and join trade unions, and to bargain collectively through them, employers being forbidden by any kind of intimidation to seek to prevent their employees from forming and joining unions. A bill to this same effect having been introduced in the Ontario Legislature, the Ontario Division took the position:

(1) That if a penalty is to be imposed on employers for seeking to prevent employees from joining trade unions, there should also be a penalty imposed on anyone who seeks to compel employees to join unions against their will;

(2) That if the principle of the right of workmen to form and join trade unions is to be laid down, they should be allowed to form and join any lawful trade union they may wish, not excluding unions limited in their scope to a particular plant; and

(3) That if trade unions are to be given the new status proposed, they should be put on the same footing as employers in the matter of responsibility under the law for the contracts into which they enter.

The bill was not passed.

A Dominion bill making it a criminal offence for an employer to dismiss or refuse to employ any person on the sole ground of his trade union membership, or to seek by any kind of intimidation to prevent an employee from joining a trade union, was strongly opposed by the Association, on the grounds that it was an unconstitutional interference with provincial jurisdiction over property and civil rights, that it omitted to impose any penalty on those who seek to compel employees to join trade unions against their will, and that it was likely to encourage groundless charges against employers, to the embitterment of employer-employee relations. Notwithstanding the Association's opposition, the bill was passed.

Minimum Wage and Industrial Standards Legislation

On this subject the Committee declared its position in the following paragraph:

The trend during the past year, particularly in Ontario and Quebec, has been in the direction of increased activity under the so-called "Codes" legislation, rather than under the government wage-fixing legislation, though so far as industry in general is concerned, very few codes have been established. The chief concern of industry has been to see to it that the codes established which apply mainly to the various building trades should not inter-

fere with the regular employees of manufacturing establishments, who may, from time to time, do work of the same kind as that covered by building trade codes, and in this a considerable measure of success has been attained. So far as the fixing of minimum or fair wages by government-appointed boards is concerned, the experience of the past year serves to confirm the view which has always been taken by your Committee, that it is highly undesirable for any government-appointed board to attempt to go beyond the fixing of minimum wages, properly so-called, as distinguished from fair wages.

Dominion-Provincial Youth Training Programme

After summarizing the Dominion-Provincial Youth Training Programme, the Committee's report observed:

Your committee is impressed with the desirability of doing everything possible to give some training to unemployed young people, who if they are allowed to remain in idleness will deteriorate physically, mentally, and morally, but faces the difficulty that, under present conditions, most manufacturers must think first of re-engaging former employees whom they have been obliged to discharge, and comparatively few are in a position to take on the graduates of the training courses provided under the Youth Training Programme.

Round Table Discussions on Employer-Employee Relations

In concluding, the Committee stated that during the past year it had held three round table discussions on employer-employee relations, and reported as follows:

The reason for holding such meetings was the recognition that for the past eight or ten years there has been increasing pressure on the Dominion and the Provincial Governments to pass legislation designed to regulate all the more important phases of employment relations, such as rates of pay, hours of work, insurance against sickness and unemployment, and the method of negotiation of contracts of labour. It is also well known that efforts are constantly being made in some quarters to convince the workers that the only way in which they can get justice is by joining aggressive trade unions and fighting their employers.

In these circumstances, your Committee feels, and the upshot of the three round table discussions was to the same effect, that industry should take stock of existing employment conditions, with a view to doing everything possible to remove grievances, make the employees feel that they are part of the enterprise in which they are engaged, and convince the workers that they can get justice by dealing with their employers direct, rather than by fighting their employers, or supporting compulsory legislation regulating labour conditions.

FIRST MEETING OF ADVISORY COMMITTEE ON INDUSTRIAL HYGIENE

An Advisory Committee on Industrial Hygiene was organized by the Minister of Pensions and National Health, the Hon. C. G. Power, following the establishment of a Division of Industrial Hygiene in the Department of Pensions and National Health in 1938 (Labour Gazette, April, 1938, p. 369). The committee along with a sub-committee of the Dominion Council of Health is to assist in the work of investigating and aiding provincial authorities and industrial organizations in the prevention of occupational diseases and with respect to measures for lessening health hazards in industry. The committee consists of representatives from the dominion and provincial governments, universities, health organizations, and organizations of employers and of workers. The representatives for industry and labour are Mr. Allan M. Mitchell of the Canadian Chamber of Commerce, Mr. R .B. Morley, General Manager of the Industrial Accident Prevention Association, Mr. R. J. Tallon, Secretary Treasurer of the Trades and Labour Congress of Canada, and Mr. Albert Coté, president of the National Catholic Textile Federation, Inc. The Department of Labour is represented by Mr. C. W. Bolton, Statistician. The first meeting of the committee was held at Ottawa on April 12, 1939, with Dr. J. G. Cunningham, Director of the Division of Industrial Hygiene, in the Ontario Department of Health as chairman. The meeting opened with a statement by Dr. F. S. Parney, chief of the Division of Industrial Hygiene, Federal Department of Pensions and National Health, as to the relationship of the Division to the provincial health departments. Dr. Parney said that the Dominion Council of Health, which is composed of Deputy Ministers of provincial departments of health and representatives of labour and women's organizations, had requested the federal department to act as a co-operating and co-ordinating body in establishing common standards and procedure throughout the Dominion. The department had, therefore, become equipped to supply the provincial department with information, personnel and financial aid in dealing with certain specific problems.

The topics dealt with were as follows: industrial hygiene from the public health aspect, the scope of medical services in industry; absenteeism due to sickness other than occupational disease and accident; the working relationship between the provincial government industrial hygiene unit and industry and labour; the industrial poisons problem in

81706—3½

Canadian industry; health hazards related to mining and refining radium ore; silicosis in industry other than mining.

In the papers and the discussion of them, emphasis was laid on the need for measures for prevention of occupational diseases as had been done to a great exent for prevention of industrial accidents, the provision of medical services, inspection and first aid especially in the smaller industrial plants, better housing, the high morbidity rate among unskilled workers, pre-employment medical examination, holidays with pay, special training in industrial medicine, industrial poisons and the need for medical inspection of factories.

The committee adopted resolutions in regard to the improvement of the statistical information on morbidity; the extent and nature of medical services in industry; for the extension of existing health services for federal government employees as a demonstration of modern industrial medical services to employers; for the determination of the extent of health hazard in the mining of radium ore at Great Bear Lake; that the Federal Division of Industrial Hygiene should be equipped and staffed to do actual technical research in the field of industrial poisons; that the attention of the Dominion Council of Health be drawn to the probability that there are in every province some industrial hygiene problems which should be investigated; and that the Committee express to the Minister of Pensions and National Health its appreciation of his action in establishing a Division of Industrial Hygiene in the Department. On page 651 of this issue reference is made to a survey of sickness in industry.

Workmen's Compensation in Quebec, 1938

IN its eleventh annual report covering the year 1938, the Quebec Workmen's Compensation Commission reports that during the year 58,335 industrial accident claims were received.

Continuing its survey of employers in default of contributions, the Commission obtained reports from 367 employers in Schedule 1 industries. As a result of the survey these employers were required to contribute an amount of $17,631.44 to the Accident Fund representing the assessment on $1,556,326.26 of actual payroll.

Provisional assessment for the year 1938 estimated in the report at $4,679,400.29 while other revenues bring the total estimated revenue for 1938 to $5,188,758.25. It is pointed out in the report that it is not possible to determine exactly the final status for Schedule 1 for the year as accident claims for the period are not completely settled and in some cases not yet submitted. In this connection the report states that: "Experience of the past shows us that more than 3/7 of the compensation for a year is definitely established only during the following year, and this fraction varies with the years and the classes." Therefore contingent liabilities for the 24 classes for 1938 are placed in the balance sheet in the report as a liability amounting to $2,063,998.28

During the year, the provisional statement shows that compensation paid for temporary incapacity amounted to $1,135,924.31; for permanent incapacity, $159,989.54; special allowances, $10,010 and funeral expenses, $12,247.93, making a total on account of these items amounting to $1,318,171.78. Medical aid paid during 1938 amounted to $617,634.37 and reserve for all compensation was set at $2,063,998.28.

For the purposes of accident prevention $81,583.26 was expended by the Commission. Administration costs during 1938 totalled $308,492.50 and legal costs amounted to $3,560.96. All items of expenditure aggregated $4,978,589.11 which when set against estimated revenue for the year leaves an estimated surplus on the year's operations of $210,169.14. Adding this surplus to the net surplus of former years, a net surplus of $260,571.26 for Schedule 1 industries is indicated.

Accident Prevention.—As indicated above $81,583.26 was expended on accident prevention during 1938, the Quebec Pulp and Paper Safety Association received a grant of $19,583.26 for the industries in Class 2; the Quebec Public Utilities Safety Association received $2,000 for the industries in Class 22; and the Quebec Association for the Prevention of Industrial Accidents received a grant of $60,000 for the industries of other classes except 1 and 5.

Final Statement for Operations in 1937.—The report also gives a final statement dealing with the operations of 1937. This statement shows that revenue from assessments amounted to $5,991,220.23 while other revenue of $107,307.23 resulted in a total income for the Commission in 1937 amounting to $6,098,527.46. Expenditures during 1937 amounted to $6,043,168.66 composed of the following: medical aid $1,125,947.60; temporary incapacity $2,097,158.32; permanent incapacity $1,758,719.07; special allowances $26,506.73; funeral expenses $20,359.54; fatal accidents $640,676.88; administration $293,659.41; accident prevention $77,000 and legal costs $3,141.11. The definite surplus for the year 1937 was therefore $55,358.80.

ROAD TRANSPORTATION IN ONTARIO

Recommendations of Royal Commission Concerning Hours and Wages in Commercial Motor Transport

FEATURING the comprehensive report of the Royal Commission on Transportation—appointed by the Ontario Government to conduct an inquiry into the operation of motor vehicles transporting freight or passengers for gain throughout the province—are the recommendations in regard to hours of labour and wages.

After holding an inquiry into all matters pertaining to the industry, including hours, wages, working conditions, expenditures on public roads, annual cost and the comparative advantages of road transport, compared with those of competing forms of transport, the Royal Commission has recommended the establishment of a Transport Board having power to deal with the problem of transport in the Province in all its forms. The report states that the Transport Board should regulate working conditions, including the fixing of maximum hours and minimum wages for drivers in the industry, the Commission being convinced that "supervision of the standards of equipment, service, hours, conditions of labour and details of operating methods of those making use of the highways for commercial purposes has become a duty devolving upon the public authority."

Indicating the importance of commercial motor transport to the Province, the report in commencing, states:

There can be no doubt of the profound and widespread influence that commercial motor transport has had on industrial and social conditions in Ontario. Motor trucks now serve many communities that formerly lacked direct service by rail or water. In many instances they have reduced the cost of freight transportation, have stimulated business, and by giving frequent and expeditious service to outlying areas have assisted in the decentralization of industry and the commendable building up of prosperous small communities distant from the large cities. At the same time, motor busses serve communities far removed from railway lines and those on lines having restricted passenger train movements are receiving a much more frequent service than formerly.

There appears to be in Ontario an original investment in commercial motor vehicles of not less than $130,000,000 and at least 120,000 persons are directly engaged in one capacity or another in connection with the operation of such vehicles. Many more persons are employed indirectly in connection with motor transport, as in garages, repair shops, gasoline stations, manufacture of equipment, or in occasional or seasonal service. Indeed, by reason of the basic influence of transportation on the cost of doing business, the whole fabric of commerce and industry in the Province is vitally affected.

For the guidance of those entrusted with the framing of revised regulations respecting the working hours of drivers of commercial vehicles on inter-urban or highway service, the Royal Commission has made detailed suggestions concerning maximum working hours. These suggestions are given in full as follows:

TIME AT WORK OR ON DUTY

(1) A driver is at work when he is engaged in loading, driving, unloading, handling freight, preparing reports, preparing vehicles for use, or performing any other active service pertaining to the transportation of passengers or property.

(2) A driver is on duty from the time he begins to work or is required to be in readiness to work until he is relieved from work and from all responsibility for performing work.

(3) A driver shall be paid for all time at work or on duty irrespective of the type of work that he is called upon to perform.

SPREAD OF WORK PER DAY

(4) Time worked or on duty shall be included within a period of fifteen hours in any and each twenty-four consecutive hours and shall be made up of not more than two periods, each of not less than three hours' duration. Release from work or duty for a period of three hours or less shall not be deemed to be a release for purposes of pay, except in one instance daily, and then only to the extent of one hour, or the actual duration of the period of release if less than one hour.

(5) No interval between periods of duty shall be deemed to occur unless such interval is in excess of three hours, other than in the case of one interval of usual length for a meal. Unless a driver is completely free of all responsibility for his truck or load at meal time, he shall be deemed to be on duty during that period.

DAILY HOURS OF WORK

(6) (*a*) No driver shall work or be on duty more than ten hours in any consecutive twenty-four hours except as follows:

(*b*) The period of ten hours may be increased to twelve hours when, on account of flood, storm, fog, ice, accident, unexpected delay or other abnormal condition, such longer time is necessary to complete a run that would, except for such abnormal condition, have been completed within his ten-hour period of duty.

(*c*) Where a driver at the expiry of any ten hours (or under abnormal circumstances twelve hours) of work or duty has reached his scheduled destination (not being his home base) he may resume work or duty, and leave for his home base within nine hours, if during such nine hours he has obtained the equivalent of a normal night's rest.

(*d*) On special, occasional and unscheduled turn-around, round trips, if, at the end of ten hours, or in unanticipated circumstances as set out in (*b*) above, at the end of twelve hours, the driver is within two hours normal run of his home base, he may continue to his home base provided that he shall not be called for duty, or report for duty, until the expiry of a period starting at the time of his arrival at his home base, equal to the elapsed time between his departure on such round trip and the time of his completion of it.

MINIMUM REST PERIOD

(7) A driver having completed a period of duty of ten hours as in 6 (*a*) above or twelve hours as permitted in 6 (*b*) may not drive or perform any other duty before the expiration of nine hours.

WEEKLY HOURS OF WORK

(8) No driver shall work or be on duty more than sixty hours in any week, counting from Sunday noon to Sunday noon, except that in any week of abnormal circumstances as set out in clause 6 (*b*), additional hours not in excess of four may be spent at work or on duty.

ALLOCATION OF RUNS

(9) No run or runs, except as in 6 (*d*), may be scheduled or allocated to any driver to be completed in one day's work that cannot under average operating conditions be normally completed in nine hours running time.

USE OF SLEEPER CABS AND DAYS OFF DUTY

(10) Except in the circumstances set out in clauses (11) (*b*) and (11) (*c*), all time spent as a helper or alternate driver, or riding "deadhead" under the instructions of the motor vehicle owner, shall be classed as time on duty, whether such time be spent actually at work, riding as a passenger, or resting in a sleeper cab.

(11) (*a*) Where special permission is given for the operation of sleeper cabs, a motor vehicle so equipped and manned with two drivers may continue in continuous operation in charge of the said drivers for thirty hours, when complete relief from duty for at least twelve hours must be given the drivers.

(*b*) Provided the motor vehicle is parked and at rest, the aforementioned drivers may occupy the sleeper cab and maintain oversight of the vehicle, without contravention of these regulations during their twelve hours relief from duty.

(*c*) Provided such motor vehicle is attended by three competent drivers, it may continue in operation continuously until the particular operation in hand is completed, but each of such drivers shall be deemed to be on duty not less than sixteen hours in any twenty-four hours, and each shall be in turn completely relieved of all responsibilites in connection with the operation for a period of eight hours in each twenty-four. Provided further that no driver shall work or be on duty in excess of sixty hours weekly, except with the express consent of the Department (or Board) and in accordance with its orders. (While the manning of a vehicle by three drivers was not suggested in evidence or in written submissions, it would appear to be a logical arrangement, if provision for special trips of, say, 2,000 miles in length is to be made.)

EXCEPTIONS FOR SEASONAL PERIODS

In order to make allowances for peak seasons in the fruit and canning season and possibly in connection with certain other industries, the Commission believed that the usual prescribed working hours might be exceeded by 20 per cent for periods totalling not more than three weeks in any one year.

HOURS OF WORK FOR CITY DRIVERS

The commission considered that while the work of city drivers and warehousemen is not characterized by so great a responsibility as that attaching to the work of a highway driver, it is more continuously laborious, and the Commission believed that at the present time an eight-hour day and a spread of 12 hours would be satisfactory for this class of employees.

MINIMUM PERMISSIBLE WAGES IN TRUCKING OPERATIONS

The Commission recommended that, having regard to all the circumstances, drivers residing in average Ontario urban centres should receive a minimum wage at an hourly rate that would yield not less than $24 to highway drivers for a week of 60 hours and not less than $20 to pick-up and delivery drivers. These amounts might be reduced 10 per cent for drivers residing in rural centres or in localities where the cost of living is measurably lower than that of metropolitan centres. Wages for helpers, warehousemen, and mechanics would be proportionate to those mentioned for drivers.

FAIR WAGE SCHEDULE FOR PUBLIC AND CERTAIN PRIVATE CONSTRUCTION WORKS IN MANITOBA

UNDER the authority of section 11 of the Fair Wage Act of Manitoba, 1916 (Consolidated Amendments, 1924, chapter 99—as amended, 1934, chapter 13; 1935, chapter 17; 1937-38, chapter 15) the provincial Minister of Public Works has approved a schedule effective June 15, 1939, establishing the minimum rate per hour and the maximum working hours applicable on public works for building construction under contract and on private works as described in the Act.

"Private Works," as defined by the Act "means the building, construction, remodelling, demolition, or the repairing at a cost of all work done irrespective of the number of contracts made exceeding one hundred dollars, of any building or construction work within the Greater Winnipeg Water District or any city or town which has a population exceeding two thousand, or any other portion of the Province to which the provisions of this Act are extended by the Lieutenant-Governor in Council, but shall not include work which is done on property by or under the immediate direction and control of the owner, tenant or occupant thereof if no more than three men are employed in addition to the regular maintenance staff, if any, and if such work

be not undertaken with a view to sale or rental of the property and shall not include work which is done by a maintenance man, or men, employed by the month."

The public work to which this schedule applies is that authorized by the Minister for the execution of which a contract has, or contracts have been entered into between the Minister and an employer, consisting of construction, remodelling, demolition or the repairing or painting of buildings in Manitoba, and, or, highway, road, bridge or drainage construction work, when a contract has been entered into, and when done outside the "Greater Winnipeg Water District Area."

Fair Wage Schedule

The following schedule shall apply from and after June 15, 1939, on "Public Works" and on "Private Work."

Occupation	A—Greater Winnipeg Water District Area for Private Work, and for Govt. Work, Wpg. and radius of 30 miles	B—Other than Area described in "A" (applies to private work when population exceeds 2,000)	Max'm Hours per week
	Minimum rate per hour		
1. Asbestos Workers—			
(a) Journeymen	$ .75	$ .75	44
(b) Improvers	.60	.60	44
2. Asphalters—			
(a) Finishers and Rakers	.571	.525	44
3. Blacksmiths	.65	.60	44
4. Bricklayers	1.10	.90	44
Helpers—			
(a) Continuously employed at mixing and tempering mortar	.50	.42½	48
(b) Attending on or at scaffold	.45	.37½	48
5. Bridge and Structural Steel and Iron Workers	.85	.85	44
6. Carpenters	.85	.70	44
7. Cement Finishers (in warehouse or large floor area jobs)	.60	.55	48
8. Electrical Workers (inside wiremen, licensed journeymen)	.85	.75	44
Apprentices indentured for a four-year period shall be paid in accordance with the following classifications. Men are not to be classed as apprentices unless employed on work or approved instruction for a minimum of 36 weeks and subject to lost time being worked out. Not more than one apprentice to two journeymen is permitted.			
First Year	.25	Nil	44
Second Year	.30	Nil	44
Third Year	.40	Nil	44
Fourth Year	.75	Nil	44
Providing that these rates for apprentices shall be changed to agree with any rates which may be fixed, at a later date, by agreement.			
9. Labourers—			
(a) Skilled	.45	.37½	48
(b) Unskilled	.40	.32½	48
10. Lathers (Metal, Wood)—			
(a) Metal Lathers	.75	.70	44
(b) Wood Lathers	.70	.65	44
(Wood lathers—work may be paid for on a square yard basis at not less than 6c per square yard.)			
11. Linoleum Floor Layers	.60	.55	48
12. Marble Setters	1.05	.90	44
(a) Helpers (all men assigned to help tradesmen)	.50	.42½	48
13. Mastic Floor Spreaders and Layers	.85	.85	48
14. Mastic Floor Rubbers and Finishers	.55	.55	48
15. Mastic Floor Kettlemen	.45	.45	48

Occupation	A—Greater Winnipeg Water District Area for Private Work, and for Govt. Work, Wpg. and radius of 30 miles	B—Other than Area described in "A" (applies to private work when population exceeds 2,000)	Max'm Hours per week
	Minimum rate per hour		
16. Operating Engineers and Firemen on Construction—			
Class "A": Engineers in charge of hoisting engines of three drums or more operating any type of machine, or operating trenching machines, clamshells or orange peels, regardless of capacity; or operating steam shovels or draglines of one yard capacity or over, or operating drop hammer pile drivers; in all cases irrespective of motive power	$ .95	$ .75	48
Class "B": Engineers in charge of hoisting engines having only two drums or of single drum, used in handling building material; or steam shovels and draglines not specified in "A" hereof; irrespective of motive power	.90	.70	48
Class "C": Engineers in charge of any steam operated machine not specified in "A" or "B" hereof; or in charge of a steam boiler if the operation of same necessitates a licensed engineer under the provision of "The Steam Boiler Act"; or air compressor delivering air for the operation of rivetting guns on steel erection work, or pumps in caissons, or concrete mixers of over ½ yard capacity, irrespective of motive power	.80	.65	48
Class "D": Men firing boilers of machines classified in "A," "B," or "C" hereof or assisting engineers in charge of same	.55	.45	48
Class "E": Operators of gas or electric engines for machines not otherwise specified in "A," "B," or "C" hereof of a type usually operated by skilled labourers	.45	.37½	48
17. Painters, Decorators, Paperhangers and Glaziers	.70	.65	44
18. Plasterers	1.10	.90	44
(a) Helpers (continuously employed at mixing and tempering material including the making of putty and operation of machinery)	.50	.42½	48
19. Plumbers	.95	.80	44
(a) Helpers (all men assigned to help tradesmen)	.50	.42½	48
20. Roofers (felt and gravel)—			
(a) Man in charge	.60	.55	48
(b) Roofers	.45	.37½	48
21. Reinforcing Steel Rodmen; when specially hired for, or when exclusively occupied on such work for a longer period than 16 consecutive hours on the work of bending, placing, tieing and similar skilled work in connection with reinforcing steel work	.50	Nil	44
22. Sheet Metal Workers	.70	.65	44
23. Steamfitters	.95	.80	44
(a) Helpers (all men assigned to help tradesmen)	.50	42½	48
24. Stonecutters	.90	.80	44
25. Stonemasons	1.10	.90	44
(a) Helpers—			
(1) Continuously employed at mixing and tempering mortar	.50	.42½	48
(2) Attending on or at scaffold	.45	.37½	48
26. (a) Teamsters	.40	Nil	54
(b) Teamsters with Teams (if employed on the construction or demolition of the building by the owner, contractor or sub-contractor)	.80	Nil	54

Occupation	A—Greater Winnipeg Water District Area for Private Work, and for Govt. Work, Wpg. and radius of 30 miles	B—Other than Area described in "A" (applies to private work when population exceeds 2,000)	Max'm Hours per week
	Minimum rate per hour		
27. Terrazo Workers—			
(a) Layers	$ .70	$ .67½	44
(b) Machine Rubbers (Dry)	.55	.47½	48
(c) Machine Rubbers (Wet) and Helpers	.50	.45	48
28. Tile Setters, including all clay product tile	1.05	.90	44
(a) Helpers (all men assigned to help tradesmen)	.50	.42½	48
29. Tile Setters (asphalt and other composition tile)	.85	.70	44
30. Timber Men and Crib Men working on grain elevators or bridges doing the "crib work" on grain elevators, or rough timber work on bridges (such men shall be restricted to the use of hammers, saws, axes and augers)	.60	.50	48
31. Truck Drivers	.45	.40	48
32. Truck and Driver (combined rate) when paid by the Hour—			
Capable of hauling not more than 1½ tons or 1 cubic yard	1.25	...	48
Capable of hauling not more than 3 tons or 2 cubic yards	1.40	...	48
Capable of hauling not more than 4 tons or 3 cubic yards	1.90	...	48
Capable of hauling over 4 tons or 3 cubic yards	2.40	...	48

If a rate per yard mile is the basis for payment, the minimum rate per yard mile shall be 7c per yard mile plus an allowance of 13c per yard to cover loading time; and if the basis is per ton mile, the minimum rate per ton mile shall be 5c per ton mile plus an allowance of 8c per ton to cover loading time.

RULE.—All men hired in Winnipeg to go into the country to work on buildings shall be paid the city schedule rate, excepting where other definite agreements are made.

Attention is called to the fact that Winnipeg contractors have agreed with tradesmen that 40 hours per week only shall be worked during period July 1st to September 2nd, 1939, inclusive.

PUBLIC ROAD AND BRIDGE WORKS

The following schedule shall apply from and after June 15, 1939, on "public works" outside the Greater Winnipeg Water District Area in all parts of Manitoba for highway, road, bridge or drainage construction work where a contract has been entered into by the Honourable Minister of Public Works.

Occupation	Minimum Rate per Hour	Maximum Hours per Week
Teamsters	$ .30	48
Labourers	.30	48
Teamster and two-horse team	.55	48
Teamster and four-horse team	.80	48
Grader and Tractor Operators (excepting permanent municipal employees)	.60	48
Truck Drivers (regardless of basis for payment of truck)	.40	48
Combined Rate—Truck and Driver when paid by the hour—		
Capable of hauling not more than 1½ tons or 1 cubic yard	1.25	48
Capable of hauling not more than 3 tons or 2 cubic yards	1.35	48
Capable of hauling not more than 4 tons or 3 cubic yards	1.75	48
Larger trucks capable of hauling over 4 tons or 3 cubic yards	2.25	48
Combined Rate—Truck and Driver when paid at a unit rate per mile:		
In area "A" as described on heading.		
If a rate per yard mile or per ton mile is the basis for payment, the minimum rate shall be fixed by the Chief Engineer of the Good Roads Branch of the Public Works Department for each contract or job, which rate shall be based on the Departmental Schedule.		
Timber Men: timber work where use of hammers, saws, axes and augers only are required	.50	48

NOTE.—Men occupied on subsistence work projects such as Forestry Work, the Pas- Mafeking Highway, Grassmere Drain and similar undertakings—not less than the Minimum Wage Rate set by the Minimum Wage Board.

EMPLOYMENT PROBLEMS OF OLDER WORKERS IN THE U.S.A.

IN February 1938, the United States Secretary of Labor appointed a committee composed of representatives of the public, labour and industry to consider the difficulties experienced by older workers in finding employment and to suggest possible remedies. A summary of the report transmitted by the committee to the Secretary of Labor appeared in the May issue of *Labor Information Bulletin* published by the United States Department of Labor.

The committee, which was known as the Committee on Employment Problems of Older Workers, reached the unanimous conclusion that "workers are not through after reaching the age of 40" and that "any policy, private or governmental, which arbitrarily discriminates against employees or applicants on the basis of a fixed age is undesirable from the point of view of employees, employers, and the public as a whole and is not justified."

The committee found however that older workers are at the present time handicapped by the current general unemployment situation, by the prejudices of some employers, and by their own fears, and find difficulty in securing new employment if they are displaced. It was pointed out that the 1937 census of employment showed that men in the United States, after reaching the age of 40 and women after the age of 35 begin to experience difficulty in finding new jobs and that their prospects of finding employment decrease as they approach the retiring age. This census data confirmed the experience of private and public employment officers in locating jobs for older workers.

The Committee found no valid social or economic reason for such discrimination against older workers, particularly when around the age of 40. Examination of available factual data on productivity, accidents, sickness, group insurance, and pension plans all indicate, the Committee points out, that the age of workers has little effect upon the costs of operating the plant. In many instances productivity of older workers was found to be greater than that of younger employees. This is especially true in industries where skill, based upon long years of experience, is in demand. The younger workers have the edge in productivity over older employees only in occupations primarily requiring physical strength and endurance. Even in such jobs the precise age at which the decline in productivity begins varies widely among different individuals, and any fixed age is unfair to many workers.

Most of the data on occupational injuries indicates that older workers have fewer accidents, although their injuries are as a rule more severe. The result, according to the Committee, is that the net cost of industrial accidents to the employer remains about the same regardless of the age composition of his workers.

Objections to hiring older workers, based on alleged increased cost of maintaining group life insurance and private pension plans, were likewise found to be untenable. The employers' share of the cost of group life insurance is ordinarily so small that it should not influence employers to establish hiring-age limits, according to the Committee, and such higher insurance rates as may be necessary can be met by proper allocation of the cost of premiums between employers and workers. Private pension plans can also be revised in the light of recent nation-wide legislation providing old-age annuities to most groups of workers. It was pointed out that since workers covered by the Social Security Act may now continue credits for these annuities when they change jobs, their final annuity or pension will depend upon their total working time in insured employment rather than on the length of service with a particular firm. Thus employers who hire older workers do not have to worry about retiring these workers on inadequate pensions or run the risk of bankrupting their own pension plans in order to pay adequate old-age benefits.

Recommendations of Committee

The Committee stated that employment opportunities for older workers could be enlarged through co-operative action of trade unions and management, by a re-examination of hiring methods followed by employers, and by eliminating age requirements in Government employment.

With reference to agreements between trade-unions and employers, the Committee states: "We wish to call attention to the fact that employees themselves can help break down the prejudices against older workers and that in some instances the problem has been successfully dealt with through union contracts. We believe that unions and managements should co-operate fully in dealing with this problem."

Concerning employment and production practices of employers, the Committee urges and recommends that employers who have in the past adopted hiring-age limits, discontinue this practice. "We believe that those employers who have been swayed in their hiring policies by a preference for youth to the point of excluding the applicants over 40 from serious consideration should re-examine the basis of this preference in the light of this report, and scan their productive processes and work methods to determine what occupations are particularly suitable for the employment of older workers."

REPORT OF BRITISH MINISTRY OF LABOUR FOR 1938

THE fifteenth annual report of the British Ministry of Labour for the year 1938 was published recently. The report was reviewed in the June issue of the British *Ministry of Labour Gazette* under the main sections of the report—employment and unemployment; work of the employment exchanges as employment agencies; provision of training, instruction and welfare schemes for unemployed men and women; boys and girls; unemployment insurance; industrial relations (conciliation and arbitration); administration of the Trade Boards Acts, 1909 and 1918; labour statistics; International Labour Conference, etc.

Employment and Unemployment.—Employment in 1937, after reaching a record high level, had shown a considerable decline in the last few months of that year. This was followed by the usual seasonal decline in January, 1938; some improvement in the next two months was followed by a recession, which left the position in June about the same as in January. A subsequent seasonal decline in certain industries was counterbalanced by improvements in the textile, metal goods manufacture, and the vehicle and mining industries, and employment in December, 1938, stood at about the same level as in December, 1937. The average number of insured persons aged 16-64, in employment in Great Britain in 1938 (excluding persons insured under the agricultural scheme), was 11,406,000. This was about 120,000 less, on a comparable basis, than the average for 1937, but appreciably higher than the average recorded for any previous year. The average rate of unemployment among all insured persons in Great Britain (including those under the agricultural scheme) was 12·2 per cent in 1938, compared with 10·3 per cent in 1937. For the agricultural scheme alone the percentages were 5·5 and 4·1 respectively.

The Work of the Employment Exchanges as Employment Agencies.—The number of vacancies notified to Exchanges in 1938 was 3,152,818, an increase of 12,794 compared with 1937. Vacancies filled totalled 2,705,064, or 85·8 per cent of those notified, as compared with a corresponding percentage of 83·6 for 1937. The Exchanges played a substantial part in the provision of the labour required in connection with the general re-armament program, and heavy demands were made by the local authorities for air raids precautions work due to the national emergency in September. Difficulties were encountered in meeting the demand for certain types of workers, including skilled building trade operatives (principally bricklayers), engineering trade workers, domestic servants, and, in certain areas, skilled shipbuilding workers. Only a little over one-half of the vacancies notified for domestic servants were filled. Some 200,000 vacant situations in the hotel and catering trades were filled, an increase of over 10,000 compared with 1937. The proportion of vacancies filled to those notified for seasonal work at holiday resorts increased from 71·9 per cent to 74 per cent, 65,477 vacancies being filled in 1938.

About 18,000 men and women from the depressed areas were placed in employment in other districts by the Exchanges during 1938, while 4,000 families from the depressed areas were assisted to re-settle elsewhere.

The number of applications for foreign workers from abroad in 1938 was 25,923, the largest total yet recorded. Permits were granted in 22,347 cases, and refused for 3,576. There were 16,281 applications in respect of private domestic service, permits being granted in 13,792 such cases.

Provision of Training, Instruction and Welfare Schemes for Unemployed Men and Women.—The total number of places available at Government Training Centres at the end of 1938 was 8,739, an increase of more than 1,000 during the year; about 4,000 of these places are in the first instance reserved for soldiers. After October recruitment for the most important engineering classes was thrown open to the whole country, recruitment for other classes being restricted, as previously, to the areas of heavy unemployment. The number of admissions in 1938 was 18,751; 13,983 men completed training during the year, of whom 12,031 passed direct into employment. Twenty-five Instructional Centres were open during the year, which, with 10 summer camps, provided a total of 6,185 places. Admissions in 1938 totalled 23,772, or over 3,000 more than in 1937. In addition there were four Local Training Centres with accommodation for 750 men.

The training of unemployed women and girls is mainly effected by a grant to the Central Committee on Women's Training and Employment. During 1938, 3,775 women and girls completed training at the Committee's Home Training Centres, of whom 2,781 entered domestic employment.

Other forms of assistance to the unemployed included certain special training schemes for particular classes of both men and women, physical training classes (for which there were 24,946 enrolments in 1938), and a grant of £110,000 to the National Council of Social

81706—4½

Service for the provision of occupational courses and other welfare work.

Boys and Girls.—The decline in the birth rate after 1920 caused a reduction in the number of juveniles aged 14-17 available for employment; at the end of 1938 the number was estimated at 2,198,000, or 159,000 less than at the end of 1937. The average number of juveniles registered as unemployed during the year increased for boys, from 40,105 to 49,176, and for girls from 43,444 to 53,590. Advisory and placing work carried out through various local and regional committees was coordinated and supervised centrally by the Ministry. Vacancies filled in 1938 totalled 506,082; this total includes 10,389 secondary school pupils who were placed in their first situation.

During 1938, 9,627 boys and girls were transferred from the depressed mining areas to employment elsewhere.

There were 157 centres and 37 classes in December, 1938, for courses of instruction to unemployed juveniles. Regulations which came into force in 1938 made provisions for meals or milk and biscuits to be given at these classes in approved cases.

Reference is also made in this chapter of the report to the progress made during 1938 in connection with vocational training schemes, junior transfer centres and camps, maintenance grants, and after-care for transferred juveniles.

Unemployment Insurance and Unemployment Assistance.—Dealing with the administration of the Unemployment Insurance Act, reference was made to the application of its provisions to certain outdoor domestic servants effective from April 4, 1938, from which date also certain other classes of outdoor servants were brought within the agricultural scheme. (LABOUR GAZETTE, January 1938, page 45).

Other legislative changes in 1938 increased the rate of benefit in respect of an adult dependant under the *general* scheme from 9s. per week to 10s., while the "ratio rule" was improved by altering the deduction in respect of past benefit from one day for each eight days past benefit to one day for each ten days. Under the *agricultural* scheme the "waiting period" was reduced from six days to three days (this had already been done in 1937 in the general scheme). Rates of contribution for persons aged 18 and over were reduced by ½d. per week for each party, while the rate of benefit for a young man between 18 and 21 was increased from 10s. 6d. per week to 12s. The ten contributions requalifying condition was made to apply only where 300 days' agricultural benefit had been drawn, and not, as previously, wherever agricultural benefit was exhausted.

As regards the finance of the Unemployment Insurance Schemes, the income on the *general* account in 1938 was £65,894,665, being £927,752 more than in 1937. Expenditure in 1938, excluding the special debt repayment of £20,000,000, totalled £62,320,027, compared with £43,565,187 in 1937. There was a heavy increased expenditure on benefit, due mainly to the rise in unemployment, added to which was the effect of the improvements introduced in 1937, allowing more additional days of benefit to men with good employment records, and reducing the waiting period. The average weekly payment was 16s. 11d., compared with 17s. 5d. in 1937.

The income on the *agricultural* account rose by £64,905 to £1,942,533 and the expenditure from £700,016 to £993,649. The average weekly payment was 14s. 6d., compared with 14s. 5d. in 1937.

The total cost of administration of Unemployment Insurance and Unemployment Assistance (other than the cost borne on the Vote for the Unemployment Assistance Board) and taking into account the whole cost of Employment Exchanges in so far as they deal with the persons concerned, was £7,713,114 in 1937-38, and is estimated to amount to £8,298,000 in 1938-39.

Industrial Relations (*Conciliation and Arbitration*).—Most disputes involving stoppages of work in 1938 affected only individual establishments, and the year was singularly free from serious disputes. There was an increasing tendency for the Ministry's conciliation officers to be consulted at an early stage in disputes, assisting thereby the prevention of stoppages of work.

Among the industries, etc., with whose representatives discussions took place during 1938 in regard to conditions of employment were the retail distributive trades, the licensed trade, the cotton industry, the glove industry, the London furniture trade, and the London central omnibus services. The Ministry was directly associated with the settlement of 83 disputes by conciliation.

The Report also gives an account of the proceedings of the twenty-fourth session of the International Labour Conference and of the proceedings at four sessions of the Governing Body of the International Labour Office.

There are 36 Appendices of tabular statistics and other related information in the Report including charts, and lists of statutory enactments in 1938 relating to unemployment insurance, and of the principal publications issued by the Ministry in 1938. Among subjects covered by the tables are changes in rates of wages, and in the cost of living in 1938; trade disputes in 1938; and the membership of trade unions.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, MAY, 1939

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on June 1 was 11,718, the employees on their payrolls numbering 1,098,908 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for May was 1,909, having an aggregate membership of 238,724 persons, 11·7 per cent of whom were without employment on June 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of June, 1939, as Reported by Employers

There was widespread improvement in industrial employment at June 1, according to returns received by the Dominion Bureau of Statistics from 11,718 establishments, whose staffs aggregated 1,098,908, compared with 1,032,068 at May 1. This gain of 66,840 persons, or 6·5 per cent, substantially exceeded the average advance at June 1 in the period 1921-1938, while on only two occasions in the last twelve years have larger additions to payrolls been reported, viz., at June 1 in 1937 and in 1928, when there were percentage gains of 7·5 and 6·7, respectively.

The unadjusted index rose from 106·2 at May 1, 1939, to 113·1 at the beginning of June, being then slightly higher than that of 111·9 at June 1, 1938. The seasonally-corrected index, also at 113·1 at the date under review, showed a gain of 2·8 points from the preceding month.

Greatly increased activity was indicated at the beginning of June in manufacturing, especially of lumber, pulp and paper, food, clay, glass and stone and iron and steel products. The movement was also decidedly favourable in the non-manufacturing division. Logging showed the largest June 1 advance recorded in the years since 1920, reflecting to a considerable extent river-driving operations in the Maritime and Central Provinces, while pulp wood cutting also showed important gains. Mining, transportation, communications, construction and maintenance, services and trade provided work for many more persons than at May 1. The advance in most of these industries was greater-than-seasonal, notably so in transportation and logging; this was partly due to the fact that the resumption of seasonal operations in certain industries, which ordinarily takes place before May 1, had this year been delayed by the unusually cold spring, and is accordingly reflected in the June 1 return. In a number of establishments, increased employment was reported as a result of the Royal visit.

Improvement on a smaller scale had been indicated at June 1, 1938; the 10,632 employers then making returns had employed 1,068,620 men and women, an increase of 43,335 from May 1. This advance raised the crude index from 107·4 at May 1, 1938, to 111·9 at June 1 of that year, when it was just over one point lower than at the beginning of June, 1939.

The indexes for June 1 in recent years of the record, based on the 1926 average as 100, are as follows: 1939, 113·1; 1938, 111·9; 1937, 114·3; 1936, 102·0; 1935, 97·6; 1934, 96·6; 1933, 80·7; 1932, 89·1; 1931, 103·6; 1930, 116·5; 1929, 122·2; 1928, 113·8 and 1927, 107·2.

Employment in Financial Organizations

For some months, statistics of their employment have been collected from banks, trust companies and stock market operators. For June 1, 413 firms and branches in these lines of business reported staffs aggregating 32,972 persons, compared with 33,085 in the preceding month. The addition of these figures to the returns furnished in the manufacturing, logging, mining, transportation, communications, construction, service and trade

industries brings the total number of employees included in the June 1 survey of employment to 1,131,880 in 12,131 establishments and slightly lowers the index of 113·1 in the industries above enumerated, to 112·9; when the data of employment in financial organizations are added to the general figures for May 1, the index rises from 106·2 to 106·3; comparable data for 1938 are not available.

Employment by Economic Areas

The trend was upward in each of the provinces; firms in Quebec and Ontario employed the greatest number of extra workers, while the percentage gains over the preceding month ranged from 3·2 in British Columbia to 8·5 in Quebec, and 12·2 per cent in New Brunswick. Except in the Maritime Provinces as a unit, industrial activity was at a somewhat higher level at June 1 than at the same date in 1938, but generally was rather quieter than at the beginning of June, 1937.

Maritime Provinces.—Important increases were reported in Prince Edward Island, Nova Scotia and New Brunswick, according to statistics received from 833 employers in the Maritime Provinces with a combined working force of 79,998 persons, as compared with 73,937 at May 1. This gain considerably exceeded the average indicated at June 1 in the years since 1920, and was also substantially larger than that which took place at June 1, 1938; the index of employment then, however, was rather higher than at the latest date. Manufacturing reported decided expansion, particularly in the iron and steel, lumber, pulp and paper and animal food divisions; logging, mining, trade and construction also afforded more employment, the advance in the last-named being greatest. On the other hand, transportation was seasonally slacker.

The 790 firms reporting for June 1, 1938, had employed 81,019 workers, or 2,633 more than at the beginning of May of last year.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

Quebec.—Improvement was indicated in practically all industrial groups in Quebec; logging and construction recorded especially pronounced increases in personnel, but there were also important additions to payrolls in manufacturing and transportation, with smaller advances in mining, services and trade. Within the manufacturing division, pulp and paper, food, lumber and clay, glass and stone plants reported the greatest expansion, but the trend was also upward in the tobacco, chemical, electrical apparatus, iron and steel, non-ferrous metal and non-metallic mineral industries. On the other hand, seasonal curtailment was shown in textiles, this being the only exception to the generally favourable movement in Quebec. Statements were tabulated from 2,897 firms employing 344,477 workers at June 1, 1939, or 26,956 more than in their last monthly report. The general gain indicated by the employers making returns exceeded the average at June in the years, 1921-1938, and was also larger than that noted at the same date of last year, when the co-operating establishments, numbering 2,570, had reported 335,996 employees, as compared with 314,230 in the preceding month.

Ontario.—There was considerable expansion in operations in manufacturing, logging, mining, transportation and construction and maintenance at June 1, 1939, together with smaller increases in employment in communications, services and trade. Within the manufacturing division, the lumber and food divisions showed the largest additions to the payrolls, but there was also improvement in the pulp and paper, clay, glass and stone, beverage, electrical appliances, non-ferrous metal, non-metallic mineral product, and other groups; on the other hand, leather and textile works were somewhat slacker. The staffs of the 5,115 co-operating establishments aggregated 450,932 at the latest date; as compared with 428,419 at May 1, this was an increase of 22,513 employees, an advance that was much greater-than-average in the experience of past years. The general index of employment stood at 113·6 at June 1, as compared with 107·9 at May 1, 1939, and 112·5 at the beginning of June in 1938, when the general gain had been on a decidedly smaller scale. A combined working force of 438,579 persons was reported by the 4,668 concerns then furnishing data.

Prairie Provinces.—Construction (especially highway and railroad construction and maintenance), transportation, manufacturing, services and trade showed important improvement in the Prairie Provinces, while mining and communications recorded slight betterment, and logging was seasonally slacker. In the group of factory employment, there was an upward movement in food, lumber, pulp and paper and electric light and power, but iron and steel afforded less employment than at May 1. The 1,672 firms whose statistics were tabulated reported 130,576 employees, as against 122,152 in the preceding month; while the situation improved at June 1 in each of the provinces in the Prairie Area, the largest gains were in Alberta. Smaller increases had been indicated at June 1, 1938, when the 1,502 establishments making returns had employed 123,479 workers, compared with 116,463 at May 1; employment was then at a lower level.

British Columbia.—An aggregate staff of 92,925 was reported by the 1,201 co-operating employers, who had 90,039 persons on their payrolls at the beginning of May. This increase approximated the average gain at June 1 in the years since 1920, and was much larger than that noted at the same date in 1938. The index of employment then was slightly lower than at the first of June of the present year, when it stood at 106·6. Manufacturing recorded improvement, that in lumber and animal food factories being most pronounced. Among the non-manufacturing groups, logging, transportation, communications, construction and maintenance and services showed heightened activity. For June 1, 1938, statements had been received from 1,102 employers of 89,547 persons.

Table 1 gives index numbers by economic areas.

Employment by Cities

The trend was favourable in six of the eight cities for which separate compilations are made. Montreal, Quebec City, Toronto, Ottawa, Hamilton and Winnipeg showed improvement, while there were moderate losses in Windsor and Vancouver. Employment in Montreal, Quebec, Toronto, Ottawa and Vancouver was rather brisker than at the same date of last year, but the indexes in Hamilton, Windsor and Winnipeg were lower; the falling-off in the index for the last-named was fractional.

Montreal.—Further marked improvement was recorded in Montreal, where the 1,685 co-operating firms employed 168,215 persons, or 6,475 more than at May 1. Manufacturing showed a large increase, most of which occurred in food, tobacco and iron and steel factories; on the other hand, the textile division was seasonally quiet. Transportation and construction were also busier, while other industries reported little general change. The index, at 108·7, was slightly higher than in June, 1938, when a smaller percentage advance had been recorded in the 1,474 estab-

lishments from which information was received, whose employees had numbered 161,781.

Quebec.—There was another rise in industrial activity in Quebec City; manufacturing, construction and services reported an upward movement, but transportation showed curtailment. Statements were tabulated from 213 employers having 17,423 workers, as against 17,222 in the preceding month. No general change had been indicated at the beginning of June of a year ago, when the index was many points lower; an aggregate of 179 firms had then reported a staff of 13,899.

Toronto.—Returns were furnished by 1,740 business houses in Toronto with 140,075 employees, compared with 138,122 at May 1. Manufacturing as a whole was brisker, there being moderate gains in food, clay, glass and stone, chemical, electrical apparatus, mineral product and some other groups, while iron and steel and textiles were slacker. Transportation, construction and services afforded more employment, and there was also a slight gain in trade. The general index was 2½ points higher than at June 1, 1938, when statistics from 1,596 establishments indicated a combined staff of 133,470, or 367 more than at the beginning of May of last year.

Ottawa.—Heightened activity was noted in manufacturing, especially in the lumber division; construction and services also showed some improvement. A total working force of 15,048 men and women was recorded at June 1, 1939, by the 228 co-operating firms, who had had 14,582 on their payrolls in the preceding month. At the same date of last year, 200 establishments had reported 14,008 workers, a gain of over 400 from their May 1 forces, while the index was then 3·5 points lower than that of 109·8 at the date under review.

Hamilton.—There was a further increase in Hamilton, where data were tabulated from 328 employers who had 34,049 persons on their paylists, or 716 more than at the beginning of May. This advance compared favourably with the reduction indicated at June 1, 1938, although employment was then at a rather higher level. Moderate improvement was noted in manufacturing, transportation and construction, the gains in the first-named taking place mainly in the iron and steel, electrical apparatus and clay, glass and stone divisions, while textile factories were not so active. The 297 concerns reporting for June 1, 1938, had employed 34,118 workers, or 177 fewer than in the preceding month, the index then stood at 106·6, compared with 104·6 at June 1, 1939.

Windsor.—Employment in Windsor showed a seasonal contraction at June 1, for which statistics were received from 198 firms with 18,864 employees, a decrease of 597 since the beginning of May. There was a falling-off in the textile and iron and steel industries; construction reported some slight improvement, while other groups showed little general change. At the corresponding date of last

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

—	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
June 1, 1927	107·2	103·5	107·5	108·1	106·5	105·5
June 1, 1928	113·8	107·2	110·7	115·5	121·5	109·9
June 1, 1929	122·2	112·5	115·9	126·2	132·4	117·5
June 1, 1930	116·5	122·4	114·5	117·8	115·8	113·3
June 1, 1931	103·6	105·2	104·3	104·2	103·3	97·9
June 1, 1932	89·1	96·4	87·8	89·9	89·3	83·7
June 1, 1933	80·7	82·8	79·3	81·6	82·7	76·2
June 1, 1934	96·6	98·4	90·9	104·4	89·5	89·1
June 1, 1935	97·6	101·6	93·8	101·6	92·2	96·6
June 1, 1936	102·0	103·4	99·8	104·7	97·7	102·2
June 1, 1937	114·3	122·0	113·6	118·8	99·3	112·2
June 1, 1938	111·9	110·9	120·4	112·5	97·0	105·1
Jan. 1, 1939	108·1	109·2	114·9	108·8	97·1	98·0
Feb. 1,	106·5	100·5	113·0	109·2	93·9	96·2
Mar. 1,	106·5	101·2	112·8	109·1	94·3	96·7
April 1,	104·9	99·7	109·4	108·0	91·7	100·5
May 1,	106·2	100·2	111·6	107·9	94·5	103·3
June 1,	113·1	108·4	121·0	113·6	101·0	106·6
Relative Weight of Employment by Economic Areas as at June 1, 1939	100·0	7·3	31·3	41·0	11·9	8·5

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

summer, a decline had also been indicated by the 187 co-operating establishments, whose staffs aggregated 19,943; employment then was more active than at the latest date, when the index stood at 136·4.

Winnipeg.—A personnel of 40,116 men and women was reported by the 521 Winnipeg employers whose statistics were compiled, and who had 39,064 employees at May 1. Most of the gain took place in manufacturing, but construction, services, transportation and trade also afforded more employment. The general increase was much larger than that noted at the beginning of June of last year, when 488 returns had been tabulated, showing a combined working force of 39,892 persons, as against 39,354 in the preceding month. The index then, however, stood at 92·8, compared with 92·4 at June 1, 1939.

Vancouver.—Manufacturing, building construction and transportation recorded moderate losses in Vancouver, while communications, road construction and maintenance and services were brisker. Statements were tabulated from 521 firms with 36,547 workers, as compared with 36,667 at May 1, 1939. A small increase had taken place at June 1 of a year ago, according to statistics from 459 establishments with 34,625 persons on their staffs, or 138 more than in the preceding month. Employment then, however, was in rather less volume, the index being 3½ points lower than that of 109·9 indicated at the beginning of June of this year.

Employment by Industries

Manufacturing.—Employment in manufacturing showed very general improvement at the beginning of June. The trend at that date in other years has almost invariably been upward, but the increase recorded at June 1, 1939, considerably exceeded the average advance in the years since 1920, and was very substantially greater than that reported at June 1, 1938. The 6,386 manufacturers furnishing data enlarged their staffs from 554,072 at May 1, 1939, to 569,881 at the date under review; this gain of 15,809 persons, or 2·9 per cent, raised the crude index from 108·4 at the former date to 111·4 at June 1, when it was very slightly lower than that of 112·3 at the beginning of June in 1938. The seasonally-corrected index advanced from 107·6 at May 1 to 109·3 at June 1, 1939.

A feature of the situation at the latest date was the wide distribution of the increases recorded in factory employment. Improvement was reported in all industrial groups except leather and textiles, in which the moderately downward trends were seasonal. The most marked expansion was in lumber, food, pulp and paper, clay, glass and stone and iron and steel, but considerably heightened activity was also indicated in fur, rubber, beverage, tobacco, chemical, electrical apparatus, non-ferrous metal and non-metallic mineral products. Geographically, the increases were also generally distributed, the movement being decidedly favourable in all provinces except Saskatchewan, where little general change in manufacturing was indicated.

The unadjusted indexes at June 1 in recent years (based on the 1926 average as 100), are as follows: 1939, 111·4; 1938, 112·3; 1937, 117·9; 1936, 103·4; 1935, 98·4; 1934, 93·2; 1933, 80·0; 1932, 86·0; 1931, 99·4; 1930, 113·6; 1929, 121·2; 1928, 112·6 and 1927, 106·9.

A brief review of the situation at June 1, 1938, shows that the 6,133 manufacturers then co-operating had reported 571,840 employees, as compared with 562,869 in the preceding month, being an increase of 8,971 or 1·6 per cent. The food, lumber, pulp and paper, clay, glass and stone and other industries had shown improvement over May 1 of last year.

Animal Products, Edible.—There were further and more pronounced increases in the numbers employed in this group, particularly in the fish-preserving division in the Maritime Provinces and British Columbia, while the meat and dairying industries also showed heightened activity. Statistics were tabulated from 331 firms employing 27,018 workers, as compared with 24,685 in the preceding month. This advance was much larger than that reported at June 1, 1938, and the index then was four points lower.

Fur and Fur Products.—There was an upward trend in employment in fur factories, 67 of which enlarged their payrolls from 2,103 persons at the beginning of May to 2,318 at June 1. A rather smaller gain had been made at the same date last summer, but activity was then at a slightly higher level.

Leather and Products.—Although employment in this group was further curtailed, the loss was much smaller than that indicated in June of last year; the index then stood at 105·3, compared with 110·1 at the date under review. The working forces of the 324 co-operating employers totalled 22,691 men and women, as against 22,882 in the preceding month. The declines were mainly in Ontario.

Lumber and Products.—Continued, seasonal improvement took place in lumber mills, and there were also gains in container and other wood-using plants. Returns were compiled from 927 plants in the lumber group having 47,138 workers, compared with 41,285 at the beginning of May. All five economic areas shared in the favourable movement at June

1, that in Quebec and Ontario being especially pronounced. Additions to staffs on a smaller scale had been made at the same date last year, and the index then was two points lower.

Plant Products, Edible.—Expansion was noted in this group at the beginning of June, when 1,374 persons were added to the forces of the 522 co-operating manufacturers, who had 34,139 employees. Fruit and vegetable canning, sugar, bakery and other vegetable food establishments reported improvement. The increase registered at June 1, 1938, did not provide work for so many persons, and the employment index was then fractionally lower than that of 112·2 at the date under review.

Pulp and Paper Products.—Pulp and paper mills showed important increases in personnel,

TABLE II.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

Industries	[1] Relative Weight	June 1 1939	May 1 1939	June 1 1938	June 1 1937	June 1 1936	June 1 1935	June 1 1934

[1] For explanation of term "Relative Weight", see footnote to Table I.

and printing and publishing houses were also busier. The index number in the pulp and paper group as a whole stood at 108·2, compared with 105·3 at the beginning of June of last year, when the gains recorded were much smaller. An aggregate payroll of 67,168 workers was reported by the 710 firms whose statistics were compiled, who had employed 65,242 at May 1, 1939.

Rubber Products.—Fifty-four rubber factories recorded a combined working force of 13,396 persons, or 215 more than in their last return. Employment was in greater volume than at the beginning of June a year ago, when only a slight advance over the preceding month had been indicated.

Textile Products.—There was a moderate seasonal decline in textiles at the date under review, chiefly in silk and clothing factories. On the other hand, woollen mills were busier. The losses took place in Quebec and Ontario. Data were received from 1,162 firms employing 103,670 men and women, as against 104,460 in the preceding month. A much greater decrease had been reported at June 1, 1938, but employment was then at practically the same level as at the date under review.

Beverages.—Activity in this group showed an advance, according to 147 employers whose staffs were enlarged from 8,749 in the preceding month to 9,171 at the beginning of June in the present year. Improvement had also been noted at the same date of last year, when the index was a few points lower.

Tobacco.—There was a moderate increase in the manufacture of tobacco; 45 factories employed 7,917 men and women at June 1, compared with 7,520 in their last report. Activity in this industry was not equal to that reported at June 1 of last summer; the tendency had then also been favourable.

Chemical and Allied Products.—Statistics were tabulated from 301 chemical establishments, which provided work for 18,834 employees, as against 18,600 at the first of May. The gain occurred largely in Quebec. Employment in these industries was at much the same level as in the early summer of last year.

Clay, Glass and Stone Products.—Further marked improvement was noted in building material plants, 219 of which employed an aggregate working force of 10,545 persons, or 1,313 more than at May 1. The index stood at 94·0; this was slightly above that recorded at the same date in 1938, when a rather smaller increase had been made. Quebec and Ontario reported the bulk of the gain in this group, to which factories turning out clay, glass and stone products contributed.

Electric Light and Power.—A slight advance as compared with May was shown in electric light and power plants, in which employment was rather quieter than at the same date a year ago. The 100 co-operating companies enlarged their staffs by 83 workers to 16,058 at the beginning of June, 1939.

Electrical Apparatus.—Further expansion was shown in electrical appliance factories, 124 of which reported a combined payroll of 17,483 at the date under review, or 485 more than in the preceding month. Although no general change had been recorded at June 1, 1938, employment was then somewhat more active.

Iron and Steel Products.—There was a moderate contra-seasonal increase at June 1, 1939, in iron and steel; the largest additions to staffs were in the crude, rolled and forged division. Returns were tabulated from 922 manufacturers employing 128,472 persons, compared with 127,370 at May 1. Improvement was noted in the Maritime Provinces and Quebec, while elsewhere the changes were slight. A smaller advance had been made at June 1, 1938, but the index was then several points higher.

Non-ferrous Metal Products.—These industries reported heightened employment, according to 187 firms employing 24,471 men and women, compared with 24,342 in the preceding month. The increase took place mainly in Quebec and Ontario, while the tendency was downward in British Columbia. Reduced activity had been recorded at the beginning of June a year ago, when employment was, however, at a very slightly higher level.

Mineral Products.—Continued, seasonal expansion was noted generally in the miscellaneous mineral product group; this was on a much larger scale than that occurring at June 1, 1938, but the index number then was rather higher. An aggregate payroll of 12,566 persons was reported for June 1, 1939, by the 100 co-operating employers, who had 12,037 workers at May 1.

Miscellaneous Manufacturing Industries.—Production in the manufacturing establishments listed under this heading showed an increase, 164 employees having been added to the forces of the 108 firms whose returns were tabulated, and who employed 5,624 at the beginning of June.

Logging

Employment in logging camps substantially increased at the beginning of June, partly as a result of river-driving operations and partly reflecting greater activity in pulpwood cutting; there was marked expansion in the Maritime Provinces, Quebec, Ontario and British Columbia, while curtailment was indicated in the Prairies. Returns were received from 383 firms

employing 28,422 workers, or 13,509 more than in the preceding month. This gain was the largest reported at June 1 in any year since 1920. A decline had been indicated at the same date in 1938, and the index, at 93·6, was then lower than at the beginning of June in the present year, when it stood at 97·1.

Mining

Coal-Mining.—Employment in the eastern and British Columbian coal-fields showed some improvement, but there was seasonal curtailment in Alberta. Statements were compiled from a total of 102 operators with 22,491 employees, or 18 more than at the beginning of May. The index was about three points lower than at June 1, 1938, when a small reduction had been recorded.

Metallic Ores.—A further and greater gain was shown in metallic ore mines, mainly in Ontario; 241 employers enlarged their staffs from 41,612 workers at May 1, to 42,690 at the date under review. A rather more marked increase had taken place at the beginning of June of last year, but the index then was lower than at June 1, 1939.

Non-Metallic Minerals (other than coal).—According to data received from 103 firms in this group, they employed 9,275 persons, or 1,081 more than in the preceding month. Employment was brisker than at the same date of last year, when smaller additions to personnel had been reported by the co-operating firms.

Transportation

Street Railways and Cartage.—An increase was registered in local transportation at June 1, when 280 companies added 968 employees to their payrolls, bringing them to 28,777. Employment had shown expansion on a smaller scale at the beginning of June, 1938, and the index was then lower than at the date under review.

Steam Railways.—Improvement was indicated in steam railway operation, in which the 100 co-operating companies and branches enlarged their personnel from 56,264 in the preceding month to 58,909 at June 1. The Maritime Provinces reported a seasonal contraction, while there were increases in the remaining economic areas. Activity generally was at a rather higher level than at June 1 of last year, when much less extensive gains had been recorded.

Shipping and Stevedoring.—There were pronounced seasonal losses in employment in the Maritime Provinces, which were more than offset by the additions to staffs elsewhere indicated. Statistics were received from 126 firms with 17,034 employees, as compared with 14,423 in the preceding month. Although only a slight advance, on the whole, had been noted at June 1, 1938, the index then stood at 97·9, compared with 91·9 at the date under review.

Communications

Improvement was indicated on telegraphs and telephones. The 86 companies and branches reporting had 22,386 men and women on their paylists at the beginning of June, or 477 more than at May 1. Employment was at a slightly lower level than at the same date a year ago, when a somewhat larger gain had been indicated.

Construction and Maintenance

Building.—An aggregate staff of 22,767 was reported by the 849 contractors furnishing statistics, who had 19,656 workers at May 1. Activity increased in all provinces except Alberta and British Columbia, where little general change occurred. The expansion, which was seasonal, was on a similar scale to that noted at June 1, 1938, and employment in building operations was then in practically the same volume as at June 1, 1939.

Highway.—The 392 highway and road contractors furnishing returns had 87,048 persons in their employ, or 17,147 more than at the beginning of May. All provinces shared in the upward movement, Quebec reporting the greatest gain. The number engaged in road work was rather larger than at the beginning of June, 1938, although a more pronounced increase had then been indicated.

Railway.—Important advances were again registered by the track departments of the railways; the working forces of the 34 co-operating employers included 29,253 workers, as against 24,122 in the preceding month. This increase was larger than that noted at June 1 of last year, and the index of employment was then fractionally lower. The most noteworthy gains at the date under review were in the Prairie Provinces, but all five economic areas reported heightened activity.

Services

Hotels and restaurants showed a seasonal increase, and laundries and dry-cleaning establishments also recorded improvement. Statements were compiled from 592 firms employing 31,210 men and women, as compared with 29,316 at May 1. The index, at 141·8, was 6·5 points higher than at the same date in 1938, when much smaller advances had been made.

Trade

An upward movement was indicated in retail and wholesale trade; 2,044 establishments employed 128,765 persons, or 1,361 more than in their last return. The improvement in wholesale trade was slight, while that in the retail division was more pronounced. Little general change, on the whole, had been noted at June 1, 1938, when employment in the distributive industries was rather quieter.

Tables

Index numbers of employment by economic areas, and industries are given in the accompanying tables. The columns headed "relative weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada at the date under review.

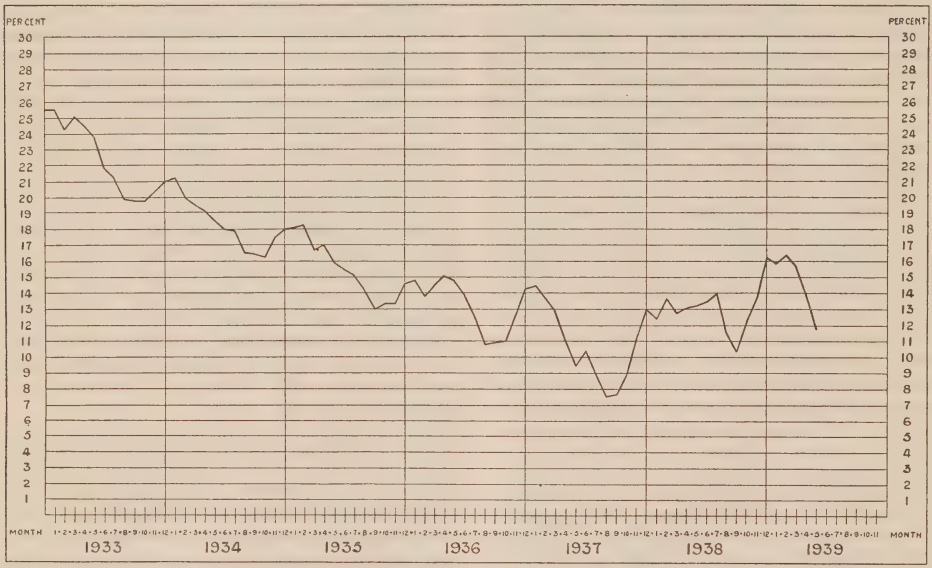
(2) Unemployment in Trade Unions at the Close of May, 1939

Unemployment as used in the following article has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are idle on account of illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Continued improvement was manifest among local trade union members during May, the 1,909 labour organizations from which reports were compiled, with an aggregate of 238,724 members, showing that 27,895 or a percentage of 11·7 were out of work at the end of the month, as compared with 13·9 per cent of inactivity in April. Better conditions obtained also, than in May last year when unemployment stood at 13·2 per cent. Saskatchewan unions, with a gain of over 5 per cent from April, showed the greatest advancement of any of the provinces, particularly in the steam railway division. In Ontario, Quebec, British Columbia and Manitoba increases of over 2 per cent were reflected, the building and construction trades, and steam railway division showing the most noteworthy changes except in British Columbia, where the fishing and lumbering and logging industries were the determining factors in the favourable situation noted in that province. Nova Scotia unions indicated improvement of slightly lesser degree. New Brunswick and Alberta alone, showed some slackening in available work, the recessions in the latter province, however, being but nominal. Contrasted with the returns for May last year Quebec and British Columbia unions reported increases in work afforded of over 3 per cent and Saskatchewan and Ontario unions advances of somewhat smaller proportions. In Nova Scotia and New Brunswick, however, curtailment of moderate degree was registered. The tendency in Manitoba and Alberta was also toward retarded activity, though the variations from May last year were less than one per cent.

The returns on unemployment in the largest city in each province, with the exception of Prince Edward Island, are compiled separately each month. During May, employment for Saint John and Edmonton members was in moderately greater volume than in April and heightened activity, on a somewhat smaller scale, was evident among Vancouver, Toronto, Winnipeg and Montreal members. Nominally better conditions prevailed in Regina. Employment in Halifax, however, showed some falling off from April. The situation in Montreal and Toronto was considerably improved during May from the corresponding month last year and fair sized gains in employment were noted by Vancouver members. In Regina and Edmonton a slightly upward tendency was reflected. Halifax and Saint John unions, on the contrary, showed moderate losses in work afforded and activity for Winnipeg members was slightly restricted.

Accompanying this article is a chart which illustrates the trend of unemployment by months from January, 1933, to date. The curve in May showed a slight drop in level from April, indicative of a somewhat better employment trend. The point reached at the end of the month remained below that of May, 1938, an evidence of a greater volume of available work during the period under review.



Little change during May from the preceding month was recorded in the manufacturing industries, though the tendency was in a favourable direction. This was apparent from the reports compiled from 571 local unions with 93,756 members, 10,920 of whom, or a percentage of 11·6, were idle, as contrasted with 11·8 per cent of inactivity in April. Improvement in greater measure was indicated from May last year, when 15·8 per cent of the members reported were out of work. General labourers were considerably better engaged during May than in April and among brewery workers the advances recorded

were noteworthy. A somewhat higher level of activity obtained also among iron and steel, jewellery, cigar and tobacco, and textile and carpet workers, meat cutters and butchers, and bakers and confectioners. On the other hand, hat, cap and glove, and glass workers were slacker than in April and reductions in employment on a small scale were reported by leather and fur workers, and metal polishers. Activity for papermakers, wood and garment workers, and mill and smelter men was fractionally retarded from April. The percentage of idleness among printing tradesmen remained identical with that of the preceding month. When contrasting with the reports for May last year important gains in employment were registered by garment, wood and fur workers during the month reviewed, and noteworthy expansion was apparent among hat, cap and glove workers, and meat cutters and butchers. More moderate increases were reflected by cigar and tobacco workers, bakers and confectioners, general labourers and metal polishers, while the situation for glass workers showed little change, though the tendency was favourable. Leather and textile and carpet workers, however, were much quieter than in May last year and activity in the iron and steel trades was at a somewhat lower level. Minor contractions in work available were recorded by jewellery and brewery workers, printing tradesmen, papermakers and mill and smelter men.

The trend of activity in coal mining during May was slightly downward from both the previous month and May a year ago, according to the returns tabulated from 58 local unions embracing a membership of 21,747 persons. Of these, 3,289, or a percentage of 15·1 were out of work on the last day of the month, in comparison with percentages of 14·3 in April and 13·4 in May, 1939. Alberta unions showed a noteworthy drop in employment during May from the preceding month, while in Nova Scotia and British Columbia conditions were slightly improved. Nova Scotia, Alberta and British Columbia members all participated in the retrogressive employment movement indicated from May last year, British Columbia miners particularly showing a marked increase in slackness, while in the other provinces the changes were of lesser importance. A number of unions, however, continued to report some part-time employment.

Building and construction activities were considerably stimulated during May, chiefly as a result of seasonal influences, the 208 associations making returns with a membership covering 25,832 persons indicating 30·4 per cent of idleness, compared with 40·0 per cent in April. Nominal gains only were noted from May last year, when 30·9 per cent of unemployment was reported. Decided recovery during May from the preceding month was shown by bricklayers, masons and plaster-

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

ers, carpenters and joiners, electrical workers, granite and stonecutters, and bridge and structural iron workers, and noteworthy increases were reflected by painters, decorators and paperhangers. More moderate improvement was evident among steam shovelmen, and plumbers and steamfitters, while conditions for hod carriers and building labourers were fractionally better. Tile layers, lathers and roofers alone showed increased slackness, which was in a substantial measure. In making a comparison with the returns for May last year bricklayers, masons and plasterers were much better engaged during the month under review and the situation for granite and stonecutters was somewhat improved. Steam shovelmen, hod carriers and building labourers, and tile layers, lathers and roofers, on the other hand, suffered extensive losses in work afforded and marked recessions were reported by painters, decorators and paperhangers, and bridge and structural iron workers. Carpenters and joiners showed fair sized declines in employment and the tendency for electrical workers and plumbers and steamfitters was adverse, though the variations from May last year were quite slight.

Somewhat improved conditions were apparent in the transportation industries during May from the previous month, unemployment standing at 6·6 per cent, in contrast with a percentage of 9·5 in April. The percentage for May was based on the reports compiled from 810 labour organizations, including 63,438 members, 4,205 of whom were out of work on the last day of the month. Steam railway employees, whose returns constituted nearly 80 per cent of the entire group membership reported, were greatly responsible for the advancement from April, though navigation workers, street and electric railway employees, and teamsters and chauffeurs participated slightly in the favourable employment movement. A higher level of activity was shown in the transportation industries also, during May from the corresponding month last year, when 7·9 per cent of the members reported were unemployed. In this comparison, steam, and street and electric railway employees registered heightened activity on a small scale, while quieter conditions prevailed for navigation workers and teamsters and chauffeurs.

The 5 unions of retail shop clerks forwarding reports for May with 1,806 members, indicated 0·2 per cent of unemployment on the last day of the month, contrasted with a percentage of 0·5 in April. In May last year adequate work was available for all members reported.

Returns compiled during May from 79 associations of civic employees with a membership total of 9,950 persons showed 1·1 per cent of inactivity, in comparison with 1·4 per cent in April and with a percentage of 0·5 in May a year ago.

In the miscellaneous group of trades during May employment was maintained at much the same level as in April, the 140 reporting unions which involved 10,911 members showing 6·7 per cent of idleness, as compared with a percentage of 6·6 at the close of April. Hotel and restaurant employees reported a gain in activity of over 2 per cent from April, which was just slightly more than offset by the curtailment evident among barbers, theatre and stage employees, stationary engineers and firemen and unclassified workers. Contrasted with the situation existing in May a year ago, when 7·5 per cent of unemployment was reported in the miscellaneous group of trades as a whole, a slightly improved situation was apparent among stationary engineers and firemen, and hotel and restaurant employees, while barbers, unclassified workers and theatre and stage employees showed some employment cessation. The variations, however, were slight.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1929.....	4·0	1·6	7·7	4·3	7·1	5·3	6·4	5·9	**5·7**
Average 1930.....	5·4	3·7	14·0	10·4	9·6	10·6	13·3	11·6	**11·1**
Average 1931.....	8·5	9·2	19·3	17·2	15·7	15·6	19·4	17·6	**16·8**
Average 1932.....	9·6	14·4	26·4	23·7	20·0	15·8	22·6	21·6	**22·0**
Average 1933.....	16·0	13·0	25·2	24·4	20·3	17·2	21·7	20·8	**22·3**
Average 1934.....	8·7	7·9	22·8	18·1	17·7	13·2	17·8	20·2	**18·2**
Average 1935.....	6·9	8·6	20·9	14·3	12·6	9·8	15·4	16·4	**15·4**

Fishermen were much better engaged during May than in April, though the situation declined somewhat from May last year. This was evident from the reports compiled from 5 local unions with a total membership of 1,993 persons, 4·0 per cent of whom were without employment on the last day of the month, in contrast with percentages of 16·6 in April and 0·8 in May last year.

Lumber workers and loggers, with 4 unions showing a combined membership of 2,133 persons, indicated 9·0 per cent of their members idle on the last day of May, compared with 30·7 per cent in April and with a percentage of 4.9 in May a year ago.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1929 to 1938, inclusive (and also the percentage of unemployment by provinces for May of each year from 1929 to 1936, inclusive), and for each month from May, 1937 to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for May, 1939

During the month of May, 1939, reports received from the offices of the Employment Service of Canada showed increases of nearly 19 per cent and 20 per cent, respectively, in the average daily placements, when compared with those of the preceding month and also with those effected in May a year ago. All groups, except farming, where a fairly pronounced loss occurred, registered gains over April, the highest being in services, logging and construction and maintenance, all of which were very substantial. When compared with May last year, all sections, with the exception of transportation, which registered a moderate decline, again recorded increased placements, the most noteworthy gains, a second time, being those shown in services, construction and maintenance and logging.

The accompanying chart shows the trend of employment from January, 1937, to date, as reported by ratio of vacancies offered and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, computations being made semi-monthly. It will be noted from the graph that the curves of vacancies and placements in relation to applications followed a sharp upward trend during the first half of the month, but, while the level of the curve for vacancies remained stationary during the latter half, that of placements showed a slightly upward variation. At the end of May, however, both levels were over 6 points higher than those reached at the close of the corresponding period a year ago. The ratio of vacancies to each 100 applications was 56·1 during the first and the second half of May, 1939, in contrast with the ratios of 49·1 and 49·9 during the corresponding month of 1938. The ratios of placements to each 100 applications during the month under review were 52·6 and 53·9, as compared with 45·0 and 47·2 during May a year ago.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during May, 1939, was 1,367, as compared with 1,174 in the preceding month and with 1,162 in May, 1938.

The average number of applications for employment received daily by the offices during the month under review was 2,436, in comparison with 2,499 in April, and with 2,347 in May last year.

The average number of placements made daily by the offices of the Service during May, 1939, was 1,296, of which 734 were in regular employment and 562 in work of one week's duration or less, as compared with a total daily average of 1,094 in the previous month. Placements during May a year ago averaged 1,083 daily, consisting of 689 placements in regular and 394 in casual employment.

During the month of May, 1939, the offices of the Service referred 34,923 persons to vacancies and effected a total of 33,694 placements. Of these, the placements in regular employment were 19,073, of which 13,825 were of men and 5,248 of women, while placements in casual work numbered 14,621. The number of vacancies reported by employers was 22,394 for men and 13,145 for women, a total of 35,539, with applications for work numbering 63,320, of which 46,402 were from men and 16,918 from women. Reports for April, 1939, showed 26,994 positions available, 57,469 applications made and 25,146 placements effected, while in May, 1938, there were recorded 29,033 vacancies, 58,674 applications for work and 27,063 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1929, to date:—

Year	Placements		
	Regular	Casual	Totals

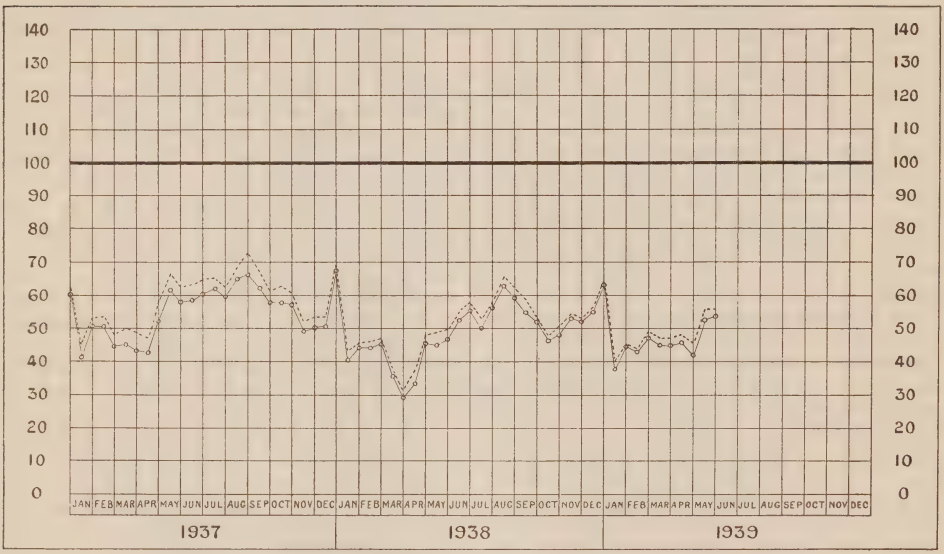
Nova Scotia

Orders received at Employment Offices in Nova Scotia during May, 1939, called for nearly 31 per cent more workers than in the preceding month and nearly 6 per cent more than during the corresponding month of last year. There was an increase also in placements of nearly 33 per cent when compared with April and of over 8 per cent in comparison with May, 1938. The largest increase in placements over May of last year was in construction and maintenance, but improvement was also reported in logging, trade, manufacturing and farming. These gains were partly offset by moderate declines in services and mining. Industrial divisions in which most of the placements were effected during the month were logging, 151; construction and maintenance, 430 and services 755, of which 560 were of household workers. During the month 359 men and 162 women were placed in regular employment.

New Brunswick



There was an increase of nearly 24 per cent in the number of positions offered through Employment Offices in New Brunswick during May, 1939, when compared with the preceding month and a gain of over 10 per cent in comparison with the corresponding month of last year. There was an increase also in placements of over 24 per cent when compared with April and of nearly 11 per cent in comparison with May, 1938. Placements by industrial divisions were on about the same level as in May, 1938, except in construction and maintenance, where there was a large increase and in services, where a decline was reported. Most of the placements effected during the month were in these two groups, there being 434 in the former and 818 in the latter. Of the 818 placements in services, 597 were of household workers. Placements in regular employment numbered 59 of men and 121 of women.

Quebec

Opportunities for employment, as indicated by orders received at Employment Offices in the Province of Quebec during May, were over 39 per cent better than in the preceding month, but nearly 9 per cent less favourable than during the corresponding month of last year. There was an increase of nearly 47 per cent in placements, when compared with April, but a decline of nearly 10 per cent in comparison with May, 1938. The most important reduction in placements from May of last year was in construction and maintenance, there was also a fairly substantial loss in transportation and a minor decline in trade. These decreases were largely offset by substantial gains in services and logging and small increases in manufacturing and mining. Placements by industrial divisions included manufacturing, 189; logging, 880; farming, 109; construction and maintenance, 2,399, and

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements—o—o—o—o—o—o

services, 3,841, of which 3,349 were of household workers. During the month 3,809 men and 1,882 women were placed in regular employment.

Ontario

Employment opportunities, as indicated by orders received at Employment Offices in Ontario during May, were nearly 43 per cent better than in the preceding month and 41 per cent above the corresponding month of last year. There was an increase also in placements of over 44 per cent in comparison with April and of nearly 41 per cent when compared with May, 1938. With the exception of a small loss in transportation, all industrial divisions showed gains in placements over May of last year, the most important being in construction and maintenance, logging and services. Improvement on a somewhat smaller scale was reported in farming and manufacturing. Placements by industrial divisions included manufacturing, 604; logging, 1,593; farming, 1,274; construction and maintenance, 4,107; trade, 339, and services 5,393, of which 3,128 were of household workers. There were 5,487 men and 1,646 women placed in regular employment.

Manitoba

During the month of May positions effected through Employment Offices in Manitoba were over 38 per cent more than in the preceding month and over 80 per cent above the corresponding month of last year. Placements also showed an increase of nearly 43 per cent when compared with April and of nearly 85 per cent in comparison with May, 1938. All industrial divisions participated in the increase in placements over May of last year, the most important gains being in construction and maintenance, services, farming and logging. Industrial divisions in which most of the placements were effected during the month were logging, 268; farming, 571; construction and maintenance, 603 and services, 1,135, of which 857 were of household workers. During the month 1,539 men and 367 women were placed in regular employment.

Saskatchewan

Employment Offices in Saskatchewan during May listed orders for nearly 7 per cent less workers than in the preceding month, but over 19 per cent more than during the corresponding month of last year. There was a decrease in placements of over 4 per cent when compared with April, but an increase of nearly 25 per cent in comparison with May, 1938. The only change of importance in placements by industrial divisions, when compared with May of last year, was a gain in construction and maintenance. In addition, a moderate increase was reported in services and a small loss in farming. Other changes were nominal only. Placements by industrial divisions included farming, 366; construction and maintenance, 370; and services, 750, of which 505 were of household workers. Placements in regular employment numbered 743 of men and 375 of women.

Alberta

The demand for workers, as indicated by orders received at Employment Offices in Alberta during May, was nearly 8 per cent better than in the preceding month, but was fractionally less favourable than during the corresponding month of last year. There was an increase of over 9 per cent in placements when compared with April, but a decline of 2 per cent when compared with May, 1938. There were small changes only in placements by industrial divisions, when comparison was made with May of last year, the largest being an increase in logging and declines in farming and construction and maintenance. Industrial divisions in which most of the placements were effected during the month were manufacturing, 51; logging, 81; farming, 485; transportation, 114; construction and maintenance, 383, and services, 624, of which 444 were of household workers. During the month 954 men and 374 women were placed in regular employment.

British Columbia

During May, orders received at Employment Offices in British Columbia called for nearly 15 per cent more workers than in the preceding month and nearly 86 per cent more than during the corresponding month of last year. There was an increase also in placements of over 15 per cent in comparison with April and of nearly 88 per cent when compared with May, 1938. The increase in placements over May of last year was due to a substantial gain in construction and maintenance. Moderate improvement was also reported in services and mining, but the changes in all other groups were quite small. Placements by industrial divisions included farming, 106; mining, 100; construction and maintenance, 2,461 and services, 978, of which 561 were of household workers. During the month 875 men and 321 women were placed in regular employment.

Movement of Labour

During the month of May, 1939, the offices of the Employment Service of Canada effected 19,073 placements in regular employment, 9,387 of which were of persons for whom the employment located was outside of the immediate district of the offices at which they were registered. Of the latter,

* Placements effected by offices since closed.

1,472 were granted the Employment Service reduced transportation rate, 1,352 travelling to points within the same province as the despatching office and 120 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Quebec transfers at the reduced rate during May were of bushmen, numbering 56, who were carried to centres in the Pembroke zone on certificates secured at Hull. Ontario offices issued 1,088 reduced rate certificates during May, all provincial. Of these, 578 were granted at the Port Arthur office to 567 bush workers, 7 sawmill labourers, 2 mine workers, one cook and one waitress going to employment at various centres within the Port Arthur zone. Travelling from Fort William 438 bush workers, one mine engineer and one hotel waiter and from Sudbury 59 bush workers were bound for points within their respective zones. The Sudbury zone in addition was the destination of 2 labourers journeying from Toronto. The Timmins zone received 6 painters from North Bay and one hotel cook from Ottawa. From Windsor one tool designer was sent to St. Catharines and one machine operator to Toronto. The Winnipeg office was instrumental in the despatch of 69 persons at the reduced rate in May, 6 of whom were conveyed to provincial employment and 63 to other provinces. The provincial transfers were all within the Winnipeg zone and included 3 mine workers, one construction labourer, one hotel porter and one survey worker. Of the persons journeying outside the province one, a farm hand, went to Yorkton while to the Port Arthur zone were destined 29 bush workers, 18 mine workers, 7 sawmill workers, 4 hotel employees, 3 construction workers and one domestic. Business transacted by Alberta offices during May involved the issue of 255 reduced rate certificates, 254 provincial and one interprovincial, the latter was granted at the Edmonton office to a farm hand going to Saskatoon. Provincially, the Edmonton office was responsible for the transfer within its own zone of 106 transportation company employees, 72 highway construction workers, 24 fish company employees, 11 sawmill workers, 10 bush workers, 10 farm hands, one farm housekeeper, 5 miners, 5 hotel employees, 5 oil refinery workers, one Dominion Parks warden, one construction labourer, one baker and one housekeeper. The Edmonton office also, shipped one cook to Calgary. In British Columbia during May 4 persons took advantage of the Employment Service reduced transportation rate, these going to provincial employment on certificates granted at the Vancouver office. Bound for points in the Vancouver zone were 2 farm hands and one miner, while one mine labourer proceeded to Penticton.

Of the 1,472 workers who travelled at the Employment Service reduced transportation rate during May 454 were carried by the Canadian National Railways, 1,008 by the Canadian Pacific Railway, 6 by the Temiskaming and Northern Ontario Railway, 3 by the Pacific Great Eastern Railway and one by the Northern Alberta Railway.

(4) Building Permits Issued in Canada During May, 1939

The estimated cost of the building represented by the construction permits taken out in 58 cities during May, 1939, was higher by 7·6 per cent than in April, 1939, but was lower by 3·2 per cent than in May, 1938; with this exception, however, the total was higher than in any other May since that of 1931. According to statements tabulated by the Dominion Bureau of Statistics, the authorizations amounted to $6,390,779, as compared with $5,936,806 in the preceding month, and $6,599,318 in May of last year.

The value of the building authorized in the first five months of the present year was $19,279,570; this was slightly lower than the aggregate of $19,375,095 reported in the period, January-May, 1938, and was also lower than in the same months of 1937. The wholesale prices of building materials also have recently been lower than in the corresponding period of 1937 or 1938.

Some 50 cities furnished detailed statistics for May, 1939, showing that they had issued some 750 permits for dwellings valued at approximately $2,800,000, and for more than 3,000 other buildings, estimated to cost over $3,000,000. In April, authority was given for the erection of about 500 dwellings and 2,300 other buildings, valued at approximately $1,800,000 and $3,600,000, respectively.

Prince Edward Island, Nova Scotia, New Brunswick, Ontario, Manitoba and Saskatchewan recorded increases in the value of the building represented by the permits issued during May as compared with the preceding month. Ontario showed the greatest gain, of $485,505, or 24·1 per cent. On the other hand, the totals in Quebec, Alberta and British Columbia were lower than in April; the largest decline in this comparison was that of $140,148, or 15·6 per cent, in the last named.

As compared with May, 1938, Prince Edward Island, Nova Scotia, New Brunswick, Quebec,

Manitoba, Saskatchewan and Alberta registered increases, of which that of $762,011, or 61·7 per cent, in Quebec was most noteworthy. The greatest decline, of $1,041,497, or 57·8 per cent, was in British Columbia.

Of the four largest cities, Montreal showed improvement as compared with last month, and also over the same month of last year. In Toronto, the total value of the building represented by the permits for construction granted in May was greater than in April, 1939, but smaller than in May, 1938, while in Winnipeg the reverse was the case, the aggregate for the month under review being slightly smaller than in the preceding month, but considerably larger than in May of last year. The authorizations reported in Vancouver were lower than in either April, 1939, or May, 1938.

Of the other centres, Charlottetown, New Glasgow, Sydney, Fredericton, Saint John, Shawinigan Falls, Sherbrooke, Three Rivers, Westmount, Belleville, Guelph, Niagara Falls, Oshawa, Ottawa, Peterborough, Sarnia, Woodstock, Brandon, Moose Jaw, Regina, Saskatoon and Medicine Hat showed increases in the value of the building authorized as compared with either the preceding month, or the same month of 1938.

Table I gives the value of the building authorized by 58 cities in May and in the first five months of each year since 1926, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first five months of the same years are also given (1926=100).

TABLE I

Year	Value of permits issued in May	Value of permits issued in first five months	Indexes of value of permits issued in first five months (1926=100)	Average indexes of wholesale prices of building materials in first five months (1926=100)
	$	$		
1939	6,390,779	19,279,570	32·1	87·5
1938	6,599,318	19,375,095	32·3	90·7
1937	5,416,299	22,050,984	36·7	94·6
1936	4,836,358	13,666,195	22·8	86·3
1935	4,728,340	19,535,656	32·5	81·7
1934	3,019,761	7,999,917	13·3	83·0
1933	2,065,372	6,726,695	11·2	75·2
1932	5,488,845	19,312,720	32·1	78·8
1931	12,115,291	50,356,550	83·9	83·6
1930	20,321,160	66,792,498	111·2	95·5
1929	24,185,738	96,792,675	161·2	99·4
1928	27,515,522	79,285,027	132·0	95·8
1927	20,138,657	62,479,480	104·1	96·1
1926	18,504,296	60,042,369	100·0	101·3

As already mentioned, the aggregate for the first five months of 1939 was very slightly lower than in the same period in 1938, and was also less than in 1937. The average index numbers of wholesale prices of building materials were also rather lower than in 1937 or 1938.

Table 11 gives the value of the building permits issued by 58 cities during May, 1939, and May, 1938. The 35 cities for which records are available since 1910 are marked thus "*".

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF JUNE, 1939

Reports of the Superintendents of the Employment Service of Canada

THE employment situation at the end of June was reported by the Superintendents of the Employment Service to be as follows:—

Farmers in the Maritime Provinces were busily engaged with growing crops. Logging consisted chiefly of pulpwood cutting and peeling, of saw mill activity and the exporting of lumber. Fishing was fair. Mines in the New Glasgow area operated from two to five days per week, while those in Cape Breton and vicinity worked from four to six days. Manufacturing concerns on the whole reported the usual seasonal output; some idleness, however, was reported in woodworking plants, as well as by the iron and steel industry. Building construction was progressing favourably and more work available was reported in this line. Further highway construction and street maintenance, too, was under way and this absorbed a number of unemployed. Both passenger and freight transportation, by water and bus, was heavy, but by rail, in some sections, somewhat lighter. Trade was fair. The usual demand for female domestics also continued.

Employment in farming throughout the Province of Quebec was fairly good. River driving having been completed, slackness was reported in logging, except at Matane, where 800 men were employed as cutters and peelers and at Rouyn, where land was being cleared for a local power company. Manufacturing centres reported industrial conditions as follows: Bagotville—decline in activity; Chicoutimi—textile, furniture and aluminum factories working full time, other industries at 50 per cent capacity; Hull and Three Rivers —situation normal; La Tuque—sash and door plants fully employed, although no increase in staff; Montreal—shoe factories fairly busy; Rouyn and Sherbrooke—considerable improvement noted; Val d'Or—unchanged. Building construction appeared to be picking up, with the result that many carpenters and labourers found employment. Trade was fairly active and transportation, by water and motor, had increased to a marked degree, but, by rail, was somewhat less. Requests for domestic help also were very satisfactory.

There was a steady call for farm help in Ontario, as haying, hoeing, berry and fruit picking were well under way. With river driving completed, and logging camps fully staffed, activity in lumbering was confined chiefly to replacements; saw mills were busy, but, likewise, reported little labour turnover. Mining was slack, except at Timmins, where there existed a good demand for many classes of experienced miners and a few calls for inexperienced help. Seasonal improvement in beverage plants and fruit and vegetable canneries was taking place, while industrial activity in other lines, though not at full capacity, continued to be well maintained. Some establishments, however, were taking stock, others, also were operating on a reduced summer schedule, but these were considered normal for the time of year. Building and highway construction was more active and the National Forestry Program absorbed a number of youths. Some men, too, were sent out on extra railway gangs. Requests for domestic help were numerous, especially for experienced cooks-general and women and girls capable of filling positions in hotels or tourist camps. Canneries and other industrial concerns, likewise, afforded employment for a number of applicants, but clerical work was slow, with a seasonal increase in this section in new registrations, as a result of the closing of schools and business colleges.

Very little demand for farm help existed in the Prairie Provinces, but conditions throughout the West appeared much more favourable than usual for a good crop, as rain and warm weather had greatly benefited the land. Logging and mining both were slack and manufacturing quiet in all lines. Building construction showed improvement. In Winnipeg and Calgary influence of a prospective good crop was already felt, for repairs and reopening of many elevators were contemplated. More highway construction, also, was being undertaken and a few replacements of men on extra gangs for the railways had been made. The National Forestry Program, with the opening of youth training camps, likewise provided employment for a number of persons. Trade was fair, but decreased activity was reported in the women's division of household service.

Wet weather in British Columbia, which delayed haying and resulted in a reduction in calls for farm help, had been followed by bright sunshine, which greatly improved the crops. Berry and cherry picking had started and this was affording seasonal work. Logging was rather slack, except for saw and shingle mills, which continued to be busy, with prices better. The official log scale, however, for the first five months of the year showed an increase of 343,026,355 board feet, this tremendous increase being entirely due to the demand for export lumber, which created an all time record during May; overseas orders for shingles, likewise, were numerous. Youth training forestry camps, also, had been estab-

lished in the Province and parties of boys sent to them. On the whole, mining was rather quiet, although a few of the active mines were increasing their crews and a group of students had been accepted for a mining training camp. Building construction was more active than usual, a number of small homes having been started. Ship yards at Prince Rupert were quiet and only fair at Victoria, while the water fronts at all ports, except New Westminster, were very busy. Trade was better. With the tourist season well started, hotel orders for domestic service were being received and experienced cooks-general, as usual, were much in demand. Requests for these exceeded the supply available.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, June, 1939, summarized the employment situation as follows:—

Employment showed a further improvement between April 17 and May 15, which extended to nearly every industry. The improvement was most marked in building, public works contracting, the iron and steel and tinplate industries, engineering, shipbuilding, metal goods manufacture, the textile industries, tailoring, pottery manufacture, dock and harbour service, the distributive trades, and hotel, boarding house, etc., service.

It is provisionally estimated that at May 15, 1939, the number of insured persons, aged 16-64, in employment in Great Britain was approximately 12,667,000. This was 156,000 more than at April 17, 1939, and, on a comparable basis, about 440,000 more than at May 16, 1938.

Among insured persons, aged 16-64, the percentage unemployed in Great Britain and Northern Ireland at May 15, 1939, was 10·4 compared with 11·4 at April 17, 1939. For May 16, 1938, the percentage (which excludes the classes brought into insurance in April, 1938) was 12·5. For persons insured under the general scheme the corresponding percentages were 10·6 at May 15, 1939, 11·6 at April 17, 1939, and 12·8 at May 16, 1938. For persons within the agricultural scheme the percentages were 5·7, 6·1 and 6·5 respectively.

At May 15, 1939, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,234,001 wholly unemployed, 198,617 temporarily stopped, and 59,664 normally in casual employment, making a total of 1,492,282; this was 152,112 less than at April 17, 1939, and 286,523 less than at May 16, 1938.

The total of 1,492,282 persons on the registers in Great Britain, at May 15, 1939 included 783,413 persons with claims admitted for insurance benefit, 520,188 with applications authorized for unemployment allowances, 29,100 persons with applications for insurance benefit or unemployment allowances under consideration, and 159,581 other persons, of whom 37,392 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at May 15, 1939, was 1,565,313, as compared with 1,726,083 at April 17, 1939, and 1,868,760 at May 16, 1938.

United States

Approximately 180,000 more workers were employed in non-agricultural industries in May than in April according to a press release issued on June 28 by Miss Frances Perkins, United States Secretary of Labor. This increase was attributed in part to the return of about 80,000 bituminous coal miners to their work between mid-April and mid-May, following the settlement of wage agreements.

The following paragraphs taken from the official press release indicate the employment situation in the United States to be as follows:—

A substantial employment gain was also registered in private and public construction. Quarries, laundries, and dyeing and cleaning establishments reported sizable increases reflecting seasonal activity, and public utilities also enlarged their forces in May. Smaller employment gains were reported by crude petroleum producing, metal mining, and insurance firms. Retail trade establishments also added workers to their staffs, the gain of 8,000 workers, while small, being significant in that the May level was much better sustained than usual.

Factory employment showed a slightly greater than seasonal decline in May, the loss being 1·2 per cent, or 90,000 workers. There was a reported decline of more than 36,000 workers in the automobile industry which had labour differences.

Wholesale trade establishments reported fewer employees, the decrease of 0·4 per cent being considerably smaller than the May declines in the preceding four years. Brokerage firms reduced their forces by 1·5 per cent, and anthracite mines reported a decrease of 0·8

per cent. Employment in year-round hotels showed virtually no change.

Class I steam railroads reported 7,200 more workers in May than in the preceding month, according to preliminary figures compiled by the Interstate Commerce Commission.

The non-agricultural industries were employing approximately 680,000 more workers than in May, 1938. These figures do not include employees on Works Progress Administration and National Youth Administration projects nor enrollees in the Civilian Conservation Corps.

Factory Employment.—Employment in manufacturing industries was reduced by 90,000, or 1·2 per cent, in May. Weekly wage disbursements were nearly $1,000,000, or 0·6 per cent, less than in the preceding month. The greater-than-seasonal decline in factory employment in May is attributable in part to the recession in automobile employment, in which labour difficulties reduced operations in some localities, and to the employment losses in the shoe, women's clothing, and cotton goods industries, in which the decreases were somewhat more pronounced than usual. The May employment index (90·1 per cent of the 1923-25 average) was 8·0 per cent higher than the corresponding index of last year, while the pay-roll index (84·4) was 15·8 per cent higher.

The durable goods group of industries as a whole showed an employment decline of 1·1 per cent from April to May, while the non-durable goods group reported a curtailment of 1·3 per cent. Corresponding pay-roll declines were 0·9 per cent and 0·3 per cent, respectively. Compared with May of last year, employment in the durable goods group shows a gain of 10·9 per cent and pay-rolls of 23·8 per cent. In the non-durable goods industries, the gains over the year interval were 5·7 per cent and 8·8 per cent, respectively.

Employment gains from April to May were shown by 37 of the 87 industries covered by the Bureau of Labour Statistics and pay-roll increases were shown by 50 industries. Among those showing larger than seasonal or contraseasonal gains in employment were aircraft, woollen and worsted goods, shipbuilding, meat packing, sawmills and baking. Substantial increases of approximately seasonal proportions were shown in ice cream, butter and beverages.

Sizeable employment declines which, with the exception of men's clothing and fertilizers, were larger than seasonal were shown by factories manufacturing automobiles, shoes, women's clothing, men's clothing, fertilizers, cotton goods, steel, agricultural implements, and hardware. Reports from a number of firms indicated that plant operations were curtailed during the May 15 pay period because of coal shortage. The unbroken expansion in employment and pay-rolls in aircraft factories which began in the Fall of 1938 continued in May, bringing the index to a new high. Employment in this industry in May was more than double the number employed in 1929. Shipbuilding employment, which has climbed each month since last August, reached a level of 117·5 per cent of the 1923-1925 average in May, which was above that recorded in any month since 1923, with the exception of April, 1937. Machine-tool employment which likewise has risen each month since last August, reached the highest level since March of last year.

Employment in Private Building Construction.—Employment in private building construction increased 5·4 per cent, according to reports from 12,968 contractors employing 119,521 workers in May. Corresponding pay-rolls were up 10·8 per cent. The marked advances in employment reported in the New England, the East North Central and the West North Central States in April were continued in May with increases of 19 per cent, 14·1 per cent and 16·1 per cent, respectively. Gains of 3·1 per cent and 6·5 per cent, respectively, were shown for the West South Central and Mountain States. Employment in the East South Central and South Atlantic States remained virtually unchanged with slight increases of 0·4 per cent and 0·8 per cent reported. In the Pacific States there was a decline of 0·5 per cent, and in the Middle Atlantic States there was a 3·1 per cent decrease, due largely to a 6·3 per cent recession in New York. The reports on which the figures are based do not cover construction projects financed by the W.P.A., the P.W.A., and the R.F.C., or by regular appropriations of the Federal, State, or local Governments.

Employment on Public Works.—The decline in employment on projects operated by the Works Progress Administration continued through May dropping to 2,468,000, a decrease of 161,000 as compared with April. Employment on these projects was 211,000 less than in May, 1938. Pay-roll disbursements of $138,000,000 were $8,388,000 less than in April and $90,000 more than in May a year ago. There was an increase of 28,000 in employment on Federal projects under The Works Program. A decrease in employment was reported on work projects of the National Youth Administration; an increase on Student Aid.

The seasonal increase in road building was largely responsible for the gain in employment and pay-rolls on construction projects financed from regular Federal appropriations. For the month ending May 15, employment on these projects was 214,000 and pay-roll disbursements $21,237,000.

Employment on State-financed road projects increased by 10,000 during the month ending May 15, bringing the number of men employed up to 132,000. Pay-rolls for the month were $9,771,000.

Employment on projects financed by the Public Works Administration continued to increase as many projects on the program reached the point of maximum employment. There were 274,000 men at work for the month ending May 15, a gain of 25,000 over April and more than double the number at work in May, 1938. Pay-roll disbursements for May were $22,671,000.

The number of employees in camps of the Civilian Conservation Corps increased 22,000 making a total of 336,000 for May. This is 30,000 more employees than were in camps in May, 1938.

The value of material orders placed on construction projects financed by the Public Works Administration totalled $37,000,000 for the month ending May 15. On construction projects financed from regular Federal appropriations the value of material orders placed was $36,097,000 and on Federal projects under The Works Program the total was $1,162,000.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages Scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages; "The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, the same labour

conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

DEPARTMENT OF AGRICULTURE

Construction of an advanced registry piggery at St. Hyacinthe, P.Q. Name of contractors, Messrs. Paquet and Godbout, St. Hyacinthe, P.Q. Date of contract, June 8, 1939. Amount

81706—5½

of contract, $14,271. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers and finishers	$0 50
Carpenters and joiners	0 55
Cement finishers	0 50
Cement and concrete mixer operator:	
Steam	0 60
Gasoline or electric	0 45
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Drivers	0 35
Electricians—inside wiremen	0 60
Labourers	0 35
Motor truck drivers	0 40
Motor truck driver and truck:	
1 to 2 tons	1 40
Painters (spray)	0 60
Painters and glaziers	0 50
Plumbers and steamfitters	0 60
Road grader operator:	
Horsedrawn	0 40
Including team	0 65
Gasoline	0 45
Roofers:	
Composition	0 45
Felt and gravel—patent	0 40
Sheet metal workers	0 60
Pipe layers, caulkers and solderers	0 45
Tractor operators	0 45
Watchman	0 30

Department of Mines and Resources

Bituminous surfacing of eight miles of the Trans-Canada Highway west of Banff. Name of contractors, Crown Paving & Construction Company Limited, Edmonton, Alberta. Date of contract, June 15, 1939. Amount of contract, $24,802. A fair wages schedule was included in the contract as follows:—

	Per hour
Foreman, labour	$0 75
Foreman, assistant labour	0 58½
Blacksmith	0 70
Carpenter	0 80
Operator:	
Power grader	0 58½
Horse drawn grader	0 50
Tractor	0 55
Roller	0 75
Mixer (cement)	0 58½
Rock and gravel crusher	0 60
Aggregate Drier	0 58½
Dragline	1 00
Dragline Craneman	0 75
Dragline fireman	0 60
Powderman	0 55
First aid man	0 50
Motor truck driver and truck	1 50
Motor truck driver	0 50
Driver, team and wagon	0 80
Drivers	0 45
Labourers	0 45

	Per month with board
Cook, first	$85 00
Cook, second	70 00
Cookee	45 00
	Per hour
Watchman	$0 40
Timekeeper	0 50
Machinist	0 70
Engineer, steam boiler	0 70

NOTE: In this contract the hours are 48 per week, authority for which is given in P.C. 1570 of June 27, 1936.

Bituminous surfacing of 16·2 miles of the Chief Mountain highway northerly from the International Boundary. Name of contractors, Carter-Halls-Aldinger Company Limited, Winnipeg, Manitoba. Date of contract, June 15, 1939. Amount of contract, $42,063.30. The preceding fair wages schedule was also included in this contract.

National Harbours Board

Strengthening the wharf at Section 30, Montreal Harbour, P.Q. Name of contractors, The Atlas Construction Company Limited, Montreal, P.Q. Date of contract, June 19, 1939. Amount of contract, $23,043.72. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmith's helpers	0 45
Boatmen (rowboats)	0 40
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Compressor operators (gasoline or electric)	0 50
Dragline operators (steam)	0 85
Dragline firemen	0 55
Dragline oilers	0 50
Drivers	0 40
Driver, horse and cart	0 55
Drivers, team and wagon	0 75
Drill runners	0 50
Engineers, operating, steam:	
Single or double drum	0 65
Three or more drums	0 75
Firemen, stationary	0 50
Labourers	0 40
Machinists	0 65
Machinists' helpers	0 45
Motor boat operators	0 45
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Rodmen—reinforced steel	0 50
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 85
Watchmen	0 35

Strengthening the wharf at Sections 23-24, Montreal Harbour, P.Q. Name of contractor, Angus Robertson Limited, Montreal, P.Q. Date of contract, June 19, 1939. Amount of contract, $284,649.80. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 45
Boatmen (rowboats)	0 40
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Compressor operators (gasoline or electric)	0 50

	Per day
Divers (full day's pay to be allowed whether employed full or part time)	$14 00
Diver's tenders (full day's pay to be allowed whether employed full or part time)	5 00
	Per hour
Drivers	$0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drill runners	0 50
Engineers, operating, steam:	
Single or double drum	0 65
Three or more drums	0 75
Engineers on steel erection	0 75
Engineers, crane (steam, gasoline or electric)	0 70
Firemen, stationary	0 50
Hoist operators—tower (gasoline or electric)	0 60
Labourers	0 40
Machinists	0 65
Machinists' helpers	0 45
Motor boat operators	0 45
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Pile driver and derrick foremen	0 75
Pile driver and derrick engineers	0 65
Pile driver and derrick men (rigging, setting and signalling)	0 55
Pile driver and derrick firemen	0 50
Pile driver and derrick labourers	0 45
Pumpmen	0 50
Riggers (general)	0 55
Rodmen—reinforced steel	0 50
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 85
Structural steel workers	0 75
Tractor operators	0 50
Watchmen	0 35
Welders and burners—acetylene or electric	0 60
Welders and burners on steel erection	0 75
	Per day
Lock tenders	$ 6 50
Assistant lock tenders	4 00
Gauge tenders	4 50

Men working under compressed air (sandhogs):—

Pressure	Maximum working hours	Maximum first and second period in compressed air hours	Minimum rest period in open air hours	Wages per day
Normal to 18 pounds	8	4	½	$ 6 50

Mastic floor rubbers and finishers	0 60
Mastic floor kettlemen	0 60
Mastic floor labourers	0 50
Motor truck drivers	0 50
Motor truck driver and truck:	
1 to 2 tons	1 50
3 tons	2 00
4 tons	2 50
5 tons	3 00
Ornamental iron workers	1 12½
Painters, spray	0 80
Painters and glaziers	0 80
Plasterers	1 00
Plasterers' helpers (mixing and tempering material)	0 62½
Plumbers and steamfitters	1 00
Plumbers and steamfitters' helpers	0 50
Roofers:	
Composition	0 55
Felt and gravel, patent	0 50
Sheet metal	1 00
Shingles (wood, asbestos)	0 90
Sheet metal workers	1 00

	Per hour
Stonecutters	1 00
Structural steel workers	1 12½
Terrazzo layers	0 75
Terrazzo finishers and helpers	0 60
Terrazzo labourers	0 50
Tile setters	1 12½
Tile setters' helpers	0 50

Breakwater reconstruction at Tignish, P.E.I. Name of contractors, M. F. Schurman Company Limited, Summerside, P.E.I. Date of contract, June 15, 1939. Amount of contract, aproximately $28,033.65. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters and joiners	$0 55
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Engineers, operating, steam (single or double drum)	0 60
Firemen, stationary	0 40
Hoist operator—tower (gasoline or electric)	0 45
Labourers	0 35
Motor truck driver	0 40
Motor truck driver and truck	1 35
Pile driver and derrick foreman	0 70
Pile driver and derrick engineer	0 60
Pile driver and derrick man (rigging, setting and signalling)	0 50
Pile driver and derrick fireman	0 40
Pile driver and derrick labourers	0 40
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 42
Watchman	0 30

Alterations and additions to the Public Building, Liverpool, N.S. Name of contractors, M. A. Condon, Kentville, N.S. Date of contract, June 15, 1939. Amount of contract, $6,782 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 75
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 55
Cement finishers	0 50
Cement and concrete mixer operators:	
Steam	0 60
Gasoline or electric	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Electricians (iniside wiremen)	0 60
Engineers, operating, steam (single or double drum)	0 60
Engineers on steel erection	0 75
Firemen, stationary	0 40
Labourers	0 35
Lathers, metal	0 55
Lathers, wood	0 50
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Ornamental iron workers	0 55
Painters and glaziers	0 55
Plasterers	0 75
Plasterers' helpers (mixing and tempering material)	0 40
Plumbers and steamfitters	0 60
Roofers, felt and gravel	0 40
Roofers, sheet metal	0 60
Sheet metal workers	0 60
Stonecutters	0 65
Stonemasons	0 75
Stonemasons' helpers (mixing and tempering mortar)	0 40
Structural steel workers	0 75
Watchman	0 30

Construction of a protection extension, Baie St. Paul, P.Q. Name of contractors, Ernest Perron, Baie St. Paul, P.Q. Date of contract, June 22, 1939. Amount of contract, approximately $7,766.96. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboat)	0 35
Carpenters and joiners	0 55
Cement finishers	0 50
Cement and concrete mixer operators (gasoline or electric)	0 45
Compressor operators (gasoline or electric)	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Drill runners	0 45
Hoist operators—tower (gasoline or electric)	0 45
Labourers	0 35
Motor truck driver	0 40
Motor truck driver and truck	1 35
Pile driver and derrick foreman	0 70
Pile driver and derrick engineers	0 60
Pile driver and derrick men (rigging, setting and signalling)	0 50
Pile driver and derrick firemen	0 40
Pile driver and derrick labourers	0 40
Powdermen	0 45
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 85
Watchmen	0 30

Construction of a breakwater extension and repairs, Naufrage, Harbour, P.E.I. Name of contractors, Joseph Gillis and Angus McKinnon, Bear River and Monticello, P.E.I., respectively. Date of contract, June 23, 1939. Amount of contract, approximately $8,408. A fair wages schedule was included in the contract as follows:—

	Per hour
Drivers	$0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Hoist operator—engine men (gasoline or electric)	0 45
Hoist operator (steam)	0 60
Labourers	0 35
Motor truck driver	0 40
Motor truck driver and truck	1 35
timbermen and cribmen (measuring, scribing and, by use of axe, adze, etc., cutting and fitting timber)	0 42
Watchman	0 30

Construction of a ferry wharf at the south end of the Berthier Islands Highway, St. Ignace de Loyola, P.Q. Name of contractors, Lavallee, Lachapelle & Cournoyer Limited, Sorel, P.Q. Date of contract, June 5, 1939. Amount of contract, approximately $26,136.84. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 55
Blacksmiths' helpers	0 40
Boatmen	0 35
Carpenters and joiners	0 55
Cement and concrete mixer operator:	
Steam	0 60
Gasoline or electric	0 45
Cement finishers	0 50
Compressor operator	0 45
	Per day
Diver (full day's pay to be allowed whether employed full or part time)	$14 00

Driver, team and wagon	0 60
Electricians (inside wiremen)	0 60
Engineers, operating, steam:	
Single or double drum	0 60
Three or more drums	0 70
Engineers, crane (steam, gasoline, or electric)	0 65
Hoist operator—tower (gasoline or electric)	0 45
Labourers	0 35
Machinist	0 60
Machinist's helper	0 40
Motor truck driver	0 40
Motor truck driver and truck	1 35
Painters (spray)	0 65
Painters and glaziers	0 55
Pile driver and derrick foremen	0 70
Pile driver and derrick engineers	0 60
Pile driver and derrick men (rigging, setting and signalling)	0 50
Pile driver and derrick firemen	0 40
Pile driver and derrick labourers	0 40
Timbermen and cribmen (measuring, scribing and by the use of axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30
Welders and burners (acetylene or electric)	0 55

Repairs to the wharf at St. Irenee, P.Q. Name of contractors, Napoleon Trudel and Joseph Trudel, both of St. Irenee, P.Q. Date of contract, June 8, 1939. Amount of contract, approximately $33,076. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 50
Blacksmith's helpers	0 35
Boatmen (rowboats)	0 30
Carpenters and joiners	0 50
Cement and concrete mixer operators (gasoline or electric)	0 40
Compressor operators (gasoline or electric)	0 40
Driver	0 30
Driver, horse and cart	0 45
Driver, team and wagon	0 55
Drill runners	0 40
Engineers, operating, steam (single or double drums)	0 55
Fireman, stationary	0 35
Hoist operators (gasoline or electric)	0 40
Labourers	0 30
Machinists	0 55
Motor boat operators	0 35
Motor truck drivers	0 35
Motor truck driver and truck:	
1 to 2 tons	1 35
3 tons	1 85
4 tons	2 35
5 tons	2 85
Pile driver foremen	0 65
Pile driver engineers	0 55
Pile driver firemen	0 35
Pile driver derrick engineers	0 55
Pile driver derrick firemen	0 35
Powdermen	0 40
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 85
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 37½
Watchmen	0 25

Construction of an extension to the South Pier, Saugeen River, Ontario. Name of contractors, Henry and Ross, Kincardine, Ontario. Date of contract, June 8, 1939. Amount of contract, approximately $18,275.65. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmith	$0 55
Blacksmith's helper	0 40
Carpenters	0 60
Cement finisher	0 55
Cement and concrete mixer operator (gasoline or electric)	0 45
Compressor operators (gasoline or electric)	0 45
Drivers	0 35
Driver, team and wagon	0 65
Engineer, operating, steam (single or double drum)	0 65
Hoist operator—tower (gasoline or electric)	0 45
Labourers	0 35
Motor truck driver	0 40
Motor truck driver and truck	1 40
Machinist	0 60
Machinists' helpers	0 40
Pile driver and derrick foreman	0 75
Pile driver and derrick engineer	0 65
Pile driver and derrick men (rigging, setting and signalling)	0 50
Pile driver and derrick firemen	0 40
Pile driver and derrick labourers	0 40
Timbermen and cribmen (measuring, scribing and by use of axe, adze, etc., cutting and fitting timber)	0 42
Watchman	0 30

Repairs at the Armoury on Craig Street, Montreal, P.Q. Name of contractors, La Compagnie de Construction Interprovinciale Inc.,

of Montreal, P.Q. Date of contract, June 19, 1939. Amount of contract, $117,950 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Electric	0 50

Complete reconditioning of Moth 60M aircraft 160. Name of contractors, The De Havilland Aircraft of Canada, Limited, Toronto, Ontario. Date of contract, June 6, 1939. Amount of contract, $1,633. The preceding fair wages schedule was also included in this contract.

Major repairs to Fairchild 71 landplane No. 637. Name of contractors, Fairchild Aircraft Company, Limited, Longueuil, P.Q. Date of contract, June 8, 1939. Amount of contract, $2,567.30. The preceding fair wages schedule was also included in this contract.

Major reconditioning of Tiger Moth aircraft 241. Name of contractors, The De Havilland Aircraft of Canada, Limited, Toronto, Ontario. Date of contract, June 9, 1939. Amount of contract, $1,793. The preceding fair wages schedule was also included in this contract.

Complete reconditioning of Moth 60M landplane No. 154. Name of contractors, Wells Air Harbour, Vancouver, B.C. Date of contract, June 9, 1939. Amount of contract, $1,791.50. The preceding fair wages schedule was also included in this contract.

Complete reconditioning of Moth 60M landplane. Name of contractors, Wells Air Harbour, Vancouver, B.C. Date of contract, June 9, 1939. Amount of contract, $1,855.50. The preceding fair wages schedule was also included in this contract.

Partial reconditioning of Avro 621, landplane No. 188. Name of contractors, Ottawa Car Mfg. Co., Ltd., Ottawa, Ontario. Date of

contract, June 19, 1939. Amount of contract, $2,892.26. The preceding fair wages schedule was also included in this contract.

Construction of wooden airscrews. Name of contractors, Canadian Vickers, Limited, Montreal, P.Q. Date of contract, June 10, 1939. Amount of contract, $9,261. The preceding fair wages schedule was also included in this contract.

Complete reconditioning of Moth 60 M Aircraft No. 120. Name of contractors, The De Havilland Aircraft of Canada, Limited, Toronto, Ontario. Date of contract, June 7, 1939. Amount of contract, $1,570. The preceding fair wages schedule was also included in this contract.

Reconditioning of Moth 60M Aircraft No. 157. Name of contractors, The De Havilland Aircraft of Canada, Limited, Toronto, Ontario. Date of contract, June 8, 1939. Amount of contract, $1,753. The preceding fair wages schedule was also included in this contract.

Reconditioning of 60M Moth Aircraft No. 166. Name of contractors, The De Havilland Aircraft of Canada, Limited, Toronto, Ontario. Date of contract, June 7, 1939. Amount of contract, $1,608. The preceding fair wages schedule was also included in this contract.

Reconditioning of 60M Moth Aircraft No. 67. Name of contractors, The De Havilland Aircraft of Canada, Limited, Toronto, Ontario. Date of contract, June 7, 1939. Amount of contract, $1,635. The preceding fair wages schedule was also included in this contract.

Reconditioning of 60M Moth Aircraft No. 167. Name of contractors, The De Havilland Aircraft of Canada, Limited, Toronto, Ontario. Date of contract, June 7, 1939. Amount of contract, $1,648. The preceding fair wages schedule was also included in this contract.

Reconditioning of 60M Moth Aircraft No. 165. Name of contractors, The De Havilland Aircraft of Canada, Limited, Toronto, Ontario. Date of contract, June 7, 1939. Amount of contract, $1,550. The preceding fair wages schedule was also included in this contract.

Reconditioning of 60M Moth Aircraft No. 70. Name of contractors, The De Havilland Aircraft of Canada, Limited, Toronto, Ontario. Date of contract, June 7, 1939. Amount of contract, $1,596. The preceding fair wages schedule was also included in this contract.

Reconditioning of 60M Moth Aircraft No. 158. Name of contractors, The De Havilland Aircraft of Canada, Limited, Toronto, Ontario. Date of contract, June 6, 1939. Amount of contract, $1,630. The preceding fair wages schedule was also included in this contract.

Major repairs and renewals to Avro 626 landplane 226. Name of contractors, MacDonald Brothers Aircraft Limited, Winnipeg, Manitoba. Date of contract, June 14, 1939. Amount of contract, $4,993. The preceding fair wages schedule was also included in this contract.

Major reconditioning of Fairchild 71 monoplane 643. Name of contractors, Fairchild Aircraft Limited, Longueuil, P.Q. Date of contract, June 7, 1939. Amount of contract, $4,840.30. The preceding fair wages schedule was also included in this contract.

Complete reconditioning of Moth 60M Aircraft No. 223. Name of contractors, Mid-West Aircraft Limited, Winnipeg, Manitoba. Date of contract, June 22, 1939. Amount of contract, $1,625. The preceding fair wages schedule was also included in this contract.

Complete reconditioning of Moth 60M Aircraft No. 65. Name of contractors, Mid-West Aircraft Limited, Winnipeg, Manitoba. Date of contract, June 22, 1939. Amount of contract, $1,890. The preceding fair wages schedule was also included in this contract.

Complete reconditioning, rebuilding and modification of Fleet Aircraft aerofoils. Name of contractors, Fleet Aircraft Limited, Fort Erie, Ontario. Date of contract, June 27, 1939. Amount of contract, $3,748.99. The preceding fair wages schedule was also included in this contract.

Rebuilding of Fleet model 7 aircraft No. 204. Name of contractors, Fleet Aircraft Limited, Fort Erie, Ontario. Date of contract, June 26, 1939. Amount of contract, $3,746.45. The preceding fair wages schedule was also included in this contract.

Constructing sets of Beaching Gear. Name of contractors, MacDonald Brothers Aircraft Limited, Winnipeg, Manitoba. Date of contract, June 28, 1939. Amount of contract, $18,275.18. The preceding fair wages schedule was also included in this contract.

Constructing winter nose cowl assemblies with shutter. Name of contractors, Noorduyn Aviation Limited, Montreal, P.Q. Date of contract, June 30, 1939. Amount of contract, $3,726. The preceding fair wages schedule was also included in this contract.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agrements and schedules of wages and worikng conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Logging

FORT FRANCES, ONTARIO.—CERTAIN LOGGING OPERATORS AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL NO. 2560 (LUMBER AND SAWMILL WORKERS).

Agreement to be in effect from September 1, 1938, to September 1, 1939.

No discrimination to be shown by either party to the agreement against any employee on account of his membership or non-membership in the union. A union officer may visit the camps with the permission of the company. Each camp to choose a camp steward to be chairman of the grievance committee.

Employees members of the union may authorize the company to deduct union membership dues from their wages, to be given to the union.

Hours: men "to be turned out to work at 7 a.m. and to work, except for one hour for lunch at noon, until such time (in no event later than 5 o'clock in the afternoon) as will permit them to get into camp by 5.30 in the afternoon." These hours do not apply to kitchen staff, teamsters, barnmen, garagemen, truck and tractor drivers, handymen, etc.

Overtime: work on Sundays including work of teamsters to be paid at time and one quarter. This does not include kitchen staff, barnmen, garagemen, handymen, etc.

The wage rates are those established under the Industrial Standards Act as summarized in the LABOUR GAZETTE, December, 1938, page 1425 and January, 1938, page 104.

Manufacturing: Animal Foods

WINNIPEG, MANITOBA.—CERTAIN ABATTOIRS AND COLD STORAGE PLANTS AND THEIR EMPLOYEES (MEMBERS OF BUTCHERS' AND MEAT PACKERS' FEDERAL UNION NO. 97).

Agreements to be in effect from October 15, 1938 to October 15, 1939, and thereafter from year to year, subject to notice.

The Company recognizes the union.

The company agrees to employ both permanent and seasonal employees according to a seniority list agreed upon between the company and the plant grievance committee.

Hours: 10 per day, 5 on Saturdays, a 55 hour week.

Overtime: double time to be paid for work on Sundays and six specified holidays.

Hourly wage rates: general labourers 35 cents, casing room 45 cents, butchers 55 to 82 cents.

Vacation: all employees with two years steady employment with a company to be given one week's vacation with pay each year, the 40 hour week to constitute a week's vacation.

The company to negotiate all disputes with the elected plant grievance committee and the business agent of the union.

Manufacturing: Textiles and Clothing

GUELPH, ONTARIO.—A CERTAIN HAT MANUFACTURING COMPANY AND THEIR EMPLOYEES, MEMBERS OF THE UNITED HATTERS, CAP AND MILLINERY WORKERS' INTERNATIONAL UNION, LOCAL NO. 82 (HAT FACTORY WORKERS).

The agreement which was summarized in the LABOUR GAZETTE, November, 1938, page 1294, has been renewed to November 30, 1939, with the provision that should there be any changes in the overtime clause in other factories under contract with the union, the same change to apply to this agreement after May 31, 1939.

TORONTO, ONTARIO.—TORONTO CLOAK MANUFACTURERS' ASSOCIATION AND THE INTERNATIONAL LADIES' GARMENT WORKERS' UNION AND THE TORONTO JOINT BOARD COMPOSED OF CLOAK OPERATORS, LOCAL NO. 14, CUTTERS' LOCAL NO. 83, LOCAL 68, LOCAL 94 AND PRESSERS' LOCAL NO. 92.

Agreement to be in effect from January 1, 1939 to December 31, 1940, or if no notice of change given, to December 31, 1941.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, May, 1937, page 575, with these exceptions:

Overtime and work on holidays is restricted as in the previous agreement except that no overtime may be worked for more than two hours in each day of the first four days of the week during the spring season nor more than one hour in each day of the first four days of the week during the fall season. The provision in the previous agreement that if a similar agreement were made in Montreal all overtime work was to be paid at time and one half rates is eliminated from this agreement.

Wages: operators to be paid "at the rate which will ensure to the lowest paid operator of that eighty per cent group of the operators engaged by an employer, who are the highest paid of the operators engaged by such employer payment of the sum of $1.05 per hour" (The previous rate was $1); overpressers at the rate of $1.03 (an increase of 3 cents); under pressers 79 cents; trimmers $26 per week (an increase of $1 per week) (The wages of any trimmer now receiving less than such sum shall be forthwith increased having regard to the experience and qualification of such trimmer); cutters $38.50 per week (an increase of $1 per week); fur sewers and tailors 73½ cents per hour (an increase of 3½ cents); finishers 58 cents (an increase of 3 cents). Workers engaged in sample making to be paid: operators on the basis of week work $38.50 per week and

if on piece work to be paid on basis of existing categories and prices; all other piece work crafts at 65 per cent above stock prices. Workers engaged in making of duplicates to be paid a varying percentage (from 20 to 40 per cent) above stock prices according to the number of duplicates made. Other wage provisions are the same as in the previous agreement.

Only one system of work to prevail in any one craft of any one factory, either piece work or week work, and once either system is adopted it must be maintained for at least two full consecutive seasons.

When a similar agreement comes into effect in one other Canadian market each employer will pay to the Toronto Cloakmakers Unemployment Insurance Fund a percentage to be agreed upon of the wages paid each week by such employer to his employees covered by this agreement.

Manufacturing: Miscellaneous Wood Products

TIMMINS, ONTARIO.—A CERTAIN TIMBER COMPANY AND THE LUMBER AND SAWMILL WORKERS' UNION (LOCAL NO. 2507 OF THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS).

Agreement reached following strike reported on page 662 of this issue; agreement to be in effect from June 7, 1939 to December 31, 1939.

A representative of the union may visit the bunkhouses and cookeries after hours, and the employer recognizes the right of the union to organize.

Minimum wage rate for actual sawing operations and all work necessary in conjunction therewith: $3.25 per day; but all employees receiving a higher rate to be continued at such higher rate; employees receiving $4 or more per day to be dealt with individually by the employers. Men employed in and about the yard on operations not in actual conjunction with the sawmill to be continued at rates in effect on and before June 5, 1939, which are governed by the schedule under the Industrial Standards Act for loggers in the Timmins zone (LABOUR GAZETTE, August, 1938, page 948).

Any dispute which cannot be settled by the local committee of employees with the employer will be taken up by an officer of the local union with the employer. If they cannot agree it will be referred to a joint arbitration board. If the representatives of each party cannot agree on a chairman for such board he will be appointed by the Minister of Labour for the Province of Ontario.

Construction: Buildings and Structures

HALIFAX, N.S.—THE CONSTRUCTIVE MECHANICAL TRAINS EXCHANGE, INC. AND THE BRICKLAYERS, MASONS AND PLASTERERS INTERNATIONAL UNION, NO. 1 (BRICKLAYERS, MASONS AND TILESETTERS).

Agreement to be in effect from May 1, 1939 to April 30, 1940, and thereafter from year to year, subject to notice.

The terms of this agreement were approved by Order in Council under the Industrial Standards Act and are summarized on page 731 of this issue.

HALIFAX, N.S.—THE CONSTRUCTIVE MECHANICAL TRADES EXCHANGE, INC. AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL 83.

Agreement to be in effect from May 1, 1939 to April 30, 1941, and thereafter from year to year subject to notice.

The terms of this agreement were approved by Order in Council under the Industrial Standards Act and are summarized on page 732 of this issue.

HALIFAX, N.S.—MASTER PAINTERS OF HALIFAX AND DARTMOUTH AND THE BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS OF AMERICA, LOCAL 1069.

Agreement to be in effect from May 1, 1939 to May 1, 1940, and thereafter from year to year, subject to notice.

Hours: 8 per day, 4 on Saturdays, a 44 hour week.

Overtime: time and one half; work on Sundays and six specified holidays, double time.

Minimum wage rate for qualified painters: 60 cents per hour; for bridges, structural iron or steel or other hazardous work, 75 cents.

Men sent to work out of Halifax or Dartmouth to have their fare and board paid while so employed.

HALIFAX, N.S.—CONSTRUCTIVE MECHANICAL TRADES EXCHANGE, INC. AND THE OPERATIVE PLASTERERS AND CEMENT FINISHERS INTERNATIONAL ASSOCIATION, LOCAL 215.

Agreement to be in effect from May 17, 1939, to April 30, 1940, and thereafter from year to year, subject to notice.

The terms of this agreement were approved by Order in Council under the Industrial Standards Act and are summarized on page 732 of this issue.

Collective Labour Agreements Act, Quebec

The following agreements and amendments to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:

Shoe Manufacturing Industry, Province of Quebec (amendment),

Dress Cutters, Province of Quebec (cancellation),

Sash, Door, Wrought Wood and Casket Manufacturing Industry, Jonquière and Kenogami.

Aluminum Industry, Arvida, (amendment),

Building Trades, Three Rivers, (amendment),

Building Trades, Joliette, Montcalm and Berthier (amendment),

Building Trades, Sherbrooke and Eastern Townships (amendment),

Building Trades, Montreal,

Retail Store Employees, Quebec, (amendment),

Dairy Employees, Quebec, (amendment),
Clerks and Bookkeepers, Jonquière, Kenogami, Arvida and St. Joseph d'Alma,
Barbers and Hairdressers, Joliette (amendment),
Hairdressers, Montreal (amendment),

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are summarized in a special article below:

NOVA SCOTIA

Bricklayers, Halifax and Dartmouth.
Carpenters, Halifax and Dartmouth.
Plasterers and Cement Finishers, Halifax and Dartmouth.

ONTARIO

Hard Furniture Industry, Province of Ontario (renewal).
Carpenters, Cornwall.
Plumbers, Hamilton.

SASKATCHEWAN

Painters, Regina.
Plumbers, Regina.
Draying, Transferring and Storage Industry, Regina.
Barbers, Estevan.
Barbers, Prince Albert.
Barbers, Saskatoon.

ALBERTA

Plumbers, Calgary.
Taxi and bus drivers, Banff.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938, issue of the LABOUR GAZETTE, page 503. Amendments to the Act are noted in the LABOUR GAZETTE, June, 1939, page 576. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934 to July, 1937. Proceedings under the Workmen's Wages Act

were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues beginning May, 1938.

Recent proceedings under the Act include: the extension by Orders in Council of three agreements and the amendment of nine other agreements and the cancellation of one agreement, all of which are summarized below. A request was published in the *Quebec Official Gazette,* June 10, for the extension of a new agreement affecting checkers and coopers engaged in ocean navigation work at Montreal. In addition, Orders in Council were published in the *Quebec Official Gazette,* June 3, approving the constitution and by-laws of certain joint committees, and in the issues of June 3, 10 and 30 authorizing certain joint committees to levy assessments on employers and employees, all of which are listed below.

Manufacturing: Fur and Leather Products

SHOE MANUFACTURING INDUSTRY, Province of Quebec.—An Order in Council, approved May 26, and published in the *Quebec Official Gazette,* June 3, amends the previous Orders in Council for this industry (LABOUR GAZETTE, October, 1937, page 1156, March, 1938, page 335, June, page 691 and December, page 1423).

A number of manufacturers are added to the parties to the agreement.

The term of apprenticeship for class I is changed from six months to one year, with no change in wage rates for the first six months of apprenticeship but with the following hourly rates for the second six months apprenticeship in this class: 41 cents in zone I, 38½ cents in zone II, 36 cents in zone III. Certain other modifications were made in the agreement which do not affect the summaries as previously given in the LABOUR GAZETTE.

Manufacturing: Textiles and Clothing

DRESS CUTTERS, PROVINCE OF QUEBEC.—An Order in Council, approved May 26 and published in the *Quebec Official Gazette,* June 3, cancels the previous Order in Council making this agreement obligatory (LABOUR GAZETTE, October, 1936, page 954).

Manufacturing: Miscellaneous Wood Products

SASH, DOOR, WROUGHT WOOD AND CASKET MANUFACTURING INDUSTRY, JONQUIÈRE AND KENOGAMI.—An Order in Council, approved June 2, and published in the *Quebec Official Gazette,* June 10, makes obligatory the terms of an agreement between certain employers and le Syndicat National Catholique des Employés de l'Industrie du Bois Ouvré de Jonquière et Kenogami (The National Catholic Union of Employees of the Wrought Wood Industry of Jonquiere and Kenogami) from June 10, 1939 to June 9, 1940. It applies to the manufacture of doors and sashes, the preparation of wrought wood and the manufacture of caskets, in the towns of Jonquiere and Kenogami and within three miles of their limits.

Hours: 60 per week.

Overtime: time and one-quarter; double time for work on seven specified holidays.

Minimum hourly wage rates: foreman of shop 50 cents, journeyman 40 cents, labourers (yard foreman) 30 cents, helper 20 cents, stationary engineman in the boiler house 35 cents, carter (with horse) 40 cents, truck driver 35 cents. Special lower rates may be set by the joint committee for employees over 60 years of age. Any permanent employees receiving higher than the above rates are not to have their wages reduced.

One apprentice allowed to each of first four journeymen in an establishment and one to each three journeymen over that number.

Wages of apprentices: from 10 cents per hour during first year to 30 cents during fourth year.

Manufacturing: Metal Products

ALUMINUM INDUSTRY, ARVIDA.—An Order in Council, approved May 26, and published in the *Quebec Official Gazette,* June 3, amends the previous Order in Council for this industry (LABOUR GAZETTE, November, 1937, page 1272) by providing that typist, stenographer, clerk, learner and junior office employees be paid a minimum of $10 per week; that typist, stenographer and clerks with one year of employment be paid $13 per week. (The rates for these same workers after two years' service $18 and after four years' service $22 are unchanged from the original Order in Council.)

Construction: Buildings and Structures

BUILDING TRADES, THREE RIVERS.—An Order in Council, approved June 2, and published in the *Quebec Official Gazette,* June 10, amends the previous Orders in Council for these trades (LABOUR GAZETTE, August, 1938, page 944, and May, 1939, page 528) by including definitions of "plasterer" and "cement finisher," and by eliminating the word "celanite" from the classification "marble, terrazzo, celanite, tile and mosaic setters" where this class appears in the original Orders in Council.

BUILDING TRADES, JOLIETTE, MONTCALM AND BERTHIER.—An Order in Council approved May 26, and published in the *Quebec Official Gazette,* June 3, amends the previous Orders in Council for these trades (LABOUR GAZETTE, June, 1938, page 694 and November, page 1299) by substituting "Le Syndicat Catholique et National des Ouvriers du Bâtiment de Joliette" (The National Catholic Union of Building Trades Workers of Joliette) for "L'Association des Ouvriers de Joliette" (The Workers' Association of Joliette).

BUILDING TRADES, SHERBROOKE AND EASTERN TOWNSHIPS.—An Order in Council, approved May 26, and published in the *Quebec Official Gazette,* June 3, amends the previous Orders in Council for these trades (LABOUR GAZETTE, June, 1938, page 693, October, page 1173 and November, page 1299), as follows:

Wages: for carpenters the rate at Magog is the same as in other municipalities, 40 cents for journeymen; for Granby and within five miles of it the rate for carpenters is 55 cents and for painters 40 cents for journeymen and 50 cents for contractors (personal services).

Hours: except for pipe-mechanics, tinsmith roofers, electricians and labourers who help tradesmen, hours are 8 per day except between October 1 and March 1, during which the week of labour shall be 48 hours. Hours for labourers engaged to help tradesmen, 9 per day. In the city of Granby, however, hours for painters, 9 per day.

This Order in Council to have precedence over all other Ordinances of the Fair Wage Board in so far as the industrial jurisdiction as defined in this Order in Council, and maintenance men are concerned.

BUILDING TRADES, MONTREAL.—An Order in Council, approved May 26, and published in the *Quebec Official Gazette,* June 3, makes obligatory: the terms of an agreement between The Builders' Exchange Incorporated and Le Conseil des Syndicats des Métiers de la Construction de Montréal (the Building Trades Council of Montreal) and the Building and Construction Trades Council of Montreal and vicinity; and also the terms of an agreement between the Master Plumbers Association of Montreal and vicinity, L'Association des Maîtres-Plombiers de la province de Québec (the Association of Master Plumbers of the Province of Quebec), section of l'Association des Marchands Détaillants du Canada, Inc. (The Association of Retail Merchants of Canada, Inc.) and the United Association of Plumbers and Steamfitters, local 144 and Le Conseil des Syndicats des Métiers de la Construction de Montréal, Inc. (The Council of Building Trades Unions of Montreal, Inc.).

The Order in Council is to be in effect from May 1, 1939, to March 31, 1940, and is similar to the one previously in effect and summarized in the LABOUR GAZETTE, August, 1938, page 945, October, page 1173, November, page 1300 and December, page 1423, with these exceptions:

The territorial jurisdiction is enlarged to include all the Island of Montreal and the provincial constituency of Jacques Cartier and is divided into two zones: zone I consisting of the cities of Montreal, Verdun, Westmount, Outremont, and the municipalities or towns of Hampstead, Montreal East, Montreal West, Mount Royal, Model City and Côte St. Luc; zone II of the whole provincial constituency of Jacques Cartier except Cartierville and the remainder of the Island of Montreal except the municipalities comprising zone I.

The territorial jurisdiction for the structural steel industry and the trade of sprinkler fitters comprises the whole province of Quebec except the territory in the Sherbrooke and Eastern Townships district's Order in Council. Sprinkler fitters living in Montreal to be paid 20 cents over the regular rate (85 cents) for work done outside the Island of Montreal.

Repair and maintenance works for which the cost including both wages and material does not exceed $1,200 when performed on private properties on which the buildings do not exceed a value of $15,000, are not subject to the terms of this Order in Council.

The wage rate for pipe mechanics applies to work in or outside the shops.

Hours are the same as in previous Order in Council, with this exception: except on the Island of Montreal, on work which necessitates workmen living away from home, the joint committee may issue a permit for extra hours, not exceeding two per day, to be worked at straight time.

Minimum hourly wages are the same as in the previous Order in Council, with these exceptions: enginemen (hoisting) 65 cents, landscape foremen 45 cents in zone I, 40 cents in zone II, landscape workmen (common) 30 cents in both zones; shingle layers 50 cents in zone I, 45 cents in zone II; shovel operators (steam, gas, electric) when employed less than 44 hours during the week to be paid 90 cents in zone I and 72 cents in zone II; concrete metal brace erectors 55 cents in zone I, 50 cents in zone II; yardmen $18 per week in zone I, $16 in zone II.

There is no provision in this Order in Council for conditions or wage rates for maintenance men.

Apprenticeship: the time of apprenticeship for pipe mechanics is specified as four years and they are to be paid 25 cents per hour during first year, 30 cents during next three years; apprentice landscape workmen to be paid 30 cents per hour during first two years of apprenticeship and 35 cents during next two years.

Trade

RETAIL STORE EMPLOYEES, QUEBEC.—An Order in Council, approved June 2, and published in the *Quebec Official Gazette,* June 10, amends the previous Orders in Council for this trade (LABOUR GAZETTE, January, 1939, page 96 and March, page 336) by providing that any employee working more than 30 hours and less than 49¼ in a week be considered a regular employee and paid as such and he will have the right to a supplementary wage of 20 per cent.

DAIRY EMPLOYEES, QUEBEC.—An Order in Council, approved May 26, and published in the *Quebec Official Gazette,* June 3, amends the previous Order in Council for this industry (LABOUR GAZETTE, July, 1938, page 799) by making a number of changes in the definitions of classes of work, and the following other changes:—

Overtime: time and one quarter; employees not regularly required for work on Sundays and holidays to be paid at time and one quarter if required to work on those days.

Vacation: three days' vacation every year to employees with one year's service.

The employers to pay to salesmen, deliverymen and their helpers 25 cents per meal for meals taken away from the plant.

CLERKS AND BOOKKEEPERS, JONQUIÈRE, KENOGAMI, ARVIDA AND ST. JOSEPH D'ALMA.—An Order in Council, approved May 26, and published in the *Quebec Official Gazette*, June 3, makes obligatory the terms of an agreement between l'Association des Marchands Détaillants de Jonquière et Kenogami (the Association of Retail Merchants of Jonquière and Kenogami), l'Union professionelle des Marchands de St. Joseph d'Alma (the Professional Union of Merchants of St. Joseph d'Alma), certain other employers in finance, industry and professional offices and le Syndicat national catholique des commis et comptables de Jonquière (the National Catholic Union of Clerks and Accountants of Jonquière, Inc.), le Syndicat national catholique des commis et comptables de St. Joseph d'Alma, Inc. (the National Catholic Union of Clerks and Accountants of St. Joseph d'Alma, Inc.) and le Syndicat interprofessionnel féminin de Jonquière (the Women's Interprofessional Union of Jonquière).

(The previous agreement was summarized in the LABOUR GAZETTE, December, 1937, page 1388, March, 1938, page 335 and October, page 1173 and its repeal was noted in the issue of January, 1939, page 97).

The Order in Council is to be in effect from December 8, 1938 to December 7, 1939, and applies to commercial, industrial, financial establishments and lawyers' and doctors' offices except the following: employees of banks, insurance companies, railways and the pulp and paper industry, also employees in the aluminum industry and of industrial or commercial establishments governed by a collective labour agreement under the Professional Syndicates Act. Municipal and school corporations are governed by this Order in Council unless they pass a resolution asking to be exempted. The Order in Council applies to the towns of Jonquière, Kenogami, Arvida and St. Joseph d'Alma and within two miles of them.

Hours: 60 per week in industrial establishments, with no work on religious holidays and three other holidays; 44 per week in financial establishments, municipal and school corporations and professional offices, with no work on Sundays and nine specified holidays; 63 per week (between 7 a.m. and 6 p.m. Mondays to Fridays, and between 7 a.m. and 10 p.m. on Saturdays and the day before a holiday except in St. Joseph d'Alma where the distribution of the 63 hours is not specified) in commercial establishments (except between December 20 and January 1 when stores may be open until 9 p.m. from Monday to Friday inclusive) with no work on Sundays and nine specified holidays; 70 per week in hotels, cafés, drug stores, gasoline stations, dairies and doctors' offices (no limit of hours set for restaurants). In all cases the law and regulations respecting the weekly day of rest to apply.

Overtime to be paid at regular rate.

Wages: all wages higher than the rates shown below may not be reduced.

Wages for female employees: the wages and apprenticeship conditions are those established by Ordinance No. 4 of the Fair Wage Board.

CLERKS, ETC., JONQUIÈRE, ETC.—See above under "Trade."

Service: Business and Personal

BARBERS AND HAIRDRESSERS (MALE AND FEMALE), JOLIETTE.—An Order in Council, approved May 29 and published in the *Quebec Official Gazette*, June 3, amends the previous Order in Council (LABOUR GAZETTE, January, 1939, page 96) by cancelling the clause which had provided that no one might practice the barber or hairdressing trade without a certificate of competency from the board of examiners of the joint committee.

HAIRDRESSERS, MONTREAL.—An Order in Council, approved May 26, and published in the *Quebec Official Gazette*, June 3, amends the previous Order in Council for this trade (LABOUR GAZETTE, March, page 336), by eliminating one of the seven specified holidays.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the June 3 issue of the *Quebec Official Gazette*:

Barbers and hairdressers, St. Jean and Iberville (amendment),
Barbers and hairdressers, Joliette, Berthier, Montcalm and l'Assomption (amendment),
Shoe industry, Province of Quebec (amendment),
Textile bag industry, Montreal,
Men's and boys' hats and caps, Montreal,
Building materials, Province of Quebec.

Notices were published in the *Quebec Official Gazette*, June 3, 10 and 30, that authorization was given by Orders in Council to levy assessments at the rate of one-half of one per cent of wages on employers and employees concerned to the following joint committees:—

Barbers and hairdressers, Sherbrooke,
Retail fur trade, Montreal,
Building trades, Hull,
Corrugated paper box, Province of Quebec,
Graphic arts, Quebec,
Building materials, Province of Quebec,
Automobile industry, Montreal,
Dairy industry, Quebec,
Barbers and hairdressers, Joliette, Berthier, Montcalm and l'Assomption,
Barbers and hairdressers, Three Rivers,
Bakers and bread deliverymen, Three Rivers,
Bakers, Quebec.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Nova Scotia, Ontario, Saskatchewan, and Alberta

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council on all employers and employees in the industry in the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour, who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the LABOUR GAZETTE, as follows: Ontario, in the issue of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, May, 1938, page 501, and June, 1939, page 574; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, June, 1938, page 633, and June, 1939, page 567; Nova Scotia, in June, 1936, page 604; Saskatchewan, in the issue of June, 1937, page 635, May, 1938, page 507, and June, 1939, page 581. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Nova Scotia

Construction: Buildings and Structures

BRICKLAYERS, HALIFAX AND DARTMOUTH.—An Order in Council, dated June 13, and published in *The Royal Gazette*, June 14, makes binding the terms of a schedule of wages and hours for bricklayers, masons and tilesetters in the city of Halifax and the town of Dartmouth, from May 1, 1939 to April 30, 1940, and thereafter from year to year subject to notice. It will not affect contracts entered into before May 1, 1939, provided notice given to Department of Labour on or before May 20, which work may be completed at a rate approved by the Minister of Labour.

Hours: 8 per day, 4 on Saturdays, a 44 hour week. In case of shift work men employed between 5 p.m. and 6 a.m. or between 12 noon Saturday and 8 a.m. Monday to work 7 hours for 8 hours' pay.

Overtime and work on Sundays and ten specified holidays: double time.

Minimum wage rate for bricklayers, masons and tilesetters: $1 per hour (an increase of 2½ cents over the previous schedule).

CARPENTERS, HALIFAX AND DARTMOUTH.—An Order in Council, dated June 13, and published in *The Royal Gazette,* June 14, makes binding the terms of a schedule of wages and hours for carpenters in the city of Halifax and the town of Dartmouth, from May 1, 1939 to April 30, 1941, and thereafter from year to year subject to notice.

Hours: 8 per day, 4 on Saturdays, a 44 hour week. In case of shift work, men employed between 5 p.m. and 8 a.m. or between 12 noon Saturdays and 8 a.m. Monday, 8 hours' pay for 7 hours' work.

Overtime: time and one-half for first four hours; thereafter and all work on Sundays and ten specified holidays, double time.

Minimum wage rate for carpenters: 70 cents per hour (an increase of 5 cents over the previous schedule). A special minimum rate may be established by the Advisory Committee for any handicapped employee.

PLASTERERS AND CEMENT FINISHERS, HALIFAX AND DARTMOUTH.—An Order in Council, dated June 13, and published in *The Royal Gazette,* June 14, makes binding the terms of a schedule of wages and hours for the plastering and cement finishing industry in the city of Halifax and the town of Dartmouth from May 17, 1939, to April 30, 1940 and thereafter from year to year, subject to notice.

Hours: 8 per day, 4 on Saturdays, a 44 hour week. In case of shift work, men employed between 5 p.m. and 6 a.m. to be paid at the rate of 8 hours' pay for 7 hours' work.

Overtime: time and one-half for first four hours; thereafter and all work on Sundays and ten specified holidays, double time.

Minimum wage rate for plasterers and cement finishers: 80 cents per hour (an increase of 5 cents per hour over the previous schedule). A special minimum rate may be established by the Advisory Board for any handicapped worker.

Ontario

Manufacturing: Miscellaneous Wood Products

HARD FURNITURE INDUSTRY, PROVINCE OF ONTARIO.—An Order in Council dated May 30, and published in *The Ontario Gazette,* June 3, renews without change the previous Order in Council for this industry (LABOUR GAZETTE, June, 1938, page 699 and April, 1937, page 457). The schedule is to remain in effect from June 13, 1939, "during pleasure."

Construction: Buildings and Structures

CARPENTERS, CORNWALL.—An Order in Council, dated May 30, and published in *The Ontario Gazette,* June 3, makes binding the terms of a schedule governing the carpentry industry in the town of Cornwall and neighbouring district, from June 13, 1939, "during pleasure."

Hours: 8 per day, 4 on Saturdays, a 44 hour week, but work required for the pouring of concrete may be done on Saturday up to 6 p.m. at straight time rate.

Overtime: first three hours 97½ cents per hour; all other overtime including work on Sundays and eight specified holidays, $1.30 per hour.

Minimum wage rate: 65 cents per hour (no change from previous schedule). The advisory committee may fix a special minimum rate for any handicapped employee.

PLUMBERS, HAMILTON.—An Order in Council, dated May 30, and published in *The Ontario Gazette,* June 3, makes binding the terms of a schedule governing the plumbing and heating industry in the city of Hamilton, Burlington Beach, the town of Dundas and neighbouring district, from June 13, 1939, "during pleasure."

Hours: 8 per day, Monday to Friday inclusive, a 40 hour week. In case of shift work, employees on night shifts to be entitled to 8 hours' pay for 7 hours' work.

Overtime: emergency repair work when a permit given by the advisory committee and also the setting of sleeves and inserts necessary for pouring concrete if done on Saturday morning to be paid at regular rate; other overtime $1.27 per hour, until midnight on Mondays to Fridays inclusive; all other overtime including work on Saturdays, Sundays and six specified holidays, double time.

Minimum wage rate: 85 cents per hour. The advisory committee may fix a special lower minimum rate of wages for any handicapped employee.

Saskatchewan

Constructon: Buildings and Structures

PAINTERS, REGINA.—An Order in Council, approved June 19, and published in *The Saskatchewan Gazette,* June 30, makes binding the terms of a schedule of wages and hours for the painting, decorating and paperhanging industry in the city of Regina and within five miles of it, from July 10, 1939, "during pleasure."

Hours: 8 per day, 4 on Saturdays, a 44 hour week.

Overtime and all work on Sundays and six specified holidays, time and one-half.

Minimum wage rate for journeymen: 65 cents per hour except for spray painting for which rate is 80 cents (no change from previous schedule). Employees furnishing and using their own equipment or brushes to be paid 90 cents per hour except when work is done by a spraying machine when rate is $1.05 per hour. Minimum rate for helpers; 45 cents per hour.

One apprentice allowed to each employer, articles of apprenticeship to be approved by the Advisory Board.

Apprentices to be paid 52 weeks wages in each year at the following weekly rates: first year $7.50, second year $10, third year $12.50 thereafter journeymen's rate.

Not more than one helper allowed to every four journeymen.

PLUMBERS, REGINA.—An Order in Council, approved June 9 and published in *The Saskatchewan Gazette,* June 30, makes binding the terms of a schedule of wages and hours for the plumbing and steamfitting industry in the city of Regina and within five miles of it, from July 10, 1939 "during pleasure."

Hours: 8 per day, 4 on Saturdays, a 44 hour week. In case of shift work, 8 hours' pay for 7 hours' work.

Overtime: time and one-half; work on Sunday and eight specified holidays, double time.

Minimum wage rates: for journeymen plumbers and steamfitters, 90 cents per hour; for helpers, 40 cents per hour. A special minimum rate may be established by the Advisory Board for any handicapped worker.

One apprentice allowed in each branch of the trade for every three journeymen employed, articles of apprenticeship to be approved by the Advisory Board.

Apprentices to be paid the following hourly minimum rates: 20 cents for first year, 25 cents second year, 30 cents third year, 40 cents fourth year.

Not more than one helper may be employed for each journeyman employed.

Transportation and Public Utilities: Local and Highway Transportation

DRAYING, TRANSFERRING AND STORAGE INDUSTRY, REGINA.—An Order in Council, approved June 19, and published in *The Saskatchewan Gazette,* June 30, makes binding the terms of a schedule of wages, hours and prices in the draying, transferring and storage industry in the city of Regina and within five miles of it from July 10, 1939, "during pleasure."

The schedule is similar to the one previously in effect and summarized in the LABOUR GAZETTE, May, 1938, page 582, with these exceptions:

Wages are the same as before except for part time employees for whom rate is 40 cents per hour.

Vacation: all employees with one year's service with an employer to be given one week's vacation with pay.

A scale of minimum charges which must be charged for services is now included in the schedule.

Service: Business and Personal

BARBERS, ESTEVAN.—An Order in Council, approved June 9, and published in *The Saskatchewan Gazette,* June 30, makes binding the terms of a schedule for the barbering industry in the town of Estevan and within five miles of it, from July 10, 1939 to July 9, 1940.

The terms of this schedule are similar to the one previously in effect and summarized in the LABOUR GAZETTE, May, 1938, page 582, the minimum rate for full time employment being $12 per week of 57 hours or 60 per cent of proceeds from the work of the employee, whichever is greater.

BARBERS, PRINCE ALBERT.—An Order in Council, approved June 9, and published in *The Saskatchewan Gazette,* June 30, makes binding the terms of a schedule for the barbering industry in the city of Prince Albert and within five miles of it from July 10, 1939 "during pleasure."

The terms of this schedule are similar to the one previously in effect and summarized in the LABOUR GAZETTE, July, 1938, page 805, the minimum rate for full time employment being $14.50 per week of 52 hours or 60 per cent of proceeds from the work of the employee, whichever is greater.

BARBERS, SASKATOON.—An Order in Council, approved June 9, and published in *The Saskatchewan Gazette,* June 30, makes binding the terms of a schedule for the barbering industry in the city of Saskatoon and within 5 miles of it from July 10, 1939, "during pleasure."

The terms of this schedule are similar to the one previously in effect and summarized in the LABOUR GAZETTE, July, 1938, page 805, the minimum rate for full time employment being $13 per week of 48 hours and 30 cents per hour for all hours in excess thereof, or 60 per cent of proceeds from the work of the employee, whichever is greater.

Alberta

Construction: Buildings and Structures

PLUMBERS, CALGARY.—An Order in Council, dated June 26, and published in *The Alberta Gazette,* June 30, makes binding the terms of a schedule of wages and hours for the plumbing, steamfitting and gas fitting industry in the city of Calgary, from July 10, 1939 to July 9, 1940.

The terms of this Order in Council are similar to the one previously in effect and summarized in the LABOUR GAZETTE, August, 1938, page 949.

The minimum hourly wage rate for journeymen remains at 95 cents, but it is now provided that such journeymen hold an Alberta Proficiency Certificate in the plumbing, steamfitting and gas fitting industry. Hours are unchanged at 40 per week.

Transportation and Public Utilities: Local Transportation

TAXI AND BUS DRIVERS, BANFF.—An Order in Council, dated June 13, and published in *The Alberta Gazette,* June 30, makes binding the terms of a schedule of wages and hours for taxi and bus drivers in the Banff National Park, from July 10, 1939, for twelve months

or "during pleasure." (The previous schedule was summarized in the LABOUR GAZETTE, August, 1938, page 949.)

Hours of regularly employed chauffeurs: 12 consecutive hours per day, less a one hour rest period in each day; days of rest to be provided on a basis of one day in seven at the convenience of the employer and with the agreement and consent of the employee.

Wages: regularly employed chauffeurs to be paid a guaranteed wage of $2.35 per day of 11 working hours plus a bonus to drivers of touring cars of 4 cents per mile, and to bus drivers of 5 cents per mile for all excess mileage in each employment period based on 60 miles per day. Temporary chauffeurs to be paid *pro rata* of the above rates, but no temporary chauffeur may be paid for fewer than 4 hours in any one day, with a minimum of 40 cents per hour. Employers may enter into an agreement with employees for the payment of a monthly salary on a fixed scale without bonus.

Chauffeurs to be held responsible for an amount not exceeding $100 for damage to employer's cars where such damage is occasioned by negligence or lack of skill on the part of the chauffeur.

PRICES RETAIL AND WHOLESALE IN CANADA, JUNE, 1939

Cost of Living, Prices of Staple Articles and Index Numbers

THE movement in prices during the month was slight. Both the cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget and the Dominion Bureau of Statistics weekly index number of wholesale prices were, however, at somewhat lower levels than in May. The decrease in the former was due to the lower cost of foods and fuel and in the latter to a large extent to declines in the prices of certain farm products and non-ferrous metals.

The cost per week of a list of twenty-nine staple foods, entering into a budget for a family of five, in terms of average retail prices in sixty-nine cities was $8.05 at the beginning of June as compared with $8.13 for May; $8.56 for June, 1938; $8.52 for June, 1937; $7.79 for June, 1936; $6.67 for March, 1933 (the low point in recent years); and $11.10 for June, 1930. Fifteen items in the list were lower, nine were higher and five were unchanged. Changes were of a minor nature the most important being decreases in the cost of potatoes, eggs, butter, cheese and bread and increases in beef, pork and sugar. Including the cost of fuel and rent with that of foods the total list cost $16.92 at the beginning of June; $17.02 for May; $17.43 for June, 1938; $17.20 for June, 1937; $15.41 for June, 1933 (the low point during recent years); $21.44 for June, 1930; $20.58 for June, 1922; $26.92 for July, 1920 (the post war peak); and $14.27 for June, 1914. In fuel there was a seasonal fall in the price of anthracite coal while rent was unchanged.

In wholesale prices the Dominion Bureau of Statistics weekly index number moved within narrow limits in June and for the week ended June 30 was 73·3 as compared with 73·5 for the week ended June 2 and 73·7 for that ended May 5. The latest figures available on a monthly basis are for May when the index was 73·7 as compared with 80·1 for June, 1938; 84·6 for June, 1937; 72·3 for June, 1936; 63·5 for February, 1933 (the low point in recent years); 93·4 for June, 1929; 97·8 for June, 1922; 164·3 for May, 1920 (the post war peak); and 64·4 for June, 1914. At the end of June the index number was about nine per cent lower than in June, 1938, and fourteen per cent lower than in June, 1937. The slight decline during the month under review was due mainly to lower prices of grains, flour, raw sugar, meats, livestock, sheep skins, raw silk, certain non-ferrous metals and anthracite coal.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of June of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delievered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords

COST PER WEEK (IN TERMS OF THE AVERAGE RETAIL PRICES IN SIXTY-NINE CITIES IN CANADA) OF CERTAIN STAPLE FOODS, FUEL AND LIGHTING, IN THE QUANTITIES STATED, AND RENT ENTERING INTO A FAMILY BUDGET.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantites of different foods required for an average family

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in Other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended June 30, 1939, monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(*Continued from page 734*)

and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not payng rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received, and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

Retail Prices

In beef the price of sirloin steak again averaged higher at 28·4 cents per pound as compared with 27·9 cents in May and 25·7 cents in January while certain other cheaper cuts were somewhat lower. The price of fresh pork has shown little variation in recent months. In June the average was 23·8 cents per pound as compared with 23·5 in May. Lard was fractionally lower at 11·9 cents per pound than in the previous month as compared with 15·3 cents in June, 1938. The price of fresh eggs declined from 26·1 cents per dozen in May to 25·5 cents in June. Seasonal decreases in the price of milk were reported from several cities and the Dominion average price was fractionally lower at 10·8 cents per quart. Creamery butter was down in the average from 26·1 cents per pound in May to 25·5 cents in June. The average price in June, 1938, was 31·4 cents. Cheese also was down from 22 cents per pound to 21·4 cents. Onions were about one cent per pound higher at 5·8 cents per pound. The price of potatoes averaged $1.49 per 90 pounds in June as compared with $1.56 in May. This is the first decline recorded since September when the average price was $1 per 90 pounds. Seasonal reductions in the price of anthracite coal were reported from several cities and the Dominion average price was down $14.54 per ton to $14.26. No changes were reported in rent.

The following are the prices per ton reported for Welsh coal "cobbles" and "French nut"; Halifax $15.50; Charlottetown $14; Moncton $16; Saint John $14.50; Quebec $14; Three Rivers $15 and $14; Sherbrooke $14.75; St. Hyacinthe $14.50; Thetford Mines $17.25; Montreal $14 to $14.25; Ottawa $16.50; Kingston $16; Belleville $15.50; Peterborough $16.75; Oshawa $15; Toronto $14.50; St. Catharines $15; Hamilton $14.50; Galt $16-$16.50; St. Thomas $16.50; Cobalt $19.50; Timmins $19.25; Port Arthur $17.75; Fort William $17.75; Winnipeg $20.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE accompanying tables, which appear quarterly, give the official and certain other index numbers of the cost of living, retail and wholesale prices in Great Britain and certain of the principal commercial and industrial countries. The following notes afford information as to recent changes in prices in several of these countries.

Great Britain and Northern Ireland

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 97·8 for May as compared to 97·2 for April, an increase of 0·6 per cent for the month. Food prices rose by 0·5 per cent while those of industrial materials and manufactures rose by 0·7 per cent. Compared with a year earlier there was a decline of 4·1 per cent in the general index, food prices being 8·5 per cent lower and those of industrial materials and manufactures 1·9 per cent lower.

The *Statist* index number, on the base 1867-1877=100, was 90·6 at the end of May as compared to 90·5 at the end of April. The index for foodstuffs declined 0·6 per cent during the month but this decrease was more than offset by an increase of 0·5 per cent in the index of industrial materials. The general index for May, 1938, was 91·4, the corresponding figure for this year being 0·9 per cent lower.

COST OF LIVING.—The Ministry of Labour's index number, on the base 1914=100, was 153 at the first of June, showing no change from the figure for the previous month. The index of food prices was also unchanged at 134. Prices of butter and cheese were lower than at May 1, and milk prices fell in some areas but these declines were offset by an increase in the price of sugar in most districts. The indexes of rent and clothing showed no change during May, while a small decrease in the index of fuel and lighting material prices was offset by an increase in the index of prices of sundries.

France

WHOLESALE PRICES.—The General Statistical Office index number, on the base 1914=100, was 693 for May, as compared with 681 for April, an increase of 1·8 per cent for the month. The index of food prices rose from 636 to 643 due to increases in the cost of animal foods and in the sugar, coffee and cocoa group which were only partially offset by decreases in the cost of vegetable foods. The index of all industrial materials rose from 722 to 737, there having been increases in all its sub-groups. The index based on gold currency, 1914=100, was unchanged at 55.

Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office, on the base 1913=100, was 106·5 for May as compared to 106·4 for April. The index of prices of agricultural products increased 0·5 per cent during the month, while that for raw materials and semi-manufactured goods declined 0·3 per cent and that for manufactured goods declined 0·1 per cent.

COST OF LIVING.—The official index number, on the base 1913-1914=100, was 126·1 for May as compared to 125·9 for April, an increase of 0·2 per cent for the month. The index for rents was unchanged, while those for food and for clothing showed increases of 0·3 per cent and 0·1 per cent respectively. The price index of fuel and lighting materials declined 1·0 per cent while that for sundries declined 0·1 per cent.

India

WHOLESALE PRICES.—The index number of the Labour Office, Government of Bombay, on the base July, 1914=100, was 99 for March, showing no change from the figure for the previous month. The index of prices of foods was 100 as compared to 101 for February while the index of prices for non-foods rose from 99 in February to 100 in March.

COST OF LIVING.—The official index number of the working class cost of living at Bombay, on the base July, 1933, to June, 1934=100 was 103 for April. While the general index showed no change from the March figure, the food prices index increased from 109 to 110, the index for fuel and lighting materials decreased from 102 to 98 and that for sundries decreased from 95 to 94. The indexes for rent and clothing prices were unchanged at 100 and 85 respectively.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number, on the base 1926=100 was 76·2 for April as compared to 76·7 for March, a decrease of 0·7 per cent for the month. Farm products declined 3·2 per cent, foods 2·3 per cent, hides and leather products 1·0 per cent, chemicals and drugs 0·7 per cent, metals and metal products 0·3 per cent and building materials 0·2 per cent. Four groups showed small increases as follows: textile products, 0·5 per cent, fuel and lighting materials, and miscellaneous commodities, 0·4 per cent each, and house furnishing goods 0·2 per cent. The all commodity index was 3·2 per cent lower than a year ago.

COST OF LIVING.—The index number of the Industrial Conference Board on the base

81706—8

(a) Average for year. (b) First of month. (c) 15th of month. (d) End of month. (e) New series. (g) Until end of 1927. "Dr. Lorenz." (h) Prior to 1929, the number of commodities was 236, from January 1926 to December 1933, 502, and since January, 1934, the number is 567.

1923=100, was 84·8 for May as compared with 85·0 for April. The index for rent was unchanged but all the other groups making up the index showed decreases, the largest being in the fuel and light group whose index declined 1·4 per cent during the month; the price indexes of food, clothing and sundries each declined 0·1 per cent. As compared with May, 1938, the general index showed a decline of 2·0 per cent.

RECENT LEGAL DECISIONS AFFECTING LABOUR

British Columbia Appeal Court Orders New Trial Where Barbers Act Not Complied With

The plaintiff failed on an examination under the Barbers Act at which it was necessary to qualify in order to obtain a barber's licence. He appealed under section 11 of the Act to a County Court Judge who dismissed the appeal without referring the matter to a special tribunal of three barbers as required by that section.

The British Columbia Court of Appeal unanimously held that it had jurisdiction to hear the appeal and that since section 11 of the Act had, in effect, been disregarded, a new trial should be ordered. *McAllister* v. *Board of Examiners under the Barbers Act* (1939) 3 Dominion Law Reports 124.

Manitoba Appeal Court Upholds Magistrate's Decision Dismissing Action Under Minimum Wage Act

The Manitoba Court of Appeal on May 9 unanimously affirmed the judgment of Judge Whitla of the County Court dismissing an action by a night watchman for wages at the minimum rate fixed by the Manitoba Minimum Wage Board. The plaintiff was hired in October, 1936, at $40 a month, which was gradually increased to $50, the rate he was receiving in August, 1938, when he voluntarily left his employment. No decision was made as to whether he was entitled to the benefit of the Minimum Wage Act. The question was whether a civil action could be brought by the plaintiff in the County Court where under the Statute of Limitations wages may be recovered for as long a period as six years or whether only criminal proceedings could be taken before a magistrate for a violation of the Minimum Wage Act or regulations in which case, according to the Manitoba Summary Convictions Act and the Criminal Code of Canada, s. 1142, the proceedings must be taken within six months of the offence.

The original Act declared it an offence to violate any provision of the Act or any regulation and prescribed a penalty. It expressly provided also that if an employee were paid less than the minimum to which she was entitled, she could recover in a civil action the full minimum wage. In 1925 the Act was amended to require a magistrate who found an employer guilty of paying less than the minimum to order the employer to pay the amount of wages due in accordance with the Act and regulations. This new section, replacing the old, stipulated also that "any agreement made by any employee to work for less than the fixed minimum wage shall be no defence in an action by an employee to recover wages or in any prosecution under the Act." There was, however, no express statement in the Act as amended that an employee could recover in a civil action.

Mr. Justice Dennistoun expressed the opinion that the word "action," which in its popular sense means a civil action by which one party seeks in a Court of Justice to enforce some right or to restrain the commission of some wrong, refers in this section to criminal proceedings before a magistrate and not to a civil action since the clause providing for a civil action had been repealed. He was, therefore, of the opinion that the appeal should be dismissed.

After the appeal had been heard but before judgment on appeal had been rendered, the Legislature amended the Minimum Wage Act to stipulate that nothing in the Act should curtail or defect any civil or other remedy for the recovery of wages by an employee except in so far as an order has been made by a magistrate in convicting an employer of paying a wage lower than the prescribed minimum. The amendment provides further that every employer who permits an employee to do work for which a minimum wage has been fixed is to be deemed to have agreed to pay such wage and the employee may recover the full amount by civil action. It was provided, however, that no order for the payment of wages in connection with the prosecution of an employer should relate to wages payable more than six months before the date of the complaint on which the proceedings were based. These amendments were declared to be retroactive and to be construed as if originally contained in the Minimum Wage Act.

Mr. Justice Dennistoun indicated that if these amendments had been enacted before the present case went to trial, the result might have been different but they could not affect an action which was pending at the time of their enactment since the Manitoba Inter-

81706—8½

pretation Act stipulates that the provisions of an Act shall not affect litigation pending at the time of enactment unless it is so expressly stated in the Act.

Mr. Justice Robson agreed that the reference in the Act to "any action by an employee to recover wages" was not sufficient to give an employee the remedy of a civil action and he distinguished between the case before the Court and an English case of *Waghorn* v. *Collison* (1922) L.J. K.B. 735, relied on by the appellant in which the Court decided that the Corn Production Act, 1917, authorizing the fixing of minimum wages for agricultural workers, was "the contractual basis between agricultural workmen and their employers and that an employee could sue for the statutory wages as contractual and that the summary procedure was optional." Mr. Justice Robson was of the opinion that there was no conventional contract in the Manitoba Act such as the English Court found to exist in the section of the English Act providing that "any person who employs a workman in agriculture shall pay wages to the workman at a rate not less than the minimum rate as fixed under this Act and applicable to the case..." The penal provision in the Manitoba Act that if an employer pays less than the minimum wage and is found guilty of a violation of the Act he shall be ordered by the magistrate to pay the full amount of the wage "merely established a magistrate's jurisdiction and did not go so far as the provision in the Corn Production Act, 1917, which made the minimum rate a contractual rate which could either be sued for in the Civil Courts or enforced with a penalty in a Court of Summary Jurisdiction."

As regards the amendments in the Manitoba Act made by the Legislature before a judgment was given in this case, Mr. Justice Robson considered that they provided such a contractual basis as the English statute but they could not affect an action begun before their enactment in spite of the stipulation that they should be retroactive. *Dorosh v. Bentwood Chair and Table Co.* (1939) 2 Western Weekly Reports. 150.

Superior Court Judgment Dismissing Action Under Collective Labour Agreements Act Upheld on Appeal

On April 29 the Quebec Court of King's Bench unanimously affirmed the judgment of Mr. Justice Forest of the Superior Court of the district of Montreal who had disallowed a claim for wages by a joint committee set up under the Collective Labour Agreements Act. The action was on behalf of workmen engaged in constructing drains for the defendant contractors for the City of Montreal who had been paid less than the rates established by a collective agreement and made binding by order in council. The plaintiffs admitted that if the agreement did not apply to the work, the men had been paid in full; and the defendants did not deny that the wages paid were less than those fixed in the agreement. The defence was that the words "building trades" used in the agreement and order in council did not apply to the construction of drains and the majority of the court agreed with this contention. Mr. Justice Langlais considered that construction in general was covered by the agreement but he would have dismissed the appeal because the statement of claim referred to the "building" industry instead of the "construction" industry. *Comité Conjoint des Metiers de la Construction* v. *Toussaint Frères* (1939) Rapports Judiciaires de Quebec, 424.

Court Action Under U.S. Fair Labor Standards Act

Labor Standards, a publication of the United States Department of Labor reports in its June issue that rulings favorable to the Government have been handed down in each of the 17 decisions in cases brought to enforce the provisions of the Fair Labor Standards Act. Eight other cases, including one in which the Government is defendant, are pending. Fines totalling $8,000 have been imposed, and penalties amounting to $31,500 have been suspended on the condition that restitution is made the underpaid employees. Twelve injunctions restraining violations of the act have been granted.

In the first criminal case brought under the act, the company and its manager were each indicted on four counts—payment of less than the minimum wage, falsification of records to conceal the underpayment, failure to keep proper records of hours worked and wages paid, and shipment in interstate commerce of goods manufactured in violation of the law. The Federal court rendering the decision fined the general manager $1,000 and the company $500 on each of the four charges, but suspended the fine in three of the charges, provided that complete restitution amounting to approximately $750 was made the employees.

In a recent case the defendants were fined $15,000, $12,000 of which was suspended on the condition that restitution amounting to about $1,700 was made.

The first decree in which specific inventories of manufactured goods were barred to interstate commerce was entered on April 15, when a lumber company in a consent decree was enjoined from shipping in interstate commerce goods admittedly produced in violation of the minimum-wage provisions of the Fair Labor Standards Act. Recently a hosiery mill was permanently enjoined from violating the law by listing certain of its workers in a branch factory as "students" in a "trade school." Back wages in an approximate amount of $2,000 have been paid to these "student" employees. In another hosiery case the court permitted the shipment of some "hot" goods, but only on condition that full restitution amounting to about $2,000 be made to the employees.

A case is pending of a company who, it is charged, not only failed to meet the minimum-wage and overtime requirements of the act but attempted to evade the law by establishing a system of contract shops. According to the complaint filed, these shops were set up in cellars, outbuildings, and other insanitary places.

One case involved an employee discharged for making a complaint to the Wage and Hour Division. In this case the defendant immediately offered to submit to a consent decree, which provided not only for restitution to the employees insofar as wages are concerned but also for reinstatement of the discharged worker.

A recent complaint filed against a railroad company alleges that the company has arbitrarily made deductions from the wages of maintenance employees for rent on company-owned houses, many of which are nonexistent or not occupied by the employees from whose pay envelopes the "rental" is deducted. As a result of this practice, maintenance employees of this company have failed to receive the minimum wage of 25 cents an hour prescribed by the law. The complaint also alleges that in addition many deductions have been made for food purchased from company stores at prices which include a profit to the company. This is contrary to regulations prescribed by the Administrator defining the reasonable cost of board, lodging, and other facilities. The complaint asks that the railroad company be permanently enjoined from violating the minimum-wage and record-keeping provisions of the Fair Labor Standards Act.

In each of the four criminal cases in which decisions have been rendered the defendants pleaded guilty.

Loans Under National Housing Act

Honourable Charles A. Dunning, Minister of Finance announced on July 8 the approval of National Housing Act loans well over the $2,000,000 mark for the second consecutive month. Housing Act loans approved in June aggregated $2,196,825 and those in May, $2,426,491. The number of loans approved in June was 547, the largest number for any month to date. Taking into account, as well, advances under the Home Improvement Plan, more than $8,500,000 has been made available in the past two months under these measures for the construction of new dwelling units and the repair and improvement of older residential properties.

Total National Housing Act loans approved in June, amounting to $2,196,825 provided for the construction of 669 family housing units. Of these, 205 or over 30 per cent were financed by loans of $2,500 or less, 343 or over 51 per cent were financed by loans of $3,000 or less, 482 or over 72 per cent were financed by loans of $3,500 or less, and 569 or over 85 per cent were financed by loans of $4,000 or less.

Of the 547 individual loans approved, 525 were to finance the construction of single-family houses, 8 to finance the construction of two-family houses (mostly in Quebec), and 14 to finance the construction of multiple-family houses. Loans to finance single-family and two-family houses accounted for approximately 81 per cent of the total volume of mortgage money approved, and multiple-family houses accounted for 19 per cent of the total.

The extension of the loaning facilities to new communities was continued with loans approved in 8 new communities where previously there had been no Housing Act loans. The total number of communities in which these facilities have now been made available is 330.

Activity under the 90 per cent loan provisions of the National Housing Act was again a feature of operations for June. From 33 approvals for this type of loan in March, the number has increased to 71 in April, 77 in May, and 110 in June, or over 1/5th the total number of individual loans approved in this latter month. Loans as high as 90 per cent of the lending value of new homes may be approved under the Act to finance single-family houses which are being built for owner occupancy where the total lending value of the property (including lot) does not exceed $2,500. Since the original investment is not large, and the monthly payments are very moderate, the market for this type of dwelling is immense, and considerable interest is being shown in the possibilities of this provision by builders in a number of centres. A total of 419 of these loans have now been given approval in 73 Communities.

Up to June 30, 1939, the aggregate volume of Housing Act loans approved stands at $36,655,589, providing for 9,862 family housing units.

Home Improvement Loans

Continuing the marked upward trend of loaning operations evidenced in recent months, Home Improvement loans reported to the Department in June numbered more than 5,000 aggregating well over $2,000,000 according to figures made public on July 6 by the Honourable Charles A. Dunning, Minister of Finance. As compared with June, 1938, this represents an increase of between 40 and 50 per cent.

Based on the conservative estimate that each Home Improvement loan (average about $400) provides a month's work for two men, it is estimated that the 5,000 loans reported in June would provide work for at least 10,000 workmen in the building and related industries.

More than 75,000 loans have now been granted under the Home Improvement Plan totalling about $30,000,000.

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

Twenty-Fifth Session of the International Labour Conference

THE Twenty-fifth Session* of the International Labour Conference (League of Nations) was held at Geneva, Switzerland, from June 8 to 28, 1939.

Under the terms of the Treaties of Peace, each Member State is entitled to send four delegates to the Conference, two of whom must be government delegates and the other two must represent, respectively, employers and workpeople. These two latter representatives must be chosen in agreement with the industrial organizations, if such organizations exist, which are most representative of employers or workpeople. Each delegate may be accompanied by advisers not exceeding two in number for each item on the agenda of the meeting, but these advisers may not speak or vote, except as authorized deputies for the delegate.

The decisions of the Conference may take the form of draft international Conventions, or Recommendations to be submitted to the Member States for consideration with a view to effect being given to them by national legislation or other action. A two-thirds majority of the votes cast by the delegates is required for the adoption of any Draft Convention or Recommendation by the Conference. The Draft Conventions and Recommendations are afterwards communicated by the Secretary-General of the League of Nations to the countries represented in the International Labour Organization. Each country is obliged under the Treaties, within the period of one year at most from the closing of the Conference, or if it is impossible owing to exceptional circumstances to do so within one year, then at the earliest possible moment and in no case later than eighteen months from the closing of the Conference, to bring the Draft Convention or Recommendations before the authority or authorities within whose competence the matters lie, for the enactment of legislation or other action.

In Canada, the Draft Conventions and Recommendations adopted at each session of the Conference have been examined by the Law Officers of the Crown to determine whether the subject-matters were within federal or provincial jurisdiction, and then, with the Law Officers' reports on the question of jurisdiction, have been brought before the Dominion Parliament and the respective Provincial authorities.

* A session of the Conference has been held annually since the first session in 1919. Two sessions were held in 1926 and in 1929, and three in 1936. A report of each session was given in the LABOUR GAZETTE for the year.

Countries Represented at Conference

Delegations were present at the Conference from forty-six countries, and the Credentials Committee approved the credentials of 86 Government delegates, 34 Employers' delegates and 34 Workers' delegates, making 154 delegates in all. In addition 199 Technical Advisers were accredited, 96 being Government Advisers, 48 Employers' Advisers and 55 Workers' Advisers. This made a total attendance of 353 Delegates and Advisers at the Conference. In 1938, 157 Delegates and 257 Advisers attended the Conference from 50 different countries. There was thus in 1939 a decline of 61 (3 fewer Delegates and 58 fewer Advisers) from the previous year.

Among the delegates present were the Ministers of Labour, or other Departments, from several countries. These included: Mr. Ernest Brown, Minister of Labour, Great Britain; Mr. Langstone, Minister of Lands, New Zealand; Mr. Pomaret, Minister of Labour, France; Mr. Delfosse, Minister of Labour and Social Welfare, Belgium; Mr. Torp, Minister of Social Affairs, Norway; Mr. Fagerholm, Minister of Social Affairs, Finland; Mr. Krier, Minister of Social Welfare and Labour, Luxemburg.

A list of the countries represented follows: Afghanistan, Argentine Republic, Australia, Belgium, Bolivia, Brazil, British Empire, Bulgaria, Canada, Chile, China, Columbia, Cuba, Denmark, Dominican Republic, Ecuador, Egypt, Estonia, Finland, France, Greece, Hungary, India, Iran, Iraq., Ireland, Latvia, Lithuania, Luxemburg, Mexico, Netherlands, New Zealand, Norway, Panama, Peru, Poland, Rumania, Siam, Sweden, Switzerland, Turkey, Union of South Africa, United States of America, Uruguay, Venezuela, and Yugoslavia.

Canadian Delegation

Government Delegates:

Mr. H. H. Wrong, Geneva, Switzerland, Permanent Delegate of Canada to the League of Nations.

Mr. M. S. Campbell, Ottawa, Chief Conciliation Officer, Department of Labour.

Advisers to Government Delegates:

Mr. Thomas J. O'Neill, Member of Parliament, Kamloops.

Mr. George D. Taylor, Sault Ste. Marie, Executive Board Member, All-Canadian Congress of Labour.

Mr. Michel A. Bourdon, Montreal, Treasurer, Confederation of Catholic Workers of Canada.

Mr. Alfred Rive, Geneva, Switzerland, Second Secretary, Permanent Delegation of Canada to the League of Nations.

Employers' Delegate:

Mr. A. R. Goldie, Galt, Vice-Chairman of Babcock-Wilcox and Goldie-McCulloch Limited, and Past Chairman of the Industrial Relations Committee of the Canadian Manufacturers' Association.

Adviser to Employers' Delegate:

Mr. G. V. V. Nicholls, Toronto, Assistant Secretary of the Legal and Industrial Relations Department of the Canadian Manufacturers' Association.

Workers' Delegate:

Mr. R. J. Tallon, Ottawa, Secretary-Treasurer of the Trades and Labour Congress of Canada and President of Division No. 4, Railway Shop Crafts.

Adviser to Workers' Delegate:

Mr. William H. Phillips, Ottawa, Vice-President of the Order of Railroad Telegraphers.

Officers of the Conference

The following officers were elected:—

President.—Mr. Edmond Schulthess, former president of the Swiss Confederation, and Swiss Government delegate to the Conference.

Vice-Presidents—Mr. Langstone, Government delegate from New Zealand; Mr. Harriman, Employers' delegate from the United States; and Mr. Jouhaux, Workers' delegate from France.

Secretary-General.—Mr. John G. Winant, Director of the International Labour Office.

Agenda

Comprising the 1939 agenda were the following items listed for the second and final stage of the double-discussion procedure of the Conference:

I. Technical and vocational education and apprenticeship.
II. Regulation of contracts of employment of indigenous workers.
III. Recruiting, placing and conditions of labour (equality of treatment) of migrant workers.
IV. Regulation of hours of work and rest periods of professional drivers (and their assistants) of vehicles engaged in road transport.
V. Generalization of the reduction of hours of work in industry, commerce and offices.
VI. Reduction of hours of work in coal mines.

Appointment of Committees

On the recommendation of the Selection Committee, the Conference appointed the following committees:

Committee on Standing Orders.—Fifteen members: five from the Government group and five each from the Employers' and Workers' groups.

Resolutions Committee.—Twelve members: six from the Government group and three each from the Employers' and Workers' groups.

Committee on Application of Conventions.—Sixteen members: eight from the Government group and four each from the Employers' and Workers' groups.

Committee on Technical Education.—Fifty-six members: twenty-four from the Government group and sixteen each from the Employers' and Workers' groups.

Committee on Indigenous Workers' Contracts.—Twenty members: ten from the Government group and five each from the Employers' and Workers' groups.

Committee on Migrant Workers.—Forty-two members: eighteen from the Government group and twelve each from the Employers' and Workers' groups.

Committee on Hours of Work in Road Transport.—Forty-two members: eighteen from the Government group and twelve each from the Employers' and Workers' groups.

Committee on Hours of Work in Coal Mines.—Twenty-four members: eight from each group.

The Canadian delegation secured representation on the following committees:—

Selection Committee:
Mr. Wrong; (substitute, Mr. Campbell); Mr. Tallon.
Committee on Technical Education and Apprenticeship:
Mr. Campbell; (substitute, Mr. Taylor).
Mr. Goldie; (substitute, Mr. Nicholls).
Committee on Hours of Work in Road Transport:
Mr. Wrong; (substitutes, Mr. O'Neill, Mr. Bourdon).
Mr. Goldie; (substitute, Mr. Nicholls).
Mr. Phillips, (substitute, Workers' member).
Committee on Migrant Workers:
(Substitute, Workers' members, Mr. Tallon).
Committee on the Application of Conventions:
(Substitutes, Mr. Wrong, Mr. Rive).

Summary of Conference Decisions

The following is only a brief summary of the Conference decisions and the full text of the adopted Draft Conventions, Recommendations and Resolutions will be found elsewhere in this article.

1. *Technical and Vocational Education and Apprenticeship*

The Conference adopted by 110 votes to 0 a Recommendation concerning vocational training. By the same vote, the Conference adopted a Recommendation concerning apprenticeship. Both Recommendations received the votes of the Canadian Government and Workers' delegates.

II. *Regulation of Contracts of Employment of Indigenous Workers*

On this item the Conference adopted two Draft Conventions and two Recommendations.

The first Draft Convention concerned the regulation of written contracts of employment of indigenous workers, and was adopted by a vote of 101 to 0.

The second Draft Convention concerned the abolition of penal sanctions for breaches of contracts of employment by indigenous workers, and was adopted by a vote of 95 to 22.

The first Recommendation concerning the maximum length of written contracts of employment of indigenous workers was adopted by a vote of 94 to 16, while the second Recommendation (concerning labour inspectorates for indigenous workers) was adopted by a vote of 94 to 2. Though this subject on the agenda of the Conference has no particular application to Canada, the Canadian Government and Workers' delegates supported the proposals because the Governments chiefly concerned were, with one exception, in favour of these measures.

III. *Recruiting, Placing and Conditions of Labour (Equality of Treatment) of Migrant Workers*

The Conference adopted a Draft Convention concerning the recruitment, placing and conditions of labour of migrants for employment, the vote being 110 to 0. Supplementing this Draft Convention were two Recommendations which were adopted by votes of 103 to 0 and 107 to 0, respectively. As in the case of the preceding item, this question has no particular application to Canada. The Canadian Workers' delegates supported the proposals.

IV. *Regulation of Hours of Work and Rest Periods of Professional Drivers (and their Assistants) of Vehicles Engaged in Road Transport*

On this subject the Conference adopted a Draft Convention and four Recommendations.

The Draft Convention concerning the regulation of working hours and rest periods was adopted by a vote of 88 to 18.

The first Recommendation concerning individual control books in road transport was adopted by a vote of 85 to 20.

The second Recommendation concerning the regulation of night work was adopted by a vote of 81 to 23.

The third Recommendation concerning the methods of regulating hours of work was adopted by a vote of 81 to 21.

The fourth Recommendation concerning the rest periods of professional drivers of private vehicles was adopted by a vote of 72 to 21.

On the Draft Convention and the first three Recommendations, the Canadian delegation was divided, the Government and Workers' delegates voting in favour and the Employers' delegate against. On the last Recommendation, re professional drivers of private vehicles, the Canadian Government and Workers' delegates did not vote, while the Employers' delegate voted in opposition.

V. *Generalization of the Reduction of Hours of Work in Industry, Commerce and Offices*

On this subject the Conference by a vote of 90 to 2 adopted a resolution postponing further action in view of the "prevailing political insecurity" and the resultant "extensive programs of armament and national defence." The Canadian delegation took no part in either the discussion or the voting on this resolution.

VI. *Reduction of Hours of Work in Coal Mines*

The "prevailing political insecurity" also operated in this matter. The Conference discussed a resolution asking the Governing Body to place this question on the agenda of an early session "as soon as such action is warranted by an improvement in the international situation." This resolution was adopted without a record vote.

Other Resolutions Adopted

The Conference also adopted three important Resolutions not relating to items on the agenda but which had been submitted by different members. These concerned: (1) the employment of women; (2) judicial bodies for the enforcement of labour legislation and the rapid functioning of such bodies; (3) an enquiry into the methods followed in order to encourage the development of the activities of the International Labour Organization in various countries. (The texts of these Resolutions are given at the conclusion of this review.)

Position of Federal States in Regard to Conventions

The United States Government had suggested to the International Labour Office in advance of the Conference that a special provision should be inserted in any Draft Convention dealing with road transport to permit Federal States to ratify the resultant convention to the limits of their constitutional authority if they thought it advisable to do so.

This suggestion was considered by a subcommittee of the Road Transport Committee of the Conference who were of the opinion that the suggestion was one which would require examination by the Governing Body before any definite decision was taken as the question would doubtless arise with respect to other Conventions.

From the text of the road transport Convention (included in the present article) it will be observed that there is no clause dealing with the case of federal countries. Accordingly, the committee submitted to the Conference a resolution requesting the Governing Body to undertake a study of the position of Federal States with regard to the ratification of Conventions.

ADDRESS OF U. S. GOVERNMENT DELEGATE

Speaking to the resolution when it came before the Conference, the United States Government delegate (Mr. Goodrich) outlined the purpose underlying the resolution as follows:

Since the proposed resolution is the result of a suggestion put forward by the United States Government delegation, it is, I think, our duty to inform the Conference of what has been in our minds. Our purpose is to find ways and means to bring about a wider application of international labour Conventions within those Federal States in which the jurisdiction of the central authority, with respect to labour matters, is at present limited.

This problem, as was brought out in the Committee discussions, is one which affects different Federal States unequally. In some Federal States there has been no serious question of the competence of the Federal authorities. Their position would not be affected by any proposed change. In other Federal States, earlier difficulties that stood in the way of ratification have been largely, if not entirely, removed. Care must be taken not to jeopardize their gains. . . .

Let there be no mistake as to the spirit in which this proposal is put forward. The Federal States of limited jurisdiction have no grievance and no grounds for grievance. Their necessities were generously recognized—perhaps even over-generously—by the provision in the Constitution permitting them to treat Conventions in cases like this as Recommendations. What we ask is the opportunity to do more, rather than less, than the Constitution requires. We hope that the way may be found. We believe that it is of great importance to bring these Federal States and their labour movements into a more complete participation at every stage in the work of the Organization. It is for this reason that we ask that every possibility be explored of extending to these large additional numbers of workers the benefits and the protection of international labour Conventions. It is in this spirit that we ask the Conference to support the resolution. . . .

81706—9

ADDRESS OF CANADIAN GOVERNMENT DELEGATE

The position of Canada and other federal states in relation to ratifications limited by constitutional jurisdiction was set forth by the Canadian Government delegate, Mr. Wrong, as follows:

Mr. Wrong (*Government delegate, Canada*).—The resolution adopted by the road transport Committee recommends that the Governing Body should undertake a study of the methods whereby Federal States with limited jurisdiction over labour matters may apply labour Conventions to the largest possible number of workers. The report explains how this resolution arose out of an amendment to the draft road transport Convention which was moved by the representative of the Government of the United States. The purpose of the amendment was to add an article permitting a Federal State to ratify the Draft Convention on the understanding that its obligations would be limited to applying the Convention first to persons whose conditions of work were directly regulated by the Federal authority and, secondly, to persons whose conditions of work were regulated by a constituent unit of the Federation (a State or Province) which had undertaken to the Federal authority to apply the Convention.

This amendment gave rise to important legal and constitutional problems. It presented a difficult question of drafting, because of the varying character of Federal jurisdiction in the different Federations, and questions were also raised concerning its validity under the Constitution of the Organization. I do not wish here to go into the nature of these legal difficulties. My purpose is to emphasize the practical importance to the International Labour Organization of finding an answer to the problem.

On examining the table of progress of ratifications, one may notice that the number of ratifications registered by Federal States is small. For example, the United States of America has ratified five Conventions, Australia has ratified eleven Conventions, Canada nine and Switzerland also nine. In the case of the first three countries, the great majority of ratifications relate to maritime Conventions, the reason being that, in them all, control of ocean shipping is within Federal jurisdiction. Yet no one would maintain that social progress in these countries lags behind the rest of the world. At least in Canada the small number of ratifications results from the inability of the Federal Government, because of its limited jurisdiction, to undertake to apply throughout the whole country, to all persons covered by their terms, most of the Conventions which have been adopted by the Conference.

The importance of Federal States in the International Labour Organization is increasing. We all recognize the vitality of the support which has been brought to the Organization by the adhesion of the United States. Another great and prominent Member of the Organization, India, is in process of becoming a Federal State. It may be that in course of time some of the political problems of this Continent may be met through the creation of new federations in Europe.

The provision in the Constitution permitting Federal States to treat Conventions in certain cases as Recommendations has not proved satisfactory. That Federal States should be able to apply international labour Conventions is a matter of growing importance. It follows that it is of growing importance that public interest in the Organization should be maintained and increased inside Federal States. It is a commonplace which still bears repetition that the salt of our discussion in the International Labour Organization comes from the direct participation of representatives of employers and workers. But the real value of our tripartite methods depends, particularly perhaps in the case of the Workers' representatives, on the existence of a lively support at home for the work of the Organization. I think that the Canadian Workers' delegate would agree with me that the interest of organized labour in Canada in the work of the International Labour Office has not been easy to maintain except in certain fields, such as maritime questions, in which, under the Canadian Constitution, the ratification of labour Conventions is possible. A slackening of public interest in the Federal States would be a serious matter for the Organization. An increase of public interest would be of great value. Can this be accomplished if the possibility of ratifying Conventions in some federations is limited to those dealing with a few subjects?

In endorsing this resolution, I therefore wish to emphasize that the solution of the problem which it refers to the Governing Body is not merely a matter of concern to a few Member States; it can and may affect the whole future of the Organization.

ADOPTED RESOLUTION

This Resolution which was adopted is as follows:

The Committee on Hours of Work in Road Transport.

Having considered with great interest a proposal that special provision should be made in the text of the Draft Convention on Hours of Work and Rest Periods in Road Transport to permit ratification by Federal States in which the jurisdiction of the federal authorities is subject to limitations.

Considering that the proposal raises questions of importance not only to the Committee on Hours of Work in Road Transport but to the International Labour Organization as a whole, and

Recognizing the importance to the International Labour Organization of bringing the largest possible number of workers under the protection of the binding obligations of International Labour Conventions,

Recommends that the Conference request the Governing Body to undertake a study of methods of enabling Federal States, whose jurisdiction over labour matters is limited, to assume under future Conventions the obligations of the Convention for the largest possible number of workers, and to submit a report to the Twenty-Sixth Session of the Conference.

Policy of I.L.O. in Case of Emergency

Submitted to the Conference in the form of a communication from the Governing Body of the International Labour Office was a document explaining the decision of the Governing Body as to the attitude to be adopted by the Organization in the event of an acute international crisis, even if such a crisis should unfortunately develop into war. In brief, this decision is to the effect that activity should be continued.

The Governing Body of the International Labour Office, which has had under consideration since October, 1938 the question of the policy of the International Labour Organization in the event of any future international crisis, has adopted unanimously certain proposals upon this subject submitted to it by its Emergency Committee.

As indicated in its report, the Emergency Committee took cognizance of the replies from a certain number of Governments to the communication addressed to them by the Office forwarding the report which the Governing Body had adopted on some of the problems which would arise as regards the International Labour Organization at a time of grave international crisis. It noted with particular satisfaction that a number of these replies, including those from Great Britain, Rumania and Sweden, reaffirmed the principle that the International Labour Organization should endeavour to function as completely as possible if an international crisis should intervene and even if such a crisis should unfortunately develop into war. The Committee also received with great satisfaction similar declarations made on behalf of their Governments by the representatives of France and the United States of America. . . .

The decision of the Governing Body clearly implied that the Office should continue to function in its present premises until this proves impossible.

While indicating the impossibility "to foresee conditions which may supervene in time of an acute international crisis," the Committee pointed to possible eventualities such as greater or lesser degree of industrial disturbance, involving, in the event of a large-scale war "a wide-spread disorganization of economic life" with all countries "facing social problems of great gravity."

The effect of a major war in the opinion of the Committee would intensify labour problems, and on this likelihood the report observed:

Judging from past experience, the existence of a state of war would give a new acuteness to labour problems and lead to a great intensification of social legislation, in belligerent countries as well as in those not engaged in hostilities.

The fundamental problem of real wages, i.e. of the relation between wages and the cost of living, would be of added importance. Adaptations in the light of the best available information would have to be made far more deliberately than in normal times. It was pointed out, for instance, by a member of the Committee that many of the industrial disputes which occurred during the war of 1914-1918 were the outcome of a futile chase of wages after prices, and might have been avoided if there had been a better understanding of the problems and processes involved.

Moreover, it may be regarded as certain that the new distribution of economic activities

which war would necessarily produce would lead to problems of labour supply, certain industries experiencing shortage and others possibly unemployment. In order to avoid these difficulties, measures of different kinds, such as the extension of the functions of employment exchanges, the development of training institutions, substitution, etc., may have to be taken. The problems of fatigue resulting from increased hours of labour and intensification of effort, night work, etc., would also necessarily preoccupy the administrations dealing with labour and social questions.

The report dealt with technical problems arising out of the wide use of new products and processes and emphasized the need of continued co-operation between Governments, employers and workers, thus:—

Even assuming, however, that the Organization were not in a position to discharge concrete tasks, its continued existence as an instrument of co-operation between Governments, employers and workers would, in the Committee's judgment, be of the highest value. The degree of co-operation which is achieved to-day has not come into existence automatically. It is the outcome of the uphill work of twenty years, which has created a tradition which will die unless it continues to grow. If that tradition were now allowed to perish, it might well take an equal period to re-establish the degree of influence which the Organization enjoys to-day. No one who is conscious of the acuteness of the social problems which another war, whatever its result, would inevitably bring in its train, can contemplate without the gravest disquiet any diminution in the influence of the Organization as an instrument of co-operation between Governments, employers and employed during the difficult period that is likely to follow immediately upon the termination of hostilities.

Technical and Vocational Education

The Conference considered a Draft Recommendation which was submitted by the Advisory Committee on Technical Education.

This is designed to ensure a good organization of the vocational training of the workers.

Regarded as one of the most important problems in many countries, where large-scale unemployment in certain branches of economic activity is accompanied by a lack of skilled labour in other branches, it was, therefore, necessary to train skilled workers, capable of adapting themselves to the changing methods of production.

With this end in view, the Conference was asked by its Committee to "recommend" a certain number of principles which each State Member should apply on its territory to ensure that this training occurs in the best possible conditions.

The first objective was that the work of the various official and private institutions in each country which deal with vocational training should, while ensuring free play to initiative and adaptability to the requirements of the different industries, regions and localities, be co-ordinated and developed on the basis of a general programme.

81706—9½

The Recommendation then dealt, in succession, with "prevocational" preparation, that is to say with the preparation which all children should receive within compulsory education, and with technical and vocational education.

A network of schools should be established in each country, adjusted as regards number, location and curricula to the economic requirements of each region or locality and affording the workers adequate opportunities for developing their technical or trade knowledge.

Measures should be adopted to ensure that, in the event of economic depression or financial difficulty, the supply of trained workers necessary to meet future requirements is not imperilled by a reduction in the facilities for technical and vocational education. For this purpose, consideration should be given particularly to the grant of subsidies to the existing schools and to the provision of special courses to make good the loss of opportunities for training caused by unemployment.

In countries in which a sufficient number of vocational and technical schools has not yet been established, it would be desirable that undertakings of such a size as to make such arrangements practicable should meet the cost of training a certain number of young workers determined according to the number of workers employed by the undertaking.

Admission to technical and vocational schools should be free.

Attendance at such schools should be facilitated as circumstances require, by the grant of economic assistance in such forms as free meals, provision of working clothes and implements, free transport or reduction in the cost of transport, or maintenance allowances.

The curricula for technical and vocational schools should be so drawn up as to protect the future vocational adaptability of the workers.

Workers of both sexes should have equal rights of admission to all technical and vocational schools, provided that women and girls are not required to engage continuously on work which on grounds of health they are legally prohibited from performing.

The Recommendation also dealt with the vocational training to be given to young persons before and during employment.

In this connection, the chief point is that opportunities for extending their technical knowledge by attending part-time supplementary courses should be provided for all workers, whether they had or had not received vocational training before entering employment.

The time spent by apprentices and other young workers who are under an obligation to attend supplementary courses in attending

such courses should be included in normal working hours.

Then come measures to be recommended for co-ordinating technical education with a country's economic activities. To this end close collaboration should be maintained between technical and vocational schools and the industries or other branches of activity concerned, particularly by the inclusion of employers and workers in the governing bodies of the schools or in advisory bodies attached to the schools.

The Recommendation dealt with the conditions in which it would be desirable to organize examinations on termination of technical and vocational training, the qualifications to be required from candidates for each occupation and the recognition of certificates issued as a result of these examinations, etc.

It sets forth the principle that occupational organizations of employers and workers should assist the competent authorities in the control of these examinations, and also the principle that persons of both sexes should have equal rights to obtain the same certificates and diplomas on completion of the same studies.

Regional, national and international exchanges of students who have completed their training would be desirable so as to enable them to acquire wider knowledge and experience.

The Recommendation concludes by laying down general rules for the recruiting of teachers responsible for theoretical and practical courses in undertakings providing technical and vocational education. In order to ensure the constant improvement of the qualifications of teachers, it emphasizes, in particular, the necessity of regular contacts between teachers and such undertakings.

The Conference appointed its own committee to study the clauses in a Blue Report on the subject. From the amended Blue Report, this committee produced a Draft Recommendation which was adopted by a vote of 110 to 0. (The text of this adopted Recommendation is given at the conclusion of this article).

Apprenticeship

Supplementing the Draft Recommendation on vocational training, the Conference considered and subsequently adopted a Draft Recommendation dealing specially with apprenticeship.

Among the various forms of vocational training it is considered that apprenticeship raises special problems, particularly because it is given in the undertakings and involves contractual relations between the master and the apprentice.

In the texts submitted to the Conference, it was stated that the expression "apprenticeship" means any system by which an employer undertakes by contract to employ a young person and to train him or have him trained systematically for a trade for a period the duration of which has been fixed in advance and in the course of which the apprentice is bound to work in the employer's service.

The Recommendation before the Conference indicated a number of principles which are summarized in the following paragraphs:

Young persons should not be allowed to enter into apprenticeship until they have reached a fixed age, which should not be below the age at which school attendance ceases to be compulsory. Entrance into apprenticeship should in every case be subject to a medical examination.

Provision should be made for the registration of apprentices with appropriate bodies, and, where necessary, for the control of their number. Arrangements should be made to facilitate the transfer of an apprentice from one employer to another in cases where transfer appears necessary or desirable in order to avoid interruption of the apprenticeship or to complete the training of the apprentice or for some other reason.

The requirements of form to be complied with in contracts of apprenticeship and the terms to be contained in them should be specified, in particular by the drawing up of a standard contract.

Contracts of apprenticeship should contain provisions in regard to any remuneration in kind due to the apprentice and other payments due from the employer and in regard to the apprentice's holidays with pay.

It would be desirable that the parties concerned in apprenticeship and more particularly the organizations of employers and workers should collaborate with the official bodies responsible for the supervision of apprenticeship.

Close collaboration should be maintained between the bodies responsible for the supervision of apprenticeship and the general and vocational education authorities, the vocational guidance institutions, the public employment exchanges and the labour inspection authorities.

The Conference Committee on Technical Education studied the proposals submitted in a Blue Report and prepared a Draft Recommendation. This was adopted by the Conference by a vote of 110 to 0. (The text of the Recommendation, as adopted, is given at the conclusion of this article).

Regulation of Contracts of Employment of Indigenous Workers

The Conference considered and adopted two proposed Draft Conventions and two proposed Recommendations with a view to the

regulation of contracts of employment of indigenous workers.

These regulations are the logical result of the work undertaken by the International Labour Organization for the protection of indigenous workers. Already there have been two important stages in this work: the adoption of a Convention for the suppression of forced or compulsory labour (in 1930) and of another Convention regulating the recruitment of indigenous workers (in 1936).

The first Draft Convention dealt with *written* contracts of employment of indigenous workers. It applies to contracts of employment by which an indigenous worker enters the service of an employer as a manual worker for remuneration in cash or in any other form whatsoever. The competent authority may exclude from the application of this Convention contracts by which a worker enters the service of an indigenous employer who does not employ more than a limited number of workers, and any contract of employment by which the only or principal remuneration granted to the worker is the occupancy or use of land belonging to his employer.

The Draft Convention also contains a whole series of guarantees for indigenous workers.

This Draft Convention is accompanied by a proposed Recommendation completing it by stating certain general principles which appear well fitted to guide the policy of Governments in fixing the maximum period of service of written contracts.

A second Draft Convention dealt with penal sanction for breaches of contracts of employment by indigenous workers.

Finally a second proposed Recommendation asks Governments to create a labour inspection service in such of their colonial territories as do not have one at present.

(Since this problem is not one of particular application to Canada it has not been considered necessary to reproduce the verbatim text.)

Recruiting, Placing and Conditions of Labour (Equality of Treatment) of Migrant Workers

The Conference adopted proposed Draft Convention and two Draft Recommendations which have been submitted to it by the Committee to which it had entrusted the examination of the problems of recruiting, placing, and conditions of labour (equality of treatment) of migrant workers.

These texts are the product of prolonged study and effort on the part of the International Labour Organization, extending over a number of years. The background is set forth in the following paragraphs released by the I.L.O.

The world economic crisis very seriously weakened and upset migration currents. Afraid that an overflow of immigrants would aggravate the unemployment from which their nationals were suffering, many Governments introduced measures of restriction and the problem of regulating migration thus called for the general attention of emigration and immigration countries.

After being brought almost to a complete standstill in recent years, migration currents, particularly among salaried employees, have for some time shown a tendency to revive in many places. Since then there has been a desire that States should no longer find themselves unprepared for a fuller development of this resumption. Many countries are now realizing the importance of all the problems involved; and there is a wider recognition that States cannot remain indifferent to such migration movements, the success or failure of which is an extremely important factor in the harmony of international political and economic relationships.

The Committee considered that any attempt at international regulation of migration should deal first with the control of propaganda relating to emigration and immigration, the repression of harmful and misleading publicity and the maintenance, in various countries, of appropriate services to supply information and give assistance to emigrants and immigrants.

In the second place the Committee considered that there should be adequate guarantees that the operations of recruitment, introduction and placing of migrant workers were carried on properly and that these workers were protected against the abuses to which they were exposed, the bodies and persons engaging in these operations requiring authorization and coming under control.

Finally, the Committee considered that the conditions under which migrants admitted to employment in immigration countries worked should be under proper control, in order to protect them against the danger of exploitation and, at the same time, to ensure that their labour did not have a harmful effect on the conditions of employment of national workers.

The proposed Draft Convention submitted to the Conference deals with all these problems.

The proposed Draft Convention is accompanied by a Draft Recommendation giving, in greater detail, the principles which States are asked to bear in mind in the practical application of the above provisions.

A second Draft Recommendation asks the States concerned to supplement the measures which they take nationally by concluding bilateral or plurilateral agreements and by co-

operating in the handling of the various administrative questions raised by the recruitment, placing and conditions of labour of migrants for employment.

(Since this problem is not one of particular application to Canada it has not been considered necessary to reproduce the verbatim text.)

Hours of Work and Rest Periods in Road Transport

The Report of the Committee on Road Transport, which the Conference considered and adopted in amended form, contained a Draft Convention, four Draft Recommendations and a Resolution, dealing with the regulation of hours of work and rest periods of professional drivers (and their assistants) of vehicles engaged in road transport.

There were several reasons why the Governing Body of the I.L.O. decided to put this question on the Agenda. It was considered that road transport, becoming more and more important, also has, frequently, an international character and consequently it is necessary to unify the regulation of working conditions and to promote such regulation where it does not yet exist. This problem is closely bound up with that of safety. When drivers' working hours are too long there is not the same degree of safety.

The proposed Draft Convention, drawn up by the Committee on the basis of the text prepared by the I.L.O. after the consultation of the Governments, defines, in the first Article, the scope of the Convention as regards persons and vehicles.

On these points there was an important difference of opinion between the majority of the Committee and the Employers' Group. The latter by an amendment endeavoured to exempt owner drivers from the scope of the Convention. This amendment was defeated by a vote in committee whereupon the Employers' group reserved the right to bring the question before the Permanent Court of International Justice, contending that the International Labour Organization is not competent to deal with this category of persons.

The proposed Draft Convention then defines, for the purposes of the Convention, the term "hours of work." In Article 5 it fixes these at 48 hours per week, while permitting the competent authority to authorize higher weekly limits for subsidiary work and work frequently interrupted by periods of mere attendance.

Article 6 permits weekly hours of work to be calculated as an average; while Article 7 embodies the principle of the 8 hour day, which may, however, be exceeded by not more than one hour per day provided that this excess does not cause the 48 hour week to be exceeded.

The following Articles indicate the conditions in which the competent authority can allow the limits fixed to be exceeded, particularly as a result of accidental causes, or in case of *force majeure*, or a shortage of indispensable skilled labour.

The clauses relating to overtime permit a maximum of 75 to 100 hours overtime per annum, according to circumstances, and a minimum overtime rate of remuneration of 1¼ to 1½ times the normal rate.

Articles 14, 15 and 16 stipulate the daily and weekly rest periods which the persons to whom the Convention applies must enjoy. In principle the rest period must comprise at least 12 consecutive hours in a period of 24 hours and 32 consecutive hours during each 7 days.

Finally the proposed Draft Convention, in Article 18, provides for a system of supervision of the Convention; comprising the possession of an individual control book by each driver during his hours of work and the keeping by each employer of a record of the hours of work and rest periods of the persons employed by him.

This Draft Convention is completed by 4 Draft Recommendations.

The first concerns individual control books in road transport.

The second deals with night work in road transport. The competent authority should determine the classes of transport in which it would authorize night work and should define night work.

The third deals with the method of regulating hours of work in road transport. The competent authority must ensure the effective regulation of the weekly and daily hours of work by the active encouragement of voluntary joint collective machinery established by agreement between organizations of employers and workpeople or by the establishment of statutory machinery operated in consultation with such organizations.

The fourth Draft Recommendation concerns rest periods of professional drivers of private vehicles. It recommends that the competent authority should be requested to draw up regulations to include provisions applicable to professional drivers of private vehicles used solely for personal services which will provide for the observance of minimum daily and weekly rest periods.

Finally, in a Resolution, the Committee has embodied an amendment moved by the United States Government representative requesting the Governing Body of the I.L.O. to undertake a study of methods which would enable federal States to accept the obligations resulting from the Convention. (This resolu-

tion has already been dealt with previously in this article).

As indicated previously in this article, the Draft Convention, the four Recommendations and the Resolution (dealing with the position of Federal States in regard to Conventions) were adopted by the Conference, and the texts of the Convention and Recommendations will be found at the conclusion of this article.

In addition to Mr. Wrong, Canadian Government delegate, who spoke in support of the Resolution (as already recorded in this review), Mr. Goldie, Canadian Employers' delegate, addressed the Conference on the road transport question. His address was as follows:

On behalf of a large majority of the Employers' group I wish to make a few remarks concerning the proposed Convention and Recommendations dealing with the regulation of hours of work and rest periods of professional drivers of vehicles engaged in road transport. The statement I am about to make will explain the stand that the majority of employers will take on the Convention and Recommendations.

First let me say that the proposed Convention covers owner-drivers as well as professional drivers in the employ of others. The Employers' group has always held that it is not within the competence of the International Labour Organization to deal with owner-drivers and others like them who work on their own account, and they still maintain this position. However, to save the time of this Conference, they have decided that no useful purpose would be served by introducing at this stage an amendment to exclude owner-drivers.

The regulation of working hours of professional drivers can be approached from two points of view, from the safety point of view and from the social and economic standpoint. From the first, the Employers' group had agreed that a safety Convention is desirable and practicable; requirements of safety are more or less the same in all countries. It seems regrettable that an opportunity to provide adequately for safety on the roads of the world has been missed.

The Draft Convention and Recommendations now before us attempt to deal with the problem of road transport from the social as well as the safety point of view. It is unsatisfactory in both respects. At the beginning of the Committee's sittings the Employers made the following statement: "The Employers' members are prepared to discuss all the points of the Draft Convention, but since there exists already a 48-hour Convention applicable to all industries, the Employers are prepared to discuss the points of the Draft Convention solely from the standpoint of road safety."

The amendments they have introduced from time to time in the Committee, almost all of which were rejected by the Committee, were intended to give effect to this declaration.

The Employers' group adopted the attitude just mentioned because they had come to the conclusion, after a careful review of the whole position, that the regulation of the hours of work and rest periods of professional drivers of road transport vehicles from the social standpoint was not a suitable subject for international regulation.

They arrived at this conclusion for several reasons. There is little, if any, direct international competition in road transport, and this fact would seem to make the subject one for national rather than international regulation.

The advantages of purely national control become even more obvious when it is remembered that conditions of transport vary greatly from country to country. Regulations can only be adequately determined by each country according to the conditions existing in that country, its size, the length of hauls, climate, detentions at docks, hours of daylight, etc.

The difficulty, one might even say the impossibility, of international regulation in the face of such varying conditions was strongly emphasized by the differences of opinion that prevailed within the three groups themselves at the Committee, and by the large number of amendments offered to a draft that had been carefully prepared by the Office.

It is the opinion of these employers who come from countries in which adequate machinery exists, that the best method of regulating road transport is by voluntary collective bargaining between the employers and employees. It is they who are intimately acquainted with the conditions prevailing in their own countries. But the adoption of a Convention that settles beforehand all the main points deprives collective bargaining of most of its advantages and of its voluntary character.

The road transport industry cannot be organized like a factory; indeed, it is hardly correct to describe it as an industry at all. Rather it is the handmaiden of industry, and as such must adapt itself to meet the needs of all other industries, and it can only be successful when it does meet these needs. Flexibility is its dominant need, and this would indicate that it is almost the last industry to which a Convention should apply.

While there is little international competition in road transport, there is on the other hand very severe internal competition. It constitutes a severe handicap if hours of road transport workers are regulated while those of workers in competing forms of transport are not.

The Employers are naturally not opposed to regulation of hours of road transport from a safety standpoint, but believe that in an international Convention these hours should be put at the highest level compatible with safety, leaving each country within these safety limits, to regulate hours from a social standpoint by whatever means are in force in each country. It should also be remembered that regulation is not synonymous with limitation, and may take some other form, such as requiring the employer to make a penal payment in certain circumstances.

For these reasons, the majority of the Employers, while they would welcome a safety Convention, reluctantly find themselves compelled to vote against the Convention as a whole, but will abstain from voting on the individual articles.

Similarly, the majority of the Employers will vote against the four Recommendations, as they cannot be regarded as being separate from, but rather are bound up with, a Convention to which we are opposed.

Reduction of Working Hours in Industry, Commerce and Offices

This subject constituted the fifth item on the agenda and the Conference adopted a Resolution for its postponement by a vote of 90 to 2.

The following was the Resolution submitted by the delegates of the Governments of the United States, France, Belgium, Denmark and Norway:

The Conference,

Having taken note of the results of the consultation of Governments with regard to the generalization of the reduction of hours of work in industry, commerce and offices; and

Recognizing that many Governments would find it difficult to assume an international obligation in this respect at a time when economic activity and the development and enforcement of social legislation are gravely affected by the prevailing political insecurity, as a result of which a large number of countries have found themselves obliged to carry out extensive programs of armament and national defence;

Decides, in these exceptional circumstances, not to proceed at the present session with the examination of the generalization of the reduction of hours of work in industry, commerce and offices, although the question will be kept before the International Labour Organization; and

Invites the Governing Body to place this question on the agenda of a later session of the Conference as soon as such action is warranted by an improvement in the international situation.

Reduction of Working Hours in Coal Mines

As in the case of the preceding item of the agenda, this question also was postponed. The Conference unanimously approved of the report of the Committee on Hours of Work in Coal Mines which contained the following Draft Resolution:

The Conference,

Having taken note of the results of the consultation of Governments with regard to the reduction of hours of work in coal mines;

Noting that in their replies to the questionnaire the Governments most directly concerned with the question of hours of work in the coal-mining industry, have for the most part declared themselves favourable to the principle of the reduction of hours of work in this industry;

But recognizing further that many Governments would find it difficult to assume an international obligation in respect to the reduction of hours in coal mines at a time when economic activity and the development and enforcement of social legislation are gravely affected by the prevailing international political insecurity, as a result of which a large number of countries have found themselves obliged to carry out extensive programs of armament and national defence;

Decides, in these exceptional circumstances, not to proceed at the present session with the examination of the reduction of hours of work in coal mines, although the question will be kept before the International Labour Organization; and

Invites the Governing Body to place this question on the agenda of an early session of the Conference as soon as such action is warranted by an improvement in the international situation.

Application of Conventions

The report of the Committee on the Application of Conventions comprehensively reviewed its work in examining the application of Conventions by countries. The report contained an appendix in which there appeared a statement by Mr. Wrong, one of the Canadian Government delegates, in which he set forth the position of Canada with respect to the application of Conventions Nos. 1 (Hours of Work in Industry); 14 (Weekly Rest in Industry); and 26 (Minimum Wage Fixing Machinery). Reference was made to this statement in the appendix of the Committee's report as follows:

With reference to the observations made by the Committee of Experts concerning the application of Conventions Nos. 1, 14 and 26 by Canada, a representative of the Canadian Government stated that his Government fully accepted the view that international labour Conventions were legal obligations and not merely pious aspirations or expressions of good intentions, and explained the circumstances in which the legislation which had been passed to implement these three Conventions had been declared, *ultra vires* of the Dominion Parliament, which made it impossible for Canada for the time being to enact the necessary measures of application. The Royal Commission which was appointed in 1937 to re-examine the economic and financial basis of the Canadian Federation and the distribution of legislative powers therein was expected to present its report in the course of the present summer. When the report of the Royal Commission was available and the necessary decisions had been taken in the light of its recommendations, the situation in respect of these three Conventions would be clarified. His Government recognized that the present situation should not be permitted to continue indefinitely, and expected to be in a position to indicate, in the annual reports for next year, that positive measures were being taken.

The Committee took note of this statement.

Employment of Women

Matters relating to the employment of women came before the Conference in two resolutions (submitted by the Workers' delegates of France and the Netherlands, respectively) which were referred to the Resolutions Committee. This committee secured the consent of the respective movers to have the two proposed measures combined in a single Draft Resolution, the text of which follows:

"Considering that it cannot yet be said that a satisfactory solution has been found for the problem of the equality of women in industrial and public life and that there remains much to be done before women receive equal rights with men, the International Labour Conference recognizes that one of the tasks of the International Labour Office is to raise the position of women workers throughout the world.

"The Conference notes with satisfaction the facts set forth in the report of the International Labour Office entitled *The Law and Women's Work* concerning the improvement in the conditions of employment of women, in particular as regards maternity protection; the Conference appreciates the efforts accomplished by the International Labour Organization in this connection. The Conference recognizes the great importance of the laws for the protection of

women, prohibiting night work and employment in dangerous and unhealthy trades, but emphasizes that it is urgently necessary for the health of all workers to be protected by legislation.

"The Conference recognizes the importance of the principle of equality of pay, and asks that the International Labour Office should complete its enquiry into present practice as quickly as possible, so as to enable the Governing Body to draw its conclusions."

The Resolution was adopted without a vote.

Judicial Bodies for Enforcement of Labour Legislation

The Resolutions Committee of the Conference transmitted the following Resolution concerning judicial bodies for the enforcement of labour legislation and the rapid functioning of such bodies (submitted by the entire delegation of Venezuela):

"Whereas it is desirable that, parallel with the development and standardization of labour legislation, the judicial bodies entrusted with its enforcement and the procedure followed for this purpose should develop on the same lines, since these various aspects of labour law play equally important parts in social questions;

"Whereas, although the judicial systems and their procedure must necessarily be based on the legal conceptions and circumstances peculiar to each country, special courts for the enforcement of labour legislation and the procedure they follow may well be based on certain general principles, without interfering with those conceptions and special circumstances;

"Whereas the existence of special courts and of a speedy and adequate procedure has given satisfactory results in the decision of questions relating to the enforcement of labour legislation;

"The Conference requests the Governing Body of the International Labour Office to consider the desirability of placing on the agenda of one of the next sessions of the Conference a question concerning special courts for the enforcement of labour legislation and the functioning of such courts in a speedy and adequate manner."

The Resolution was adopted without a vote.

Encouragement of I.L.O. Activities

The Conference adopted, without a formal vote, the following Resolution concerning an enquiry into the methods followed in order to encourage the development of the activities of the International Labour Organization in various countries:

Considering that it would be of great value to the three elements of which the International Labour Organization consists (Governments, Employers and Workers) to possess information concerning the methods followed in the various countries in order to encourage the development of the activities of the International Labour Organization in the national sphere, either by preparing for and facilitating the ratification of the Conventions adopted by the International Labour Conference or by making the work of the International Labour Organization better known among those concerned;

Considering that any measures intended to generalize the application of such methods would be of the greatest interest;

The Conference expresses a wish that it may be given an opportunity of undertaking a general discussion and exchange of experiences on this subject at its next session.

Director's Report, Discussion, and Director's Reply

Featured by a review of the world political crisis, as well as an analysis of the social economic situation, the annual report of the Director of the International Labour Office, Mr. John G. Winant, to the twenty-fifth session of the International Labour Conference, again presents a composite picture of world affairs in all their related problems. The following summary of this comprehensive report has been published by the International Labour Office:—

The International Labour Organisation and the World Situation

In a brief foreword the Director remarks that just as the world economic crisis caused the Organisation to expand its activities to meet the demands made upon it and thereby enlarge its influence and membership, so the present international political crisis calls, not for the contraction of activities, but for an increasing effort and greater energy. In particular, when the way becomes open to a lasting peace, the Organisation should have ready a practical social program that would assure to the common people recognition of their ultimate needs.

The work which this Organisation has done in the past shows what a contribution it could make to real international co-operation owing to its unique representative composition, which includes not only persons representing Governments, but also persons representing the great associations of employers and workers. The International Labour Conference has already, on many occasions, put forward ideas which have had a favourable influence on the development of international co-operation.

> "Meeting in Washington in 1919 in the midst of the bitterness of war disillusionment, the first International Labour Conference invited Germany and Austria to immediate membership. The rightness of that decision has never been questioned. When the problem of reparations was under taboo, it was the initiative of the Labour Conference that brought it into the open for examination and discussion. And again, it was an Italian Labour Delegate at the Washington Conference who first proposed that there be created some system of distribution under international control for the fair allotment of the raw materials of the world.
>
> "Long before the World Economic Conference of 1927 was called, a workers' delegate proposed the convocation of an international Conference, which should comprise qualified representatives of all the important organised economic factors: commerce, industry, agriculture, labour and consumption. When the history of the efforts towards international understanding during the last twenty years is written, I am confident that these initiatives taken at the Conference will be given a high place in the record."

In present circumstances, it is inevitable that delegates should be more than ever concerned

with the general situation, which gives rise to profound and universal anxiety. It is not an easy matter for a non-political organisation to continue its work, because the tasks it must perform are necessarily influenced by the disturbances and confusions of the world to-day.

"But I am certain"—adds Mr. Winant—"that neither Member Governments nor non-Member Governments would wish to see the International Labour Organisation used as an agency of foreign policy in the field of politics. On the other hand, in approaching labour and social problems we are forced to face the economic consequence of war and peace. This holds whether it be in relation to trade conflict or war economy."

The effect of military preparations on the daily life of the peoples is a question which concerns workers. The present state of "near war," though not so destructive as war in immediate effect, produces results which are not wholly dissimilar in a slower though no less certain way.

"The present state of armed peace means the speeding up of production, a concentration of productive energies on non-productive activities, the diversion of groups of the population to military service, the decrease of the supply of labour relative to the demand, the rapid increase in public budgets and the necessity of having recourse to loans to meet military expenditures, the inflationary effects of such fiscal policies, an inevitable tendency towards a rise in the cost of living and the hardship which that necessarily entails on the masses of the population. As these manifestations are prolonged, they become steadily aggravated and the wastage they involve is not very different from that which would be produced by war itself. Their social consequences do not need to be underlined to a body such as the International Labour Conference.

"The desire to speed up production leads to a prolongation of hours of work, with resulting danger to the health and safety of the workers. The standards set by protective legislation and by collective agreements with regard not only to adult workers but also to young persons are endangered. These developments, combined with the tendency for wages and earnings to fall behind prices as a result of inflationary conditions, lead to friction between employers and workers over the whole area of industrial life unless foresight and constructive action prevent. An attempt should be made to anticipate the needs arising from these situations and to outline a basis for international action.

"Rearmament cannot continue at the present rate of acceleration without eventually absorbing so much of the national income of many countries as will prove intolerable. A point may come when defence expenditure will cause actual starvation in the lower income groups. Before this happens, it may be hoped that some general international settlement will intervene. But it must be realised that even in this case most countries of the world would have to face the tremendous problems of readjustment to a peace-time economy. Serious economic re-employment problems will arise demanding urgent solution. Some means of absorbing the workers thrown out of employment by the slowing down of armament production—or, in other words, of facilitating the change-over of industry from armaments to normal peace-time production—will have to be devised."

It is pointed out that the International Labour Organisation can, owing to its structure, make an invaluable contribution to this task provided that it has at its disposal the necessary resources.

The Director of the International Labour Office says that it is normal and indeed inevitable that "in present circumstances the minds of statesmen should be concentrated on the problem of the security of their countries." He continues as follows:—

"I would not say one word which would weaken the determination of the Member countries to protect themselves against aggression and to preserve those democratic institutions which are the hope of mankind. More quickly than we have dared to believe, that very determination may give us a new chance for security and peace without war. At the present time, the invitation of President Roosevelt to a general economic conference still stands. I hope and believe that an exchange of views by the nations may pave the way toward that enduring peace that was hoped for so fervently in 1919 by a weary soldiery and a war-torn world. For this too we should be prepared. It may mean for us the opportunity to clarify the social objectives of a lasting peace. The workers will measure the value of any settlement by the improvement that it brings to the conditions under which they live and work. It should be our part to have ready a practical social program that would assure to the common people recognition of their ultimate needs. . . ."

The Economic Setting

In the first part of the report, under the title of "The Economic Setting," the Director notes, first of all, that the most striking feature of 1938 was the impact of international disturbances and war preparations upon the widespread tendency of industry and trade towards substantial improvement. During the first half of the year the economic system in most countries was showing signs of a new depression; by the middle of the year Governments in many countries had adopted measures to counteract this, with considerable success; but by the end of 1938 the resulting upward movement was checked largely by the international tension, which made national defence and armaments production the paramount considerations. While this situation leads to considerably increased employment in the industries directly or indirectly affected, it has unfavourable effects on other branches of economic life, since people become increasingly afraid to commit themselves to long-term investments while they fear that a war may intervene to rob these of all value.

This chapter surveys the different measures adopted for meeting the depression; long-range Government investment policies; agricultural policies; economic problems of rearmament; international trade; migration; and the special problem of refugees. In connection with the last-named, it refers in particular to proposals for agricultural colonisation, and expressly points out that such proposals cannot by themselves provide a solution.

"Here, as in the still greater problem of unemployment, there is no full solution, short of such an organisation of the world economy as will make use of the full capacities of mankind in the production of the goods and services needed for the raising of the standard of life."

Conditions of Work

In the next chapter the Director deals with conditions of work. The percentage of unemployment, he shows, remains high in spite of the measures adopted in many countries to cope with it. Increasing attention, he notes, has been given to the question of elderly workers, the vocational training of young persons and the vocational retraining of the unemployed.

As regards wages and hours of work, it appears that in every country except Germany and Japan, real hourly wages have been maintained above the level of 1929. The situation in regard to the shorter working week, on the other hand, is much more complex.

"The attainment of the reduced work week, however, remains a permanent problem of social and economic policy. The evidence points to a realisation of shorter working hours as one of the great additional benefits that will be assured to workers when nations will agree to a just and stable peace."

The Standard of Life

In the third chapter, which is entitled The Standard of Life, Mr. Winant deals with social insurance; nutrition; housing; holidays and recreation; distribution of income; and the standard of life of indigenous workers. He draws attention to the rapidity with which the movement for holidays with pay has spread throughout the world, so that there are now 23 countries which have adopted legislation providing paid holidays for workers in industry and commerce, while 14 others have laws which give paid holidays to certain classes of workers, and in many industrial countries where there are no such laws, the system of paid holidays is nevertheless widespread.

Referring to the question of distribution of income, the Director makes the following statement:—

"During the twenty years since the close of the World War the standard of life in most countries has greatly advanced. Widespread unemployment has impeded progress, but the underlying conditions have continued to improve. The extension of social insurance and the increasing attention given to nutrition, housing, holidays and recreation are typical of a new outlook. Yet in all countries some proportion, and in most countries a large proportion, of the population live in circumstances of the most abject poverty. . . .

"From estimates such as these it is not possible to draw rigidly scientific conclusions. But there are certain human inferences that are inescapable. If in a country such as the United States there is a 'submerged tenth' or a submerged fifth even of families who are terribly poor, what can be said of the situation in countries where the average income is only half or a quarter or a tenth of that in the United States? The great mass of mankind still lives in a state of intolerable poverty.

"Two things are principally required: that the poorer countries should have the means of obtaining the necessary training and equipment; and that they should have the fullest possible opportunity of buying and selling on the world market. With modern methods of production, access to raw materials and a ready market for their goods, it is possible for peoples at present sunk in poverty to attain a civilised standard of life. But this, as has already been indicated, can only come about as a result of co-operative action to clear the channels of international investment and international trade."

Achievements of I.L.O. in 20 Years

In the final chapter, entitled Twenty Years, the Director briefly surveys the history of the I.L.O., and gives an account of its work under the headings The New Internationalism; The International Labour Code; and the International Civil Service.

The principal function of the Organisation, as laid down in its Constitution, is the building up of what may be called the International Labour Code. It has adopted 63 Conventions, and the number of ratifications received was 839 on 15th March, 1939.

"In spite of the disturbed circumstances in many countries, the upward movement of ratification has not faltered. During the twelve months ending 15th March, 1939, 57 new ratifications were recorded, the largest number since 1935-1936. Over two-thirds of these ratifications came from non-European countries, including 22 from New Zealand, 5 from the United States and 4 from Brazil. In the case of Iraq and Turkey, moreover, as well as New Zealand and the United States already mentioned, the ratifications were the first to be registered by these countries."

In addition to the direct influence which Conventions exercise when they are ratified and embodied in national legislation, they also exercise an indirect influence. Their existence sets up a standard which public opinion gradually tends to accept as normal, and one result of this is that they act as a check on any tendency to allow conditions of work to be depressed below that level in times of difficulty. If the differences which exist in labour legislation now and twenty years ago are studied, there can be little doubt that the direct and indirect influence of the Conventions has been considerable.

The Report of the Director gives a very few striking examples of this.

The Convention of 1919 concerning the 8-hour day and the 48-hour week in industry has been ratified by 23 countries. Its actual influence has been much greater than that figure would seem to indicate, for in every part of the world it has been the fundamental basis for efforts to generalise the 48-hour week and it has inspired many laws and regulations, even in countries which have not ratified it.

The Convention concerning the employment of women before and after childbirth set up standards considerably in advance of current legislation at the time when it was adopted. It has been ratified by 16 countries. In 1919, only one State provided for the total of 12 weeks' leave laid down in the Convention. In 1939, 25 States made provision for 6 weeks leave before childbirth and 31 for 6 weeks' leave following childbirth.

The series of Conventions fixing the minimum age for admission to employment in industry, on board ship, in agriculture and in non-industrial occupations at 14 have been widely ratified. The three revised Conventions raising the minimum age to 15 are in advance of legislation in a large majority of countries, but they have already induced several countries to adopt or consider the adoption of the higher minimum age.

The 15 Conventions on various aspects of social insurance have received 136 ratifications, and the definite undertakings given by States checked any tendency to lower the standard of social insurance during the recent depression.

The 13 Conventions dealing with maritime questions go far to constitute an international seamen's code. Some of the older Conventions have practically reached saturation point as regards ratification.

The influence of the Conventions concerning indigenous labour has been felt even in the territories of States which have not yet ratified them. Thus the Forced Labour Convention may be said to have set the standard for colonial policy in regard to the use of forced or compulsory labour. In addition, the application of the general Conventions in colonial territories, subject to modifications designed to adapt them to local conditions, has greatly developed.

In addition to the 63 international labour Conventions, 56 Recommendations have been adopted by the Conference in the last 20 years.

As is well known, Recommendations, though made the subject of the same intensive preparation and discussion as the Conventions, do not involve a formal international obligation. They lend themselves particularly to the treatment of measures which are still in the formative stage, or to the laying down of a more detailed line of policy than would be suitable in a Convention.

The International Labour Organisation has thus, in the past 20 years, travelled a long way in establishing an international labour code. It has, however, become clear that the real utility of such a code could be greatly enhanced if the Organisation did not confine itself to setting up standards but also did something to bring about the necessary organisation and co-ordination of social policy, on which the improvement of living and working conditions depends. A shifting of emphasis in this direction has taken place, especially in the last few years.

The recent conferences on the coal-mining industry, rail transport, the textile industry and migration for settlement, and still more the work of the International Public Works Committee, are characteristic of this new emphasis.

The Report of the Director goes on to describe briefly the development of the work of the International Labour Office itself and more particularly its publications. The latter deal with most of the principal social and economic problems of the day.

The Report draws attention to the very special character of the research work which the International Labour Office carries out, and in which it always deals with questions from the international point of view. The Report explains how, in relation to the attempt to remedy the economic depression and unemployment, the work of the Office, based as it is on wide international experience, has guided world opinion towards the most effective solutions.

The studies made of silicosis, the standardisation of labour statistics and the improvement in their comparability, etc. also illustrate the importance of the research work of the International Labour Office.

The Director concludes that the need for such an instrument as the International Labour Organisation is no less in 1939 than it was in 1919; in some ways it is even greater.

> "So long as the Organisation can count on the support of the three elements—Governments, employers and workers—on which it is founded, it will be able to continue its struggle for social justice, and for the fulfilment of the promise of which Abraham Lincoln once spoke—the 'promise that in due time the weights would be lifted from the shoulders of all men and that all should have an equal chance.'"

Discussion and Reply of Director

The above report of the Director was dealt with in all its phases during a number of sessions of the Conference with 62 speakers participating in the discussion thereon.

The Director made his reply to the discussions on June 22 and comprehensively covered the numerous points developing from the analysis of his report by the various speakers.

On the question of hours of work, the Director declared that when the need for armaments had been removed and the world returned to collaboration, the workers could look forward to the 40-hour working week.

All delegates had agreed that the standard of life and the international labour code were basic objectives of the Organization.

He had been happy to find that holidays with pay and the use of leisure time had had the interest and support of members of the Conference.

The Director then referred to suggestions for a special study of family allowances, to which he attached particular importance. He also expressed the hope that an exchange of views might take place next year on the question of industrial relations.

The Director thanked the many delegates who had expressed their faith in the Organization, and their determination that it should continue even in the case of war.

The work of the last few months had been to consolidate the position and clarify the Organization's fields of service. The Director referred to the possibility that a sudden change for the better in the world political situation might result in a serious unemployment problem through the change over of industry from armaments to normal production. If, on the other hand, the situation should suddenly degenerate into war, it seemed certain that there would be new acuteness in labour problems and new duties thrown upon the Organization. The work that the Office might undertake in that event had been outlined in the report of the Emergency Committee of the Governing Body.

Texts of Draft Convention and Recommendations

Following are the texts of: (1) Recommendation concerning vocational training; (2) Recommendation concerning apprenticeship; (3) Draft Convention concerning regulation of hours of work and rest periods in road transport; (4) Recommendation concerning individual control books in road transport; (5) Recommendation concerning regulation of night work in road transport; (6) Recommendation concerning methods of regulating hours of work in road transport; (7) Recommendation concerning rest periods of professional drivers of private vehicles.

TEXT OF THE RECOMMENDATION CONCERNING VOCATIONAL TRAINING

The General Conference of International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twenty-fifth Session on 8 June 1939, and

Having decided upon the adoption of certain proposals with regard to vocational training, which is included in the first item on the agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

adopts, this 27th day of June of the year one thousand nine hundred and thirty-nine, the following Recommendation which may be cited as the Vocational Training Recommendation, 1939:

Considering that the Preamble to the Constitution of the International Labour Organization mentions the organization of vocational and technical education among the reforms necessary for improving the conditions of labour;

Considering that the International Labour Conference has already to a certain extent dealt with this problem, particularly by adopting at its Third Session (1921) a Recommendation concerning the development of technical agricultural education and at its Twenty-third Session the Vocational Education (Building) Recommendation, 1937;

Considering that at its Nineteenth Session the Conference, by adopting the Unemployment (Young Persons) Recommendation, 1935, favoured the generalization of measures for vocational training, and that it was as a result of a resolution it adopted during that session that it was decided to include in the agenda of the Conference the question of the vocational training of workers in all its aspects;

Considering that the effective organization of vocational training is desirable in the interests of workers and employers alike as well as those of the community as a whole;

Considering that the rapid transformation of the economic structure of, and conditions in, various countries, the constant changes in the methods of production, and the widening of the conception of vocational training as a factor in social progress and in the general culture of the workers, have in a number of countries led to a fresh examination of the whole of this question and have given rise to a general desire to reorganize vocational training on the basis of principles better adapted to present requirements;

Considering that, in these circumstances, it is particularly desirable at the present time to state the principles and methods which each Member should apply on its territory, with due regard to the special requirements of the different branches of its national economy and of the different occupations, as well as the customs and traditions of the country, and subject to further special measures that might be required in respect of vocational training for certain branches of activity such as agriculture or maritime transport;

The Conference makes the following recommendations:

PART I.—DEFINITIONS

1. For the purpose of this Recommendation—

(*a*) the expression "vocational training" means any form of training by means of which technical or trade knowledge can be acquired or developed, whether the training is given at school or at the place of work;

(*b*) the expression "technical and vocational education" means theoretical and practical instruction, of whatever grade, given at school for purposes of vocational training;

(*c*) the expression "apprenticeship" means any system by which an employer undertakes by contract to employ a young person and to train him or have him trained systematically for a trade for a period the duration of which has been fixed in advance and in the course of which the apprentice is bound to work in the employer's service.

PART II.—GENERAL ORGANIZATION

2. (1) The work of the various official and private institutions in each country which deal with vocational training should, while ensuring free play to initiative and adaptability to the requirements of the different industries, regions and localities, be co-ordinated and developed on the basis of a general program.

(2) This program should be based on—

(*a*) the occupational interests and cultural and moral requirements of the worker;

(*b*) the labour requirements of employers;

(*c*) the economic and social interests of the community.

(3) In drawing up this program due account should also be taken of the following factors:

(*a*) the stage of development reached in general education and in vocational guidance and selection;

(*b*) changes in technique and methods of organization of work;

(*c*) the structure of, and trend of development in, the labour market;

(*d*) national economic policy.

(4) The co-ordination and development referred to in sub-paragraph (1) should be undertaken on a national scale with the organized collaboration of the authorities concerned with the different aspects of the problem mentioned in sub-paragraphs (2) and (3), and of the interested parties, including more particularly the occupational organizations of employers and workers.

PART III.—PREVOCATIONAL PREPARATION

3. (1) Compulsory education, which should be entirely general in character, should provide for all children a preparation developing an

idea of, taste for, and esteem for, manual work, these being an indispensable part of a general education and likely to facilitate future vocational guidance.

(2) The proposed preparation should aim, in particular, at training the eye and hand of the child by means of practical work, but the importance and character of this work should be consistent with the general purposes of compulsory education. In drawing up the program of practical work, the nature of the principal industries in the locality or district might be taken into account, but any attempt at vocational training should be avoided.

(3) This preparation, which should extend over a period of at least one year, should begin at the latest at the age of thirteen years and continue until the end of the period of compulsory education.

4. (1) In order to determine the occupational aptitudes of the child and to facilitate the selection of the future labour supply, there should be available to children who intend to enter an occupation requiring vocational training of long duration, and in particular to those who propose to become apprentices, a preliminary preparation constituting a transition from general education to vocational training.

(2) This preparation should take place after the completion of the period of compulsory education: Provided that where the laws or regulations in force in the country concerned fix the school-training age at not less than fourteen years, this preparation may be undertaken during the last year of compulsory education.

(3) The duration of this preparation should be determined with due regard to the occupation concerned and to the age and educational qualifications of the young person.

(4) In the curricula for this preparation, particular importance should be attached to practical work, but such work should not be given precedence over the theoretical courses or courses in general education. Practical and theoretical instruction should be so arranged as to be mutually complementary. The preparation should, by aiming at the general development of the pupil's intellectual and manual capacities and avoiding undue specialization, make it possible to determine for which of a group of occupations he is best suited to undergo full training. Practical and theoretical instruction should be so arranged as to secure continuity between this preliminary preparation and subsequent vocational training.

PART IV.—TECHNICAL AND VOCATIONAL EDUCATION

5. (1) A network of schools should be established in each country, adjusted as regards number, location and curricula to the economic requirements of each region or locality and affording the workers adequate opportunities for developing their technical or trade knowledge.

(2) Measures should be adopted to ensure that, in the event of economic depression or financial difficulty, the supply of trained workers necessary to meet future requirements is not imperilled by a reduction in the facilities for technical and vocational education. For this purpose, consideration should be given particularly to the grant of subsidies to existing schools and to the provision of special courses to make good the loss of opportunities for training caused by unemployment.

(3) In countries in which a sufficient number of vocational and technical schools has not yet been established, it would be desirable that undertakings of such a size as to make such arrangements practicable should meet the cost of training a certain number of young workers determined according to the number of workers employed by the undertaking.

6. (1) Admission to technical and vocational schools should be free.

(2) Attendance at such schools should be facilitated, as circumstances require, by the grant of economic assistance in such forms as free meals, provision of working clothes and implements, free transport or reduction in the cost of transport, or maintenance allowances.

7. (1) Courses should be organized in several grades, adjusted for each branch of economic activity to the training requirements of (*a*) journeymen and similar grades, (*b*) staff in intermediate grades, (*c*) managerial staff.

(2) The curricula for the courses in the different schools and for the different grades should be so co-ordinated as to facilitate transfer from one school to another and to enable promising pupils with the requisite knowledge to pass from a lower to a higher grade and to obtain admission to higher technical education at a university or equivalent institution.

8. The curricula for technical and vocational schools should be so drawn up as to protect the future vocational adaptability of the workers and for this purpose it is particularly desirable—

(*a*) that the primary object of the courses in the earlier years should be to give the pupil a sound basis of theoretical and practical knowledge, avoiding excessive or premature specialization; and

(*b*) that care should be taken to enable the pupil to acquire a wide grasp of the theoretical principles underlying the practice of his occupation.

9. (1) In technical and vocational education of all grades, subjects of general educational value and subjects relating to social questions should be included in the curricula for full-time courses and, so far as the time available permits, for part-time courses, other than special short courses for adults.

(2) The curricula should include courses in domestic subjects, attendance at which might be either compulsory or optional for young workers according to circumstances.

10. (1) Workers of both sexes should have equal rights of admission to all technical and vocational schools, provided that women and girls are not required to engage continuously on work which on grounds of health they are legally prohibited from performing, a short period on such work for the purpose of training being, however, permissible.

(2) Appropriate facilities for technical and vocational training should be provided for occupations in which women and girls are mainly employed, including domestic employments and activities.

PART V.—VOCATIONAL TRAINING BEFORE AND DURING EMPLOYMENT

11. (1) Where the nature of the occupation, the methods of operation of the undertaking, the absence of an adequate system of apprenticeship and traditions of craftsmanship, or other local circumstances, make it impossible for young persons to secure satisfactory vocational training while in employment, such training should be given in full-time schools before they enter employment.

(2) Where young persons are given vocational training in the conditions referred to in the preceding sub-paragraph, the practical training

should be given in surroundings as similar as possible to those of an actual undertaking and, where circumstances permit, should be completed by periods of practical work at the place of work.

(3) Where vocational training is given during employment, it is desirable that separate workshops specially adapted for the purpose of giving training should be set up within the undertaking wherever the size and organization of the undertaking make such an arrangement practicable.

12. (1) Opportunities for extending their technical and trade knowledge by attending part-time supplementary courses should be provided for all workers, whether or not they had received vocational training before entering employment.

(2) These courses should, as far as possible, be held in establishments near to the place of employment or the workers' homes.

(3) The curricula for these courses should be adjusted to the special requirements of (*a*) apprentices; (*b*) young workers for whom facilities should be provided to enable them to obtain better posts; (*c*) adult workers who wish to acquire a technical qualification or to extend or improve their technical or trade knowledge.

(4) The time spent in attending supplementary courses by apprentices and other young workers who are under an obligation to attend such courses should be included in normal working hours.

PART VI—MEASURES CONCERNING CO-ORDINATION AND THE SUPPLY OF INFORMATION

13. Close collaboration should be maintained between technical and vocational schools and the industries or other branches of activity concerned, particularly by the inclusion of employers and workers in the governing bodies of the schools or in advisory bodies to the schools.

14. (1) Local or regional advisory committees should be established to ensure collaboration between the competent administrative authorities and the technical and vocational educational institutions, public employment exchanges and organizations concerned, in particular occupational organizations of employers and workers.

(2) The duties of these committees should be to advise the competent authorities—

(*a*) on the promotion and co-ordination of official and private action in regard to vocational training, guidance and selection in the locality or region;

(*b*) on the drawing up of curricula and the adjustment of such curricula to changes in practical requirements;

(*c*) on the conditions of work of young persons who are receiving vocational training, whether in a technical or vocational school or in an undertaking, and, more particularly, on measures for ensuring—

(i) that the work done by them is suitably restricted and is essentially of an educative character; and

(ii) that the work of pupils in technical and vocational schools is not intended for commercial profit.

15. (1) Measures should be taken to supply information to interested persons, by means of brochures, articles, talks, films, posters, visits to undertakings, exhibitions, etc., on the occupations for which the young persons can obtain training corresponding with their inclinations and aptitudes, on the conditions upon which such training can be obtained and the facilities that are accorded, and on the advantages offered by each type of training in relation to the prospects of employment and their future careers.

(2) The primary and secondary schools, vocational guidance offices, public employment exchanges and technical and vocational educational institutions should collaborate in furnishing such information.

PART VII.—CERTIFICATES AND EXCHANGES

16. (1) The qualifications required in the examination on termination of technical and vocational training for any given occupation should be uniformly fixed, and the certificates issued as a result of these examinations should be recognized throughout the country.

(2) It would be desirable for the occupational organizations of employers and workers to assist the competent authorities in the control of these examinations.

(3) Persons of both sexes should have equal rights to obtain the same certificates and diplomas on completion of the same studies.

17. (1) Regional, national and international exchanges of students who have completed their training would be desirable so as to enable them to acquire wider knowledge and experience.

(2) The occupational organizations of employers and workers should, as far as possible, collaborate in organizing these exchanges.

PART VIII.—TEACHING STAFF

18. (1) Teachers responsible for theoretical courses should be recruited from among persons with a university degree or a diploma awarded after training in a technical school or teachers' training college and should possess or acquire practical knowlege of the branch of activity for which they prepare pupils.

(2) Teachers responsible for practical courses should be recruited from among persons qualified by practical experience, should have extensive experience of the subject they teach, and should be fully qualified as regards both theoretical knowledge of their subject and general culture.

(3) Teachers recruited from industry and commerce should as far as possible receive special training for the purpose of developing their teaching ability and where necessary their theoretical knowledge and general culture.

19. The following methods should be taken into consideration with a view to improving the qualifications of teachers and keeping their knowledge up to date:

(*a*) the establishment of contracts between undertakings and the teachers responsible for giving practical training as, for instance, by the organization of regular "refresher" periods of work;

(*b*) the organization by educational institutions of special courses which teachers may follow individually and short holiday courses for groups of teachers;

(*c*) the granting, in special cases, of travelling or research scholarships or special leave with or without pay.

20. Arrangements should be made between employers and educational authorities for the appointment of persons employed in industry and commerce as part-time teachers of special subject.

TEXT OF THE RECOMMENDATION CONCERNING APPRENTICESHIP

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twenty-fifth Session on June 8, 1939, and

Having decided upon the adoption of certain proposals with regard to apprenticeship which is included in the first item on the agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

adopts, this 27th day of June of the year one thousand nine hundred and thirty-nine, the following Recommendation which may be cited as the Apprenticeship Recommendation, 1939:

The Conference,

Having adopted the Vocational Training Recommendation, 1939, which enumerates the principles and methods which should be applied with regard to the organization of such training;

Considering that of the various methods of vocational training, apprenticeship raises special problems, particularly because it is given in undertakings and involves contractual relations between master and apprentice;

Considering that the efficacy of apprenticeship largely depends on the satisfactory definition and observance of the conditions governing apprenticeship and, in particular, of those relating to the mutual rights and obligations of master and apprentice;

Recommends that each Member should take into consideration the following principles and rules:

1. For the purpose of the present Recommendation the expression "apprenticeship" means any system by which an employer undertakes by contract to employ a young person and to train him or have him trained systematically for a trade for a period the duration of which has been fixed in advance and in the course of which the apprentice is bound to work in the employer's service.

2. (1) Measures should be taken to make apprenticeship as effective as possible in trades in which this system of training seems necessary. These trades should be designated in each country, having regard to the degree of skill and the length of the period of practical training required.

(2) Subject to there being sufficient coordination to guarantee uniformity in the degree of skill required and in the methods and conditions of apprenticeship within each trade throughout the country, the measures referred to in the preceding sub-paragraph may be taken by laws or regulations, or by decisions of public bodies entrusted with the control of apprenticeship, or in virtue of collective agreements, or by a combination of the above methods.

3. (1) The measures referred to in the preceding paragraph should make provision in respect of—

(*a*) the technical and other qualifications required of employers in order that they may take and train apprentices;

(*b*) the conditions governing the entry of young persons into apprenticeship; and

(*c*) the mutual rights and obligations of master and apprentice.

(2) In making such provision consideration should be given more particularly to the following principles:

(*a*) An employer taking apprentices should either himself be qualified to give adequate training or be in a position to provide such training by some other person in his service with the necessary qualifications, and the undertaking in which the training is to be given should be such as will permit of the apprentice securing a proper training in the trade to be learnt.

(*b*) Young persons should not be allowed to enter into apprenticeship until they have reached a fixed age, which should not be below the age at which school attendance ceases to be compulsory.

(*c*) Where the minimum standard of general education required for entry into apprenticeship is higher than that normally attained at the end of the period of compulsory school attendance, this minimum standard should be fixed with due regard to the variations in requirements of different trades.

(*d*) Entry into apprenticeship should in every case be subject to a medical examination, and where the trade in view calls for special physical qualities or mental aptitudes these should be specified and tested by special tests.

(*e*) Provision should be made for the registration of apprentices with appropriate bodies and, where necessary, for the control of their number.

(*f*) Arrangements should be made to facilitate the transfer of an apprentice from one employer to another in cases where transfer appears necessary or desirable in order to avoid interruption of the apprenticeship or to complete the training of the apprentice or for some other reason.

(*g*) The duration of apprenticeship, including that of the probationary period, should be determined in advance, any prior training undergone by the apprentice in a technical or vocational school being duly taken into account.

(*h*) Provision should be made for the holding of examinations of apprentices on the expiry of the period of apprenticeship and, where necessary, in the course of apprenticeship, for determining the methods of organizing such examinations, and for the issue of certificates based on the results thereof. The qualifications required in such examination for any given trade should be uniformly fixed, and the certificates issued as a result of such examinations should be recognized throughout the country.

(*i*) Supervision should be established over apprenticeship, particularly with a view to ensuring that the rules governing apprenticeship are observed, that the training given is satisfactory and that there is reasonable uniformity in the conditions of apprenticeship.

(*j*) Any requirements of form to be complied with by the contract of apprenticeship and the terms to be contained or implied in it should be specified, as for instance by the drawing up of a standard contract, and the procedure for the registration of contracts with the bodies referred to under (*e*) above should be determined.

4. (1) Provision should be made in the contract of apprenticeship as to how any remuneration in cash or otherwise due to the apprentice should be determined and as to the scale

of increase in remuneration during the course of the apprenticeship.

(2) Where there are no laws or regulations upon the subject, or the laws or regulations do not apply to apprentices provision should also be made in the contract of apprenticeship in respect of—

(*a*) the remuneration referred to in subparagraph (1) above during sickness; and

(*b*) holidays with pay.

5. (1) It would be desirable that the parties concerned in apprenticeship and more particularly the organizations of employers and workers should collaborate with the official bodies responsible for the supervision of apprenticeship.

(2) Close collaboration should be maintained between the bodies responsible for the supervision of apprenticeship and the general and vocational education authorities, vocational guidance institutions, public employment exchanges and labour inspection authorities.

6. This Recommendation does not apply to the apprenticeship of seamen.

TEXT OF THE DRAFT CONVENTION CONCERNING THE REGULATION OF HOURS OF WORK AND REST PERIODS IN ROAD TRANSPORT

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twenty-fifth Session on June 8, 1939, and

Having decided upon the adoption of certain proposals with regard to the regulation of hours of work and rest periods of professional drivers and their assistants of vehicles engaged in road transport which is the fourth item on the agenda of the Session, and

Having determined that these proposals shall take the form of a Draft International Convention,

adopts, this 28th day of June of the year one thousand nine hundred and thirty-nine, the following Draft Convention which may be cited as the Hours of Work and Rest Periods (Road Transport) Convention, 1939:

Article 1

This Convention applies to—

(*a*) persons who drive in a professional capacity a road transport vehicle; and

(*b*) attendants and other persons who travel with a road transport vehicle in a professional capacity connected with the vehicle, its passengers or its load.

2. For the purpose of this Convention the term "road transport vehicle" includes all vehicles, whether publicly or privately owned, propelled by mechanical power, including trams, trolley-cars and trailers drawn by mechanically-propelled vehicles, which are engaged in the transport of passengers or goods by a public highway for payment or for the purposes of the undertaking operating the vehicle.

Article 2

The competent authority may exempt from the application of this Convention—

(*a*) persons who drive or travel with private vehicles used solely for personal services;

(*b*) persons who drive or travel with vehicles engaged in—

(i) transport by agricultural or forestry undertakings in so far as such transport is directly connected with and exclusively used for the work of the undertaking;

(ii) the transport of sick and injured persons by hospitals and nursing homes;

(iii) transport for the purposes of national defence, police services and other transport effected in the administration of public authority;

(iv) transport for rescue or salvage work.

Article 3

The competent authority may exclude from the application of all or any of the provisions of this Convention owners of vehicles and members of their families who are not employed for wages, or prescribed classes of such persons, if and so long as the authority—

(*a*) is satisfied that such exclusion will not—

(i) expose to unreasonable competition the conditions of employment of the persons to whom the provisions in question remain applicable; or

(ii) expose to unreasonable risk of accident the persons to whom the Convention applies or endanger public safety; or

(*b*) is satisfied that in view of the conditions in the country concerned the application of the provisions in question to the persons proposed to be excluded is impracticable.

Article 4

For the purpose of this Convention—

(*a*) the term "hours of work" means the time during which the persons concerned are at the disposal of the employer or of any other person entitled to claim their services, or in the case of owners of vehicles and members of their families the time during which they are engaged in their own account in work connected with a road transport vehicle, its passengers or its load, and includes—

(i) time spent in work done during the running time of the vehicle;

(ii) time spent in subsidiary work;

(iii) periods of mere attendance; and

(iv) breaks for rest and interruptions of work, which breaks or interruptions do not exceed a duration to be prescribed by the competent authority;

(*b*) the term "running time of the vehicle" means the time from the moment when the vehicle starts at the beginning of the working day until the moment when the vehicle stops at the end of the working day, excluding any time during which the running of the vehicle is interrupted for a period exceeding a duration to be prescribed by the competent authority during which period the persons who drive or travel with the vehicle are free to dispose of their time as they please or are engaged in subsidiary work;

(*c*) the term "subsidiary work" means work in connection with the vehicle, its passengers or its load which is done outside the running time of the vehcle, including more particularly—

(i) work in connection with accounts, the paying in of cash, the signing of registers, the handing in of service sheets, the checking of tickets and other similar work;

(ii) the taking over and garaging of the vehicle;
(iii) travelling from the place where a person signs on to the place where he takes over the vehicle and from the place where he leaves the vehicle to the place where he signs off;
(iv) work in connection with the upkeep and repair of the vehicle; and
(v) the loading and unloading of the vehicle.

(*d*) the term "periods of mere attendance" means periods during which a person remains at his post solely in order to reply to possible calls or to resume action at the time fixed in the timetable.

Article 5

1. The hours of work of persons to whom this Convention applies shall not exceed forty-eight in the week.

2. The competent authority may authorize higher weekly limits of hours for persons who ordinarily do a considerable amount of subsidiary work or whose work is frequently interrupted by periods of mere attendance.

Article 6

1. The competent authority may permit weekly hours of work to be calculated as an average.

2. Where the competent authority permits weekly hours of work to be calculated as an average, it shall determine the number of weeks over which the average may be calculated and the mamimum number of hours that may be worked in any week.

Article 7

1. The hours of work of persons to whom this Convention applies shall not exceed eight in the day.

2. Where by law, custom, or agreement between the employers' and workers' organizations concerned, or where no such organizations exist between employers' and workers' representatives, the hours of work on one or more days of the week are less than eight, the limit of eight hours may be exceeded on the remaining days of the week by the sanction of the competent authority, or by agreement between such organizations or representatives, so however that in no case shall the daily limit of eight hours be exceeded in virtue of the provisions of this paragraph by more than one hour.

3. The competent authority may authorize higher daily limits—

(*a*) in respect of persons whose weekly hours do not exceed forty-eight in any week as provided in Article 5, paragraph 1, or an average of forty-eight as provided in Article 6; and
(*b*) in respect of persons who ordinarily do a considerable amount of subsidiary work or whose work is frequently interrupted by periods of mere attendance.

Article 8

The competent authority shall prescribe the maximum number of hours which may separate the beginning and end of the working day.

Article 9

1. The competent authority may permit time lost as a result of accidental causes to be made up within a prescribed period.

2. The competent authority may permit the limits of hours authorized by the preceding articles to be exceeded in cases in which the provisions of this article are applied.

Article 10

The competent authority may permit the limits of hours authorized by the preceding articles to be exceeded to a prescribed extent in cases in which it is satisfied that there is a shortage of indispensable skilled labour.

Article 11

1. This Article applies in the following cases:

(*a*) in case of accident, breakdown, unforeseen delay, dislocation of services, interruption of traffic, or *force majeure;*
(*b*) in order to make good the unforeseen absence of a person employed upon indispensable work for whom it is impossible to find a substitute;
(*c*) in case of rescue or relief work necessitated by earthquake, flood, fire, epidemic, or any other calamity or disaster;
(*d*) in case of urgent and exceptional necessity for ensuring the working of services of public utility.

2. In the cases in which this article applies—

(*a*) the limits of hours authorized by the preceding articles may be exceeded,
(*b*) the period of five hours prescribed by Article 14 may be extended, and
(*c*) the periods of rest prescribed by Articles 15 and 16 may be reduced,

but only in so far as may be necessary for the performance of indispensable work.

3. The employer or the owner of the vehicle shall notify the competent authority, within a period and in a manner to be prescribed by the said authority, of all time worked in virtue of this article and of the reasons therefor.

Article 12

1. The limits of hours authorized by the preceding articles may be exceeded, but only in so far as may be necessary for the performance of indispensable work, in order to meet exceptional requirements in respect of—

(*a*) the transport by hotels of passengers and their luggage between the hotel and the station or port of arrival or departure;
(*b*) transport by funeral undertakings.

2. The competent authority shall determine the conditions subject to which the preceding paragraph applies.

Article 13

1. The competent authority may permit the limits of hours authorized by the preceding articles to be exceeded by the working of overtime in accordance with the provisions of this article.

2. The competent authority may grant permission to work overtime in accordance with regulations prescribing—

(*a*) the procedure by which permission shall be granted;
(*b*) the minimum overtime rate of remuneration, which shall in no case be less than one and a quarter times the normal rate; and
(*c*) the maximum number of hours for which permission may be granted, which shall in no case exceed—
(i) seventy-five hours in any year in cases in which weekly hours of work are calculated as an average over a period exceeding a week; or

(ii) one hundred hours in any year in cases in which the weekly limit of hours of work is applied as a strict limit applicable to each week.

3. In any country in which it is not desired to place a fixed number of hours of overtime in the year at the disposal of undertakings, the competent authority may permit the limits of hours authorized by the preceding articles to be exceeded, subject to the condition that all time worked in virtue of this paragraph shall be paid for at not less than one and a half times the normal rate.

Article 14

1. No driver may drive for any continuous period of more than five hours.

2. For the purpose of the preceding paragraph any two periods of time shall be deemed to be a continuous period unless separated by an interval of a duration to be prescribed by the competent authority.

3. The competent authority may exempt from the application of paragraph 1 drivers for whom adequate intervals are ensured by stops provided for in the timetable or by the intermittent nature of the work.

Article 15

1. Every person to whom this Convention applies shall be granted in every period of twenty-four hours a period of rest comprising at least twelve consecutive hours.

2. The competent authority may permit the period of rest required by paragraph 1 to be reduced in the case of certain services subject to breaks of considerable duration.

3. The competent authority may permit the period of rest to be reduced on a prescribed number of days in the week, so however that the average rest calculated over the week is not less than the minimum required by paragraph 1.

Article 16

1. Every person to whom this Convention applies shall be granted in every period of seven days a period of rest comprising at least thirty consecutive hours of which not less than twenty-two fall within the same calendar day.

2. The competent authority may permit a number of periods of rest fulfilling the requirements of paragraph 1 to be granted in the course of a number of weeks not exceeding a prescribed maximum in lieu of one such period of rest in every period of seven days. In such case the number of periods of rest granted in the course of the number of weeks over which the said periods of rest are distributed shall be at least equal to the number of weeks and the time separating any two periods of rest shall not exceed ten days.

Article 17

Decisions taken by the competent authority in pursuance of the provisions of this Convention enumerated below shall be taken after consultation with the employers' and workers' organizations concerned where such exist:

2;
3;
4 (*a*) and (*b*);
5, para. 2;
6;
7, paras. 2 and 3;
8;
9;
10;
11, para. 3;
12, para. 2;
13;
14, paras. 2 and 3;
15, paras. 2 and 3;
16, para. 2;
18.

Article 18

1. With a view to the effective enforcement of the provisions of this Convention, the competent authority shall maintain system of supervision by labour inspectors, the police, traffic commissioners or other appropriate administrative authorities, both in garages, depots and other premises and on the roads.

2. Every employer shall keep a record in a form approved by the competent authority of the hours of work and rest periods of the persons employed by him, and such records shall be available for inspection by the supervisory authorities under conditions laid down by the competent authority.

3. The competent authority shall prescribe a standard form of individual control book and the manner in which the book shall be issued to every person to whom this Convention is applied, and every such person shall be in possession of his book during his hours of work and rest periods shall be entered in the book in a manner prescribed by the competent authority.

Article 19

1. The operation of the provisions of this Convention may be suspended by the competent authority, but only for the period during which such suspension is strictly indispensable in case of necessity for meeting the requirements of national safety.

2. The International Labour Office shall be notified immediately of—

(*a*) any suspension of the operation of the provisions of this Convention, together with the reason for such suspension, and
(*b*) the date from which such suspension has been terminated.

Article 20

The annual reports upon the application of this Convention to be submitted by Members under Article 22 of the Constitution shall include more particularly full information concerning—

(*a*) any decisions taken in virtue of Article 2;
(*b*) any decisions taken in virtue of Article 3, together with a statement of the grounds on which the confident authority is satisfied that such decisions are justified;
(*c*) any recourse to the provisions of Article 5, paragraph 2;
(*d*) any recourse to the provisions of Article 6;
(*e*) any recourse to the provisions of Article 7, paragraphs 2 or 3;
(*f*) any determinations made in pursuance of Article 8;
(*g*) the extent to which recourse has been had to the provisions of Articles 10 and 13 and any regulations made thereunder.

Article 21

In accordance with Article 19, paragraph 11, of the Constitution of the International Labour Organization, nothing in this Convention shall affect any law, award, custom or agreement between employers and workers which ensures more favourable conditions to the workers than those provided for by this Convention.

Article 22

The formal ratifications of this Convention shall be communicated to the Secretary-General of the League of Nations for registration.

Article 23

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Secretary-General.

2. It shall come into force twelve months after the date on which the ratifications of two Members have been registered with the Secretary-General.

3. Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

Article 24

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention first comes into force, by an act Communicated to the Secretary-General of the League of Nations for registration. Such denunciation shall not take affect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

Article 25

1. The Secretary-General of the League of Nations shall notify the Director of the International Labour Office and all the Members of the International Labour Organization of the registration of all ratifications and denunciations communicated to him by the Members of the Organization.

2. When notifying the Members of the Organization of the registration of the second ratification communicated to him, the Secretary-General shall draw the attention of the Members of the Organization to the date upon which this Convention will come into force.

Article 26

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report in the working of this Convention and shall consider the desirability of placing on the agenda of the Conference the question of its revision in whole or in part.

Article 27

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides.

(*a*) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 24 above, if and when the new revising Convention shall have come into force;

(*b*) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have retified it but have not ratified the revising Convention.

Article 28

The French and English texts of this Convention shall both be authentic.

TEXT OF THE RECOMMENDATION CONCERNING INDIVIDUAL CONTROL BOOKS IN ROAD TRANSPORT

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twenty-fifth Session on June 8, 1939, and

Having decided upon the adoption of certain proposals with regard to individual control books in road transport which is included in the fourth item on the agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

adopts, this 28th day of June of the year one thousand nine hundred and thirty-nine, the following Recommendation which may be cited as the Control Books (Road Transport) Recommendation, 1939:

1. Each Member of the International Labour Organization should provide for the drawing up of a standard form of individual control book to facilitate the supervision of the hours of work and rest period of persons to whom the Hours of Work and Rest Periods (Road Transport) Convention 1939 applies.

2. The individual control book should contain entries relating to the following points:

(*a*) the time at which the working day begins and the time at which it ends;
(*b*) time spent in work done during the running time of the vehicle;
(*c*) time spent in subsidiary work;
(*d*) periods of mere attendance;
(*e*) the duration of breaks for rest and interruptions of work during which the driver or attendant is free to dispose of his time as he pleases;
(*f*) periods of continuous driving time;
(*g*) weekly periods of rest;
(*h*) any extensions of hours of work beyond the normal limits and the circumstances in which such hours have ben worked.

3. The competent authority should determine the conditions in which individual control books shall be issued.

4. (1) The driver or attendant as the case may be or the employer should be required to enter daily the prescribed particulars under the various entries of the individual control book.

(2) In the case of classes of transport in respect of which it would be difficult to give the particulars specified in (*b*), (*c*), (*d*) and (*f*) of paragraph 2, the particulars required to be entered might be limited to these specified in (*a*), (*e*), (*g*) and (*h*).

(3) In the case of classes of transport running to a fixed time-table, a statement of the time-table to which the driver or the attendant works might be permitted to be substituted for the detailed particulars specified in (*a*) to (*f*) of paragraph 2.

5. (1) Drivers and attendants should be required to carry their control books with them during their hours of work and to produce them on demand to the supervisory authorities.

(2) During the driver's or attendant's rest days the individual control book should be left at the garage and should be kept available for inspection by the supervisory authorities.

TEXT OF THE RECOMMENDATION CONCERNING THE REGULATION OF NIGHT WORK IN ROAD TRANSPORT

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twenty-fifth Session on June 8, 1939, and

Having decided upon the adoption of certain proposals with regard to the regulation of night work in road transport which is included in the fourth item on the agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

adopts, this 28th day of June of the year one thousand nine hundred and thirty-nine, the following Recommendation which may be cited as the Night Work (Road Transport) Recommendation, 1939:

Whereas in certain classes of road trnasport for the conveyance of passengers or goods it is necessary to operate at night; and

Whereas in order to afford road transport workers the necessary protection under labour regulations and in order to ensure safety on the road, it is desirable to regulate the conditions under which transport at night is carried on;

The Conference recommends every Member of the International Labour Organization to apply the following principles concerning the regulation of night work for travelling staff engaged in road transport:

1. The competent authority in each country should—

(*a*) determine the classes of transport for which it authorizes night work to be regularly worked; and

(*b*) define what constitutes night work.

2. When night work is organized on a rota system, the number of turns of night work worked by any worker during any rotation period should not exceed the number of turns of day work worked during the same period.

TEXT OF THE RECOMMENDATION CONCERNING THE METHODS OF REGULATING HOURS OF WORK IN ROAD TRANSPORT

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twenty-fifth Session on June 8, 1939, and

Having decided upon the adoption of certain proposals with regard to the methods of regulating hours of work in road transport, which is included in the fourth item on the agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

adopts, this 28th day of June of the year one thousand nine hundred and thirty-nine, the following Recommendation which may be cited as the Methods of Regulating Hours (Road Transport) Recommendation, 1939:

Whereas in many countries the system of collective negotiation has proved of great value in the regulation of conditions of work;

Whereas this system is also to some extent applied as regards the regulation of hours of work in road transport and has worked well in this connection;

The Conference recommends that:

Each Member of the International Labour Organization, in taking such measures as may be necessary to promote the effective regulation of the weekly and daily hours of persons to whom the Hours of Work and Rest Periods (Road Transport) Convention, 1939, applies, should consider the following methods:

(*a*) the active encouragement of voluntary joint collective machinery established by agreement between the employers' and workers' organizations concerned; or, failing this,

(*b*) the establishment of statutory machinery operated in consultation with such organizations.

TEXT OF THE RECOMMENDATION CONCERNING REST PERIODS OF PROFESSIONAL DRIVERS OF PRIVATE VEHICLES

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Twenty-fifth Session on June 8, 1939, and

Having decided upon the adoption of certain proposals with regard to rest periods for professional drivers of private vehicles which is included in the fourth item on the agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

adopts, this 28th day of June of the year one thousand nine hundred and thirty-nine, the following Recommendation which may be cited as the Rest Periods (Private Chauffeurs) Recommendation, 1939:

Whereas the Hours of Work and Rest Periods (Road Transport) Convention, 1939, authorizes the competent authority in each country to exempt from the application of the Convention persons who drive private vehicles used solely for personal services;

Whereas that the exercise by the competent authority of this power of exemption should not result in depriving professional drivers of private vehicles of the rest periods to which they are no less entitled than the persons who may not be exempted from the application of the Convention, and

Whereas, for reasons of road safety, it is necessary to apply provisions relating to rest periods to professional drivers of private vehicles;

The Conference

Recommends each Member of the International Labour Organization to draw up regulations applicable to professional drivers of private vehicles used solely for personal services providing for the observance of minimum daily and weekly rest periods.

THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 39] AUGUST, 1939, [NUMBER 8

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

INDUSTRIAL employment in Canada at the beginning of July showed further improvement, according to the Dominion Bureau of Statistics, which tabulated returns from 11,760 firms (each employing a minimum of 15 persons) in all industries except agriculture, fishing, hunting and highly specialized business. The staffs of these firms aggregated 1,126,216 workers, or 26,118 more than they employed at June 1. The index (based upon the average for the calendar year 1926 as 100), stood at 115·8, compared with 113·1 in the preceding month, and 113·5 at July 1 of last year, when a smaller advance had taken place. At the same date in preceding years, the index was as follows: 1937, 119·1; 1936, 104·6; 1935, 99·5; 1934, 101·0; 1933, 84·5; 1932, 88·7; 1931, 103·8; 1930, 118·9; 1929, 124·7; 1928, 117·7 and 1927, 109·7. The general increase at July 1, 1939, slightly exceeded the average gain between June and July in the experience of the last eighten years; accordingly, the seasonally-adjusted index rose slightly, standing at 113·6, compared with 113·1 at June 1.

Unemployment in Trade Unions.—At the beginning of July, 1939, reports were forwarded to the Department of Labour by 1,951 local trade unions, involving a membership of 244,323 persons, 28,289 or 11·6 per cent of whom were out of work as contrasted with percentages of 11·7 at the beginning of June and 13·5 at the beginning of July, 1938.

Employment Office Reports.—Reports received by the Department of Labour from the offices of the Employment Service of Canada during June, 1939, showed a gain in the average daily placements effected, when compared both with the previous month and also with the corresponding month a year ago, construction and maintenance and farming being mainly responsible for the gain under the first comparison and logging and services under the second. A marked decline in services from May also took place. Vacancies in June, 1939, numbered 36,013; applications, 65,291; and placements in regular and casual employment, 34,634.

83242—1½

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget was practically unchanged at $16.93 for July as compared with $16.92 for June. Comparative figures for certain earlier dates are $17.45 for July, 1938; $17.24 for July, 1937; $15.41 for June, 1933 (the low point during recent years); and $21.26 for July, 1930. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics declined gradually week by week during the month and for the week ended July 28 was 72·1 as compared with 73·3 for the week ended June 30 and 73·5 for the week ended June 2. Comparative figures on a monthly basis are 73·3 for June; 78·6 for July, 1938; 87·6 for July, 1937; 74·3 for July, 1936; 63·5 for February, 1933 (the low point in recent years) and 97·2 for July, 1929.

Business Statistics.—The latest information available reflecting industrial conditions in Canada is given in the table on page . The index number of the physical volume of business in June was at the same level as in May following the upward movement since February. The level in June, 1939, was about 12 per cent higher than in June, 1938. Of the principal groups used in the construction of the index number mineral production was at somewhat lower volume than in the preceding month but about 30 per cent greater than in June, 1938. The index of manufacturing indicated a slight reduction in volume in June as compared with the previous month but about nine per cent greater than in June, 1938. In the latter comparison there were important increases in the manufacture of textiles and forestry products. Of the other principal groups, construction, the output of electric power and exports were substantially higher in the month under review both as compared with the previous month and with June, 1938, while trade employment, carloadings, and imports were somewhat lower in June than in May but higher than in June, 1938. Information available for July indicates improvement in employment, the number of cars of revenue

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† For the week ended July 28, 1939.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending July 29, 1939, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending July 15, June 17, and May 20, 1939; July 16, June 18, and May 21. 1938. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation.

freight and in the earnings of the Canadian National Railways both as compared with June, 1939, and with July, 1938, while the value of contracts awarded and the amount of sugar manufactured were both lower than in June but higher than in July, 1938.

Strikes and Lockouts.—The number of strikes and lockouts recorded during July was nine, involving 4,170 workers with time loss of 14,960 man working days. Most of the workers involved and the time loss were accounted for by six strikes of coal miners in Nova Scotia but there was also a two weeks' strike of 325 rubber workers at Guelph, Ont. In June, 1939, there were 11 disputes, involving 2,023 workers with time loss of 8,963 days, due chiefly to strikes of rubber workers at Kitchener and Toronto, Ont., and a strike of coal miners in Nova Scotia. In July, 1938, there were 16 disputes involving 1,428 workers with time loss of 9,768 days, due chiefly to strikes of hat factory workers at Guelph, Ont., lime plant workers at Blubber Bay, B.C., and restaurant workers at Toronto, Ont. Of the nine disputes recorded for July, 1939, eight were terminated during the month, two resulting in favour of the employers concerned, one in favour of the workers involved, one was partially successful, three resulted in compromise settlements and the result of one being recorded as indefinite. One dispute, involving 1,200 workers, was recorded as unterminated at the end of July. These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Industrial Disputes Investigation Act

During the month of July the Department received the report of the Board of Conciliation and Investigation which dealt with a dispute between various coal mining companies at Bienfait, in the Estevan district of Saskatchewan, and their employees. The text of the Board's findings appears on page 782.

One Board of Conciliation and Investigation was established by the Minister of Labour during July, and two applications for boards were withdrawn. Further details concerning these proceedings under the Act will be found on page 782.

Statistics of Material Aid Recipients for June

According to preliminary figures from the National Registration, the grand total of all classes of persons on urban and agricultural aid across Canada in June this year was 848,000. This is a decrease of 8·7 per cent from the May figure, over 4 per cent less than in June a year ago, and almost 6 per cent less than in June, 1937.

The Dominion total of unemployed but fully employable persons on aid in June this year was 150,000, a decrease of 11·2 per cent from the revised May total of 169,000. The figure for June this year, although it showed an increase of 8·6 per cent over June a year ago, was down by 17·4 per cent from June, 1937.

A total of 563,000 persons were receiving non-agricultural aid last June, a decrease of over 10 per cent from the previous month. This category includes all totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a net increase of 8·1 per cent from the figure for June, 1938, but was over 11 per cent lower than the figure for June two years ago.

The number of farmers and members of their families in receipt of agricultural aid continues to show a decline from a year ago. A total of 62,500 farmers who, together with their dependents, account for a farm population of 285,000, were reported as receiving agricultural aid for subsistence in June. Of these, 243,500 were located in the Province of Saskatchewan.

The Dominion total on agricultural aid in June showed a decrease of 5 per cent from the May figure, was 21·6 per cent less than in June, 1938, but was 7·8 per cent greater than in June, 1937. The total of farmers and their families on aid in Saskatchewan continued to hold the improvement over a year ago, June showing a decrease of over 23 per cent in this comparison, and a decrease of 3·4 per cent from May, 1939. However, due to crop conditions in 1937 and 1938, Saskatchewan this year showed 41·6 per cent more on agricultural aid than in June, 1937.

Projects for rehabilitation of older unemployed persons

In a statement issued on August 2, the Hon. Norman McL. Rogers, Minister of Labour, announced that agreements have been concluded with 5 out of the 9 provinces, and are nearing completion with two others, under which projects for the rehabilitation of unemployed persons in the upper age groups will be operated.

It will be recalled that Parliament at its last Session voted $500,000 for the rehabilitation of older persons. This was in addition to $1,500,000 for the Dominion-Provincial Youth Training Programme, and $1,000,000 for the National Forestry Programme, both of which are designed to assist the younger age groups. As in the case of youth training, the upper age rehabilitation programme calls for con-

tribution by the provinces on a dollar for dollar basis. Thus, if the entire amount of federal money is taken up, $1,000,000 will be utilized for projects to assist older people.

Agreements have been completed with New Brunswick, Ontario, Alberta, British Columbia and Manitoba and are in the final stages in Nova Scotia and Saskatchewan. Quebec at the moment has under consideration the establishment of a hard rock mine training plan to which study is being given.

Selection of the undertakings is in the hands of the provinces, subject to approval by the Dominion. Projects will be of a character designed to meet conditions existing in each province. In British Columbia, forestry work is being provided for a special group. Alberta has a farm chore plan, and training is being given in making furniture and brushes. The farm chore plan is contemplated in Saskatchewan and is in operation in Manitoba in addition to a rustic furniture training class.

The farm chore plan is designed especially to take care of the older age group at present on relief in the urban centres.

In Ontario the placing of families on improved land is in operation as an initial experiment. The placement of 100 families is contemplated. New Brunswick plans classes and instruction for persons in the upper age group in agricultural subjects leading to improved farm technique. Hard rock mining training is to be given to the miners of Thorburn district, Nova Scotia, where the coal mines have been closed down.

Defence Purchasing Board appointed

On July 14 The Defence Purchasing, Profits Control and Financing Act, 1939, was proclaimed and the Defence Purchasing Board provided for in the Act was appointed.

The Board is to have exclusive power to negotiate, to recommend for the approval of the Governor in Council and to execute all contracts for the Department of National Defence for the manufacture of defence equipment and the construction of defence projects involving an expenditure in excess of $5,000; also to supervise the performance of such contracts and those previously made. The Act provides for the limitation of costs, the control of profits, the borrowing of moneys necessary to pay for expenditures designated as capital expenditures and for an annual sinking fund.

Tenders are to be invited for all contracts wherever practicable and the lowest tender in each case is to be recommended for acceptance except for reasons not in the public interest, in which case the facts are to be reported to the Minister of Finance. In respect to any proposed contract for the purchase of defence equipment outside Canada the reasons are similarly to be reported to the Minister of Finance, for submission to the Governor in Council with recommendations. Except for contracts awarded as a result of competitive tender and contracts performed outside of Canada the maximum net profit is limited to five per cent per annum on the average capital employed, any excess as determined by the Board to be collected as a tax by the Department of National Revenue.

The Board consists of a chairman and three other members appointed by the Governor in Council to hold office "during good behaviour" for five years. The Chairman as the chief executive officer of the Board, is to devote his whole time to the business of the Board and is to receive a salary determined by the Governor in Council. The other members of the Board are entitled to receive travelling and living expenses incurred in connection with the work of the Board and a per diem allowance fixed by the Governor in Council.

As Chairman of the Board during the period of organization the Government arranged to secure the services of Robert Charles Vaughan, vice-president of the Canadian National Railways in charge of purchasing and stores. The other members are C. W. Sherman, president and managing director of Dominion Foundries and Steel Limited, Hamilton; C. E. Gravel, Montreal, vice-president of the Canadian Chamber of Commerce, director of the Bell Telephone Company, La Banque Canadienne Nationale, and several other corporations; and Howard B. Chase, Montreal, Assistant Grand Chief Engineer of the Brotherhood of Locomotive Engineers.

The Defence Purchasing Board is charged with duties in regard to contracts and purchases formerly assigned to the Interdepartmental Committee for the Control of Profits on Government Armament Contracts provided for by Order in Council on March 5, 1937, (LABOUR GAZETTE, July, 1937, p. 818).

Review of Dominion-Provincial Youth Training Programme

According to a report issued recently by the Department of Labour, 71,812 young persons took advantage of various training courses made available under the Dominion-Provincial Youth Training Programme during the fiscal year April 1, 1938 to March 31, 1939. Of this total, 15,878 received training in courses designed to train for wage-earning employment, while 55,934 were registered in agricultural and rural, and physical training courses.

Of the 15,878 who commenced training under various projects with a view to fitting themselves for wage-earning employment,

2,735 discontinued before the completion of their courses and of the remaining 13,143, there were placed in employment 4,747, or over 36 per cent, and 5,178 persons were still in training at March 31, 1939.

The programme was carried on by means of agreements with each Province which were completed between July 21 and August 6, 1938. (Labour Gazette, August 1938, page 863). The agreements provided for a Dominion contribution of 50 per cent of the expenditure incurred by the Province for projects submitted by the Province and approved by the Dominion, with each Province bearing its own administrative costs. Under these agreements plans were submitted and approved which involved Dominion commitments as follows: Prince Edward Island, $17,000; Nova Scotia, $80,000; New Brunswick, $76,500; Quebec, $325,000; Ontario, $127,500; Manitoba, $149,000; Saskatchewan, $115,000; Alberta, $120,000; British Columbia, $155,000.

Those eligible to participate were young people, male or female, between the ages of 16 and 30, who were not gainfully employed and who were in necessitous circumstances.

Provincially the numbers participating in the training courses provided were as follows: British Columbia, 21,893; Quebec, 17,352; Alberta, 10,714; Saskatchewan, 9,848; Manitoba, 5,292; New Brunswick, 2,712; Ontario, 2,029; Nova Scotia, 1,383; Prince Edward Island, 589, making a Dominion total for all projects of 71,812 for the period April 1, 1938 to March 31, 1939.

The report also contains information concerning the various training projects which were operated during the period; placement; average age of trainees in different projects; number of classes held, and other details of the programme.

Working Hours of juveniles in factories in Great Britain

In Great Britain, the Factories Act of 1937 (Labour Gazette, October, 1937, page 1059) contained specific provisions governing the working hours of juveniles in factories. Some revision of the regulations pertaining to certain industries have recently taken place and inquiries are being conducted into others. Concerning these revisions and inquiries, the British *Ministry of Labour Gazette* for July reports, in part, as follows:

The Factories Act of 1937 provided that the hours worked by young persons who have not attained the age of 16, and who come within the provisions of the Act, shall not, from 1st July, 1939, exceed 44 in any week, exclusive of intervals for meals and rest. The Act, however, gave the Home Secretary power to extend this limit to a number not exceeding 48 in any particular class or description of factory, or in a process carried on therein, should he receive representations to that effect, and should he be satisfied, as the result of a public inquiry, that a limit of 44 would seriously prejudice the carrying on of the industry; that the longer hours would not be injurious to the health of the young persons; that the work is particularly suitable for young persons, and that their employment familiarises them with, and helps to train them for employment in processes in which older persons are employed in the industry, and is likely to lead to their permanent employment in the industry.

Under the foregoing provision the Home Secretary appointed Commissions to hold inquiries concerning various classes of factories in respect of which representations had been made. As a result of the reports already received from the Commissioners, he has issued Draft Regulations which will have the effect of increasing the permitted limit of hours to 48 in the following classes of factories, viz.: factories in which the sole or principal industry carried on is the spinning of cotton, woollen or worsted yarn, or the weaving of cotton or woollen or worsted cloth or carpets.

The Draft Regulations propose that the increased hours shall have effect from 3rd September, 1939, and shall apply to young persons under the age of 16 employed in processes in or incidental to the industries specified, but shall not apply to those who have not attained the age of 15 and who were not so employed prior to 3rd September.

The reports of the Commissions appointed to hold inquiries respecting three other classes of factories have been issued. In each case the Commission advised that there should be no increase in the number of hours provided for in Section 71 of the Act. The Home Secretary has refused the applications accordingly. The factories concerned are:—(1) those in which is carried on the spinning of ramie yarn; (2) those in which is carried on the manufacture of paper or paper board, or the process of paper coating; (3) those in which is carried on the spinning or weaving of jute.

Prior to 1st July inquiries had been directed to be held in respect of several other classes of factory, but the results of those inquiries are not yet published.

Revision of regulations by United States Labour Relations Board

Reference has been made from time to time in the Labour Gazette to the establishment and functioning of the United States Labour Relations (Wagner) Act, administered by the National Labour Relations Board.

Under date of July 11 it was reported that the National Labour Relations Board had revised its rules to permit employers to ask for collective bargaining elections when two or more labour unions claim to represent a majority of their workers.

The board also announced other changes which it said were designed to liberalize the procedure under which it administers the Wagner Act. The revisions became effective on July 14.

The National Labour Relations Act (LABOUR GAZETTE, April, 1935, page 343) guarantees workers the right to organize and bargain collectively with their employers through representatives of their own choosing. It forbids employers to interfere with, restrain or coerce employees in the exercise of that right. Employers also are forbidden to dominate any labour organization or contribute financial or other support to it. The act further states that it shall be unfair for an employer to encourage or discourage union membership by any condition of employment, or to discharge or otherwise discriminate against an employee because he files charges or gives testimony under the act.

The National Labour Relations Board, established by the act, is empowered to conduct elections among employees when a dispute arises as to which of two or more labour organizations represents a majority of the employees.

For several months the United States Congress has been studying a series of amendments to the National Labour Relations Act, which, it is understood, were sponsored by the American Federation of Labor and business interests. On July 22, the House of Representatives voted an extensive inquiry into the operations of the Board.

Survey of comparative living costs in U.S.A.

A survey of comparative living costs in five small Southern cities and five Northern cities of similar size, just completed by the United States Bureau of Labor Statistics for Administrator Elmer F. Andrews of the Wage and Hour Division, United States Department of Labor, found the average was 3·1 per cent lower for the five Southern cities.

The study was undertaken by the Bureau of Labor Statistics at the request of Mr. Andrews, who wanted all pertinent information on questions that may come before him in conducting hearings and passing upon the minimum wage recommendations of the various Industry Committees. The questions of wage differentials in favour of the South and of living costs in the South, as compared with the North, have already come up before some of these committees.

The report of the Bureau of Labor Statistics showed that while, on the average, rents in the five Southern cities surveyed are 7·6 per cent lower than for similar housing in the North and fuel costs are 34·2 per cent lower, there was no essential difference in food costs. The cost of clothing was 2 per cent higher in the five Southern cities surveyed; furniture, furnishings and equipment 3.8 per cent higher, and miscellaneous items 3 per cent higher.

Families in both regions have adapted their expenditures to local prices, consuming more of the goods which are relatively cheap in the locality, and less of those goods and services which are relatively more expensive. Thus, based on the prices of goods consumed by an average family of an employed wage earner in the North, the Bureau of Labor Statistics finds that the cost of such a Northern budget is one per cent less in the five Southern cities surveyed than in the Northern cities surveyed. In dollars, the cost is $1,387 in the Northern cities and $1,374 in the Southern cities. Wage-earner families in the five Southern cities, on the average, would have to spend $13 less annually than wage earners in the five Northern cities to live on the same standard.

On the other hand, it is pointed out, the cost of goods consumed by an average family of an employed wage earner in the South was found to be 5·3 per cent less in the five Southern cities than in the five Northern cities.

Survey of World Unemployment Situation

Quarterly statistics, appearing in the July 3 issue of *Industrial and Labour Information* published by the International Labour Office, show that industrial employment was decidedly better in the months from February to June, 1939, than in the preceding quarterly period.

Of the 18 countries for which statistics of industrial employment are available, the number of persons in employment increased in 15 compared with a year ago and declined in three (Australia, Canada, and Latvia).

With regard to unemployment, reports from 23 countries show that five (Australia, Belgium, Canada, Chile, Hungary) registered an increase as compared with a year ago, 16 a decrease and one no change. In most cases, the increases are very small and the decreases fairly considerable.

In presenting these statistics of employment and unemployment, the International Labour Office emphasizes the limitations of such figures, and states that they do not afford any comparison of levels of unemployment or employment in the various countries as methods applied in compiling such statistics differ from one country to another, and the figures only serve as an indication of the trend of employment and unemployment in the countries concerned.

Statistics based on unemployment insurance schemes indicate declines in unemployment over the corresponding period of 1938 ranging from 5·8 in Denmark to 2·1 in the United Kingdom. Other declines were registered in the Netherlands, 4·3, and Switzerland, 2·7, while the only increase recorded was that of 1·1 in Belgium.

Returns from trade unions show that unemployment had decreased 1·8 per cent in Sweden and 5·5 per cent in the United States. An increase in unemployment in Australia was reflected in figures from this source the percentage change being 1·8 compared with the same period a year ago.

Indices of employment computed from statistics obtained from the operation of social insurance schemes register improvement in all countries so reporting with the exception of Latvia where a decrease of 1·0 is recorded. The increases in employment range from 7·9 in the Netherlands and 7·3 in Germany to 4·4 in Great Britain, 5·0 in Hungary and 4·7 in Yugoslavia.

Returns from selected establishments for the quarterly period register declines in employment in Australia 3·8, and Canada 1·1. Increases in employment were indicated in statistics obtained from this source in Estonia, 2·4, France, 1·9, Italy, 10·4, Japan, 12·6, Luxemburg, 2·1, Norway, 2·0, Poland, 8·6, South Africa, 1·4, Switzerland, 0·9, and the United States, 5·3.

Note.—*More recent and detailed statistics dealing with the employment situation in Canada are given in the article (four sections) "Employment and Unemployment in Canada in June, 1939" to be found elsewhere in this issue.*

Silicosis and Lead Poisoning Among Pottery Workers in U.S.A.

Under the title of *Silicosis and Lead Poisoning Among Pottery Workers,* the Public Health Service of the United States Treasury Department has published a bulletin (No. 244) reporting the results of the second field study of the pottery industry made by the Public Health Service.

In the introduction to the report it is stated that the two studies made are an example of the way in which the relative importance of industrial health hazards change during the course of technological progress. In 1919, it is stated, most of the 92 pottery plants surveyed by the Public Health Service were housed in badly constructed buildings, ware was fired almost exclusively in intermittent kilns of the bee-hive type, and, because the use of fritted glazes was relatively restricted, the glazes then in use contained large quantities of lead carbonate and lead oxides. The principal health hazard then recognized was lead poisoning, although numerous publications show that many industrial hygienists were aware of the excessively high death rates from respiratory diseases in the pottery industry. In the intervening 17 years great changes have been made in working conditions. Most of the factories studied in 1937 were housed in recently built structures with better sanitary facilities, lighting, and ventilation than before. Most potteries use continuous or tunnel kilns, although many intermittent kilns are still in use. Fritted (the lead contained in a fritted glaze is in the form of a silicate) glazes are in general use, reducing the lead hazard. Advances in radiological technique and interpretation have made industry and the medical profession aware of the dangers of the dust diseases. It was found that in almost every plant some equipment for reducing the dust hazard has been, or is being, installed.

In a summary to the report it is stated: "In occupations in which the dust concentration exceeded 4 million particles per cubic foot, the proportion of workers found to have silicosis increased with increasing dust concentration and increasing length of employment. Nine of the twelve workers exposed more than 30 years to more than 16 million particles per cubic foot, for instance, had silicosis. Approximately three-fourths of the workers employed more than 30 years in the clay shop were found to have silicosis and about half of the slip house and kiln workers employed more than 30 years were found to have silicosis. On the other hand, no cases of silicosis were found in workers whose only employment in the pottery industry had been in the decorating department or mould shop.

"It appears that if the dust concentration in potteries could be brought below 4 million particles per cubic foot new cases of silicosis would not develop."

Concerning lead poisoning the report states that "it is gratifying to be able to report that lead poisoning, formerly a major health hazard in this industry, can be, and is being, controlled largely as a result of the widely practiced substitution of fritten glazes for glazes containing large amounts of readily soluble lead compounds. Only one case of lead poisoning was found, a dipper who worked in a factory where soluble lead compounds were added to the glaze. A few persons exposed to lead in their working environment showed signs of lead absorption but the usual signs and symptoms of lead poisoning were not common.

The report also makes suggestions as to effective means of preventing the development of new cases of silicosis by the installation and maintenance of dust-control equipment. The engineering control measures required for this purpose are described in a special section of the bulletin.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

A Board of Conciliation and Investigation was established by the Minister of Labour during July to deal with a dispute between SMT (Eastern) Limited and its motor coach and freight truck drivers, members of Division 1182, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America. An application for a board had been received in the department from the employees on June 5 (LABOUR GAZETTE, June, 1939, page 551). Officers of the department endeavoured to bring about a settlement of this dispute but their efforts at conciliation were unsuccessful. The personnel of the board is as follows: Rev. H. E. Thomas, St. John, N.B., chairman, appointed by the Minister in the absence of a joint recommendation from the other board members, Mr. L. McC. Ritchie, of St. John, nominated by the company, and Mr. J. A. Whitebone, also of St. John, nominated by the men.

Two applications for Boards of Conciliation and Investigation which were received in the Department of Labour during April from stevedores, coopers, sealers, etc., in the employ of the Canadian National Railways, at Port Arthur, Ontario, and of the Canadian Pacific Railway Company, at Fort William, Ontario (LABOUR GAZETTE, May, 1939, page 462), have been withdrawn, an adjustment of the basic rate of pay having been reached as a result of departmental mediation and arrangements having been made for direct negotiations to take place concerning certain outstanding matters.

Report of Board in Dispute between Various Coal Mining Companies at Bienfait in the Estevan District, Saskatchewan, and their Coal Miners

The Board of Conciliation and Investigation established by the Minister of Labour in November last to deal with a dispute between various coal mining companies at Bienfait, in the Estevan district of the province of Saskatchewan, and their employees, submitted its findings to the Minister of Labour during July. For details of this dispute see the LABOUR GAZETTE, November, 1938, pages 1201 and 1219, and December, 1938, page 1331.

The report of the board is signed by the chairman, Professor A. R. Greig, and the member nominated by the men, Mr. Angus J. Morrison. Mr. B. D. Hogarth, the board member nominated by the companies, submitted a minority report.

The texts of the two reports follow:—

Report of Board

In the matter of the Industrial Disputes Investigation Act and of a Dispute between Western Dominion Coal Mines Limited, Manitoba and Saskatchewan Coal Company Limited, Bienfait Mines Limited, Lignite Mines Limited, Eastern Collieries of Bienfait Limited, Baniulis Brothers Limited and Wilson Coal Company, (Employers), and their Employees, the majority of whom are represented by The United Mine Workers of America, (employees).

Regina, Sask., June 30, 1939.

The Honourable Norman McL. Rogers,
Minister of Labour,
Ottawa, Canada.

SIR,—Further to the interim report, dated January 18, 1939, of the Board appointed to deal with the above-mentioned dispute, we beg to report that the Board reconvened at Estevan on Tuesday, May 16, 1939, and held public sessions at the Court House in the town of Estevan, and heard evidence from 27 witnesses as well as receiving considerable documentary evidence. The mine-workers were represented by Mr. Patrick Conroy, of Calgary, and the operators by Mr. C. L. Grant, of Saskatoon. The case for each of the parties had been prepared and presented with meticulous care, and the Board at the outset wishes to compliment both Mr. Conroy and Mr. Grant for the able manner in which they presented their evidence to the Board.

The output of coal in Saskatchewan has increased from 580,189 tons in 1929 to 1,017,128 tons in 1938. The last three years have not shown any increase in tonnage, being, 1936—1,020,792 tons; 1937—1,049,348 tons; 1939—1,017,128 tons. The realization has dropped from $1.78 per ton in 1929 to $1.42 per ton in 1937. This is due, according to Mr. R. L. Sutherland, to the large increase in the sale of small coal. The coal industry is suffering from an excess of labour, particularly during the months from March to September, inclusive. Coal shipments show that 70·5 per cent of the coal shipped annually is mined in the five months of October to February and less than 29·5 per cent in the other seven months.

PERCENTAGES OF COAL MINED EACH MONTH OF THE COAL MINED DURING THE YEARS 1932 TO 1936

June	2·16
July	2·28
August	2·88
September	6·95
October	14·68
November	14·70
December	14·55
January	14·71
February	11·90
March	8·01
April	4·31
May	2·77

The result is that about 60 per cent of the men employed have to find other work for seven months of the year in order to get a reasonable annual income. Evidence has been produced that some find work on the farm at $25 to $30 per month and their board; others get work on the railroads as section hands. Due to the depression in recent years all have not been able to get summer work and they have had to go on relief. From the evidence given by two merchants of Bienfait it seems to be the normal thing for the miners to go into debt during the summer months to the storekeepers and to pay up during the winter months. Some do not always succeed in doing this.

The realization per ton for Estevan coals has dropped since 1929 from $1.78 to $1.42. Evidence was given that a 25 cent increase in the realization per ton, of which ⅔ would go to increase wages, would give the men a satisfactory wage. Evidence from one of the larger mining companies was that their selling price on the Winnipeg market was set 25 cents per ton above the strip mine price. It being recognized as a higher value coal, it could command that advance in price so that as far as the underground mines were concerned they had to set their prices to suit the competition from the strip mine. On the other hand, Estevan coal is being sold on the Winnipeg market below Alberta coals on a heat value basis. According to Mr. R. L. Sutherland, expert witness, who apeared on behalf of the operators, Alberta coals should sell for a higher price than the Estevan coal on a BTU basis on account of their acceptability value. This is granted, but we do not believe that there should be such a spread as at present existing.

Since 1929 there has been a general reduction in the wages paid the men. Machine runners used to get 7 cents per ton; they are now getting 2¾ cents. Loaders who used to get 45 cents per ton in rooms and 60 cents per ton in entries are now getting 29 cents in both places. General labour used to get 40 cents to 45 cents per hour; it now gets 30 cents to 33⅓ cents. There has been a speed-up system put into operation and a reduction in wages to meet the price set by the stripped coal. Although the Saskatchewan Government has set the prices at the mine at which the coal shall be sold, there has been no control of the prices on the Manitoba market.

Mr. Sutherland supplied the Board with additional information, including a paper presented at the semi-centennial meeting of the Engineering Institute of Canada at Montreal, June, 1937, and appearing in the July issue of the *Engineering Journal,* published monthly by the Engineering Institute of Canada. Mr. Sutherland sums up the matter very concisely as follows: "Comparing production and employment figures for the underground mines for 1929 and 1935, production increased 19·4 per cent with an increase of 20·4 per cent in man days worked. Total value of production increased 3 per cent, with a decrease of 14·8 per cent in earnings of workers. Average realization per ton decreased twenty-three cents, while labour costs decreased twenty-six cents." Mr. Sutherland's paper also contains the following tables, which contain statistical information clearly showing the earnings of the men in the Estevan field:—

An examination of the above table shows clearly the reduction in wages suffered by the mine-workers. The Board has made an examination of the wages earned by the mine-workers in Estevan and district for the years 1937 and 1938 and finds them totally inadequate. We believe that, having regard to the increased cost of living, as well as to the nature of the work itself, wages should be increased in the Estevan coal fields. The following table gives the classification and the rates now being paid, and the rates which the Board recommends as the minimum rates that should be paid to the workmen in and around the mines:—

Classification	Rates paid	Rates asked	Rates recommended	
			Contract	or per hour
Loaders	18c. per ton	30c. per ton	22½c.	45c.
Unloading mud	25c. per car	35c. per car	30c.	45c.
Loading, shooting and timbering	50c. per car	80c. per car	65c.	45c.
Loading, shooting and timbering entries	90c. per car	$1.20 per car	1.00	45c.
Ditto off the solid	1.35 per car	1.55 per car	1.45	45c.
Box car loader	10c. per ton	14c. per ton	12c.	40c.

Machinist	50c. per hour	.....	.....	60c.
Other labour	33⅓c. per hour	.....	.....	40c.

Living Conditions.—Western Dominion Coal Mines Limited, Manitoba and Saskatchewan Coal Company Limited, and Bienfait Mines Limited, No. 2, have good boarding houses with ample shower baths with a good supply of hot and cold water and individual lockers, or hangers, for the men, and an attendant in charge for which the men pay a dollar per month service charge. These washhouses are made available to the families of the miners at certain periods of the week. In one mine, Baniulis Bros., the bunkhouse we found not fit for human habitation and the evidence shows that the water supply at this mine was never adequate. This had been condemned by both the Provincial Mine and Sanitary Inspectors. The Saskatchewan statutes call for a washhouse where twenty or more men are employed underground. We believe that this number should be reduced to 12.

In some of the bunkhouses the men all slept in one large room. While there were sufficient cubic feet of space per person and a sufficient number of windows, there was not adequate ventilation. The opening of the windows concentrated the flow of air over one or more persons so as to make it objectionable; as a result, the windows were kept closed. We would recommend that a number of small intake air openings could be made and so distributed as to give everyone an

ample supply of fresh air without putting anyone in a draft. This would, of course, have to be accompanied by an adequate exhaust ventilator. In these large dormitories there is no privacy and the companies should be urged to partition them off into rooms.

Working Conditions.—According to the Saskatchewan Coal Mines Safety and Welfare Act a workman shall not be employed at his working place below ground in a mine for more than eight hours a day, but by mutual consent of the employee and his employer longer hours may be worked. During the winter months when the rush season is on it has been the practice of all the mines to work longer hours. In some of the mines petitions or circulars have been sent around the mines for men to sign consenting to the longer hours. Where loaders do their own shooting and timbering the men go back into the mine after supper and do the shooting. This is in order that they may have coal ready to load in the morning. In many cases, this brings the working hours up to ten to twelve hours per day. This is not necessary as the shooting could be done the last thing before leaving the mine.

In every case of poor ventilation reported, the practice has been to shoot the coal at noon as well as after supper. The result has been a smoky condition in the mine for two to three hours after shooting. In one case reported, the fan motor was overloaded, and the fan was frequently stopped. The mine inspector ordered them to put in a larger motor and this has recently been done. In another case, a drop in voltage caused the fan motor to trip out. It seemed to be nobody's duty to restart it. Here again, the mine inspector has taken the matter up. Ventilation in all the mines would be better if all the shooting was done at night by a special crew. This is the case in the larger mines.

Water in the Mines.—Evidence was given of water in some of the mines. Water only a few inches deep in the working places will cause a loader to be wet up to the knees. The result was that where there was no washroom for the men to change their clothes and boots, these would be frozen on him going home on a cold day. This is a case where a little co-operation between the men and the management would soon put it right. An adequate allowance should be made to a workman for working in a wet place as well as for pumping water, and sufficient water tanks should be provided.

Unions.—The evidence clearly shows that many efforts have been made by the mine workers to organize in a union of their choice in the Estevan field and on each occasion without success. About the middle of August, 1938, the United Mine Workers of America was invited to come into the field and on August 20 an organizer was put in charge of this work by that organization, which culminated in a local union of the United Mine Workers of America being formed on September 11, 1938. The Saskatchewan Coal Mine Union was organized at a meeting held at Taylorton on September 18, 1938, which later affiliated with the Canadian Federation of Labour. Cessation of operations occurred at the Western Dominion Coal Company's plant at Taylorton due to an attempt to establish a closed shop in favour of the Canadian Federation of Labour. On October 1 Bienfait Mines Limited, No. 1 Mine, was called out on strike because it was alleged they were filling the Western Dominion Coal Mines Limited orders, and on October 8, 1938, the remainder of the mine party to this dispute went out on strike, which lasted four days. It is clear from evidence before the Board that the United Mine Workers of America had a clear majority of the employees who were members of their union. This is further borne out by the fact that later in November, Mr. F. E. Harrison, Western Representative of the federal Department of Labour, took a poll of the miners employed in the district, which resulted as follows:—

Number of men voting..	653
Spoiled ballots..	27
Leaving a net vote of..	626

In favour of a Board of Conciliation, 589, or 94 per cent of the net vote. For the United Mine Workers of America, 504, or 80·5 per cent. All witnesses who gave evidence testified to the fairness of the ballot and the impartial manner in which it was administered by the representative of the Department of Labour. Evidence was given that at the Western Dominion Coal Mines Limited plant, where the Canadian Federation of Labour had their largest membership, that a number of men had signed the Canadian Federation of Labour check-off in order to hold their jobs with the coal company, and also later these men had sent in a petition asking that their names be removed from the Canadian Federation of Labour list. Two companies, the Western Dominion Coal Mines Limited, and Bienfait Mines Limited, No. 2, signed agreements with the Canadian Federation of Labour and refused to deal with any other union, in spite of the fact that a large majority of their employees belong to the United Mine Workers of America. The president of the Canadian Federation of Labour local union, Mr. Frank Peverelle, gave evidence before the Board and testified that only thirty out of a total of one hundred and thirty employees had authorized him to sign such a

wage agreement, and that upon the contract being signed it was referred to a meeting of the Canadian Federation of Labour with only thirty men present, while one hundred of the employees had no voice in any way whatsoever, in the making of or the ratification of the agreement. At the Bienfait Mines Limited, No. 2, the evidence shows that the organization campaign of signing men up for the Canadian Federation of Labour was conducted by one of the company's foremen, and that at no time was the contract ever referred for ratification to the men employed.

We are of the opinion that legislation should be introduced in the province of Saskatchewan the same as that in the province of Alberta (the Industrial Conciliation and Arbitration Act, Chapter 57, Paragraph 5), which states that an employer must deal with a committee of a majority of his employees.

The Board is of the opinion that proper employer and employee relationship can only be established in the Estevan area by the employers recognizing a *bona fide* miners' union chosen by the majority of the employees. Such action, we believe, would be beneficial to both employers and employees and to the community as a whole. We, therefore, recommend that the operators' and miners' representatives convene a conference for the purpose of arriving at an amicable agreement, and recommend the acceptance of the rates recommended herein for their favourable consideration. It has, unfortunately, not been possible for the members of the Board to arrive at a unanimous report, and Mr. B. D. Hogarth, K.C., is submitting a minority report.

Respectfully submitted,

(Sgd.) Alex R. Greig,
Chairman.

(Sgd.) A. J. Morrison,
Board Member.

Dated at Regina, Saskatchewan, this 30th day of June, A.D. 1939.

Minority Report

In the matter of the Industrial Disputes Investigation Act, R.S.C., 1927, Chapter 112, and in the matter of a Dispute between Western Dominion Coal Mines Limited, Manitoba and Saskatchewan Coal Company, Limited, Bienfait Mines, Limited, Lignite Mines, Limited, Eastern Collieries of Bienfait, Limited, Baniulus Brothers, Limited, Wilson Coal Company, Limited (Employers), and the Employees of the above named Companies, majority of whom are Members of United Mine Workers of America.

REPORT OF B. D. HOGARTH, K.C., MEMBER OF BOARD OF CONCILIATION AND INVESTIGATION

The Board of Conciliation and Investigation was established in December last to investigate a dispute between the Western Dominion Coal Mines Ltd. (hereafter referred to as Western Dominion), Manitoba and Saskatchewan Coal Company Ltd. (hereafter referred to as M. & S., by which title it is generally known), Bienfait Mines Ltd. (hereafter referred to as Bienfait Number 1), Lignite Mines Ltd. (hereafter referred to as Lignite Mines), Eastern Collieries of Bienfait Ltd. (hereafter referred to as the Eastern Mine), Baniulus Brothers Ltd. (hereafter referred to as Baniulus Brothers), Wilson Coal Company Ltd. (hereafter referred to as Bienfait Number 2, by which it is now generally known in the field), and the employees of the said mines.

The application for the Board was made by the United Mine Workers of America, and sets forth the nature and cause of dispute as follows:—

(1) That the U.M.W.A. be recognized by the operators as the sole bargaining agency for all the employees.
(2) That the 8-hour day from bank to bank be strictly adhered to.
(3) That the machine men's wages be increased to $6 per day.
(4) That the miners' and loaders' wages be increased to $4.75 per day.
(5) That the day wage rates for common labour be increased to $4.50 per day, and the day wage rates for all classified labour in and around the mines be increased proportionately.
(6) That all contract rates be increased in proportion to above mentioned increase in the day wage rates.
(7) That the inequalities now existing, also the conditions requiring to be adjusted, be considered in joint conference with a view to bringing about an amicable settlement to the end of consummating a uniform contract for all the mines.

The application also requests a full investigation of the circumstances, the manner and way in which an alleged agreement between the operators and a labour union known as the Canadian Federation of Labour was brought about.

The application further states that the number of employees affected or likely to be affected directly is as follows: males 21 years or over, approximately 500; males under 21 years, approximately 75; total, 575.

All the mines in question are located in approximately ten to fifteen miles east of the town of Estevan in the Province of Saskatchewan in the neighbourhood of the villages of Bienfait and Taylorton.

Under date of January 18 last, the Board, after sitting for two weeks, endeavouring to bring about a settlement of the dispute, for-

warded to you an interim report setting forth the efforts made to bring about a settlement, and advised you of the fact that such efforts had failed. The Board did not convene again until May 16, when sittings of the Board were resumed for the purpose of hearing evidence, which extended over a period of four weeks. In our deliberations on the evidence I found myself unable to agree with the Chairman and Mr. Morrison, in certain of their findings, and in their recommendations, with the result that it becomes my duty to advise you of my observations and conclusions, which are hereinafter set out.

The Chairman of the Board has very kindly furnished me with a copy of his report, in which I believe Mr. Morrison, the representative of the men, has concurred, which report I will hereafter refer to as the majority report. I perused the majority report carefully, in the hope that I might find some reason in the grounds for their findings that would, on further consideration, enable me to concur. There are portions of the majority report in which I could concur, but in the major findings, and recommendations, I regret that I have not been able to find anything that would enable me to reach the conclusions my fellow members have arrived at.

In view of the fact that I have not been able to come to the same conclusions as the other members of the Board in the major matters in dispute, I feel that wherein I differ with them I should state the reasons or grounds for holding a contra opinion. In doing so I hope my observations and conclusions will not be construed as being in any sense a criticism of their report, or of their reasons for reaching the conclusions they have.

A Brief History

In order to properly approach the matters in dispute, I think it is necessary to review, briefly, the history of the coal mining industry in Saskatchewan. It has existed as an industry for more than forty years, but has made its most marked progress during the last ten years, during which period, as the majority report states, production has increased from 580,189 tons in 1929 to 1,020,792 tons in 1936. The production in the last three years has remained practically stationary, being 1,017,128 tons for the year 1938. There was no evidence as to what the production is for the current year 1939. Apparently the figures for 1939 are not yet available. The production figure of 1,017,128 tons, stated in the majority report as being for the year *1939* obviously is an error, as, according to tables 2 and 10 compiled by the expert, Mr. R. L. Sutherland, that tonnage was produced in the year 1938.

This is the third investigation into the coal mining industry in the Bienfait and Estevan areas since 1930, all involving wage schedules and rates of pay. The first investigation was in 1931, when His Honour Judge Wylie was commissioned to conduct an inquiry following a strike which culminated in a riot on the streets of Estevan, when three men were killed. Peace in the field followed for three years, when, by Order in Council approved by the Lieutenant Governor of Saskatchewan, the Honourable Mr. Justice Turgeon, now Chief Justice of Saskatchewan, was appointed and empowered to inquire into all matters having to do with the coal mining industry in Saskatchewan.

We had before us the report of Mr. Justice Turgeon, bearing date the 30th day of March, 1935. It indicates that a very thorough and complete inquiry was made into all phases of the industry at that time. This inquiry resulted from the posting of the following notice by five of the large mines on October 22, 1934:—

> Owing to the very low average sales price of our coal and to the very destructive business practices within the Saskatchewan field, the Bienfait Deep Seam Mines are compelled to reduce wage schedules 15 per cent effective November 1, 1934.
>
> We may be forced to make a further substantial reduction in December in order to retain our market, meet our pay-rolls and give employment throughout the season to the same number of men as were engaged last year.
>
> We regret very much that this action is forced upon us by trade conditions over which we have no control.
>
> October 22, 1934.
>
> The Eastern Collieries, The Crescent Collieries, Bienfait Mines Limited, Man. & Sask. Coal Company, Western Dominion Collieries, Ltd.

Following the report of the Honourable Mr. Justice Turgeon, the Coal Mining Industry Act, 1935, was enacted in Saskatchewan, being Chapter 73 of statutes of Saskatchewan, 1934-35. This Act empowered the Lieutenant Governor in Council to fix the price of coal sold by the mine operators, with a view to maintaining a price that would enable the operators to maintain their wage schedules and so obviate the necessity of a reduction in wages to the miners. The policy of controlled or fixed prices by the government has continued and is still in effect insofar as the Province of Saskatchewan is concerned. It is contended, and seems to be admitted, that the Government of Saskatchewan has no jurisdiction to control the price of coal sold in the Manitoba market. Sixty per cent of the coal produced by the mines involved in this dispute is sold in the Manitoba market.

Following the inquiry by Mr. Justice Turgeon the wage schedules seem to have been main-

tained, and there is evidence that some slight increases have been made by the M & S mine, and, at the beginning of July, 1938, increases in the wage schedule were granted, voluntarily, by the Western Dominion. In the meantime, however, two of the original mines investigated by Mr. Justice Turgeon had gone out of business. The Crescent Collieries ceased operations shortly after the Turgeon inquiry. The Western Dominion Collieries Ltd. in liquidation at the time of the Turgeon inquiry, ceased operation altogether early in the fall of 1935, when the tipple of that mine was destroyed by fire. The Liquidator, who resides in England where the property had been owned prior to the liquidation, declined to rebuild the tipple, and sold all the property holdings remaining, except the briquette plant, to Western Dominion Coal Mines Ltd., which reopened the mine in the fall of 1936. One new mine was opened by The Wilson Coal Company Limited in 1938. This was the situtation at the time the present dispute arose in October last year.

Beginning of the Trouble

The trouble really began when two men by the names of John Stokaluk and Joe Krkosky, employees of the United Mine Workers of America, from the Province of Alberta, arrived in Estevan, in the latter part of August, 1938, and commenced holding meetings with the miners in the village of Bienfait, and elsewhere, with a view to forming a union of miners to be affiliated with U.M.W.A., District 18, with headquarters in Calgary, in the Province of Alberta. About the same time organizers representing the Canadian Federation of Labour appeared in the field with a view to organizing the men into a union to be affiliated with that body.

The feeling in the field has been intensified as a result of the efforts of the above named unions in trying to get control of the men. The Canadian Federation of Labour is a Canadian institution, and we have some evidence that there are men who desire to belong to a union affiliated with that body because it is a Canadian union. Both the Canadian Federation of Labour and the U.M.W.A. seem determined to remain in the field. This is unfortunate because I am certain that as long as the two organizations remain there will be trouble. There does not appear to be room for both of them.

Shortly after the arrival of Stokaluk and Krkosky, a local union, affiliated with the U.M.W.A., was formed, and notices in writing, signed by the officers of the local union and Stokaluk, were sent to the operators requiring them to meet Mr. Stokaluk and the representatives of the union in the Town Hall in Estevan. It seems to me that this method of approach showed an utter lack of tact in handling a matter that obviously required the utmost tact and diplomacy. A more tactful method of approach would have been for the officers of the local union to have gone to the operators in a spirit of good will and discussed their problems and desires, and, in a friendly way, endeavoured to obtain their co-operation.

The operators ignored the notice.

Agreements with C.F.L.

We have been asked to investigate the circumstances, the manner and way in which an alleged agreement by the Canadian Federation of Labour and some of the mines, parties to the dispute, was entered into.

The evidence shows that two of the mines in question, namely, the Western Dominion and Bienfait No. 2, entered into closed shop agreements with the Saskatchewan Coal Miners' Union, affiliated with the Canadian Federation of Labour. These agreements were produced and contained a recognition of that union, with closed shop privileges, or, in other words, an agreement on the part of the operators to employ only men who belonged to that union. (Such an agreement is lawful under Section 6 of the Freedom of Trade Union Association Act, 1938.) These agreements also provide for recognition of what is known as the 'check off system,' being a deduction from the wages of the men of the dues payable to the union each month, and payment over of those dues by the company to the secretary of that union.

I will deal first with the agreement with the Western Dominion. On September 18, 1938, there was a meeting of the employees of the Western Dominion held in the community hall at Taylorton, which is on Western Dominion property. This meeting was held following notices posted in the store in Taylorton and at the mine. At the time there were approximately one hundred and thirty men employed at the Western Dominion. Seventy-three men attended the meeting, when it was decided, as a result of a vote taken by ballot, to form a union known as Saskatchewan Coal Miners' Union. Officers of that union were elected at the meeting, and a wage scale committee was appointed.

The evidence shows clearly that a substantial majority of the men employed at the Western Dominion expressed a desire to have a union affiliated with the Canadian Federation of Labour. Mr. Turner, the secretary of the company, placed the number at approximately 100 out of about 125 or 130 men employed. This number, he said, had signed an authorization for the company to pay union dues to

the union affiliated with the Canadian Federation of Labour. Mr. Peverelle, one of the men employed at the Western Dominion Mine, and president of the Saskatchewan Coal Miners' Union, placed this number at between 110 and 130.

Following the organization meeting of the Saskatchewan Coal Miners' Union, a notice was posted at the Western Dominion, in the usual place where notices to the men are posted, of a further meeting to be held at the pit head of the mine on September 26. The number in attendance is rather indefinite. One of the employees, a witness called by the men's representative, placed the number at 42, but said that men were coming and going all the time during the meeting. At this meeting it was decided to affiliate with the Canadian Federation of Labour, and the union thereupon became known as the Saskatchewan Coal Miners' Union, Local No. 1. Negotiations with the officials of the Western Dominion for recognition of the Canadian Federation of Labour, with closed shop privileges, institution of the check-off system and an increase in the wage schedule demanded by the union, followed, and an agreement was entered into, and on September 28 the following notice was given to the men:—

To the employees of the Western Dominion Coal Mine Limited.

Notice is hereby given that the Saskatchewan Lignite Mine Workers' Union, which is affiliated with the Canadian Federation of Labour of Ottawa, Canada, has now been recognized by the Company and that our agreement with the Company provides that all employees are required to be members of the Saskatchewan Lignite Mine Workers' Union. The Union has intimated to the Company that it will give the Company only until October the first to implement the provisions of the Agreement.

Western Dominion Coal Mine Limited.
A. E. Turner,
E. Pierce.

The agreement entered into, verbally at first, was not reduced to writing until October 8. Before entering into this agreement, there were meetings of the men held at the International Hotel, Estevan, and at the mine, which do not seem to have been largely attended. Only about thirty men were in attendance at the meeting when it was finally decided to enter into the closed shop agreement.

When the company attempted to carry out its agreement with the union by permitting only men who belonged to the union to go to work, some of the men refused to join the union and consequently were refused the right to work. Work in the mine thereupon ceased, and the mine remained closed for between two and three weeks.

From the inception of this union there seems to have been a determined effort made by Mr. Stokaluk and U.M.W.A. members, and supporters from other mines, together with some of the Western Dominion men, to break up the union affiliated with the Canadian Federation of Labour. Evidence of violence and threats of violence to Western Dominion men was given before us as well as evidence of picketing and demonstrations in the form of large gatherings on Western Dominion property, for no other purpose in my opinion than that of intimidating employees of the Western Dominion. These tactics on the part of the U.M.W.A. seem to have been successful, as they kept the Western Dominion closed. Mr. Turner, the secretary of the Western Dominion, told us that a number of men, employees of the mine, wanted to work, and this statement is borne out by the fact that a large delegation of men travelled to Regina to ask the Government for police protection to enable them to go to work. The Government declined to give them police protection, and Mr. Turner did not open the mine because he feared there would be trouble.

The U.M.W.A. contended that they had a majority of the men in the Western Dominion Mine favourable to that union. If this were true, it seems to me that the way to have defeated organization and affiliation with the Canadian Federation of Labour would have been for that majority to have attended the organization meeting, or the pit head meeting where the closed shop agreement was authorized, and by their majority voted it down. The Canadian Federation of Labour would then and there have been at an end. The fact that this was not done convinces me that the U.M.W.A. did not have a majority of the Western Dominion employees, and that the estimate given Mr. Turner and Mr. Peverelle of the numbers favourable to affiliation with the Canadian Federation of Labour is correct.

With reference to the agreement between Bienfait No. 2 and the Saskatchewan Coal Miners' Union, Local No. 3, affiliated with the Canadian Federation of Labour, the evidence is that a meeting was called by one Ernie Philips, an employee of this mine, at the noon hour on September 19, 1938. All the men employed at the mine, approximately thirty, attended that meeting. Mr. Philips presided and told the men that the purpose of the meeting was to form a union to be affiliated with the Canadian Federation of Labour. The meeting decided to form a union known as Saskatchewan Coal Miners' Union, Local No. 3, and officers were elected, and a committee formed. The union became affiliated with the Canadian Federation of Labour.

Mr. Wilson, the manager of the mine, told us that he was interviewed several times by a committee of the men and officers of the Canadian Federation of Labour, and that he had heard the Canadian Federation of Labour were very reasonable people and would not do anything that would cripple the industry. Representatives of the union and of the Canadian Federation of Labour finally presented an agreement that Mr. Wilson said was satisfactory to him, and he signed it. This agreement is dated September 28, 1938, and provides for a recognition of the union with closed shop privileges, and the check-off system. Twenty-one men signed it, and they also signed a further authorization to the Company to deduct $1 a month union dues from their wages, and to pay the same to the secretary of the union. Mr. Wilson also produced a further authorization signed by forty-two at a later date.

The Bienfait No. 2 mine is a new mine just opened last year. It is the most highly mechanized mine in the district, having in use and operation a mechanical loader, which does away with loading coal by hand labour, with the result that fewer men are required. Two of the employees of this mine, called as witnesses by the representative of the men, Mr. Conroy, said they had been told by Mr. Philips that if they did not sign up with the union affiliated with the Canadian Federation of Labour they would not be employed. One of them said he signed under the belief that, if he did not do so, he would lose his job. If Mr. Philips made any such statement to these men there is no evidence that he had any authority from the Company to do so, and Mr. Wilson, the manager of the mine, said that there was absolutely no coercion. This mine closed down about the end of October and did not reopen again until April, 1939.

Under date of January 2, 1939, a petition bearing fifteen signatures was presented to Mr. Wilson as manager of the mine. This petition reads as follows:—

Estevan, Sask.,
January 2, 1939.

Bienfait Mines Ltd. No. 2,
Bienfait, Sask.

DEAR SIRS—Owing to the developments which have cropped up during the last few weeks we, the undersigned, being former employees of the Bienfait Mines Ltd., No. 2, are anxious to see the mine started to work again. We are perfectly satisfied with the wage rates and working conditions set forth in our contract with the Canadian Federation of Labour and the Bienfait Mines Ltd., No. 2.

We also pledge ourselves not to join or have any connection with any other union or organization during the life of this agreement. We want the check-off system to be enforced and every person employed at this mine must be a member of our union before he commences to work. We also request that dues and assessments be deducted from our wages each pay day and turned over to our secretary.

When we are not needed on our own jobs we are quite willing to do other work at the rates of wages set forth in the agreement and will co-operate with the management to make the mine a success.

In conclusion we respectfully ask you to reopen the mine immediately and if you do we in turn assure you of our whole-hearted support, loyalty and co-operation. We realize the extent of your investment in this property and that it is only by loyal co-operation and honest endeavour that it can be made successful.

Yours very truly,

(Fifteen signatures are attached to this document.)

May I here repeat what I have said regarding the union at the Western Dominion, namely, that if the U.M.W.A. had a majority here why did they not use their superior numbers and vote down the C.F.L.

In explanation of the fact that twenty-eight out of thirty-one employees at Bienfait No. 2 voted in favour of the U.M.W.A., their representative before the Conciliation Board, Mr. Wilson, stated as follows:—

> "They did not vote for another union, they voted for a Conciliation Board. That is what they were doing. It was a case of, if you want a Conciliation Board then vote for the organization clamouring for that board. They were not voting for the U.M.W.A. You can interpret it any way you like."

Even Frank Peverelle, undoubtedly a C.F.L. man, said in the course of his evidence:—

> "I thought if there was anything to be gained by a Board of Conciliation it would be a good thing."

At the time of the visit of your officer, Mr. Harrison, it was agreed that the men should return to work pending an application for a Board of Investigation and Conciliation, and to facilitate matters the C.F.L. agreed to waive the enforcement of their closed shop agreement for the time being.

U.M.W.A. as Sole Bargaining Agency

The applicants for the Board asked that the U.M.W.A. be recognized by the operators as the sole bargaining agency for all the employees. It seems to me that this is impossible in view of the closed shop agreements between the Western Dominion, Bienfait No. 2 and the Canadian Federation of Labour.

My view is that it is not in the best interests of either the men or the operators for the U.M.W.A. to have control of the Estevan field. That union is serving the men in the coal fields of Alberta, where there are many more men employed than in the Saskatchewan field.

Coal produced by Alberta miners is in direct competition with Saskatchewan lignite. There is therefore a direct conflict of interest between the two fields. Control of both fields should not be given to one union. As pointed out above, there are many more men engaged in coal mining in Alberta than in Saskatchewan, consequently much more money goes into the treasury of the U.M.W.A. in the form of dues paid by the miners of Alberta than would be paid by the Saskatchewan miners. The Alberta field is therefore more important to the U.M.W.A. than the Saskatchewan field, and, if in control, the U.M.W.A. could, by continually harassing Saskatchewan operators, reduce production in Saskatchewan and so increase production in Alberta to the benefit of members of the union there. Where there is this possibility of conflict of interest, I would not think that control in Saskatchewan should be given to the U.M.W.A.

I observe that the majority report contains a recommendation that legislation should be introduced in Saskatchewan to provide that an employer must deal with a committee of a majority of his employees. This recommendation follows upon a finding that the U.M.W.A. has a clear majority of the employees in the Bienfait-Estevan area, who are members of the U.M.W.A. Consideration should be given to the methods employed and tactics adopted by the organizers of the U.M.W.A. in obtaining that so-called majority.

That there was intimidation and coercion employed by the U.M.W.A. there seems to be no doubt. Observe the following answers made by Mr. Wilson, manager of Bienfait No. 2, to questions put to him by Mr. Morrison:—

> Q. They were all members of the Canadian Federation of Labour at Bienfait No. 2, how then does it come they were out on strike?—A. I do not get you at all about a strike. As far as a strike is concerned, at that time the miners were being intimidated all over the field and they would go out any place.
>
> Q. Intimidated by whom?—A. Your men, the C.I.O.
>
> Q. What do you mean by intimidated?—A. I mean they were threatened their blocks would be knocked off if they did not go.

Also the following evidence given by Mr. Turner, the secretary of the Western Dominion, in answer to questions asked by me:—

> Q. During the time the strike was on, had you anything that would lead you to believe there was any intimidation or fear put into any of the men, employees of the Western Dominion?—A. I took four men down to Mr. Lynd's office after they had some trouble. They complained to me about having been assaulted down there.
>
> Q. Have you any other knowledge of any other men being molested?—A. It would be pretty hard, there are instances, but it would be pretty hard for me to give the full story without going back and doing some work on the subject.
>
> Q. Was there any picketing done at your mine?—A. There was lots of picketing down around the mine.
>
> Q. I asked one of your employees about a gathering of men on the streets of Taylorton one morning, during the time the mine was not operating, in the vicinity of the boarding house. He told me there was no gathering. Do you know anything about that?—A. Certainly there was. For about two days we operated the mine with C.F.L. labour, there were demonstrations. There was a very substantial demonstration one Saturday morning.
>
> By Mr. Morrison.
>
> Q. Do you recall how many men you had at work during those days of operation with C.F.L. labour?—A. From 35 to 45.
>
> By Mr. Hogarth.
>
> Q. This demonstration of men, do you know what brought it about?—A. I think it was to intimidate the men who were working.
>
> Q. That is your conclusion?—A. That is my conclusion.
>
> By Mr. Morrison.
>
> Q. It would be reasonable to draw the inference that there was no violence?—A. I did not say there was.
>
> Q. Held at high noon, in broad daylight?—A. Yes, and the mine not working. As a demonstration I think it was successful.
>
> Q. Let's hope it will continue to be.
>
> By Mr. Hogarth.
>
> Q. Why say it was successful?—A. I believe it influenced the men to keep them from coming back to work.
>
> Q. Was there any evidence on the part of the men to show that they desired to work?—A. There were 35 or 40 men always willing and ready to go back to work if we opened the mine for them.
>
> Q. Why did you not?—A. The feeling was high and the demonstrations indicated there would be trouble if we opened the mine, and when we did open the mine you remember the picketing when we re-opened. They just moved in. The company closed the mine in the interest of preventing trouble.
>
> Q. Did any of these men ask for police protection to enable them to go to work?—A. Oh, yes, they asked for protection.
>
> Q. Protection from what?—A. From fear of violence.

Further Frank Peverelle, employee of the Western Dominion, told us:—

> "Some men told me they would sign anything as long as they worked. Stepanski said he was afraid something might happen to him if he did not sign up. There were others. I was personally threatened three times. Several of the men said they had been threatened. I was told they would crack my head open."

The foregoing shows a flouting of the laws of the Province of Saskatchewan, wherein is provided, by section 6 of the Freedom of Trade Union Association Act, 1938, that any person who, by intimidation, by threat of loss of position or employment, by causing actual loss of position or employment or by any other threat, seeks to compel any person to join or refrain from joining a trade union, shall be guilty of an offence.

The U.M.W.A. in calling a strike in October last did so in utter disregard of the provisions of the Industrial Disputes Investigation Act, section 57 of which provides that it shall be unlawful for any employee to go on strike *prior* to or during a reference of a dispute to a board under the provisions of the Act.

A majority obtained by such methods and tactics does not impress me, and any legislation that would give power to a union employing such methods to obtain a following would be decidedly ill advised.

The U.M.W.A. is a body with head office in the United States of America, and is not a Canadian controlled union. It is well known that it is a branch of the C.I.O., an organization against which the Government of the Province of Ontario felt obliged to take a strong stand a short time ago to prevent interference with industries in that province.

The U.M.W.A. requires payment of $5 a month from each man as dues to the U.M.W.A.: $2,500 each month would therefore be taken from the wages of the men, and from the district. The only evidence of any return of this money would be $125 a month to a local secretary. The Canadian Federation of Labour requires only $1 a month as union dues from each man.

For these reasons I find myself wholly unable to agree with the recommendations of the other members of the Board that legislation be enacted in Saskatchewan to compel an employer to deal with a committee of a majority of his employees, when there may be a possibility of that majority being obtained by the use of such methods as were employed by the U.M.W.A. in Estevan, in September and October last.

I do not wish to be understood as being opposed to collective bargaining. If the men want a union they should be entitled to have a union and approach their employers with their grievances through their union. The mine inspector, Mr. Holly, when asked about the necessity of a union in the Estevan field, said he thought if they had a good committee a lot of complaints could be taken care of that way.

EIGHT HOUR DAY

A further matter in dispute is the request of the U.M.W.A. that the eight-hour day from bank to bank be strictly adhered to.

With reference to hours of labour, I would direct attention to section 4 of the Saskatchewan Coal Mines Safety and Welfare Act, which provides that a workman shall not be employed at his working place below ground in a mine for the purpose of his work for more than eight hours in any twenty-four hours, except by the mutual consent of the employee and the employer, and that no person shall be employed above ground at, or about, a mine for a longer period than eight hours in any twenty-four hours, except by the mutual consent of employer and employee.

It will be noticed that, with reference to employment below ground, the Act stipulates eight hours at *his working place,* which is different from eight hours *bank to bank.* There seems to be good reason for the provision in the Act that a man may work more than eight hours by mutual consent of him and his employer.

Coal mining in Saskatchewan is a seasonable occupation. The majority report correctly states that 70·5 per cent of the coal shipped annually is mined in the five months from October to February, and less than 29·5 per cent in the remaining seven months of the year. Sixty per cent of the men employed will have to find other work elsewhere during those seven months or remain idle. The late fall and winter months are therefore the coal miners' harvest months, when he must make as much as he can to help him through the months when there is little or no work going on in the mines.

In February, 1938, 130 men employed in the M & S mines signed an expression in writing of their willingness to work ten hours a day if necessary, at any time, in order to fill orders during the rush season. At the same time, only seven men in that mine signed a statement in writing to the effect that they did not want to work more than eight hours a day. Mr. Thomson, the manager of the M & S, told us, in the course of his evidence, that men employed in the M & S had voluntarily requested to be allowed to work longer, when necessary, and he produced figures to show that in the year 1937 the average hours of work per day throughout the year was 5·54, and the average hours of work per day for the months of September to March, both inclusive, was 8·1.

Mr. Thomson further stated, in the course of his evidence, that during the shipping season the demand for Saskatchewan lignite and M & S coal in particular, is such that sufficient cannot be produced in eight hours. He said that his reasons for this statement were that the coal cannot be mined and stored during the off or summer season, and that market conditions, and the conditions under which the coal is sold, have changed considerably during the past ten years. Where formerly large stocks were carried by dealers, now they are buying practically on a hand to mouth basis, for immediate requirements. This necessitates shipment, at the latest, the day following the receipt of order, or the business goes elsewhere to competing mines within the field, or is lost to competition.

without the field. This would only result in the tonnage being permanently lost to the field. If requirements cannot be filled when ordered during the cold weather, dealers and consumers would have to purchase substitute fuels. The final result of this would be lost earnings to the employees.

Mr. Turner, the secretary of the Western Dominion, told us that the men were always glad to work extra hours in the winter time, as the rush of business demanded, and that they knew in the ordinary course of events they would lose work in the summer time.

Mr. Turner further said there was no force or compulsion directed towards the men to work more than eight hours a day, and that they tried to work the mine to keep the hours of employment to a reasonable number.

Edward North, an employee of the Eastern Mine, called as a witness by the U.M.W.A. representative, told us it was the practice of the men to make as much as they could in the winter season.

If the eight hour day bank to bank were adhered to, the companies would have to put on sufficient men to produce the coal required to fill the orders in that time. The men would then earn less, because the amount to be earned would be distributed amongst a greater number.

In my opinion the complaint about the long hours is mostly in those mines where the miners do their own timbering and shooting. That is, they blow the coal out of the seam with charges of powder. It seems to be the practice for these men to go back in the evening for that purpose, instead of taking the time off from loading coal to do their shooting before they leave the mine for their evening meal. In such cases it seems to me the only remedy is for the company to stop them going back in the evening, or employ what is known as shot firers, on a night shift, to do the shooting. I am of the opinion that the Saskatchewan Legislature took the correct view of working hours per day when it enacted section 41 of the Coal Mines Safety and Welfare Act establishing an eight hour day, with the privilege of extending that time if the men and the operators so agree. Under the provisions of this Act, if the men want to work only eight hours a day they need not work more.

Wages

The U.M.W.A. ask for a substantial increase, in fact a very substantial increase in wages.

In view of the fact that I am unable to agree with the other members of the Board in the recommendation that wages be increased, I want it clearly understood that I am not opposed to the men getting more money, and would heartily concur in a recommendation that the wages be increased, if I thought the companies concerned were financially able to pay higher wages.

I have come to the conclusion, after careful consideration of the matter, that the companies concerned are not in a position to pay higher wages, nor can I see any hope in the near future of them being able to pay the men more money and meet their obligations and remain in business. Some of these companies are flirting with liquidation. They are carrying on their operations at a loss. Their position to-day is much the same as it was when Mr. Justice Turgeon conducted his inquiry in the fall of 1934. A thorough and complete investigation was then made into the financial position of these same companies. I cannot do better than to quote here his findings at that time. The following appears on page 22 of the report.

> The industry is in a perilous condition, and action ought to be taken to assure its survival, in the interests, not only of the various companies concerned, but of the men whom they employ, and of the consumers of Saskatchewan Lignite in this province.

Further on page 35, Mr. Justice Turgeon states:—

> But on the other hand the facts show that the companies in question have been carrying on their operations at a loss with no other prospect, in all cases save perhaps that of the Bienfait Mines, Ltd., than of closing their mines at an early date. Coal Mines cannot continue to run on indefinitely piling up losses.

Since Mr. Justice Turgeon made the above statement, one of the mines, namely, the Crescent Collieries Ltd., a party to the dispute at that time, has gone out of business.

Since this inquiry began, three of the mines, namely, Western Dominion, Bienfait No. 1, and Bienfait No. 2, have amalgamated with the Truax-Traer Coal Company Ltd., under the name of Western Dominion Coal Mines Limited, and are now operating by the strip method. The underground operations of the Western Dominion and Bienfait No. 1, have been discontinued. Bienfait, No. 2 still continues underground operations. The Truax-Traer Coal Company, not a party to the dispute, has ceased operations.

One of the other mines, a party to this investigation, namely, the Eastern Collieries, suffered a disastrous fire when their tipple was completely destroyed. The president of that mine, Mr. Wallace, appeared before us on May 16, and advised us of his loss as a result of the fire, and that he had no plans for reopening, and, under the circumstances, he did not feel that he had anything to conciliate.

The present situation is that, of the larger mines which Mr. Justice Turgeon had in mind when he made the statement quoted above,

four of them are not now in operation, three of them having passed out of the picture as underground mines since this inquiry began. How long, I wonder, will the remaining labour employing mines, namely M & S, Lignite, Baniulus Bros., and Bienfait No. 2, be able to continue if the U.M.W.A. persist in their demand for higher wages.

Financial statements were presented to us by the M & S and Baniulus Brothers. The financial statement of the M & S shows that that company is operating on a small *operating* profit, but when depreciation of equipment and depletion of coal reserves are taken into consideration, it is operating at a loss. The manager told us that the company had never in its history been able to pay a single cent in dividends to any of its shareholders.

The financial statement of Baniulus Brothers shows that their mine last year suffered an operating loss; expenditures were more than the receipts, without making any allowance for depreciation.

The manager of the Lignite Mine was not in Estevan when the Board called for information from his company, and consequently we were without any actual figures, but there is no reason to believe that the Lignite Mine is in any better shape, financially, than any of the others. In fact the mine inspector, Mr. Holly, told us that the manager, Mr. Johnston, had informed him that he intended to build a new bath house as soon as he *could afford it.* This gives us some indication that the financial position of this company cannot be strong, if it is not able to build a bath house for the accommodation of the men.

No evidence was given that the cost of management of any of the mines is too high, nor was there any evidence given before us to show wherein the operators had any hope of obtaining any increased revenue. A suggestion was made that the price of coal is too low, but there was ample evidence to show that a higher price cannot be obtained. Two retail dealers were interviewed in the City of Regina, and they both told us, definitely, that lignite coal will not stand a high price. They told us they tried to get an increase of 10 cents a ton last winter but could not do it. One of these dealers told us of an advertisement in a Regina newspaper on January 4 this year, offering Imperial Lump Lignite for $4.75 a ton delivered, and that another dealer advertised Premier Lignite Cobble at the same price. This is a definite cut of ninety cents a ton under the price other dealers were trying to retail it for. With such price cutting by retailers, it seems to me that there is no hope of the operators being able to obtain a higher price than they are now getting.

Wages can only be paid with the money realized from the sale of coal, and the money so realized depends upon the price for which coal can be sold. Estevan coal is of the lignite variety and must be offered for sale at a very attractive price, because it is a low ranking fuel, dull in colour, high in moisture and ash, and the lowest in heat content of any coal being sold in the same market. More lignite coal is required to be burned to produce the same amount of heat as the higher ranking fuels, with the result that more labour must be expended in handling it. It does not weather or store well, and disintegrates rapidly if stored. The result is a prejudice on the part of the consumer. To overcome that prejudice an attractive price seems necessary.

It must be kept in mind that the reason given by the Western Dominion and Bienfait Mines for changing their method of mining, and amalgamating with the Truax-Traer, is that the lower price realized for coal made it imperative for these companies to adopt a more economical method of mining, namely, the strip method. In other words these companies are not able to carry on the business of underground mining with the prices received for coal, and meet the demands that are made upon them. It is well known that the number of men required in the strip method of mining is a great deal less than the number required in underground mining, consequently the cost of production is less.

I listened very attentively to the evidence for some suggestion that would point the way to a better sales price, or some other source from which more revenue could be obtained by the operators, and so enable them to meet the demands of the U.M.W.A. for more wages. I have scanned the majority report for the same purpose, and I cannot find any suggestion as to how it can be done, except the suggestion that Estevan coal is selling for a lower price than it should, when compared with Alberta coal on a heat value basis. Even if that is so, it does not follow that a higher price can be obtained. Coal cannot always be sold solely on the basis of mathematical calculation of heat units. It is not sufficient simply to say that the operators should get a higher price; after all, the consumer is the man who says what he will pay. He does not have to pay a higher price just because the operators ask it. It is the consumer's privilege to buy elsewhere.

We were told by everyone who appeared before us that knew anything about coal markets and the sale of coal, that a higher price for Saskatchewan Lignite cannot be obtained. How, therefore, when the mines are facing losses and experiencing actual losses, can they pay higher wages and remain in business.

Mr. R. L. Sutherland, who gave evidence, and unquestionably qualified as an expert, has

had years of experience in the matter of marketing lignite coal. His opinions should therefore be given very serious consideration. He told us of the effect of different sales policies since 1921, and gave us his conclusions thereon. I do not think I can do better than quote what Mr. Sutherland said.

"1. 1921-1924

Production in Saskatchewan increased 42·9 per cent and average realization decreased 21·9 per cent. Production in Alberta decreased 24·9 per cent and realization decreased 16·3 per cent. *This was a period of open competition in the sale of Saskatchewan coal.*"

"2. 1925-1929

Production was practically stationary, increasing only 4·5 per cent, while average realization dropped 3·8 per cent, all in the last two years. *During this period Alberta production increased 37·8 per cent and realization dropped 12·0 per cent. During this period 82 per cent of the total tonnage, and a larger proportion of the shipped tonnage, was marketed by one sales agency.*"

"3. 1930-1932

Production increased 74·5 per cent and average realization decreased 21·9 per cent, part of which decrease was due to an increase in the proportion of smaller sizes sold. Production in Alberta decreased 31·9 per cent and realization decreased 13·4 per cent. This was a period of open competitive sales effort. The mechanized mine of the Truax-Traer Company began operations in 1930. A regrouping of the sales agencies was made in that year. The number of mines represented by the original sales agency was reduced from six to four. A second sales agency took over the sales of the coal from the mines leaving the original group and added a third mine. The Truax-Traer Company marketed its own production.

4. 1933-1934

Production was again nearly stationary, increasing only 4·0 per cent over 1932. Average realization decreased only 1·4 per cent, which was due to the increase in the proportion of smaller sizes coal. Alberta production decreased 2·4 per cent and average realization decreased 5·0 per cent. This was a period of partially controlled prices. The second sales agency operating in the preceding period dropped out. Approximately 79 per cent of the total production was sold by the two remaining sales agencies under a price and quota understanding. This period was marked by a reduction of 5·1 per cent in the output of the mines operating under the sales understanding, and an increase of 46·4 per cent in production of the smaller mines operating on a basis of unrestricted competition.

5. 1935-1937

During this period production increased 12·7 per cent and realization increased 3·6 per cent. Alberta production increased 17 per cent and realization decreased 0·8 per cent. *Control of prices in Saskatchewan was under* a Provincial Coal Administration set up by legislation resulting from the Turgeon Commission investigation of 1934.

The above analysis indicates that price control with the object of maintaining or increasing per ton realization has retarded the normal growth of the industry and, therefore, has retarded the reductions in operating costs that result from increased production. It has also encouraged the opening of new mines, further dispersing production and tending to increase operating costs. It has not been effective in preventing reductions in realization when prices were falling in competitive fields. *It also indicates that any further increase in prices, however small, will result in stagnation or actual loss of tonnage, which will react to increase cost of production and decrease employment.*

Here we have a very clear warning of what will happen if prices are increased. Coming from a man of Mr. Sutherland's knowledge and experience this warning should not go unheeded.

To assist Mr. Justice Turgeon in his inquiry, the government appointed counsel in the persons of Colonel J. A. Cross and Mr. D. A. McNiven, K.C., and, by arrangement between them, Mr. McNiven devoted his attention to questions concerning the interests of the miners, such as rates of wages, hours of labour, etc. On page 25 of Mr. Justice Turgeon's report, there is to be found the following statements:—

> All the subjects discussed during the 1931 inquiry were gone into again before me. There are two points of difference between the situation brought before Judge Wylie in 1931 and the situation as I found it: (1) the men employed in the Group mines would not have taken action at this time if they had not been faced with a reduction in wages, and (2) living and working conditions have greatly improved since the 1931 inquiry, the recommendations then made by the Commissioner appearing to have been carried out satisfactorily. Insofar as these men are concerned the general attitude in respect to wages is not that the schedules of wages are too low, but that the number of working days in the year are too few to allow them to make a fair annual living wage.
>
> Mr. McNiven, who, as I have said, acted as counsel for the mine workers, brought their case before me in a manner which seemed to cover completely and satisfactorily all the questions involved. Nineteen working men gave evidence, and each of them spoke, not only for himself, but principally as a representative of his co-workers acquainted with their views and authorized to speak for them.

On page 26 of the report Mr. McNiven is quoted as saying:—

> The wage earner concedes to his ally 'capital actually invested' the right to a fair return.

Under the guidance of the U.M.W.A. in this investigation the wage earners are silent in so far as shareholders being entitled to anything is concerned.

For the year ending May 31, 1938, the M & S paid $127,817.10 in wages, and not a single cent was available for shareholders. In that year this mine suffered a net loss of $10,944.79, and the manager told us that from an operating point of view the situation this

year is worse than last year. In the face of this evidence I cannot understand how a recommendation for an increase in wages can be justified.

Let us view for a moment some of the evidence given by the manager of the M & S as to the earnings of men employed in that mine. The following is a statement of wages paid in various occupations in the M & S for the months of November and December, 1937, and was submitted as being typical winter months:—

Occupation	November 1937	December 1937
Labourers	$ 75 32	$ 94 78
Drivers	72 73	86 16
Tracklayers	98 17	11 44
Trackhelpers	86 13	96 49
Timberers	82 98	88 00
Timberhelpers	89 43	80 03
Shotfirers	109 49	129 83
Loaders	74 25	91 01
Machinemen	108 18	123 03
Machinehelpers	90 60	109 72

The work in any one of the above classifications, with the possible exception of shotfirers and machinemen, can be done by any labourer. It does not require any particular skill.

The manager of the M & S submitted a further list of wages paid the first fifty employees on the basis of the amount earned during the calendar year, 1937, as follows:—

Position	Amount earned	Months worked
Loco. Engineer	$1,570 50	12
Engineer	1,513 30	12
Pit Boss	1,461 70	12
Mechanic	1,435 50	12
Blacksmith	1,369 75	12
Carpenter	1,361 00	12
Electrician	1,348 50	12
Machineman	1,345 80	12
Stoker	1,293 65	12
Machineman	1,222 95	12
Shotfirer	1,221 20	12
Machineman	1,217 90	12
Tracklayer	1,217 15	12
Loading Foreman	1,211 00	12
Face Boss	1,193 35	11
Tipple Operator	1,189 80	12
Machineman	1,188 90	11½
Engineer	1,178 10	12
Face Boss	1,159 85	12
Shotfirer	1,144 30	12
Brakeman	1,138 50	12
Shotfirer	1,106 00	11½
Machineman	1,093 45	11½
Pumpman	1,093 20	12
Machineman helper	1,074 75	11½
Machineman helper	1,043 95	12
Brakeman	1,024 10	12
Shotfirer	1,003 30	12
Tracklayer	1,002 85	12
Machineman helper	997 60	12
Tracklayer helper	995 05	12
Motorman	981 00	12
Weighman	981 70	12
Labourer	958 95	12
Loader	953 75	12
Motorman	951 15	11½
Loader	947 60	12
Tracklayer	946 55	12
Loader	936 15	11½
Timberer	930 35	11½
Tracklayer helper	923 15	12
Tracklayer helper	921 00	11½
Fireman	916 70	12
Timberer's helper	909 25	11
Loader	904 00	12
Trip rider	891 65	11½
Loader	882 70	11½
Hitcher Helper	880 25	12
Loader	848 65	12
Machineman helper	841 45	12

There are of course men who earn less money than that shown in the above statement, but they are men who work intermittently, or for short periods, particularly during the winter season.

I find that the men in the better organized and equipped mines who obtain employment for ten months or more do earn, and receive, wages that compare favourably with wages paid for a similar class of work elsewhere in the province, when living cost is considered.

In the matter of living cost, I would like to point out that men employed at the M & S pay from $4 to $8 a month for house rent. The houses are electrically lighted, for which of course they pay the same rates as paid in the village of Bienfait. They get their coal delivered for $1.50 a ton, as compared with $5.65 a ton for the same coal in the city of Regina.

The president of the local union of the U.M.W.A. gave evidence. He has been employed at the Western Dominion for a number of years as a machine-runner. This man for twelve months' work in 1937 earned $1,182.90, and for the same number of months in 1938 he earned $1,187.75. The absence of a transcript of the evidence makes it difficult to accurately state just what the evidence is, but my recollection is that this man pays $2.25 for a load of a ton and a half of coal delivered, and $6 a month rent for one of the Company's houses in the village of Taylorton. This man drives an automobile, and he told us that he was satisfied with the money he was making if he could earn it in what he called 'a decent day's work.'

One of the witnesses called by the U.M.W.A. told us there were a lot of automobiles around Taylorton. (Taylorton is a small village composed almost entirely of the families of men employed in the Western Dominion mine). I do not wish my remarks to be construed as suggesting that these men should not have automobiles; far from it. I am pleased to see them get all the enjoyment they can, but what I do want to point out is that if they can afford automobiles they are not suffering any hardship on account of the wages they receive.

The secretary of the local union of U.M.W.A. also gave evidence. Prior to his appointment as secretary he was employed as a machine-runner at the M & S. His earnings for the last three years were given as follows:—

1936, 12 months..	$1,418 75
1937, 12 months..	1,361 70
1938, 11¼ months..	1,163 45

He told us that he could have earned more in 1938 if he had wanted to.

While employed at the M & S this man lived in one of the company houses, for which he paid $8 a month. The house is lighted with electricity, and he has an electric washer, radio, iron and electric refrigerator. He also owns and operates a motor car, and does not seem to have suffered any hardship as a result of his employment in the mine. He told me that he took over the operating of a cutting machine, after watching it operated during one shift by his predecessor, which would lead one to the conclusion that there cannot be a great amount of skill required.

These two men to whom I have just referred were amongst the higher paid men. Those employed in the lesser occupations, such as drivers, loaders, etc., receive less money, but their earnings will compare favourably with men employed as a labouring class of work elsewhere within the province when the advantages they derive from lower living expenses, such as house rent and fuel, are taken into consideration.

There are men who earn small sums, such as $300 to $400 and upwards, but it must be kept in mind, as stated above, that these men are only employed for a short period in the year.

During the inquiry evidence was given to show that wage rates and annual earnings had been reduced during the last 10 years, but that is not a situation peculiar to the coal mining industry. There have been wage reductions in other industries, trades and occupations. The operators have been obliged to suffer a reduction in the amount for which their coal has been sold. As stated in the majority report, the realization on the sale of coal has declined steadily from $1.78 a ton in 1929, to $1.42 a ton in 1937,—a reduction of 36 cents a ton (incorrectly though unintentionally stated in the majority report as 23 cents a ton), in the revenue to the operators. While the operators have suffered this loss in realization, labour costs have dropped only 26 cents a ton during the same period.

An attempt was made to justify a demand for increased wages on the ground that the cost of living has gone up in recent years, but the evidence of a merchant in Bienfait, called as a witness by the U.M.W.A., does not support this contention. This merchant told us that the price of articles in his store is about the same as in 1934, and that $10 would buy as much now as it did five years ago.

Inequalities

Particulars of inequalities were pressed before us; some of them without foundation, and others not of sufficient importance to warrant time being taken up to deal with them. I will deal with the more important ones, as follows:—

A proper bath house should be installed in the lignite mine without delay and there should be better ventilation in this mine. The manager of this mine apparently agrees that these matters should be attended to, as a new air shaft is already under construction, and lumber is on the premises with which it is intended to construct a bath house. A special effort should be made to have this air shaft completed, and the bath house constructed before the mine opens again this fall. The law requires a bath house and it should be constructed without delay.

The living conditions at the Baniulus mine are not satisfactory. This company seems to be suffering from lack of capital, but, even so, if the management intends to continue operating a mine and employ men they should furnish them with reasonable accommodation. The chief complaint at the Baniulus Mine is the bunk house. It should be cleaned out and refurnished. The water supply is not sufficient at this mine, either for drinking or washing purposes. More strict supervision should be exercised by either the inspector of mines or by the health authorities.

The M & S, Western Dominion, and Bienfait No. 2 are to be commended for the interest they take in the welfare of their men. These mines are well equipped and well managed.

In the M & S camp there are thirty-six dwelling houses, mine office, a general store, boarding house, bath house, and a community hall 50 feet by 60 feet, kept up by the company for the use of the men and their families. There is also a two room public school in the camp under the Department of Education. All these buildings are attractively painted and there is an orderly arrangement of the buildings throughout the camp. The bath house is equipped with shower baths, and an ample supply of hot and cold water is available. There are individual lockers for the clothing of the men, and their families have the privilege of using the bath house on certain days each week. For this service the men pay $1 a month.

The Western Dominion is equipped in much the same way as the M & S.

The Bienfait No. 2 is now owned and controlled by the Western Dominion. It is, as

has been stated, a new mine. The buildings are all new. There is a splendid boarding house, and bunk house with individual rooms, and all new furnishings.

CONCLUSION

What future there is in store for the mines still operating, and the men employed therein, remains largely with the men themselves. Of the seven mines, parties to this dispute when our investigation began, only four are continuing with underground operations now. These mines when in operation produced about sixty per cent of the coal output in the province. The balance was produced by the Truax-Traer and a number of small mines. Altogether there is a total of forty-two mines in the Estevan area, of which twenty-seven are shipping mines, and fifteen are what are known as Wagon Mines. The smaller shipping mines and the wagon mines were not subject to our investigation.

Large sums of money are invested in the mines, parties to this dispute. To date in the operation of these mines those who benefited most have been the men employed. It is to be hoped there will be nothing done that will drive the remaining underground mines along the way of those that are apparently now definitely closed. If the remaining mines operating are forced to close or employ the strip method of mining, such as the Western Dominion has done, the result will not be of any benefit to those who are making demands that seem impossible for the employers to meet.

In concluding these observations, I wish to join with the other members of the Board in expressing appreciation for the assistance of Mr. C. L. Grant, representing the operators, and Mr. Patrick Conroy, representing the men. I would also add a word of appreciation for the services of Mr. Inch in the capacity of secretary to the Board. Mr. Inch discharged his duties in a very courteous and efficient manner, which was indeed appreciated.

Dated this 10th day of July, 1939.

Respectfully submitted,

(Sgd.) B. D. Hogarth,
Member of Board of Investigation and Conciliation.

To:

Honourable Norman McL. Rogers,
Minister of Labour,
Ottawa, Ontario.

I.L.O. Year Book 1938-1939

The I.L.O. Year Book 1938-39, published by the International Labour Office has recently been received. As in previous issues, the present volume sets out the outstanding events in industry and labour during the period under review, which is, in the main, the year 1938, though as far as possible mention has also been made of events in the first quarter of 1939.

A few changes have been made in the general plan of the work.

First, the former "General Introduction," which used to fall into two distinct parts, now forms the subject-matter of the first two chapters. Chapter I deals with the strictly official aspect of the International Labour Organization; it gives the changes in the membership of the Organization and the state of ratification and application of international labour Conventions and briefly mentions the work performed during the period under review by the Organization's constituent bodies, the International Labour Conference and the Governing Body of the International Labour Office. Chapter II, under the general title of "Industrial Organizations and Social Movements," describes the chief events in the life of all the bodies throughout the world which, through the aims that they pursue or the tasks that they perform, help to forward the work of the International Labour Organization: employers' and workers' organizations, private international organizations and the great religious movements.

Secondly, the former chapter on "Living Conditions," which had long been a feature of the *Year-Book* but was discontinued in last year's issue, has been revived. In addition to the three sections which used to form this chapter—"Housing," "Workers' Spare Time" and "Co-operation"—a new section on "Nutrition" has been added.

Apart from these two changes, it may be noted that the section on scientific management has been included in the chapter on "Conditions of Work," under the title "Social Aspects of Management," to emphasize the angle from which the Office approaches this question.

The *Year-Book* 1938-39 is arranged under the following chapter headings: (I) The International Labour Organization; (II) Industrial Organizations and Social Movements; (III) Economic Developments; (IV) Conditions of Work; (V) Social Insurance; (VI) Remuneration of Labour; (VII) Employment and Unemployment; (VIII) Migration; (IX) Labour Law; (X) Living Conditions; (XI) Special Problems of Certain Categories of Workers.

An appendix contains, as usual, a number of tables and the available statistics on the membership of trade union organizations.

STRIKES AND LOCKOUTS IN CANADA DURING JULY, 1939

THE following table shows the number of disputes, workers involved and time loss for July, 1939, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Numbers of employees involved	Time loss in man working days
* July, 1939	9	4,170	14,980
* June, 1939	11	2,023	8,963
July, 1938	16	1,428	9,768

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

While the number of strikes and lockouts in July was slightly lower than in June, the figures for workers involved and for time loss showed substantial increases, due chiefly to the occurrence of six strikes of coal miners in Nova Scotia which accounted for nearly 4,000 workers and nearly 12,000 days in time loss. A strike of rubber workers in Guelph, Ont., for two weeks was the only other dispute of importance. In June the important disputes included two strikes of rubber workers in Kitchener and one in Toronto, Ont., as well as a strike of coal miners in Nova Scotia. In July, 1938, strikes of hat factory workers at Guelph, Ont., lime plant workers at Blubber Bay, B.C., and restaurant employees at Toronto, Ont., accounted for two thirds of the time loss for the month.

One dispute, involving only five workers, was carried over from June and eight disputes commenced during July. Of these nine disputes, eight were terminated during the month, two resulting in favour of the employers concerned, one in favour of the workers involved, one was partially successful, the result of one was recorded as indefinite and three resulted in compromise settlements. At the end of the month, therefore, there was only one strike or lockout recorded as in progress, namely: coal miners, Stellarton, N.S.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to eight such disputes, namely: coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; lime plant workers, Blubber Bay, B.C., June 2, 1938, one employer; lithographers, London, Ont., August 31, 1938, one employer; bakers and helpers, Vancouver, B.C., November 11, 1938, one employer; dressmakers, Montreal, P.Q., January 20, 1939, one employer; and stationary engineers, Toronto, Ont., March 2, 1939, one employer.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowance for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A minor dispute on July 18 at Moncton, N.B., involving five truck drivers in a strike of a few hours, against a reduction in pay from $1.50 per hour to $1.00, has been reported in the press but particulars as to the stoppage have not yet been received. It appears that work was resumed pending negotiations between the General Workers National Union and the employer.

A stoppage of work by members of the United Garment Workers' Union in a number of sportswear manufacturing establishments in Toronto, Ont., on July 3 in connection with negotiations for new agreements has been reported in the press. The information secured by the Department is that new agreements were reached on that day and that the stoppage was to permit employees to discuss the terms under negotiation with the employers and was not the result of a dispute.

A stoppage of work at Toronto, Ont., by members of the International Ladies' Handbag, Pocketbook and Novelty Workers' Union on July 5, to ratify a new agreement with employers, has been reported in the press. The Department was informed that the stoppage was not the result of a dispute.

A dispute early in June involving lathers on one construction job in Vancouver, B.C., has been reported. It appears that young men with very little experience were employed at less than the rates of pay under the provincial minimum wage act and that following an investigation by provincial officers the proper rates were paid and qualified lathers employed.

In connection with the two strikes of rubber factory workers at Kitchener, Ont., from April 25 and May 9, respectively, to June 10, it has been reported that the charges of intimidation against sixty-seven pickets were dropped on July 17. Five others were convicted of obstructing police and were fined.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in progress prior to July

CAP FACTORY WORKERS, MONTREAL, P.Q.—Negotiations, reported in the LABOUR GAZETTE for July, resulted in a settlement providing that the dismissed workers would be placed in other shops and work was resumed on July 11. The employing firm had been reorganized.

Disputes commencing during July

COAL MINERS, SYDNEY MINES, N.S.—The miners on one shift in a colliery ceased work on July 3 in support of the demand of chain runners for contract rates of pay as a result of extra work in connection with removing coal left from the previous shift. Miners on the other shifts were affected by the stop-

STRIKES AND LOCKOUTS IN CANADA DURING JULY, 1939*

Industry, occupation and locality	Number involved		Time loss in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to July, 1939.				
MANUFACTURING—				
Textiles, Clothing, Etc.—				
Cap factory workers, Montreal, P.Q.	1	5	35	Alleged lockout of union members, commenced May 3, 1939; terminated July 10, 1939; negotiations; compromise.
(b) Strikes and Lockouts commencing during July, 1939.				
MINING, ETC.—				
Coal miners, Sydney Mines, N.S.	1	150	150	Commenced July 3; for contract instead of datal rates for five chainrunners; terminated July 4; return of workers; in favour of employer.
Coal miners, Sydney Mines, N.S.	1	150	525	Commenced July 7; for change in method of wage payment; terminated July 12; negotiations; partially successful.
Coal miners, New Waterford, N.S.	1	70	140	Commenced July 10; for extra pay for extra work following mechanical breakdown; terminated July 11; return of workers; in favour of employer.
Coal miners, Glace Bay, N.S.	1	1,150	2,300	Commenced July 18; disagreement as to sale of company house; terminated July 19; return of workers; in favour of workers.
Coal miners, Stellarton, N.S.	1	1,200	5,000	Commenced July 26; against discharge of worker; unterminated.
Coal miners, New Waterford, N.S.	1	1,100	3,300	Commenced July 27; against suspension of worker; terminated July 29; return of workers; indefinite.
MANUFACTURING—				
Rubber Products—				
Rubber factory workers, Guelph, Ont.	1	325	3,500	Commenced July 5; against reduction in wages and for recognition of union; terminated July 17; conciliation (provincial); compromise.
CONSTRUCTION—				
Highway, Etc.—				
Labourers (paving), Guelph, Ont.	1	20	10	Commenced July 25; for increased wages; terminated July 25; negotiations; compromise.

* In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

page. Work was resumed on July 5, without change in conditions.

Coal Miners, Sydney Mines, N.S.—The miners in the colliery affected by the strike on July 3 again ceased work on July 7 in support of the demand of loaders and chain runners for changes in pay for removing the coal left from the previous shift. Work was resumed on July 13 pending negotiations. Later the wages were reported to be adjusted. A number of other miners were indirectly involved so that altogether about one thousand miners were affected.

Coal Miners, New Waterford, N.S.—A number of miners in one colliery ceased work on July 10 owing to a disagreement as to the rates of pay for moving coal left in the workings as a result of the failure of an engine. The coal having been moved by other employees at day rates, work was resumed next day.

Coal Miners, Glace Bay, N.S.—Miners in one colliery ceased work on July 18 as a result of a disagreement over the purchase of a double house by a miner from the company. The company and the miner concerned agreed to cancel the sale and work was resumed after two days.

Coal Miners, Stellarton, N.S.—Miners in all of the colleries of one company ceased work on July 26 against the discharge of one worker for alleged inefficiency. The miners resumed work on July 30, pending investigation, with the understanding that the worker affected would be employed in the meantime. After one shift the miners again ceased work on July 31 because the worker had been given another job and not reinstated. At the end of the month a settlement had not been reported.

Coal Miners, New Waterford, N.S.—Miners in one colliery ceased work on July 27 against suspension of one worker as a result of a fight with an official, the miners claiming that both should have been suspended. Work was resumed after three days, pending investigation.

Rubber Factory Workers, Guelph, Ont.—Employees in one establishment ceased work on July 5 against a reduction in wages of twelve and one-half per cent, no wages to be reduced below 30 cents per hour. Owing to financial difficulties the plant had been closed for two weeks and reopened under the management of a firm of auditors. It was announced that hours per week would be raised from forty to forty-four and bonuses given to supplement wages as business improved. As a result of conciliation by an officer of the Ontario Department of Labour a settlement was reached providing for a decrease in wages of only five per cent and a closed shop agreement with a local union chartered by the American Federation of Labor, organized during the strike. The settlement was delayed for some days owing to negotiations as to the recognition of the union. The provincial auditors are to investigate the finances of the company and wages are to be adjusted later according to the results. Work was resumed on July 18 by some employees and by the others on July 19.

Labourers (Paving), Guelph, Ont.—A number of labourers, variously reported at from fifteen to thirty, ceased work on July 25, demanding an increase in wages from 30 cents to 40 cents per hour. Work was resumed after one-half day, a scale at 40 cents for shovellers and 35 cents for others being accepted. The employer reported that this was the scale intended to be paid and that there had been a misunderstanding as the men had been working only a short time.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the Labour Gazette from month to month, bringing down to date that given in the March, 1939, issue in the review of Strikes and Lockouts in Canada and Other Countries, 1938. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is taken for the most part from newspapers.

Great Britain and Northern Ireland

In Great Britain the *Ministry of Labour Gazette*, publishes statistics dealing with all strikes and gives some details of the more important ones. These details which are pub-

lished after investigation do not always agree with the information given earlier in the press.

The number of strikes which began during June was 81 and 21 were unterminated at the end of May, making a total of 102 in progress during the month, involving 39,300 workers with a resultant time loss of 130,000 man working days.

Of the 81 disputes which began during June, 22 arose out of demands for increased wages, 2 were against proposed wage reductions and 17 were over other wage questions; 2 were over questions of working hours; 25 arose out of questions respecting the employment of particular classes or persons, 6 were over questions of working conditions, and 6 were over questions of trade union principle. One dispute was due to sympathetic action.

Final settlements reached during June numbered 80. Of these, 23 were settled in favour of the workers, 35 were settled in favour of the employers and 22 resulted in compromises. In the case of 11 other disputes, work was resumed pending negotiations.

The dispute which involved the largest number of workers during June occurred in an aircraft manufacturing plant at Liverpool on June 14, when 3,734 employees ceased work in sympathy with a workman who was discharged for refusing to do work alleged to be below that of his grade. Work was resumed two days later when the workman over whom the dispute had originated was re-employed and transferred as originally proposed; it was agreed that he should resume his former duties when the urgency of the new work had been overcome.

During the month there were numerous intermittent stoppages of work in various tinplating establishments in Wales arising out of demands for increased wages for cold roll operatives. Most of these strikes were settled by the adoption of a district agreement which increased wages by introducing an output bonus. The most important of these strikes occurred at Llanelly, Gorseinon and Briton Ferry. In the last named place there was a two-day strike of workers who objected to the terms of the agreement and demanded an alternative method of increasing wages; work was resumed pending negotiations.

At Abercynon, 2,200 colliery workpeople ceased work on June 5, refusing to work with non-unionists. Work was resumed the next day when the non-unionists joined the union. A similar strike occurred at a colliery at Mountain Ash, Glamorganshire, when, 1,380 workers ceased work on June 26 for the same reason and with the same result.

At Belfast, 1,800 dockworkers refused to accept a new agreement which had been negotiated between their union and the employers' association and went on strike on June 30; 700 workers were indirectly affected. The provisions of the agreement to which the workers objected dealt with arrangements regarding "signing on" and payment for waiting time. On July 6 the men returned to work, accepting the agreement for a trial period up to October 31, 1939, subject to certain concessions by the employers in regard to waiting time and "dirty" money.

Belgium

The monthly labour review of Belgium reported 23 strikes as having begun during April, which with one unterminated at the end of March, made a total of 24 in progress, involving 13,551 workers and resulting in a time loss of 42,241 man working days. All the strikes which began during April were in the coal mining industry and with one exception they were all in protest against wage reductions. Of the 23 strikes terminated during the month only one was settled in favour of the workers, the remainder being settled in favour of the employers.

United States

Preliminary estimates of strikes in May, 1939, which as the Bureau of Labour Statistics points out, are based on "scattered information from newspaper and other sources and are subject to revision as more definite reports are received" show 235 strikes as beginning during the month, which with 140 unterminated at the end of April made a total of 375 in progress during the month. The number of workers involved in these disputes was 405,000 with a resultant time loss of 3,400,000 man working days. The comparable figures for the previous month which have been partially revised but are not final, show that there were 350 strikes in progress, involving about 410,000 workers with a resultant time loss of 5,000,000 man working days.

On July 5, the United Automobile Workers affiliated with the Congress of Industrial Organizations at Detroit called a strike of tool and die makers employed by the General Motors Corporation. The union sought a contract for these skilled workers supplemental to that which it had already secured for workers on the assembly line. Among the union demands were (1) union labels on all auto parts; (2) uniform hiring rate; (3) wage increases of at least 10 cents an hour; (4) increased rates for overtime; (5) a standard apprentice system.

While the strike began when about 800 men in one plant at Detroit ceased work, it spread rapidly until about 7,500 skilled workers at plants in Flint, Pontiac and Cleveland were directly involved. As a great part of the industry is dependent on the tool and die makers for materials about 100,000 workers,

a large part of whom were in sympathy with the strikers, were indirectly affected. Disorders occurred at Detroit, Pontiac and Cleveland.

On August 4, it was announced that a settlement had been reached by representatives of the employers and the union and the following day the terms of this settlement were agreed to by the strikers and work was resumed on August 7. While the employers stated that no general wage increase had been granted, the union claimed that since all wage scales had been adjusted to conform with those paid in the plant in which rates were highest the settlement had the effect of a general increase. The union also stated that for the first time the General Motors Corporation had signed a general wage agreement whereas previously wage rates had been subject to negotiations in individual plants and that the bargaining position of the United Automobile Workers affiliated with the C.I.O. was greatly strengthened. The workers also received concessions in regard to overtime rates.

At the time of the settlement of the strike of bituminous coal miners in the Appalachian coal fields in May (Labour Gazette, June, 1939, page 557) some employers in Kentucky refused to accept this settlement and the strike continued in certain districts of that state. Negotiations were continued throughout May, but were broken off on June 9 without an agreement conceding the demands of the United Mine Workers for a "union shop" clause in employment contracts. Picketing led to disorders, the most serious of which occurred near Harlan on July 12 when strikers attacked troops who were taking 250 arrested picketers to jail; one miner was killed and several soldiers and miners were wounded. On July 15 representatives of the employers' association and the union met at Knoxville, Tennessee, with a conciliator from the Federal Labor Department, assisting. On July 20 it was announced that an agreement had been reached which was to run until March 31, 1941. The union gave way on its demand for a "union shop" and the employers waived the "strike penalty" clause objected to by the union, agreed to drop all eviction proceedings against miners, agreed to recognize the United Mine Workers as the bargaining agent for all but certain exempted classes of employees, made certain concessions in regard to securing meeting places for the union and in regard to the settlement of disputes arising out of the collection of union dues and agreed to return strikers to employment without discrimination or prejudice as soon as possible.

CANADIAN NATIONAL RAILWAYS EMPLOYEES' BOARD OF ADJUSTMENT No. 2

Summary of Recent Decisions

REPORTS have been received of two cases settled recently by the Canadian National Railways Employees' Board of Adjustment No. 2. Outlines of previous cases were given in the Labour Gazette, April 1939, page 383, and in previous issues.

The issue of August, 1930, contained a general summary of the proceedings of the Board, covering the period from January 1, 1928, to December 31, 1929; and a similar summary of proceedings from September 1, 1925 (the date of the inception of the Board), to December 31, 1927, appeared in the issue of October, 1928, page 1060. The text of the memorandum of the agreement made between the railways and the employees concerned for the establishment of the Board, was given in these summaries.

The Canadian National Railways Employees' Board of Adjustment No. 2 was established for the purpose of disposing of outstanding grievances or disputes that might arise from the application, non-application or interpretation of the schedule of working conditions for "clerks and other classes of employees herein named," which are not adjusted between the officers of the railway and the representatives of the employees. The members of the Board are appointed for a term of one year, subject to reappointment. The Board is composed of four members selected by the management and four members selected by the representatives of the employees concerned. The decisions of the Board are binding upon the parties to the agreement. Provision was made, in the agreement constituting the Board, for the appointment of an arbitrator in any case in which the Board might be unable to agree upon an award. The ruling of the arbitrator becomes the decision of the Board.

Case No. 187 (Supplementary).—Sleeping, Dining and Parlour Car Department, Toronto District.—This was a supplementary case to one reported under the same number on page 1346 of the December, 1938, issue of the Labour Gazette, and dealt with the claim for the assignment of eight sleeping car

porters to certain trains operating between Toronto and Sioux Lookout, effective May 8, 1937.

When last reported, the case had been dismissed by the Board in view of the fact that subsequent to the submission of the claim, the Toronto-Sioux Lookout assignment was discontinued.

On representation being made to the Board that this run had been re-established on a seasonal basis with the request that the Board should render a decision on the case as submitted, the Board arranged for the parties thereto to appear and reviewed the presentations made.

The employees contended that the porters on this run were in service approximately the same hours as the porters on the long-established Toronto-Winnipeg run, and that in order to maintain a relation between similar working conditions, eight porters should be assigned to the service, and the employees on the run be compensated on that basis retroactive to May 8, 1937. The railways claimed that the terms of the employees' schedule had been fully carried out in regard to making an endeavour to reach a mutual agreement and that the seven porter assignment provided very reasonable running conditions for the employees concerned.

Having reopened the case and upon reviewing the presentations made by the parties concerned, the Board denied the claim of the employees.

Case No. 206.—Operating Department, Central Region.—This case concerned a claim submitted in September, 1938, in which it was set forth that a labourer at the rate of 42 cents an hour was performing the duties of a wheel roller and should therefore be classified as such and compensated at the wheel roller's rate of 48 cents per hour.

The employees contended that the claimant performed the work of rolling mounted wheels and was engaged on this work eight hours a day, and occasionally rolled unmounted wheels. It was further stated by the employees that the schedule does not differentiate between wheel rollers who roll unmounted wheels and those who roll mounted wheels, and that at no time had an understanding been reached between the representatives of the railway and those of the employees, that the wheel roller's rate of 48 cents per hour would only apply to men engaged to roll unmounted wheels. Therefore, the employees contended that the claimant should be paid at the rate of 48 cents per hour, retroactive to August 1, 1938, which was 45 days prior to the date upon which the claim was submitted in writing to the General Superintendent of Motive Power and Car Equipment in Toronto.

The railway in presenting its contention referred to the fact that at shops where car wheels are mounted on axles, men classified as wheel rollers, roll the unmounted wheels from the car to the boring mill or from the press to a storage plant. The handling of these unmounted wheels takes considerable strength and skill, and when the schedule was negotiated, it was agreed that the nature of the work justified a higher rate than that paid common labourers. At some shops, the volume of work is such that wheel rollers are able to handle the mounted wheels as well as the unmounted wheels, but in other shops such as London, Transcona, Port Mann and Montreal, where the volume of work is such that wheel rollers are constantly employed in handling unmounted wheels, common labourers rated at 42 cents per hour are used to roll the mounted wheels as this work does not require skill and can be performed by any ordinary labourer.

It was pointed out by the railway that the claimant was classed as a wheel roller at 48 cents per hour prior to April 1, 1938, and that effective from that date he had been reclassified as a common labourer at 42 cents per hour and has not since been required to roll any unmounted wheels. As the rolling of mounted wheels has been performed by common labour for many years the railway requested that the claim be denied.

Both parties appeared before the Board and gave oral evidence in support of their contentions and the Board in denying the claim of the employees expressed its opinion that it had not been established that the claimant was employed at the time at what is termed in the schedule as a "wheel roller."

The accidental death record for the United States in 1938, compared with the 1937 record, shows the greatest improvement ever made in a single year. There was a 10 per cent decrease. The number of non-fatal injuries and the economic loss were also reduced. The dollars-and-cents saving was around $400,000,000. The decrease in number of disabling but not fatal injuries was about 700,000.

The improvement was general in all types of accidents except those occurring in the home. There was a 19 per cent reduction in traffic deaths, a saving of more than 7,000 lives. There were 2,000 fewer occupational deaths, an 11 per cent decrease. Public accidents not involving motor vehicles claimed some 1,500 fewer lives, an 8 per cent saving.

But fatal accidents in the home increased 2 per cent. For the first time in ten years more people were killed at home than on the streets and highways, 32,500 at home against 32,000 on streets and highways.

OLD AGE AND BLIND PENSIONERS IN CANADA

Financial and Statistical Summary as at June 30, 1939

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act providing for the payment of pensions to blind persons.

Old Age Pensions

In the first of the tables appearing with this article, particulars are given dealing with operations under the Old Age Pensions Act (Revised Statutes of Canada, 1927, Chapter 156; as amended by Statutes of 1931, Chapter 42), and under the various provincial concurrent acts, as at June 30, 1939. (The text of the Old Age Pensions Act was given in the Labour Gazette for April, 1927, page 375, and the new regulations were reviewed in the issue for March, 1938, pages 286-288).

The Act made provision for the establishment of a Dominion-provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as $365 a year and who has resided in Canada for 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is $240 yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds $125 a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (Labour Gazette, May, 1937, page 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is $240 per annum. If, however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to $120. If a pensioner is unmarried, the maximum pension is reduced by the amount of his income from earnings or other sources in excess of $200 a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of $165, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $400. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $200.

Under agreements negotiated between the Dominion and the provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

Regulations governing the payment of pensions to the blind were published in the *Canada Gazette* of August 28, 1937.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

OLD AGE PENSIONS

FINANCIAL AND STATISTICAL SUMMARY OF OLD AGE PENSIONS IN CANADA AS AT JUNE 30, 1939

—	Alberta Act effective Aug. 1, 1929	British Columbia Act effective Sept. 1, 1927	Manitoba Act effective Sept. 1, 1928	New Brunswick Act effective July 1, 1936	Nova Scotia Act effective Mar. 1, 1934	Ontario Act effective Nov. 1, 1929

LABOUR AND INDUSTRY IN ONTARIO IN 1938

Nineteenth Report of the Provincial Department of Labour

A "decided improvement in industrial conditions in Ontario during the fiscal year ending March 31, 1938," is recorded in the nineteenth report of the Ontario Department of Labour. The improved situation is reflected in a general advance in the index numbers of industrial activity, the greatest gains being reported in the logging, construction and mining industries. This improvement was evident in all thirteen divisions of industry, manufacturing maintaining a high level of activity particularly in the iron and steel group.

As a result of expanding industrial activity, a decrease in the volume of unemployment among members of trade unions in the province is reported, the percentage of unemployment averaging 8·4 for the fiscal year compared with 11·4 per cent for 1937. An increase of 10·7 per cent in the value of building permits (amounting in value to $25,531,628) issued in Ontario during 1938 indicated greater activity in the building trades than in the preceding year.

The annual report, as usual, deals in detail with the administration of the following branches of the provincial Department of Labour: the Ontario Government Offices of the Employment Service of Canada; Private Employment Agencies; Factory Inspection Branch; Board of Examiners of Operating Engineers; Conciliation and Negotiation Branch; Industry and Labour Board; and the Industrial Standards, Apprenticeship and Minimum Wage Branches.

Industrial Disputes.—In an appendix to the report, the strikes and lockouts occurring in Ontario during the fiscal year are classified according to industries, the number of disputes in progress, number of employees involved, and aggregate duration in working days. A total of 127 disputes are reported with 22,749 employees involved and time loss of 294,906 working days during the year.

The report states that approximately 35 per cent of the time-loss or 102,812 working days was due to 23 strikes in the textile and clothing industry, and approximately 24 per cent, or 71,904 days, to 9 strikes in the metal products industry, which includes the automobile firms.

The report records that the settlement of 52 strikes involving 13,912 workers in a loss of 222,921 days, was effected through compromise; 37, involving 3,833 workers in a loss of 23,056 days, were settled in favour of the workers; and 25, involving 2,894 workers in a loss of 42,388 days, were settled in favour of the employers. Of the remaining strikes, 9 were indefinite in the outcome, and 4 remained unterminated at the end of the fiscal year.

Conciliation and Negotiation.—Concerning the work of the Chief Conciliation Officer and other officials of the provincial Department of Labour the report states that negotiations were conducted which resulted in the settlement of strikes involving approximately 75 per cent of the total number of workers involved in strikes in the province.

In this regard the report states that "the conciliation service has been greatly extended since the appointment of a chief conciliation officer."

Employment Service.—Dealing with the work of the Ontario Government Offices of the Employment Service of Canada, reference is made to the improvement in employment conditions during the year reviewed by the report. This improved situation resulted in an increase of 22 per cent in the number of vacancies reported to the Ontario Offices of the Employment Service of Canada, and approximately 92 per cent of them were filled. The vacancies totalled 156,506; the applications 311,188 and the placements 143,462. Approximately 70 per cent of the placements were for work of a regular nature, that is work lasting at least two weeks, as compared with 58 per cent last year. Of this total number of placements, 1,969 were handicapped ex-service men.

The current report completes the record of twenty years of service of the Ontario Offices and in that time, from 1919 to 1938, the number of placements totalled 2,867,839.

Factory Inspection.—During the year 27,425 inspections and investigations were made by the inspectors of the Composite Inspection Staff, and 5,876 orders were issued relative to various requirements of The Factory, Shop and Office Building Act. In the total number of permits issued, 4,570, there was an increase of 712 as compared with the previous year, and the number of permits in connection with homework increased 848. In 1936 the section of the Act dealing with homework was amended and it now requires all homeworkers throughout the Province, instead of only those in the larger centres, to hold permits, as well as all employers giving out this class of work and who formerly were not required to have permits. The report states that remuneration for this work is now nearer

83242—3½

factory wage rates for similar work, because of the requirement that pay for homework must be in accordance with rates set by the Industry and Labour Board.

The estimated value of buildings for which plans were approved in the Branch totalled $9,405,225 for the year, or an increase of $2,615,375 as compared with 1937. Twenty of the 292 plans, having a value of $655,600 were for new companies, which fact indicates a favourable expansion in industry in the Province.

Boiler Inspection.—In a summary of the work of the Boiler Inspection Branch the report indicates an increase in the demands for service from that branch.

The number of designs and specifications of steam boilers and other pressure vessels to be constructed for use in the province which were surveyed in the Boiler Inspection Branch totalled 418, or an increase of 135 as compared with last year. New pressure vessels which are required to be inspected during construction received 700 first inspections, 521 second and 629 final inspections, or an increase in the total of 476. Used pressure vessels being extensively repaired, sold or exchanged were given 1,310 inspections, or 269 more than in the previous year, and the number of certificates issued by the branch totalled 2,802, as compared with 2,507 in 1937.

As a result of these operations $19,599.87 was transmitted by the Boiler Inspection Branch to the Provincial Treasurer, an increase of $4,345.32 over the amount so collected in the preceding fiscal year.

Operating Engineers.—The Board of Examiners of Operating Engineers reported that 17,195 (an increase of 800 over last year) certificates were issued to engineers and firemen. During the fiscal year 2,305 candidates (661 more than in 1937) were examined. Of these 997 were examined at the Toronto office of the Board where examinations are held daily, and 1,308 were examined at outside centres, chosen for the convenience of the candidates. The net revenue for the fiscal year amounted to $29,314.14, an increase of $3,251,61.

Apprenticeship Act.—The registration of apprentices during the year totalled 665, as compared with 310 the previous year, and the active apprentices at the end of the year numbered 1,023, as compared with 518 in 1937. Examinations were held for 786 candidates, 673 of whom were engaged in the motor vehicle trade, 99 were hairdressers and 14 barbers. The certificates issued totalled 14,942, as follows: 7,633 in the motor vehicle repair trade, 3,423 in hairdressing and 3,886 in the barbering trade. Revenue on account of this work of the Department amounted to $17,132.83.

Industrial Standards.—Fifty-four official conferences were held during the year and 49 schedules were approved pursuant to The Industrial Standards Act, making a total of 56 schedules in force at the end of the fiscal year. The Board collected a total of $3,069.50 arrears of wages from 43 employers on behalf of 242 employees and the sum of $1,297.53 arrears of wages was paid direct to employees by their employers after intervention of the Board on their behalf.

In one case the sum of $52.80 arrears of wages collected for one employee was ordered forfeited to the Treasury because of evidence that the employee was equally guilty with the employer.

Minimum Wages.—The new Minimum Wage Act became effective March 25, 1937 (LABOUR GAZETTE, May, 1937, page 504) and provided for the establishment of minimum rates of wages for all employees and minimum hourly rates of wages for overtime work, provided that such hourly rates shall not be less than one-fortieth of the weekly minimum wage. The Act further provides that the maximum number of hours of labour with respect to which a minimum weekly wage is established shall not exceed,—

(*a*) 48 hours in a municipality having a population of more than 50,000;

(*b*) 50 hours in a municipality having a population of from 10,000 to 50,000;

(*c*) 54 hours in any other municipality, or in any locality which is not a municipality.

A minimum wage order covering the textile industry was issued and became effective on March 1, 1938 (LABOUR GAZETTE, March, 1938, page 292). It established the minimum wage for men at $16.00 per week and for women at $12.50, with lower rates for juveniles and beginners.

Permits are issued by the Industry and Labour Board authorizing lower wages than the specified minimum rates. These permits, issued on the signed application of the employer and employee, are issued for one year or less but renewals are granted without investigation in the case of workers over sixty years of age or where disability is permanent and handicaps the employee in the work performed.

Homework permits are issued by the Factory Inspection Branch for both employers and homeworkers, but the rates to be paid for each type of work performed outside the factory must first be approved by the Board. In every case where the same work is done in the factory, the factory rate is set for the homework. The report states that where the homework is of a kind not done in factories,

the policy of the Board is to raise the rates gradually until they reach the level of rates that would be paid if the work were performed in factories.

During the year, 18 permits were issued for handicapped workers and at the end of the year 106 permits for employees in this group were in force.

Homework permits were issued to 77 employers during the year, 107 permits were in force at the beginning of the year, 36 were cancelled during the year and 148 homework permits were in force at the end of the year.

The minimum wage orders, issued by the former Minimum Wage Board and which apply to female workers only, remain in force until replaced by orders under the new Act. During the year the sum of $21,180.18 was collected as arrears of wages from 448 firms on behalf of 646 female employees and the wages of 2,183 employees were adjusted to bring them into line with minimum wage orders.

Complaints received by the Industry and Labour Board either directly or indirectly from employees concerned or from interested parties numbered 707. All complaints where names were given were investigated and a report made to the complainant if action was not taken against the employer.

During the fiscal year adjustments of wages were effected involving 2,183 employees and 1,222 employers. There were 62 prosecutions made during the fiscal year for failing to comply with the terms of the Act. As a result 20 convictions were obtained, 32 cases were withdrawn, 8 were dismissed, in one case no judgment was given and another case was adjourned. The court ordered arrears of wages totalling $3,259.97 to be paid, and imposed fines amounting in all to $435.00 in these cases.

EMPLOYEES' THRIFT PLAN OF IMPERIAL OIL LIMITED

FROM time to time the Labour Gazette has contained reviews of various plans introduced by the Imperial Oil Company in the progressive evolution of its present industrial relations policy (Labour Gazette, January, 1937, page 49; January, 1932, page 43; April, 1925, page 347).

The latest plan introduced by the Company is *The Employees Thrift Plan.* Effective since September 1, 1938, this plan is designed to provide "a program whereby employees may secure old age protection on favourable terms, and otherwise increase their economic security."

The plan applies to all employees of the Company—employees or groups of employees of any subsidiary or affiliated company designated by their employer and accepted by the Company. The Company undertakes to establish a trust fund designated as "The Thrift Fund" administered by five trustees appointed by the Board of Directors of the Company and selected from the participants in the fund. The trustees have full and complete management and control of the fund.

Eligibility for Participation.—All employees to whom the plan applies and who were credited on September 1, 1938, with one or more years of service are eligible to participate in the plan. All other employees, to whom the plan applies, become eligible to participate on the day following their completion of one year of service. The term "employee" under the plan does not include part-time, temporary or casual employees, nor agents or salesmen on a straight commission basis except under certain circumstances.

Basis of Participation.—Any eligible employee may become a participant in the plan by authorizing the Company in writing to deduct from the amount due him for each pay period as current compensation a sum of not less than three (3) per cent nor more than thirteen (13) per cent. Within these limits the rate of contribution may be changed by the participant at the beginning of any pay period following receipt by the Company of his written authorization. Employees' rates of contribution must be in multiples of one per cent.

The amounts so deducted are paid into the fund and credited to the respective accounts of the participants. A participant in active service may suspend his contributions on written request but becomes ineligible to resume contributions for a period of six months following the date of suspension. Contributions are suspended while a participant is on the inactive list where such inactive status extends beyond thirty days and is not due to industrial accident, unless upon written request such contributions are continued with the approval of the Company in accordance with certain regulations issued by the Administrative Committee.

Concurrently with the payment of a participant's contribution the employing company pays to the further credit of the participant

a regular contribution computed on the following basis:—

If the Participant contributes	The Employing Company will contribute	Making a Total of
3%	3 %	6 %
4%	3½%	7½%
5%	4 %	9 %
6%	4½%	10½%
7%	5 %	12 %
8%	5½%	13½%
9%	6 %	15 %
10%	6½%	16½%
11%	7 %	18 %
12%	7½%	19½%
13%	8 %	21 %

It is provided in the plan that this basis of contributions

shall continue in effect as long as the total annual cost thereof together with the cost of the Company's Benefit Plan in force from time to time, lay-offs and premature retirements and all Federal and Provincial payroll taxes intended to provide old age, unemployment and other employee benefits, does not exceed 11% of the aggregate payrolls concerned. Should such total annual cost exceed 11%, the basis of regular contributions shall be revised so as to limit the future annual cost to the maximum specified herein; provided, however, that this paragraph shall not be construed to limit or deny the right of the Board to modify or terminate the Plan...

Provision is also made whereby the company and its allied companies may make additional contributions to the fund.

Use of Fund Deposits.—The utilization of the fund is provided for in two sections of the plan—i.e., purchase of group annuities and purchase of company stock.

Provision for retirement income under the plan has been made through a group annuity contract between the Company and an insurance company. For the purpose of currently purchasing group annuities it is provided that a sum of not less than the employing company's regular contribution or 4 per cent of current compensation (whichever is greater) nor more than twice the employing company's regular contribution shall be allotted currently by each participant out of his credit balance in the fund. By written authorization a participant may change his group annuity allotment. The amount designated for group annuities consists of equal amounts of employee and company regular contributions, such amounts being paid to the insurance company, thereupon ceasing to be a part of the fund or of any participant's credit balance therein.

It is also provided in the plan that all or any part of the balance remaining in the fund to the credit of a participant at the time of his retirement may be allotted by him for the purchase of immediate life annuities at the group rate for such annuities prevailing for his age at that time. For this purpose the participant's credit balance may, if he so elects, include stock purchased through the plan.

A participant may currently allot the balance or any part of deposits in his account for the purchase of shares in the capital stock of the Company. Provision is also made for the payment of dividends to the participants holding stock.

The plan, which is outlined in detail in a booklet issued by the Company, also provides for withdrawals of cash from the fund; liquidation of accounts on account of death and for causes other than death; loans from the fund to employees; fund earnings; non-assignability of funds, and the reservation of the right by the Company "to amend, modify, alter, suspend or terminate this plan in whole or part, but such action shall not have retroactive effect."

The annual report of the British Columbia Minister of Mines for the year ending December 31, 1938, shows that during 1938 employment was afforded to 2,962 persons in and about the coal mines of the province, a decrease of 191 persons compared with 1937.

During the year ten fatal accidents occurred and the ratio of fatal accidents per 1,000 persons employed was 3·37. A similar number of fatalities were reported in 1937 when the ratio of fatal accidents was 3·17 per thousand persons employed. The number of fatal accidents per 1,000,000 tons of coal produced during 1938 was 7·63.

More than 3,800 Home Improvement Loans totalling $1,619,710.19 were reported to the Department of Finance in July, according to figures released by the Honourable J. L. Ilsley, Acting Minister of Finance. This is a decided increase over the same period of 1937 and 1938.

In Ontario, an increase in the amount of loans of $748,128.70 brings the total of that Province to over $15,000,000. Quebec with an increase of $305,778.74 shows a total of $6,239,237.10 while Alberta is third for the month with an increase of $134,367.52 and a total of $2,551,939.85.

Since the inception of the Home Improvement Plan in November, 1936, and up to July 31, 1939, a total of 79,740 loans have been contracted amounting in value to $31,905,830.68.

ORGANIZATION OF LABOUR INSPECTION

Preparatory Technical Conference Held by International Labour Office

A Preparatory Technical Conference on the organization of labour inspection on industrial and commercial undertakings was held at the International Labour Office, Geneva, from May 29th to June 2nd. Represented at this conference were the following thirty-six countries: Afghanistan, United States of America, Argentine, Belgium, British Empire, Bolivia, Brazil, Chile, China, Colombia, Denmark, Egypt, Estonia, Finland, France, Hungary, India, Iraq, Ireland, Latvia, Lithuania, Luxemburg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Rumania, Sweden, Switzerland, Turkey, Union of South Africa, Uruguay, Venezuela, Yugoslavia.

The Governing Body of the I.L.O. was also represented by delegates from the three groups —Government, employers and workers.

Mr. Li Ping-Heng (China), as Government representative of the Governing Body, opened the first sitting.

The Director of the I.L.O., Mr. John G. Winant, outlined the object of the Conference, which had brought together at Geneva countries with a long history and experience of modern industrial production and those whose industrialisation was of recent date. The organisation of labour inspection services raised important administrative and technical problems. By endeavouring to place the experience of each country at the disposal of all the rest, the I.L.O. was fulfilling its duties in the sphere of international collaboration.

The Director pointed out that Legislation, whatever it might be, would remain a dead letter unless there was a properly organised system of inspection to ensure its enforcement, and this fact, which was explicitly mentioned in the Constitution of the International Labour Organisation, was yet again affirmed by the 1923 International Labour Conference when it adopted a detailed Recommendation concerning general principles for the organisation of systems of labour inspection. This Recommendation had been found a useful guide by a large number of States, and was generally agreed to have had extremely practical results.

With regard to International Labour Conventions themselves, it was well known that their effective application by ratifying States was ensured by a procedure of mutual information which was continuing. The success of this procedure largely depended on the efficient working of labour inspection in the various countries.

It was now proposed to embody in an international document containing more definite obligations than those of a mere Recommendation the main principles of effective organisation of labour inspection. With this in view, the question had been officially placed on the agenda of the 1940 International Labour Conference for the adoption of a Convention, the ratification of which by numerous countries would guarantee effective and uniform application of labour legislation in a large area of the civilised world.

The present Preparatory Technical Conference had been convened in order to express an opinion on the different provisions which such a Convention should contain.

The Conference unanimously appointed as President Mr. J. Verwaeck, Director-General of Labour Protection in the Belgian Ministry of Labour and Social Welfare. Mr. W. D. Norval (Union of South Africa) was appointed Vice-President.

The Conference proceeded to examine the points on which Governments should be consulted with a view to the future international regulations.

The first of these points dealt with the desirability of adopting regulations and the form which they should take: the desirability of adopting international regulations on labour inspection in the form of a Draft Convention —should a single Draft Convention for both industry and commerce be prepared, or two Draft Conventions for industry and commerce respectively, or, again, should a Draft Convention be prepared for industry and a Recommendation for commerce?

The Conference then dealt with the scope of the proposed international regulations, the object of labour inspection, etc.

On its second day, the Conference examined a number of points on which Governments should be consulted before the regulations were framed.

The points concerning the organisation of inspection services include: the necessity of placing these services under the direct and exclusive control of a central authority, and the necessity of associating in the work of inspection, for the purposes of enforcing the provisions concerning health and safety, duly qualified technical experts and specialists in medicine, engineering, electricity and chemistry.

Members of the inspection service should be recruited solely in the light of their qualifications for the tasks to be entrusted to them. Methods of controlling their qualifications should be fixed by national laws or regulations.

The Conference was unanimous in thinking that provision should be made to ensure the absolute impartiality of inspectors, as well as for guaranteeing independence from all outside influence.

The Conference devoted considerable attention to the question of the powers of inspectors. In this connection, Governments are to be consulted on the necessity of granting labour inspectors, provided with proper credentials, the right to enter freely at any hour any premises in undertakings subject to inspection, to interrogate the employer and the staff, and to require the production of registers and documents the keeping of which is prescribed by law, etc.

At its third session, the Conference discussed the obligations of employers and workers in relation to the labour inspectorate, the penalties to be provided for obstructing inspectors in the performance of their duties, and the obligations of labour inspectors themselves, particularly in regard to the incompatibility of their duties with any direct or indirect interest in the establishments under their supervision, as well as in relation to professional secrecy.

The Conference examined the measures to be recommended in order to maintain collaboration between the inspectorate and the employers and workers concerned, and more particularly with their occupational organisations.

A thorough discussion also took place on the methods of organising labour inspectorates in order to ensure the maximum efficiency in the enforcement of social laws, the frequency of visits to undertakings subject to supervision, and the requirement that labour inspectors or local inspectorates should submit periodical reports on the results of their work.

The Conference appointed a drafting committee, consisting of Mrs. Clara Beyer (United States of America), Mr. H. H. C. Prestige (British Empire), Mr. Perrin (France), Dr. E. Dreyer (Denmark), Dr. Ramirez Macgregor (Venezuela), and Mr. L. Wisky (Hungary). This committee prepared a draft report for the Governing Body of the International Labour Office.

On its final day the Conference unanimously adopted a report embodying the results achieved.

On the basic question before the Conference the report noted that agreement among the delegates was complete. It recalled that in 1923 a "Recommendation" on the general principles for the organisation of labour inspection services was adopted by the International Labour Conference. This Recommendation was to a great extent applied. Largely due to its influence substantial progress has been made in a number of countries, and the laws and regulations for the protection of the workers are more efficiently applied in consequence. The Conference considered that the time had come to adopt stricter international regulations on the subject in the form not merely of a Recommendation but of a Convention formally binding the States which ratified it.

When the International Labour Office has received the replies of the Governments on these various points discussed at the Conference it will use them as a basis for drawing up one or more texts for submission to the International Labour Conference in 1940, which will take the final decision.

UNEMPLOYMENT INSURANCE FOR RAILROAD EMPLOYEES IN UNITED STATES

A comprehensive review of the administration and operation of the United States Railroad Unemployment Insurance Act of 1938, which became effective on June 16, 1939, is given by Mr. Murray W. Latimer, Chairman of the Railroad Retirement Board, in the June issue of *Labor Information Bulletin* published by the United States Department of Labor. The following paragraphs have been extracted from Mr. Latimer's review:

Beginning June 16, 1939, unemployed railroad workers started registering for unemployment insurance benefits with the Railroad Retirement Board. This is in accordance with the Railroad Unemployment Insurance Act of 1938*, which provides for a national system of railroad unemployment insurance to be administered by the Board, which also administers old-age annuities for railroad workers.

A national unemployment insurance system for railroad workers is better adapted to the inter-state nature of the industry than State unemployment insurance plans. Many railroad employees in the regular course of their duties perform work in more than one State. Under the State laws, these workers when unemployed had to establish their rights to benefits in each of the States in which they worked. This meant that they had to deal simultaneously with several State unemployment-compensation agencies. The difficulties in administration and the delays in payments of benefits to unemployed railroad workers inevitable in such an arrangement will be eliminated by a single Nation-wide system.

Workers Covered.—The Railroad Unemployment Insurance Act covers, with insignificant exceptions, employees of the same group of employers as the Railroad Retirement Act of 1937. Both laws apply to employees of rail-

*This article was based on the assumption that amendments to the Railroad Unemployment Insurance Act recommended by the Board and reported favorably from committees to both Houses in the present session of Congress will be enacted into law.

roads and sleeping-car and express companies, as well as to certain companies owned or controlled directly or indirectly by such carriers. Employees of railroad employer associations and of national railway labor organizations and representatives of a few other organizations with a railroad-labor membership are also included under the law.

Qualifications for Benefits.—Not all workers covered by the Railroad Unemployment Insurance Act will, however, be entitled to benefits when they become unemployed. The law limits the payment of benefits to employees who in a preceding calendar year have earned compensation from railroad employers of at least $150. Records of the Railroad Retirement Board indicate that of about 2,000,000 workers who in 1937 received wages from employers covered by the act, more than 400,000 earned less than $150 in the railroad industry.

Waiting Period.—No railroad employee can receive unemployment benefits unless he has completed a waiting period for which benefits are not payable. The waiting period consists of a half-month or a period of 15 consecutive days, which includes at least 8 days of unemployment. The waiting period must be served within 6 months of the first day for which benefits are payable.

Amount and Duration of Benefits.—Unemployment benefits to railroad employees are calculated on a daily basis and the actual amount of the benefit ranges from $1.75 to $3.00 per day, depending upon the total railroad earnings of an employee during the calendar year used to determine his eligibility for receiving benefits.

Annual Railroad Compensation	Amount of Daily Benefit
$150.00 to $199.99	$1.75
200.00 " 474.99	2.00
475.00 " 749.99	2.25
750.00 " 1,024.99	2.50
1,025.00 " 1,299.99	2.75
1,300.00 and over	3.00

Benefits are payable to qualified employees for each day of unemployment in excess of 7 within each period of a half-month or 15 consecutive days. The maximum number of days for which a railroad worker can draw unemployment compensation in any half-month is therefore 8. During a 12-month period beginning with the first day for which benefits are paid a worker may draw benefits for a maximum of 80 days of unemployment. Unemployment compensation is therefore payable for at least 10 half-months.

A somewhat different method of calculation is outlined in the act for employees in train and engine service, such as engineers, conductors, firemen, and brakemen, whose compensation is calculated on a mileage basis. Because labour agreements generally establish for these employees a maximum number of miles an employee can run during a calendar month, they regularly have lay-off days on which they are not in fact available for employment in their usual occupations. In order to meet this situation the law provides that in any half-month in which the employee compensated on a mileage basis earned at least eight times his basic daily rate of pay he will not be eligible for unemployment benefits. If he failed to earn this minimum amount the calculation for a mileage employee is the same as for other unemployed workers.

Contributions.—The fund from which railroad unemployment benefits are to be paid will be raised beginning July 1, 1939, by a 3 per cent tax on the pay rolls of carriers covered by the act. As in the Railroad Retirement Act, monthly earnings of an employee in excess of $300 are not taxable. Railroad workers are not required to contribute to the unemployment insurance fund. One-tenth of the total amount collected each year is to be set aside to cover the cost of administering the act. The States will also transfer to the Railroad Unemployment Insurance Fund a proportionate share of the balances in their unemployment funds as of July 1, 1939.

Comparison With State Laws.—Many provisions of the Railroad Unemployment Insurance Act differ substantially from those of the State unemployment-compensation laws. The variations for the most part are due to the fact that the Railroad Unemployment Insurance Act was specifically enacted to apply to the employment and unemployment conditions peculiar to the railroad industry. For example, the operation of seniority rules tends to produce greater frequency and severity of unemployment among employees with shorter service. Because seniority rules and practices are more thoroughly established in the railroad industry than in most other industries, there is a greater concentration of unemployment among junior and lower-paid workers on the railroads. For this reason the amount of compensation payable in railroad unemployment benefits in proportion to annual earnings is considerably higher for lower-paid workers than for the better-paid groups. Thus, the lowest railroad benefit payable to workers earning between $150 and $200 a year is equivalent to about $7 a week, which is higher than the minimum weekly benefit in most States. Moreover, the total possible amount of benefits payable to an unemployed railroad worker in the lower-wage brackets is larger than under most State laws.

State Benefits to Railroad Employees.—Railroad workers are not deprived of their right to benefits under State unemployment-compensation laws which are based on wages they may have earned from nonrailroad employers covered by the State act. However, any day for which such State unemployment benefits are received cannot after July 1, 1939, be counted as a day of unemployment for benefit or waiting-period claims with the Railroad Retirement Board.

During the 3 years of operation under the national social-security system in the United States, the number of aged persons given old-age assistance has increased by 60 per cent, according to an article appearing in the July issue of the *Monthly Labor Review* published by the United States Department of Labor. Whereas in 1935, the last year under the old State systems, the sum of 65 million dollars was spent in 32 States which had this type of assistance in operation, by the end of 1938 the Federal system was nation-wide and nearly 391 million dollars were being spent annually. The immediate effect of Federal participation (1936) was nearly to triple the number of beneficiaries, while the average benefit remained almost stationary; but the next year payments per beneficiary increased nearly 20 per cent.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, JUNE, 1939

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on July 1 was 11,760, the employees on their payrolls numbering 1,126,216 persons.

(2) The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for June was 1,951, having an aggregate membership of 244,323 persons, 11·6 per cent of whom were without employment on July 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.
